ASSISTED LIVING FACILITIES: UNDERSTANDING LONG-TERM CARE OPTIONS FOR OLDER ADULTS

U.S. SENATE SPECIAL COMMITTEE ON AGING Washington, DC.

The Committee met, pursuant to notice, at 10:03 a.m., Room 106, Dirksen Senate Office Building, Hon. Robert P. Casey, Jr., Chairman of the Committee, presiding.

Present: Senator Casey, Blumenthal, Warren, Kelly, Warnock, Fetterman, Braun, Rick Scott, Vance, and Ricketts.

OPENING STATEMENT OF SENATOR ROBERT P. CASEY, JR., CHAIRMAN

The CHAIRMAN. The Senate Special Committee on Aging will come to order. As Chairman of the Aging Committee, my top priority is keeping our promises to older Americans and to Americans with disabilities.

We owe it to every older adult, every person with a disability, and their families to have the necessary information to decide when, where, and how to receive care as they age. That has motivated my advocacy, for example, for home and community-based services.

Every American who wants to receive care at home should be able to do so, and the workers providing that care must be paid, in my judgment, a living wage.

It has similarly motivated my work to ensure that nursing homes are providing safe, quality care for all of their residents. We need to address the chronic underfunding and understaffing for the state agencies that conduct nursing home oversight, so they can effectively protect the health and safety of residents. This core mission of the Aging Committee brings us to today's topic, the topic of assisted living and that landscape. It has been 20 years since this Committee held a hearing on assisted living.

With the dramatic growth of the assisted living industry in recent decades, it is long past time for Congress to reexamine this model and ensure that it is meeting our Nation's needs. The best estimates reveal that nearly one million Americans live in more than 30,000 assisted living facilities across our Nation, and that is almost certainly an undercount of that number.

Assisted living facilities are state regulated residences that support assisted living while offering help with the activities—with activities of daily living, like bathing and medication management. They also often provide meaningful engagement and activities for their residents. Assisted living was first envisioned as a social model for residents who needed lower levels of support, but today, people living in assisted living facilities are older, require more care, and have health care needs similar to that of those who reside in a nursing home, and the needs of the assisted living population change. As those needs change, we need to know that—if assisted living facilities are meeting the needs of those residents or the needs of their families. One major issue I hear a lot about is cost. Assisted living facilities are widely unaffordable to the average American and their family.

A recent survey found that 80 percent of older adults would be unable to afford, unable to afford, four years in an assisted living facility. The average annual cost is \$54,000 a year, but the costs can be substantially higher depending upon the location and the type of care that a resident requires.

The more assistance and care a resident needs, the more they pay. In some cases, residents and their families don't know the total cost until they receive their monthly bill. These substantial costs and often hidden fees make it nearly impossible for older adults and their families to accurately budget for long-term care.

Now, that is one of the reasons why I am starting today, I am asking Pennsylvanians and people across the country to share their stories and their bills with us. I want to hear from you about the true cost of assisted living and understand whether families have the information that they need to make difficult financial and health care decisions.

I am just going to hold up the—website address for those who need it. You can go to aging.senate.gov/assistedlivingbills, all one word, assistedlivingbills, to share your stories. I think it is very important that we hear from people, hear from people about their own experience as family members, as people who are paying the bill and also expecting the promises that are made when someone becomes a resident of an assisted living facility.

It is only by hearing those stories, only by hearing those—hearing about those experiences, can we bring the needed change that I know we all agree has to come. The assisted living industry is also facing the same workforce crisis that we see across other longterm care settings, and even beyond long-term care.

It is also true in the context of childcare and so many other parts of our healthcare and care landscape. Workers are often struggling to support their own families because direct care workers are paid an average of just \$15 an hour nationwide.

Workers provide a higher level of care to support residents' growing needs, especially residents with dementia, but training requirements and worker support look very different in each state.

As we will hear from our witnesses, these challenges make it harder for families to find the information that they need about assisted living facilities, including how much it will cost, the quality of the services they receive, and how safe their family member will be.

A recent Washington Post investigation found that since 2018, more than 2,000 people have left assisted living facilities unsupervised and have been left unattended outside. Tragically, 98, 98 of these 2,000 incidents have resulted in the death of the resident, and those are just the cases that have been reported.

The findings of the post investigation demonstrate how urgent it is that Congress better understand this industry. There has also been significant reporting by the New York Times and in KFF in a series written before the end of last year.

To help in our understanding, I have sent letters to three of the largest corporate owners of America's assisted living facilities. These letters request information about costs, workforce, safety, and availability of information about quality and services in assisted living facilities.

I hope these letters, or I should say the response to the letters, will improve transparency in the assisted living industry and help to inform policy solutions to address some of these concerns.

As families are making difficult decisions about where to age, they deserve to know that their loved ones are safe. I think we can all agree on that, and assisted living providers making promises they cannot keep is a violation of trust.

As we continue to increase the quality of the continuum of longterm care for older adults, it is time we prioritize efforts to improve the assisted living care option. If we say we are, as a Nation, the United States, the greatest country in the world, then we have to have the best, not second, not third, the best long-term care in the world, and we are not there yet.

Older adults and people with disabilities who call assisted living facilities home, we have to remember this is their home, their residence, where they live, where their families come to see them—if those older adults and people with disabilities are calling those facilities home, they should have quality, affordable care.

I look forward to hearing from our witnesses today, and I will turn to Ranking Member Braun for his opening statement.

OPENING STATEMENT OF SENATOR MIKE BRAUN, RANKING MEMBER

Senator BRAUN. Thank you, Chairman Casey. You know, in 2050, you think the problem is bad now, one in four Americans will be 65 years of age or older.

With an aging population that we know is coming at us, thank goodness we have hearings like this to highlight what you are going to do about it. Sometimes the market doesn't do the job. I do want to say that ideally, these things are crafted through the market and probably with states leading the way, and I say that for one big reason.

I am on the Budget Committee, and the biggest thing that challenges this place is how you would add something even further to the list of things you want to do when we are now borrowing \$1 trillion every six months instead of annually, and that has just changed over the last five years, so we have to be careful, but it still has nothing to do with a problem or an issue that is out there, and this is about highlighting who can do it best and how you get there.

Chronic workforce shortage. When I travel, visit all 92 counties in Indiana—pre-COVID, that was the number one issue, and it is about double now the number of jobs in my own State. I think it is close to 130,000. It was 65,000. Caregivers, large percentage of whom are—that assistance is given by independent contractors, you know, small business owners.

We need to figure out how to enable that, make it easier how you actually have your curriculums in various states and school systems that show the full spectrum of what jobs are out there and where the needs are.

Senator Kaine and I introduced the Jobs Act here, which allows students to use Federal Pell Grants for high quality, short term, job training programs.

That is a good Federal program. Does not add much to it. It is increasing the flexibility of how you can use it. Senators Rosen, Collins and I also introduced the Train More Nurses Act, which reviews all nursing grant programs to find ways of increasing nursing pathways.

Happy to hear some things do work well here. That passed, I think, by unanimous consent last night in the U.S. Senate, so now we got to get it over to the House to do the same thing. The Federal Government should make it easier for people to enter the health care workforce and for families to take care of their loved ones by making sure that it is energizing the people that may be interested in it and in the places they are going to probably be doing the heavy lifting.

Right now, for instance, the Biden Administration is saying one thing and actually doing another, I come from the world of small business, independent contractors, retailers, individuals that make their living out of maybe running a small business. The independent contractor rule that is out there, which would make that more difficult, could eliminate many of the existing caregiver jobs for that reason, so you got to make sure you are not wanting to do something, and then you are working at a cross purpose through another agency that will make it even more difficult. Unlike nursing homes that are regulated by both Federal and State agencies, assisted living facilities are primarily regulated by states.

To increase safety and transparency, Indiana requires staffing ratios, dementia training, and maintains a website that discloses, reports and enforcement actions. States and assisted living facilities are also working to find creative ways to use existing resources to assist seniors. Indiana is using a combination of State and Federal tools to provide more affordable assisted living to Hoosiers.

As a result, Indiana has seen affordability and quality improve. However, there is always more work to be done. Some of my colleagues may be tempted to call for a shift toward increased Federal involvement and regulation.

I would say be careful. Help us get best practices out there. Help us have an environment to get it done where it is normally done more effectively and more affordably, at lower levels of Government. I believe that states are best positioned to meet that growing need.

I am glad we here at the Federal level, this is the big microphone that has to highlight the issues, that is what we are doing here today. Thank you to all the panelists for being here, and I am interested to see what we can come up with. Thank you, Mr. Chairman. The CHAIRMAN. Thank you, Ranking Member Braun. We will next turn to our witness introductions. I am grateful for the time and the work that goes into an appearance from our witnesses.

Our first witness this morning is Ms. Patty Vessenmeyer from Gainesville, Virginia. Her first husband, John Whitney, had dementia and lived in an assisted living facility at the end of his life. She will share some of her and her husband's experiences, where she supported him in an assisted living setting.

Patty, we are grateful you are here today. Thank you. Our second witness is as Dr. Jennifer Kraft Morgan. Dr. Morgan is from Waleska, Georgia. Dr. Morgan is a Professor and Director of the Gerontology Institute at Georgia State University.

She studies issues related to long-term care dementia and the health care workforce. Thanks for being with us today, doctor. Our third witness is Julie Simpkins, and I will turn to ranking member Braun for that introduction.

Senator BRAUN. Julie Simpkins is the Co-President of Gardant Management Systems. She has been in the long-term care arena for nearly 30 years.

Ms. Simpkins focuses on affordable assisted living, and she advocates for both providers and older Americans in Gardant's 82 facilities across the country.

She leads on several state and national associations, including the Indiana Health Care Association Board of Directors and the National Center for Assisted Living Board of directors. Thank you for testifying here today.

The CHAIRMAN. Thank you, Ranking Member Braun. Our fourth and final witnesses is Richard Mollot. He is the Executive Director of the Long Term Care Community Coalition.

This coalition works to provide families with unbiased information about nursing homes, assisted living facilities, and other longterm care settings. Thanks for being with us today, and we will turn to our first witness, Patty Vessenmeyer.

STATEMENT OF PATRICIA VESSENMEYER, ADVOCATE, GAINESVILLE, VIRGINIA

Ms. VESSENMEYER. Good morning, Chairman Casey, Ranking Member Braun, and members of the Senate Special Committee on Aging.

My name is Patty Vessenmeyer and thank you for allowing me to share this testimony of my experience with assisted living for my husband, John Whitney, during his journey through the middle stage of dementia. I will focus on my experiences and observations that I believe are most relevant to your national focus.

In 2013, my husband was diagnosed with dementia with Lewy Body. Although this dementia is similar to Alzheimer's, it manifests itself a bit differently and it is important that caregivers be informed and trained to ensure the comfort, safety, and security of their patients.

Some key systems are loss of sense of smell, REM sleep behavior disorder, which causes individuals to violently act out dreams, often falling out of bed, visual hallucinations, marked fluctuations in attention and alertness, and gastrointestinal issues, including severe constipation, all of which my husband experienced. Loss of memory often occurs much later in this disease process. I took several free courses on caregiving for individuals with dementia, including a virtual reality dementia experience, which helped me to understand the challenges that people with this disorder face, and most importantly, why they become fearful and combative.

I mentioned this to provide a basis for my ability to recognize problems with care as I saw it. These same courses are offered for professionals at reasonable costs. In June 2017, when my husband's disease was progressing more rapidly, I moved to Virginia to be near family.

I cared for him alone at home until January 26th, 2018, when he attempted to strangle me in my bed. The State determined that John should be placed in a long-term care facility. I found him a room in assisted living facility in Warrenton, Virginia that specialized in memory care. He moved in the first week of March in 2018.

I provided the management team with John's history, his diagnosis, and disease progression. The following is a list of issues that I observed in the Memory Care Unit during my daily visits with John. Poor facility design. There were blocks of rooms built around a large central room for group activities and TV.

The central room was extremely loud and high levels of noise can easily agitate dementia patients. Activity stations were set up for residents. One of these had various lengths of PVC pipe, not kidding, some longer than a baseball bat. These were weapons in waiting and you can guess what happened.

There was no quiet area for the residents other than their rooms. The hallways in the room blocks were isolated, making it difficult for staff to monitor. There were many incidents that I witnessed when there were no staff around. I will share one that I feel was very important.

A woman fell by tripping on a raised area on the floor where the rug abutted the hard flooring. Nobody saw her fall. I found her bloody and staggering down the hallway. A company knowledgeable about dementia care would not design a facility this way. They would certainly understand that people with dementia have problems with gait and balance, and do understand, there were video cameras in place, but they only used them for reviewing incidents after the fact. They were understaffed. Too many patients were assigned to each caregiver. In the morning, each caregiver needed to give their assigned residence—get them up and dressed and ready for breakfast.

Everybody ate at the same time, putting additional pressure on the staff. They only gave residents a shower when necessary, as they were always pressed for time. Caregivers needed extra time to spend on residents in more advanced—sorry, stages of dementia, as they required help to move from their bed to a wheelchair and be hand fed.

After lunch, the caregivers would place most of the resident in chairs in the main room while they worked getting the advanced stage patients back into their beds. Every day after lunch, my husband urgently needed to empty his bowels.

Several times when I was there, I tried to help him, but it was difficult for me as I had had a broken arm at the time. I could not find anybody, so I did the best I could, and often when I was not there, he soiled himself while waiting for help.

I once believe I saved a man's life. I was with my husband in a room off the main activity area. I heard someone crying for help. I ran into the hallway and found an old man on the floor, trying to protect himself from being beaten with his own cane by another resident.

I called for help, quickly moving closer and redirecting the attacker's attention. I kept him busy while calmly calling for assistance, trying not to further agitate him. It took several minutes before a staff member finally heard me and came to help.

Night was no better as staff levels were lower as allowed by state regulations. They placed residents who had trouble sleeping in front of a TV while they dealt with other residents. Inadequate staff training.

Most of their caregivers staff were trained as nurse's aides, but nothing specific to memory care that I could see. I witnessed them providing new hires dementia training care in a conference room.

This consisted of a member of the management team showing them parts of Glen Campbell Zombie movie and pointing out some behaviors that demonstrated his dementia problems. I saw that movie and it was not appropriate for training purposes.

I observed several instances where caregivers and nurses displayed limited knowledge of working with dementia patients, particularly those in mid-stage of the disease, who became more fearful and combative.

Some examples: Nurses running toward the patient, causing the resident to become combative. Quick, erratic hand movements frightening the individual, and another example, the TV was on at 9:30 p.m. with extremely high volume. Several residents were seated in chairs and wheelchairs in front of the TV.

Anyone who understands dementia and sundowning would never do this. They were overstimulating these residents instead of allowing them to relax and quiet their minds for sleep, and finally, at one point, the director of this facility told me to spend less time there and let them do their jobs.

Well, I could not abide because I felt they weren't doing their jobs. In closing, unless things change, I could never recommend using this type of facility for a loved one unless things improve. I am hoping that you found my testimony helpful, and the Committee will find a way to set some national standards for appropriate levels of staffing and training for that staff.

This would be a huge step in improving assisted living. Thank you for your time.

The CHAIRMAN. Thank you very much, Ms. Vessenmeyer. I appreciate your testimony.

Dr. Morgan.

STATEMENT OF JENNIFER CRAFT MORGAN, PH.D., DIRECTOR AND PROFESSOR, THE GERONTOLOGY INSTITUTE, GEORGIA STATE UNIVERSITY, WALESKA, GEORGIA

Dr. MORGAN. Good morning, Chairman Casey, Ranking Member Braun, and the members of the Committee. I am honored and delighted to be here. Thank you, Patty, for sharing that story. Assisted living is a large and growing long-term care residential option for individuals who need or want additional supports for activities of daily living.

There are approximately 30,600 AL communities in the U.S., with approximately 820,000 residents employing about 500,000 workers. AL, often seen by the public as interchangeable with skilled nursing homes, was built and is regulated as a social model of care. This community-based care is less restrictive and strives to be home like.

AL residents vary greatly in the amount of care they need from person to person. Rising acuity levels do mean that as residents age in place, they likely require more health services. While these services could overlay AL services, much like they would if the person was needing—needing care was at home, these are not provided directly by the AL communities.

The haphazard growth of this model and the tensions between social care and health care inherent have spurred calls by scholars for assisted living to be reimagined. Most AL residents need help with medications, and more than half need help with three or more activities of daily living.

AL residents depend on their care networks. The constellation of kin and non-kin involved in residents' lives to arrange medical care, to provide social support, to coordinate care, to engage residents, and activities, and bring needed supplies.

These care works also play an important role in advocating for residents and negotiating care with AL staff. About 42 percent of AL residents have a dementia diagnosis, but we can assume this is underreported as many older adults are not screened, tested, or diagnosed with dementia, despite showing symptoms and memory thinking or making decisions that impact everyday life.

Like all people with chronic disease, people living with dementia have good days and bad days. Person centered dementia care is needed to tailor care and support to individuals in ways that account for preferences, life experiences, communication styles, and support needs that change over time.

According to MCAL, the average monthly cost of AL is \$4,500. As such, AL is inaccessible to most Americans. Yet on the spectrum of long-term care, it is often needed. Seen as a step between unpaid care by loved ones and nursing home care, AL provides an a very important long-term care option.

When the care of NE care needs of a loved one exceeds the capacity of their care network, the person and their care network is forced to navigate with little support or education, a variety of options, none of which are usually covered by health insurance.

If they have significant financial resources, AL is a useful and attractive option. If not, managing the care situation means they care partners reduce working hours, build precarious care or financial arrangements across families, hire piecemeal personal care support, or simply cross their fingers and hope that it all works out.

Sixty-six percent of the AL workforce are aides or direct care workers. Direct care workers in AL and across long-term care are predominantly women, people of color, and disproportionately immigrants. The typical direct care worker, a Senator Casey said, makes about \$15 an hour, works 36 hours a week in assisted living, and works for a for profit company.

AL workers, like most direct care workers, tend to go into this line of work to give back, to make a difference because they value elders or because it is a calling for them. Unfortunately, the system we have set up works against them.

Direct care workers in long-term care settings experience low wages, few benefits, heavy workloads, dangerous jobs, and little to no career mobility. In her book, Disrupting the Status Quo of Senior Living. A Mindshift, Jill Vitale-Aussem lays out what I think is the crux of the problems facing senior living.

AL is marketed to those who can afford it with a hospitality mindset. They advertise and compete on the basis of beautiful campuses, luxury food and furnishings, and concierge services. This model encourages residents and families to think about this next step as though they are going to a hotel or a resort.

This framing, where residents are guests and staff are encouraged to cater to their whims, increases what Dr. Bill Thomas of the Eden Alternative calls the three plagues of long-term care, helplessness, boredom, and loneliness. By encouraging passivity, we leave residents with few opportunities for giving back or creative pursuits.

Instead, long-term care that is person centered, community minded, and empowering for residents, staff, and care partners has a much better chance of success.

My recommendations include improve and standardize initial continuing education training—initial and continuing education training for direct care workers and all staff in assisted living. Professionalize the direct care workforce.

Incentivize and reward good employers who deliver high quality care. Increase access to assisted living. Improve care coordination and resources for people living with dementia and their care partners, and support standardization of monitoring and resources to increase state-based oversight and transparency. Thank you.

The CHAIRMAN. Thank you, doctor, very much for your testimony. Ms. Simpkins, you may begin.

STATEMENT OF JULIE SIMPKINS, CO-PRESIDENT, GARDANT MANAGEMENT SOLUTIONS, INDIANAPOLIS, INDIANA

Ms. SIMPKINS. Thank you. Chairman Casey, Ranking

Member Braun, and members of the U.S. Senate Special Committee on Aging, thank you for inviting me here today to be part of this important discussion on assisted living, a topic that is very near to my heart.

My name is Julie Simpkins, and I am the Co-President of Gardant Management Solutions. We are a provider that develops and operates senior living, assisted living, and memory care communities.

We are the fifth largest assisted living provider in the country and have communities in five states, Illinois, Indiana, Ohio, Maryland, and West Virginia. I have dedicated most of my life to senior living, with over 30 years to the assisted living sector.

This is my calling, and I would like to speak with you today about Gardant's unique model, as we share thoughts and how we can work together on important issues facing those who need and work in assisted living.

Gardant is uniquely focused on offering affordable assisted living to low-income seniors. Our company was founded in 1999 after the creation of the Illinois Supportive Living Program, which is a home and community-based waiver program.

Now, as we expanded into four other states, our commitment to serving this population remains. Many residents living in Gardant communities rely on Medicaid for their assisted living care through these waiver programs.

Gardant has been limited in where we can offer our services due to the variability with state Medicaid waiver programs. It depends on the availability of state programs, of state reimbursement levels, and the number of available waiver spots.

Offering affordable assisted living exclusively or even for a majority of residents like Gardant requires an entirely different business model altogether. We have had to persistently seek out HUD loans and income tax credits to stay viable.

Therefore, we support efforts to make long-term care, including assisted living, more affordable to low and middle income individuals. With a rapidly growing elderly population, we need a public and private partnership to incentivize more providers to develop these models.

When we talk about assisted living, it is important to note that every state, every community, and every resident is different. Efforts to standardize all assisted living communities would be both unworkable and irresponsible for resident care.

State regulations recognize the diversity within assisted living by holding our profession accountable, and they are consistently updated to reflect the evolving nature of our sector and our residents.

Meanwhile, Gardant is committed to exceeding the state requirements when we believe it is in the best interest of our residents. We will take memory care as an example and something that is top of mind for this Committee, as well as our residents and family. Every staff member at Gardant's memory care communities receive education and training in dementia related diseases, as well as training as a certified dementia practitioner.

While elopements are rare, we all report to the state immediately, even something as technical as a resident walking out the door instantly returning with a staff member. We know they didn't leave our community and our staff immediately addressed the situation, but we still reported.

The recent reports of resident elopements that were ultimately fatal are heartbreaking, and my thoughts and prayers go out to the loved ones of those residents. I serve in leadership positions on numerous national organizations dedicated to long-term care, and I know these tragic incidents are extremely rare and not indicative of the assisted living experience.

The overwhelming majority of families and residents have a life affirming, safe experience. Assisted living providers are committed to upholding our policies and procedures, as well as continuing to learn all that we can about dementia care to prevent these incidents. It is critical that policies and regulations help protect residents while still supporting their freedom of movement and independence.

Assisted living is a critical aspect of the long-term care continuum and dedicated to delivering person centered care to our Nation's seniors. We need collaborative, comprehensive solutions that ensure our ability as assisted living communities to continue doing what we do best, providing safe, quality care to our residents.

From expanding more affordable long-term care options, to workforce programs, to addressing the growing caregiver shortages, these efforts could make a real difference.

We must all work together to ensure current and future assisting living resident is seen, safe, and served to enjoy the highest quality of life possible.

Thank you for your time and I look forward to answering your questions today.

The CHAIRMAN. Thank you, Ms. Simpkins, for your testimony, and we will turn to our fourth and final witness, Mr. Mollot.

STATEMENT OF RICHARD MOLLOT, EXECUTIVE DIRECTOR, LONG TERM CARE COMMUNITY COALITION, NEW YORK CITY, NEW YORK

Mr. MOLLOT. Good morning, Chairman Casey, Ranking Member Braun, and members of the Committee. Thank you for inviting me to testify today on this important issue.

My name is Richard Mollot, and I am the Executive Director of the Long Term Care Community Coalition. LTCCC is a national, nonprofit, nonpartisan organization dedicated to improving care and quality of life for residents in nursing homes and assisted living.

ing. We conduct research on long-term care policies and the extent to which essential standards of care are realized in the lives of residents who are typically elderly and frail. In addition to conducting analysis and advocacy, we educate and engage residents, families, and those who work with them so that they are aware of their rights and are equipped to overcome the challenges that so many of our seniors face when they need residential care.

Our interest in assisted living is long standing, and we appreciate your commitments to ensuring that the promise of assisted living is realized in the lives of our growing senior population. Assisted living emerged in the 1980's as an alternate to nursing

Assisted living emerged in the 1980's as an alternate to nursing homes for seniors who want or need to live in a congregate setting where they can get help with tasks like housekeeping, meal preparation, and access to activities and transportation.

Over the last 40 years, three developments have drastically changed the nature and character of the assisted living sector, with both positive and negative implications. They are one, the needs and frailty of assisted living residents have dramatically increased.

Two, assisted living operators have adopted increasingly sophisticated and large scale corporate models, including ownership by real estate investment trusts, private equity, and other sophisticated private investment structures, and three, public payment for and Government interest in assisted living has increased significantly. Assisted living facilities now care for people who in many ways have the same needs and vulnerabilities as nursing home residents.

Assisted living residents are actually older on average and those in nursing homes. Approximately 40 to 70 percent of assisted living residents have Alzheimer's disease or some other cognitive impairment. Over half have hypertension.

One third or more have heart disease or depression. About half need help with dressing and, or walking, and two thirds need help with bathing. Over 10 percent of residents with dementia receive antipsychotic drugs.

Unfortunately, we as a country have failed to keep up with these trends. While some assisted living can be wonderful places to live and to work, too many take in or retain residents for whom they are unable to provide safe care and dignified living conditions. Too many residents and families are at risk for financial exploitation and even fraud.

Too many seniors and families get taken in by promises of "memory care" and aging in place, when in fact these are more often marketing terms than accurate representations of specialized care.

The absence of any Federal quality of safety standards, coupled with the virtual absence of reliable public information on the quality, safety, and cost of assisted living, have made assisted living a sector ripe for investment by sophisticated private enterprises who can shuffle around resources and take profits, with little regard for the promises made to seniors and their family.

These problems occur at every economic level, from \$50,000 a month or more paid to luxury assisted living, to the 20 percent of seniors who access assisted living through public funds like Medicaid waivers. It doesn't have to be this way.

Forty years ago, when nursing homes were in crisis, Congress took action. From numerous GAO reports to the growing chorus of local and national news reports of neglect, disastrous "elopement," and financial shenanigans, it is clear that we have reached that point now with assisted living.

We recommend three things. One, establish and implement national standards to promote quality, safety, and integrity in assisted living. Two, establish a national assisted living data base with information and metrics that the public needs to evaluate both costs and quality, and three, promote resident and family engagement to ensure that assisted living is truly a home and community-based service.

As I mentioned earlier, assisted living experiences can range from positive to alarming, posing potential risks and exploitation. I think that we can all agree that the lives of seniors should not be left to chance, ambiguity, and insecurity. Thank you again for inviting me to testify today.

The CHAIRMAN. Thanks very much for your testimony, and I will begin the first-round of questions, but I want to note for the record, we have Senators that are in and out because Thursday is a pretty busy hearing morning, and so, we will have Senators come here. Some will be here and then ask questions, and folks will be appearing intermittently throughout the hearing, but so far, I know that Senator Rick Scott was here, and Senator Blumenthal was here, and we will be awaiting others after my questions and those of the ranking member.

I wanted to start with you, Patty Vessenmeyer, about your own experience, and I want to start by saying how much I appreciate— I know the Committee appreciates your willingness to share a personal story.

That happens in hearings like this on a pretty regular basis, where an individual comes forward and talks about their own experience or that of their family, and from a distance it might seem easy, but I can't imagine how difficult it is to recount difficult, painful moments and doing it in the interest, of course, of helping others, so we are grateful for your willingness to do that, and telling your story is a very important part of the work we are trying to do together. I know that your husband was in an assisted living facility, and you were, as you indicated, paying privately for those services to make sure that he would get the care that he needed for dementia.

I know I have heard from my own constituents back home similar stories. For example, Angela, who is a constituent of mine from Johnstown, Pennsylvania, Cambria County, out in the Southwestern region of our State. She wrote to me and said that her father was in one facility that charged \$7,200 a month.

I know that is not the average. It is very high. That works out to about \$90,000 bucks a year, and Angela shared, and I am quoting her here, "there was always a sense that no one cared for the residents beyond their monthly payments." That is one experience and that is one person's personal experience.

Ms. Vessenmeyer, I wanted to ask, based upon your experience with your husband, did the facilities he lived in deliver on the care that they promised to provide?

that they promised to provide? Ms. VESSENMEYER. Thank you, Senator. Thank you for appreciating me coming and doing this, and I think the good news is it has been six years, and I am able to do it without getting overly emotional.

No, they did not deliver. They definitely over promised, and understand that they were absolutely a memory care facility, specialized in it, and knew what they were doing. His basic needs were not often met.

You could hear from some of the examples that I gave, and I observed other people the same way. They would actually recommend that you pay an additional private caregiver to come in to give them the care they really should have gotten, but their staff was just—there just wasn't enough staff for them to get it done, and do understand that their staff was friendly and caring and they were wonderful people who were not trained, and they were just overwhelmed, but they definitely did not deliver, and by the way, it did come out of my pocket because my husband had chosen not to do long care insurance, and that number that the woman gave you was low. That was my starting figure, was \$7,900. It cost me closer to \$13,000 a month.

The CHAIRMAN. We are grateful for you sharing your own story, your own experience.

I wanted to, next turn to Richard Mollot, you mentioned the need for more substantive and meaningful ways for residents who might choose a particular facility or their families to know which services they receive, how much those services cost, the outcomes for residents living in a specific assisted living facility. For a family searching for care—and we hear about this all the time.

I am not sure there is—doubt there is anyone in this room who doesn't know someone who has had the experience of having to search for care and to try to navigate it. It is obviously difficult to find the information that folks need about assisted living facilities, and sometimes they only have the word of an assisted living provider, or maybe someone else who has had their own experience they can rely upon.

Can you elaborate more on the challenges that families have in finding both accurate information and unbiased information about services, about costs, about care outcomes for residents in assisted living facilities?

Mr. MOLLOT. Thank you. Essentially, there is no independent, validated information on assisted living for the consumers, for policymakers, or for the general public, so families, as you noted, have to rely on facilities and facility marketing materials. They also quite often rely on companies like A Place for Mom and the other so-called consumer resources, excuse me, that are not independent of the industry.

Companies like caring.com, A Place for Mom, that actually get money for—from facilities to be listed, so that is not independent either. That is not something that people can rely on as being necessarily an accurate information of what has happened, what they are going to pay for, and what they are going to get, and the state websites really are the last resource, and they tend to be very flimsy. I haven't looked at every single one, but the ones—

The CHAIRMAN. They tend to be, you said?

Mr. MOLLOT. Very flimsy, I am sorry.

The CHAIRMAN. Flimsy. Ókay.

Mr. MOLLOT. Yes. Most often what we will see is they just list the facility. They may list the facility's administrator, their phone number, and the address. Sometimes there is a little bit of information, but you cannot, in my experience, ever get into finding out really what has—what the staffing is, what the costs are going to be, or what the quality has been and any issues.

The CHAIRMAN. I know that in your—going back to your testimony, you mentioned the three recommendations. The first one was, establish and implement national standards to promote quality, safety, and integrity in assisted living. The second was establish a national assisted living data base. Is that what you are referring to?

Mr. MOLLOT. Yes. Yes. Similar to care compare—you know, there is nursing home care compare, home health care compare, hospital care compare on the Medicaid website. There should be an assisted living compare.

The CHAIRMAN. Well, I think—and look, I think it is pretty fundamental that people should have the opportunity to place reliance upon a source that is objective, and to use your word, independent.

That is, I think that is true in any walk of life. Why would someone only—why should we settle for just relying upon assertions by those who are operating facilities? I think that is pretty elementary, but we haven't reached that point yet in terms of a change in policy. I know I am over time, but I will turn to our Ranking Member, Ranking Member Braun.

Senator BRAUN. Thank you, Mr. Chairman. I want to start, first I want to ask Ms. Simpkins a question, but that idea of transparency and information, to me, I don't know how you could say that wouldn't be good.

I have been a proponent since I have been here that this place out of focus as much on that as anything, because we are a portal of information that if you collate it properly, that would seem to make sense.

I think that goes across the spectrum of health care as well. I have been the most vocal Senator that our health care system is broken. We do not have transparency. We do not have competition. It is kind of almost like an unregulated utility, and you get your bill at the—after you had a significant health care scrape or a bad accident. You got to hold your breath to see how much it is going to cost, or you can afford it. I like that idea.

Ms. Vessenmeyer, you mentioned that it was \$7,200 a month and it could have been more, and that is in Virginia, correct? Is that where the—

Ms. VESSENMEYER. Yes, but that isn't the number that I gave you. That his room charge was \$7,800 to—actually \$7,900 to start, and it cost me close to \$13,000 a month.

Senator BRAUN. \$13,000 a month, okay.

Ms. VESSENMEYER. That is correct.

Senator BRAUN. That sounds unaffordable, so.

Ms. VESSENMEYER. If he hadn't passed away rather quickly by the time—the length of time he was in there, it would have used up all of my nest egg.

up all of my nest egg. Senator BRAUN. That is the kind of stuff I have been appalled by from the time I took on health care reform in my own business 15, 16 years ago.

How lucky the industry would tell you it is only going up five to ten percent each year, you know, in your health care premiums. Sooner or later, people can't afford it and that has got—something has got to give.

I was noticing in your background, Ms. Simpkins, you focus on low-income because some people are going to be able to afford it despite the quality of care and the level, but most people will not.

In Indiana and the four other states where you operate, what would that range be per month as you would compare it to \$7,000 to \$13,000 bucks a month, and it seems like when it was all in, it was closer to that higher figure. Just curious.

Ms. SIMPKINS. Yes. Thank you, Ranking Member Braun, and the range that a resident or resident family would pay under the home and community-based services is really nothing. In Illinois, there is a small personal portion.

It is based on resident income and allowing them to do things and still have money in their pocket. In Indiana, there is no personal portion, so the State of Indiana will pay for those services through the State.

Senator BRAUN. In your facilities, for low-income individuals, there is basically very little out of pocket?

Ms. SIMPKINS. There is very little out of pocket. There might be some personal portion based on what they actually receive in income, but it doesn't go over what anything a Social Security amount is.

Senator BRAUN. How much would you be able to generalize that across the rest of the country?

Ms. SIMPKINS. To model that program? Oh, you can model the program.

Senator BRAUN. Are other states doing that?

Ms. SIMPKINS. There are other states that are doing it. Now, I will say that Illinois supportive living program and Indiana are probably—and Ohio are doing it really well, recognizing that there is a need within their State, there is an underserved population. There are people that cannot afford it, and so, that is what we were founded for. That is our business model is to say there is an unmet need and how are we going to do it, and we work with states that have the programs, Medicaid waiver programs in place along with rate reimbursement that makes sense.

Senator BRAUN. Mrs. Vessenmeyer, you would not have qualified for any low-income opportunities then. Is that what kept you in that, what seems to be outrageous in terms of the cost per month?

Ms. VESSENMEYER. That is correct, because even though we were both retired, they look at all of your savings, and if you have a decent IRA out there, that counts.

Senator BRAUN. It begs the question then, is the low-income stratum across the country being served adequately?

That almost would seem to be surprising to me if that were the case, but what we are seeing on the other side, and then it is a question, there just wouldn't be many families that could afford it, and you know, I don't know what the criteria or the cutoff is. Can you fill me in a little bit? It sounds like in Indiana, especially if there were other options to choose from other than just your organization, that the low to maybe middle income strata are being served well. Is that a fair statement or not?

Ms. SIMPKINS. That is a fair statement, Ranking Member Braun. Senator BRAUN. Do you think that is the case across the country as well as you know, because you serve on some boards that where I think you would have that information.

Ms. SIMPKINS. It is not across the country. Nationally, there needs to be programs in each state to—to provide access to affordable assisted living, and they are not all there yet.

Senator BRAUN. Generally—and that is at least a little bit surprising, and generally, it is a folks at the other end of the spectrum, the low and middle, especially low, that don't get adequate services.

I think that is something that you need to get those practices spread out to where we at least can get that in most other states, and then you got to tackle something like this, that I don't know how wealthy you would have to be to be able to afford that easily and for a long time.

Something has got to give there. I will rest with that right now, and I will have another round of questions if we do it.

The CHAIRMAN. Thank you, Ranking member Braun. We turn next to Senator Kelly.

Senator KELLY. Thank you, Mr. Chairman, and thanks to all our witnesses for being here today. Mr. Mollot, the Arizona Republic, the paper of record in my State, published a series of investigative reports last year about the State of long-term care facilities in Arizona, and these journalists spent more than a year on this investigation. They reviewed police reports. They reviewed footage in some facilities. They analyzed regulatory reports from the State, and they interviewed families and experts, and what they found was, I think it is fair to say, horrifying. They reported graphic stories of a resident dying after being attacked by a roommate who hadn't received her medication in time.

Another report of an assisted living resident being sexually assaulted by another resident, and incidents of violence among residents that often aren't reported because they aren't required to be reported under state law, and they highlighted the failure of state agencies to investigate these cases in a coherent, transparent way that would allow families looking for a safe place for their loved one to know what really goes on in these facilities, and I think a lot of us knew there were issues in the system. We knew that.

I don't think we knew how bad it was. Since these articles were published, Arizona's Governor has put together a strong legislative package to standardize inspections, promote transparency for residents and their families, and empower our adult protective services to investigate, and the State legislature is looking at proposals. Mr. Mollot, are these the type of steps that can help tackle these issues?

Mr. MOLLOT. I believe so. I mean, of course it all—the details matter. This is a very nuanced issues about caring for people with dementia and ensuring that that things are reported appropriately and that there is good oversight.

As much as possible, we would hope that the State would be looking to implement policies and practices that prevent bad things from happening, as well as, of course, ensuring that when they do happen that they are rectified and that they are reported appropriately.

Senator KELLY. Arizona can't be the only State that is facing these challenges.

Mr. MOLLOT. Not at all.

Senator KELLY. Should the Federal Government maybe consider having a role here and providing oversight for assisted living facilities?

Mr. MOLLOT. I think it is time for the Federal Government to step in. As I mentioned in my testimony, 40 years ago when nursing homes were in crisis, Congress stepped in. Congress took that, you know, initiated action, and we are here now with assisted living as well. The same population in terms of numbers of people are in assisted living as they are in nursing homes, but we don't know what is happening to them.

We don't know the care they are receiving. A lot of it is private pay, not all of it, but there is unfortunately a lot of fraud.

Senator KELLY. Apparently, more than 20 years ago, this Committee helped to facilitate the creation of an assisted living work group, which was made up of 50 organizations, and this work group was tasked with coming up with recommendations for best practices in assisted living facilities to ensure a more consistent quality landscape across states.

The result was a 380 page report with a lot of recommendations, and these were hard to agree upon. Mr. Mollot, what has happened with these recommendations since this report was finished, if you are familiar with it?

Mr. MOLLOT. I haven't read it in a long time, but I am familiar with it. Frankly, on the Federal level, nothing has happened.

As Ms. Simpkins said, we do see some things going on in the states, but it is—generally speaking, the states are just not inclined, frankly, to take action on a lot of the work that they do.

Hopefully they will be different in Arizona, but it really is time, I believe, for the Federal Government to step in to ensure that wherever someone accesses dementia care, that means something. It is not just a term of art, and wherever they go for safety, they know that they can live safely, and wherever they are going into, they know what the expenses are going to be, that they are cognizable.

Senator KELLY. Well, thank you. I do want to note for my constituents a resource created by AARP Arizona and by the Arizona Republic following this investigative series that I mentioned. It is a backgrounder on long-term care, the definition—definitions of different terms, what family should look for, and what questions to ask, and folks can find this on the AARP Arizona website, and my office will be posting this on our social media accounts, and I am going to submit this for the record as well, Mr. Chairman, and I urge Arizonans or anybody else interested to check it out, and thank you.

The CHAIRMAN. Thank you, Senator Kelly. That will be submitted—accepted for the record, not just submitted.

Thanks very much. We will turn next to Senator Vance.

Senator VANCE. Thank you, Mr. Chairman. Thanks to you and the ranking member for hosting the Committee hearing today, and welcome to our witnesses. Thank you for being here, and welcome to all of our guests.

I want to direct my questions to you, Ms. Simpkins, and I appreciate you being here. I am particularly concerned by some of the estimates that I have seen about labor shortages at our long-term care facilities.

Not just now. I know there is sort of an immediate problem of not enough people at some of our elderly care facilities, but I saw an estimate that by 2030, we will need given—you know, obviously, people will retire, will drop out of the workforce, but then we also have changing demographics in this country.

We are becoming older as a country. I read that we will need an additional seven million long-term caregivers at these elder care facilities. That seems like a shocking estimate to me. It is hard to imagine how we could possibly hire effectively one million additional people per year at these facilities, given the already existing labor shortages.

I am curious if you think that estimate is within the reasonable range, and if it is not, how many more workers do we need over the next five to ten years? Ms. SIMPKINS. Thank you for the question, Senator Vance. I have not heard seven million. I have heard five million, but I can certainly I would be interested in your information, and I will followup and send you the information I have.

In my response to that, we got hit by the pandemic really hard. Health care workers left, and they are never coming back. They said this was hard and we are not going to do it, and we have had to recover, and assisted living has recovered pretty well. What we also need to do is we need to build for this aging—our workforce is aging out and our seniors are aging, and we are doubling and tripling numbers when we get to 2040 and 2050, and so, having a really intense effort and what that means to both recruit and retain, and if you don't mind, I would like to share just quickly what we are doing.

Senator VANCE. Sure.

Ms. SIMPKINS. From a recruitment standpoint—so that is how we recovered. We were able to get really creative. We looked at people and said, what do you need? What is it going to help your house-hold?

We knew we needed to increase wages, so even in an HCBS environment, you can have rate methodology that allows you to pay a living wage and higher than what a minimum wage is, and then we looked at retaining because, you know, as people—people come into the assisted living, and they stay because they are so passionate about it, and in honor of their passion, we need to create something for them. What we do is from the first interview, we asked them what they envision six months from today, one year from today, three years from today.

We want them to envision a future with us and at least a future with the assisted living industry, and then we have to meet that need by career pathing, career net mapping, and what we have so we have done a lot of that and what we have realized through those interviews and people saying, this is my career path, is we also need to skill path.

We need to provide them with the resources, whether it is through a nursing grant, is through additional education that we are reimbursing them for, additional training that they need, so if you are going to commit to working within this space in a workforce, you also need to create and having a workforce that has continued to be passionate, make a living wage, and have the tools they need, and they will want to stay.

Senator VANCE. Got it. Appreciate that. You know, one just additional thought here is, you know, you hear about these cases of elopement at some of our eldercare facilities and they are mercifully rare.

You know, we have close to a million Americans in elder care facilities right now. You know, maybe 2,000 or so elopements happen per year. That is a small number, but that is—I worry, with increasing labor shortages, whether that number goes up.

I have heard some suggestions that you could fill the labor shortage gap by expanding certain immigration programs, certain visa programs, and the one worry that I have there, of course, is that, you know, if you take a person caring for an elderly citizen, you want to make sure there is not a language barrier there, especially with people who are going through dementia and might be, you know, losing some of their cognitive capacity.

We really have to wrap our minds around this. I appreciate the work that you are doing on this, and I appreciate your answer to the question, but are you worried that we might see an increase in elopements over the next few years, or do you think not?

Ms. SIMPKINS. We need to plan for how our seniors are aging and the additional care needs, and we do that through person centered planning.

I believe Dr. Kraft Morgan mentioned that our person centered care plans revolve around what a resident needs, because and to Patricia's point too, somebody can have the same diagnosis and their needs are completely different, and if you are not having person centered plan for that individual, which is collaborative with their family, with the resident when—as much as they can participate in it, with their caregivers, you are not going to have the best plan to keep them as safe and secure as you possibly can.

On the immigration side, I would—you know, there is an opportunity here with unused visas to at least start bringing in—if you think about the workforce, start bringing in some health care workers.

Senator Vance, to your point, there are some markets within that we are within, that have the residents who also have language barriers. Having staff who speak Spanish, we have staff that speaks Polish based on where the neighborhoods are.

Senator VANCE. Yes. Thank you. Thank you, Mr. Chair.

The CHAIRMAN. Thank you, Senator Vance. Senator Ricketts.

Senator RICKETTS. Thank you, Mr. Chairman. Again, thank you to all of our folks here that are testifying. Appreciate you taking the time to help us out here today. I represent the great State of Nebraska.

In Nebraska, we have nursing—skilled nursing facilities and assisted living facilities that are scattered throughout our State, and it is incredibly important to take care of the 20,000 people who require care in the 500 different facilities that we have, and they can get that care for about \$3,875 a month.

Anybody who is providing assisted living services in the State of Nebraska that has four or more residents is designated as an assisted living facility that is regulated by the State and is licensed.

While I was Governor, I signed into law an Assisted Living Facility Act to update the standards and the requirements that we have for our assisted living facilities. They are just absolutely critical, especially in rural parts of Nebraska, and to be able to help take care of people, and we want to make sure that we continue to have that service for our folks.

Ms. Simpkins, as you know, assisted living facilities, as I mentioned, are a regulated at the state level, which allows states, you know, flexibility to be able to be responsive to local consumer demands.

Are there any states in particular doing an exceptionally good job that we can draw lessons from? States you say, hey, they have got some good programs or things that we should be adopting across the country? Ms. SIMPKINS. Well, I can speak for the states in which we operate. Illinois, Indiana, and Ohio have exceptional programs, and with that, Senator Ricketts, one of the things we noted in reporting—all of those states will require reporting of any of the incidences that were talked about previously.

Senator RICKETTS. Are there other characteristics though that you think has led, or some of the approaches that you say that these states are doing a good job. What are they doing right?

What are the things that—so you mentioned the reporting. That is obviously an important factor. Are there other things that they are doing that you say, hey, this is why they have such good systems.

Ms. SIMPKINS. This is why there is a good system, because we have access within a state, in a state that is—where assisted living is regulated under the state.

I am going to talk particularly about home and community-based service, access to the regulators, access to families, access to everybody who—you know, you have this local model that can create and innovate and come up with best practices.

I am a big proponent, let's share our best practices because there is nothing proprietary when it comes to caring for a senior and caring for somebody, and that is what those states are doing well.

My fear is, if you move those conversations further away, we will no longer have those things. The states in which we serve, and I will talk about Indiana specifically, the state program, Medicaid waiver program and regulations are really dynamic.

They promote and encourage having a local model where there is collaboration and there is innovation, and that is where we come up with best practices, so that—I would say that that is also a model.

Senator RICKETTS. Great. Well, hey, thank you because that actually leads into another question I had then. Last May, this Committee held a hearing that highlighted the strained nursing home inspection system.

As you know, nursing homes are regulated at the Federal level and—are heavily regulated by the Federal level. Anyway, so if assisted living facilities are subjected to the same sort of one size fits all Federal type regulation, what can we do as lawmakers to ensure that assisted living facilities don't have the same sort of problems we are seeing in skilled nursing facilities? How do we protect that, what you talked about, that local model and best practices?

Ms. SIMPKINS. Well, from the state level, we encourage all of the states, so the things that we were talking about, if we even just talk about reporting in the—reporting of those critical events, reporting those up through the Federal Government.

Under the HCBS services, each State has really an obligation to report up in order to continue to have their federal funding. They also are well aware of the transparency that comes from and the opportunity—once those things the states report up, we have a transparency and the opportunity to see what home and community-based services are doing across the Nation, and we will have a window and more models that we can see, because I am sure there is more states that are doing it well. I just can't speak to those today. Senator RICKETTS. Getting back to the idea of like if you have the Federal Government that is regulating those things, how do we preserve that ability of local folks to be able to really tailor how they are doing the regulation to make sure that we are not pushing a one size fits all answer?

Ms. SIMPKINS. You know, there has been—we need to—from our perspective, we need to tell our story much better. There are really good stories to tell from a state perspective on our home and community-based services, and we need to do a better job of talking about those stories and the things that are going on within the states.

The innovation that has happened. The times providers have been asked to sit at a table before there is a rule change and not just ask for comment, but sit face to face with somebody and say, if this rule changes, how does it impact the resident that you are caring for and your workforce who is caring for that resident.

Senator RICKETTS. Right. That interaction with—direct with the people who are doing the job——

Ms. SIMPKINS. Yes.

Senator RICKETTS. Before rule changes are made with the regulators so that we don't have unintended consequences with regard to the rules that are made that will harm the care that is being delivered in assisted living facilities. Is that fair?

Ms. SIMPKINS. That is fair, Senator. I like the way you put that. Thank you.

Senator RICKETTS. Great. Thank you very much. Appreciate it. Thank you, Mr. Chairman.

The CHAIRMAN. Senator Ricketts, thank you, and we will turn next to Senator Warnock.

Senator WARNOCK. Thank you so very much, Chair Casey. I would be remiss in this moment if I didn't just take a moment to remember the legacy of the late first lady, Rosalynn Carter, whom I was privileged to know and whose mission was to center and uplift our caregivers.

Her extraordinary work demonstrates how a health care system that leaves so many drowning in caregiving costs, costs most of us will one day face, is a health care system that falls short of its basic obligations.

Dr. Morgan, in your experience as a gerontologist, how does the cost, the cost of assisted living burden seniors, their caregivers, and their families?

Dr. MORGAN. Well, the cost of assisted living is both financial and emotional and real for many, many Americans.

We have a system where there is not access to assisted living. In some states, there are Medicaid waivers that cover a larger portion of those who need it at the lower income, but there are also states that have virtually no waiver programs so that the only people that can afford assisted living are those who have those significant financial resources.

The middle tier of America tends to do things that I talked about in my testimony. They reduce their working hours. They set up these arrangements across families to pay for assisted living, if that is what they can do. They bring in people who may not be trained to support their person living at home. They make these precarious work and family arrangements to be able to make it through whatever long-term care they have for their loved one.

If they are lucky enough to get into assisted living, then they are still coming after work and they are still bringing the incontinence supplies, and they are still bringing the snacks and engaging the residents.

It is another job on top of the job that they are trying to do if they are still working, if they are still able to work, and that is really important in young onset dementia as well, because in young onset dementia, these people are still earning, right, and they have young onset dementia and then the families have, very few options for thinking about their forward retirement, right.

Retirement isn't what we end up doing. We end up mortgaging everything to do the care and to, you know, clean out our savings in order to support this person living with dementia who may not be able to be at home. A lot of the young onset dementias have the sorts of things that Patty was talking about with Lewy Body dementia and front temporal dementia.

We have a different course of the disease, and it is really difficult for people to care for those folks at home, and so, even if they are able to afford assisted living for a time, they run out of resources, and then what do they do?

Sometimes they can get into nursing home placement, and sometimes there is good nursing homes to go to, but not always. It is awfully precarious for many folks.

Senator WARNOCK. Well, thank you. Your experience with this underscores the ways in which this cost not only to families, but all of us.

It has implications for our workforce and our economy, and so we have to have long range, comprehensive thinking about this. The chair has been a leader in this, and I am happy to join him, I was happy in joining him, to ask that the GAO look into how Federal health care affordability programs like Medicaid and Medicare, which you mentioned, interact with assisted living facilities, how we can do better there, and whether families choose an assisted living facility or in-home care, they need help meeting caregiving cost. The average cost of \$4,500 a month, that is an average cost, but you rightly point out the ways in which, for example, with early onset dementia, people's retirement funds actually drain just taking care of the individual, and that is why I support efforts to lower caregiving costs for aging adults. It is a critical issue for our country, and I will continue to work with my colleagues on this Committee, informed by the expertise of people like all the folks on our panel, to improve access to long-term care for families across Georgia and across the country.

Thank you so much for your work in this area.

Dr. MORGAN. Thank you.

The CHAIRMAN. Senator Warnock, thanks very much for your questions, and we will now move—a little bit out of order, we will move to a second round as we are waiting for Senators to ask their first-round questions, some of whom are on their way.

I will start. I know Ranking Member Braun had some questions as well. Dr. Morgan, I will turn back to you. Your testimony pro-vided a helpful overview of the importance of well-trained staff in assisted living facilities.

We heard that direct care staff can have as few as six or eight hours of training only before beginning their care duties. They might be responsible, in some cases, for 20 or more residents.

My-the constituent of mine that I mentioned earlier, Angela, said in part when she wrote to us, "when I mentioned my concerns about my father falling repeatedly, a facility her head nurse said, "fells are just part of aging."" 'falls are just part of aging.'

I would ask you, Dr. Morgan, are falls and other accidents in assisted living just part of aging, or are there procedures, strategies, rules that can be put in place to address the risks that older adults face?

Dr. MORGAN. Falls is a really important topic in aging. There are a lot of great tools that people can use. The National Institutes of Health has a great flier on this topic, six tips to help prevent falls. Falls is about—it is about prevention.

Educating AL staff on fall prevention is vital. There are plenty of environmental audits that can be made, and some of thesesome ALs have this training in place, but certainly it is an important aspect of initial and ongoing training that the AL workforce should do.

The other thing that is tricky about falls is that there is a fear of falling that has a real impact in whether you are going to fall, and a fear from families who are scared that their mom or dad are going to fall, and one of the things that my father would say to his patients is if you don't use it, you will lose it, and in aging, it is important to keep up with balance, and balance exercises, and keep with strength training and doing those sorts of activities, and certainly, assisted living in other places could do that to really help with improving balance, because we know that balance is really important in terms of predicting mortality, and so, if we think about it and we support false prevention, that is what we-can really make a difference, and that is also educating families, that, you know, if you use your assisted devices, if you get up slowly, if you manage your medications, it make sense to really think about falls prevention, because a fall can really have an impact on the trajectory of aging for sure, and it is really important that long-term care take that seriously

The CHAIRMAN. Doctor, thank you so much. I am going to cut myself short here. I have a little bit of a jump ball between Ranking Member Braun's second round question and Senator Warren's first-round question. I think I will start with someone who is arriving. Senator WARREN. I will yield to the Ranking Member.

The CHAIRMAN. Thank you, Senator Warren.

Senator BRAUN. That is very gracious. I will actually yield back to you since you haven't done it, so. I will be here at the tail end. Senator WARREN. All right. Well, thank you both, and thank you

for holding this hearing. I appreciate that we are having this hearing. I appreciate your leadership on ensuring quality care for seniors in assisted living facilities.

This issue is not a new one for me. In July 2020, my office released the findings from the first national survey of COVID-19 in assisted living facilities, revealing that about 7,000 residents had died from COVID in just the first half of 2020.

In many ways, the threat of COVID in assisted living facilities was just as serious as it was in nursing homes, but these facilities received little help and little attention. Now, before that, in 2018, I released the first ever National Assessment of Quality Care Issues in Assisted Living Facilities, which was completed by the Government Accountability Office at my request.

That report revealed that over 20,000 serious health and safety problems occurring at assisted living facilities in just 22 states, from physical assaults to medication errors, to unexplained deaths. In the years since my office did that work, new studies have revealed additional problems in assisted living facilities.

Mr. Mollot, you lead the Long Term Care Community Coalition, which is dedicated to improving the quality and accountability of senior living facilities. Can you say a word about what kinds of threats seniors at assisted living facilities face, and how serious the risk is?

Mr. MOLLOT. Thank you. I think there are two major risks and both of them are serious. First, due to the increasing needs and vulnerability of people who go to assisted living, the risk of harm has gone way up.

People are vulnerable. People are depending upon assisted living for significant dementia care, etcetera, and we just don't know if they are getting it, and we often don't know when terrible things happen, as you noted from that GAO report, which was so important.

Second, due to the increased sophistication of operators, we have private equity, we have real estate investment trusts that are circling around this industry. The risk of financial exploitation has gone up tremendously in recent years.

Senator WARREN. You know, and your keyword, we just don't know. These are serious problems that have been going on for years, but we hear so much less about what is going on in assisted living facilities than we do in other facilities like nursing homes.

Mr. Mollot, why do you think assisted living facilities receive so much less attention than, say, nursing homes?

Mr. MOLLOT. It is a really interesting question. If I may, I think that, you know, in the 70's and the 80's, we had some tremendous scandals in the nursing home world, and that led Congress to pay attention and finally to take action.

I think that is where we are with the assisted living now, is that we are hearing more and more of these stories. The GAO reports of 1999 and the more recent report that you mentioned. Washington Post and Times reports that Senator Casey mentioned. Local news reporting from around the country.

Over and over, we are seeing that these issues are coming up, and now is really the time to take action.

Senator WARREN. With nursing homes, we put in Federal standards on this, got more Federal oversight, but assisted living facilities are governed by a patchwork of state laws without any meaningful Federal oversight, and that means no national standards that assisted living facilities are expected to meet. That is particularly worrisome because private equity firms and real estate investment firms rates have gone on a buying spree of senior and assisted living facilities. We know how their model works.

Private equity comes in, strips the assets, cuts the staff, and sends the quality of care down the tubes. Mr. Mollot, your organization has looked carefully at the data, and you have heard from the residents of these facilities. When private equity comes into an assisted living facility and slashes jobs, what impact does that have on the residents?

Mr. MOLLOT. Well, workers are the most important component of care in any setting, especially in nursing homes and assisted living, so that could be devastating for residents, but we know, I mean, unfortunately, we don't have a lot of data directly on assisted living, we have some on senior care in general and of course on nursing homes and other care settings. We know that when private equity comes in to a sector, they often pillage it.

Senator WARREN. Yes. In other words, more people will suffer when private equity comes in. We need to do more here. At a minimum, the Biden Administration should require additional reporting on problems at living—assisted living facilities. In fact, that is a priority recommendation from the 2008 team GAO report.

While CMS is making progress on implementing this recommendation, they should finalize it quickly. This has gone on long enough without oversight, and Congress must look at ways to improve accountability, transparency, and quality of care in assisted living facilities.

Again, I want to say to the chair and to the ranking member, thank you for holding this hearing, and to the ranking member, thank you for graciously letting me do this. I am trying to cover two hearings simultaneously, and I appreciate you letting me ask these questions. Thank you all for being here.

The CHAIRMAN. Thank you, Senator Warren and Senator Braun is again seeing to a colleague, Senator Fetterman.

Senator FETTERMAN. Thank you, Mr. Chairman. Again, a credit to—Senator Warren. That is—outstanding questioning as well too. All right, anyway, thank you. Ms. Simpkins, your website states that your company's operating margins are consistently among the top in the country.

I understand that your company manages upwards \$700 million from the low-income housing tax credit program, and a majority of your residents rely on Medicaid through Medicaid waiver. Ms. Simpkins, is it fair to say that, you know, your company is viable because of Government subsidies?

Ms. SIMPKINS. Thank you for that question, Senator Fetterman. It is available for a few reasons, and what is—because we do have investors, and we are grateful to those who want to invest in affordable assisted living across the country, otherwise we would not be providing to almost 6,000 seniors today who are in Medicaid waiver.

We also need a viable business plan, and it needs to be a business plan. When you talk about on the website, when it talks about our margins, our margins as compared when you look at affordable housing across the continuum, and it is because of our investors that we are able to have margins that we continue to do, like certified dementia practitioner training and give education reimbursements and get—you know, look into different workforce opportunities, and the third thing that happens in a viable business is you have to have a service plan. You have to have a service plan that is going to—it is focused on quality outcomes, and it is focused on high resident satisfaction, and it is focused on high employee satisfaction, and what you will see in our website, and thank you for noticing that, because what we are we doing our website, and I will be glad to send you a link as soon as it is done, because we are going to start posting our quality outcomes and our residents and employee satisfaction results, and that should probably be in March, so I will send you a link.

Senator FETTERMAN. No, yes, of course I would be grateful, and also, true, I am glad that there are investors, and they are a critical part of it, but I think we are able to—it is safe to say that the subsidies from the Government is also very part—it is important too, right?

Ms. SIMPKINS. It is definitely important. We need both to have a viable business.

Senator FETTERMAN. Yes, and that is not a criticism or an attack. I am just wanting to establish that, so but you know, given the Government's undeniable role in this, in your operations, why do you believe that a company should not be able to use Federal dollars to make a profit?

I don't judge anyone, of course, you know, or earning a profit, but if you are making that kind of a profit, you know, but at—maintaining at the same time the Federal care standard.

Ms. SIMPKINS. Thank you for the question, Senator. You know, the Federal funds go into the state, and the state then decides and what that program is going to look like and what it is going to be.

The opportunity at the state level is that we can have conversations with our state regulators and improve upon practices, share best practices across the continuum. I know Senator Warren mentioned the 2020 report that she had on COVID, and we were part of that report, and our outcomes were really—you don't want anything to happen, but outcomes are really good in comparison to others, and we relied heavily on the state regulators and the resources within the state to help coach and educate and resource and everything we needed to do. I don't believe it could have happened at the Federal level, the amount of attention we were able to get from the state.

Senator FETTERMAN. Sure. I want to be very clear that if—earlier, of course, that we count on other investors to allow you to operate.

I don't have an issue with you, you know, generating a profit. I mean, that is one of the reason why people are in this, and of course, it is—in fact, that is why it works, and I am grateful that it is, and really this line of questioning wasn't an attack or isn't anything other than just to just establish that because we are partnering through the kind of subsidies that we really—I think we should maintain those kinds of Federal standards as well, too, and because all of them are—they combine together to allow this to

work and to provide that kind of—very important kind of a service, and that is really—do you—would you agree with that?

Ms. SIMPKINS. They are providing a very important service, and Senator, I actually appreciate your line of questioning, because if we didn't have these kinds of discussions and even differencing in opinion—opposing views and different views, that is where great ideas come from and that is where improvement and evolution comes from, so I do appreciate your questioning today.

Senator FETTERMAN. Okay and thank you.

The CHAIRMAN. Thank you, Senator Fetterman. We will now turn to Ranking Member Braun.

Senator BRAUN. What we have just been hearing here is just what I like about a committee like this. You are hearing a broad array of viewpoints. I have—health care has been something I wrestled with long ago, and the whole spectrum from early childhood through when you are needing to look at how you are going to spend your last years, it has been cloaked behind closed doors. Large insurance companies and hospitals where we spend most of our money on the way to maybe a nursing home, assisted living, or if you are lucky enough to live out in your own abode, it has got to be swamped with transparency and where we can see.

Ms. Vessenmeyer's story, how can something like that happen, and that was in Virginia, when we are hearing \$3,800 a month in Nebraska. Every state is going to have a different cost of living, a different cost structure, but that idea, Mr. Mollot, of a transparency portal and at least some things that are going to make it easier to shine the light on issues that are out there. To me, when you are against that, you are just trying to hide something.

For instance, on the bigger picture, and this is an interesting combination of individuals, myself, Senator Sanders, Senator Grassley, Senator Smith, Senator Hickenlooper, it is two Republicans, three Democrats. I have been working on this since I have been in the Senate. Competition and transparency.

If you want to be in the biggest part of our economy, health care, and especially at the tail end of our lives, be out there, be open. Ms. Simpkins, I was wondering, because you have done a good job, and like Senator Fetterman said, your payor is coming through either State or Federal Governments, and you are aimed at low-income.

What is your cost, roughly, to do what you are doing, across those five states? Because we heard \$3,800 here. I just asked my staff, so maybe closer to \$4,500 in Indiana per month. What are you finding? You are servicing low-income residents, so what does that cost structure look like?

Ms. SIMPKINS. Thank you for the question, Ranking Member Braun. I am trying to—

Senator BRAUN. That would just mean in terms of your—you have a business—

Ms. SIMPKINS. Yes.

Senator BRAUN. Without giving any trade secrets away, what does it roughly cost in those states to provide a service? Your payor is mostly from Government. In the case over here, didn't have that advantage, and you saw what happened, and that was in a state like Virginia, which I would have thought would have been maybe moderate on costs.

Ms. SIMPKINS. Yes. The thing I am struggling with is—and I certainly agree with the transparency. Those are things that we are going to be showing all the conversations here today of, you know, the cost of care and making sure there is no hidden fees. The expense side, what I am struggling with is the expense really depends on the state in which you are in. I would certainly be willing to—

Senator BRAUN. Let's just pick Indiana then. Keep it simple, and then, what do you charge the Governments that end up paying you mostly?

I am going to get an idea of what the variation is in cost across this country, and then that whoever is in any component of health care should be always willing to make it easy for us to understand, and on health care that leads up to assisted living or nursing homes, it is terrible. In in my own business, I tried to create health care consumers so you can actually manage your own well-being, and even when I attempted it, it wasn't easy, but we did it.

Ms. SIMPKINS. Okay. Thank you for the clarity. The cost of care, if we were looking at Indiana specifically, and I think the best gauge is probably, you know, our operating margin because the cost of care of insurance and workforce—and insurance cost have going up 15, 20 percent, and sometimes it is, you know—a little bit higher in a, you know—

Senator BRAUN. You can give me a range too.

Ms. SIMPKINS. I can give you a range, yes, so the operating margins are going to be, you know, roughly between like 20 and 28 percent. When everything is considered, that is also a debt load—

Senator BRAUN. That is operating margins.

Ms. SIMPKINS. Yes.

Senator BRAUN. I am talking about what the Government ends up paying per month.

Ms. SIMPKINS. I would be glad to send that to you, Senator Braun—

Senator BRAUN. Well, you can get that to me, and I don't want to-

Ms. SIMPKINS. Yes, I don't have that—I don't have the exact yes—

Senator BRAUN. belabor the point, but just the difficulty of this, and you guys are doing a good job by all standards. We have got to have transparency across the spectrum of health care, and when you get to the tail end of life, I think as important as it is, along the way, and until the industry and everyone in health care embraces transparency and competition, don't be surprised if there is going to be more of an interest to show how to do it from the Federal level. I am a believer that that generally isn't necessarily a solution. It can end up even costing more.

Unless you at least embrace what is done in all other industries, which is make it easy for people that want to buy your services know what it is going to cost, embrace competition, don't try to keep people out of the business, you are never going to find solutions in health care. It is now up to 20 percent of our GDP. You know, as recently as three or four decades ago, it was only five percent of our GDP. It is breaking the bank even through the programs we offer here that elderly depend on, Medicare and Social Security on their retirement. Something has got to give.

Ms. ŠIMPKINS. Okay. I understand, Senator. I will send you that information. It is not that I am not willing to share it. I am willing to share it wherever you want to share it. I just don't want to misspeak on what those numbers are.

Senator BRAUN. I respect that. Thank you, and thank the other

panelists for enlightening us on this subject. The CHAIRMAN. Thank you, Ranking Member Braun. We could spend a lot more hours, obviously, on these issues, so we are grateful for all of you helping us. I will have a closing statement and I will turn to Ranking Member Braun, and then we will wrap up. I know a vote is—if it hasn't started, it is about to start, but as we heard today, assisted living facilities are at a-or right now are growing piece of the, excuse me, the long-term care continuum, but more work is needed to ensure these facilities are quality facilities, that they are safe, and that costs are transparent and clear to families.

As Ms. Vessenmeyer stated in her testimony today, assisted living facilities must provide what older Americans need to be safe and to be healthy as they age. This hearing has demonstrated that assisted living facilities face similar challenges to other long-term care options, including maintaining a well-trained workforce, providing safety, high quality services, and being affordable.

Throughout my career, I have been working to improve care, to improve transparency and quality throughout the long-term care sector. We have a responsibility to make sure every American can age with dignity in a safe place of their choosing. That is why I have worked with my colleagues to expand access to home and community-based services, improve nursing home oversight, and strengthen the long-term care workforce, and now, we are going to continue our work on assisted living. As this sector grows, we must work to provide similar protections and safeguards that are in place for residents and their families as we have all strive to in the nursing home context.

We also want to ensure that any facilities and corporate owners that violate the trust of American families are held accountable. I look forward to working with my colleagues to ensure everyone who needs long-term care has safe and accessible options.

One way we will do that is to determine what the costs of assisted living are to families and how Federal dollars are being used. To ensure these funds are being used responsibly to pay for quality care, along with all of my Democratic Aging Committee colleagues, we have sent a letter to the Government Accountability Office asking them to conduct a study of assisted living costs and how available and transparent that information is to families, and as I said in my opening statement, I want to know more about what people are paying for assisted living and to have people tell their stories, as we heard some of the stories today.

Again, we will be asking people from across my home State, as well as the country, to share stories and to share your bills with us, if you would want to do that. We want to hear from you about the true cost of assisted living and understand whether families have the information, the information that they need to make this difficult financial and health care decision for a family member and for the family.

I will turn to Ranking Member Braun now for his closing remarks.

Senator BRAUN. Thank you, Mr. Chairman, and thank you again to all the witnesses. This Committee is unique in that you really can't craft legislation out of it. A lot of it, though, from this discussion happens through other committees, so always keep that in mind.

We heard how critical it is that Federal policies support the caregiving workforce. Senator Vance pointing that out. Back in Indiana, I mentioned how workforce in general has a lot to do with our school systems, making sure that they emphasize career and technical education along with four-year pathways, because not like in—across the country, maybe a third of jobs need the four-year degree, and we need a better high school education for many of these issues so we can hit the ground running. It should be policies from here, I think should focus on boosting workforce. I think we all kind of agree on that.

Many bills are out there to do that, and to make careers in health care easier to attain. Got to make sure you don't work at cross-purposes. Like, some of the policies that are going through the labor agencies and that side of it that are wanting to get make it harder for independent contractors, for individuals where a lot of this assisted living help comes from, so, we want to make sure we don't work at cross-purposes. We also heard how states and the providers themselves are doing things. Sadly, though, not all states seem to be doing it well because you cannot have many instances of that and say that you got an industry that is working. That should be the rare exception, never the rule, and then, when we are talking about how this place actually helps. When you are promoting transparency, it can bring on partners together. I have seen that. Two ends of the spectrum because no one should ever be against being able to have more information to make a good decision.

When it comes to standards, I think that is important, data bases. That is all something we can do, share it with all the states. I think those are good ideas. I am encouraged by the conversation we have had here today.

That is how you get better ideas, really good practices. This should be something—whoever is doing it the best, you need to shout it out so that the rest of the country can participate in it. Thank you again. Thank you, Mr. Chairman.

The CHAIRMAN. Thank you, Ranking Member Braun. I wanted to thank again our witnesses for contributing both their time and their expertise, and of course bringing your own personal stories, your own personal experience to this issue.

If any Senators have additional questions for the witnesses or statements to be added to the hearing record, the record will be open—kept open for seven days until next Thursday, February the 1st. Thank you all for participating today. This concludes our hearing. [Whereupon, at 11:42 a.m., the hearing was adjourned.] APPENDIX

=

Prepared Witness Statements

U.S. SENATE SPECIAL COMMITTEE ON AGING

"Assisted Living Facilities: Understanding Long-Term Care Options for Older Adults"

JANUARY 25, 2024

PREPARED WITNESS TESTIMONY

Patricia Vessenmeyer

Good morning, Chairman Casey, Ranking Member Braun, and members of the Senate Special Committee on Aging. My name is Patricia (Patty) Vessenmeyer. Thank you for allowing me to share this testimony of my experience with assisted living for my husband, John Whitney, during his journey through middle-stage dementia. I will focus on my experiences and observations that I believe are most relevant to your national focus.

In 2013, my husband was diagnosed with Dementia with Lewy Body. Although this dementia is like Alzheimer's, it manifests itself a bit differently and it is important that caregivers be informed and trained to ensure the comfort, safety, and security of their patients. Some key symptoms are loss of sense of smell; REM sleep behavior disorder (RBD) which causes individuals to violently act out dreams, often falling out of bed, visual hallucinations, marked fluctuations in attention and alertness; and gastrointestinal issues including severe constipation, all of which my husband experienced. Loss of memory occurs much later in the disease process.

I took several free courses on caregiving for individuals with dementia, including a "virtual reality dementia experience" which helped me to understand the challenges that people with this disorder face, and most importantly, why they become so fearful and combative. I mention this to provide a basis for my ability to recognize problems with care. These same courses are offered for professionals at a reasonable cost.

In June of 2017, when John's disease was progressing more rapidly, I moved to Virginia to be near family. I cared for him at home until January 26, 2018, when he attempted to strangle me in my bed. The State determined that John should be placed in a long-term care facility. I found him a room in an assisted living facility in Warrenton, VA that specialized in memory care. He moved in the first week of March 2018. I provided the management team with John's history, his diagnosis, and disease progression.

The following is a list of issues I observed in the memory care unit during my daily visits with John.

Poor facility design

There were blocks of rooms built around a large central room for group activities and TV. The central room was extremely loud and high levels of noise can easily agitate dementia patients. Activity stations were set up for residents. One of these had various lengths of PVC pipe (not kidding), some longer than a baseball bat. These are weapons in waiting and you can guess what happened. There was no quiet area for the residents other than their rooms. The hallways in the room blocks were isolated, making it difficult for staff to monitor. There were many incidents that I witnessed when there was no staff around. I will share the one I feel is the most significant. A woman fell by tripping on a raised area where the rug abutted hard flooring and nobody saw her fall. I found her bloody and staggering down the hall. A company knowledgeable about dementia would not design a facility this way. They would certainly understand that people with dementia have problems with gait and balance. There were video cameras in place, but these were used to review incidents after-the-fact.

Understaffed

Too many patients were assigned to each caregiver. In the mornings, each caregiver needed to get their assigned residents up and dressed for breakfast. Everyone ate at the same time, putting more pressure on the staff. They only gave residents a shower when necessary, as they were always pressed for time. Caregivers needed extra time to spend on residents in more advanced stages of dementia, as they required help to move from their bed to a wheelchair, be hand fed, etc.

After lunch, the caregivers would place most of the residents in chairs in the main room while they worked getting the advanced-stage patients back into their beds. Every day after lunch, my husband urgently needed to empty his bowels. Several times while I was there, I tried to find help as it was difficult for me to help him alone, since I had a fractured arm at the time. I could not find anyone, so I did the best I could. When I was not there, he often soiled himself while waiting for help.

I once saved a man's life. I was with my husband in a room off the main activity area. I heard someone crying for help. I ran into the hallway and found the old man on the floor, trying to prevent himself from being beaten with his own cane by another resident. I called for help and quickly moved closer and redirected the attacker's attention. I kept him busy while calmly calling for assistance, trying not to further agitate him. It took several minutes before a staff member finally heard me and came to help.

Night was no better, as staff levels were even lower, as allowed by state regulations. They placed residents who had trouble sleeping in front of the TV while they dealt with other residents.

Inadequate staff training

Most of their caregiver staff were trained as nurse aides, but nothing specific to memory care that I could see. I witnessed them providing some new hires dementia care training in a conference room. This consisted of a member of the management team showing them parts of Glenn Cambell's "I'll be Me" movie and pointing out behaviors that demonstrated his dementia problems. I saw the movie and it was not appropriate for training purposes. I observed several instances where caregivers and nurses displayed limited knowledge of working with dementia patients, particularly those in mid-stage of the disease who become more fearful and combative. Examples:

* Nurse running toward resident, causing resident to become combative

* Quick, erratic hand movements, frightening individual

* TV on at 9:30 PM, with extremely high volume. Several residents were seated in chairs and wheelchairs in front of the TV. Anyone who understands dementia and "sundowning" would never do this. They were over-stimulating their residents instead of allowing them to relax and quiet their minds for sleep.

At one point, the Director of the facility told me to spend less time there and let them do their jobs. I could not abide, because they weren't doing their jobs.

In closing, unless things change, I would never recommend using this type of facility for a loved one. I am hopeful that you found my testimony helpful and that the Committee will find a way to set national standards for appropriate levels of staffing and training for that staff. This would be a huge step in improving assisted living.

Thank you for your time.

U.S. SENATE SPECIAL COMMITTEE ON AGING "Assisted Living Facilities: Understanding Long-Term Care Options for Older Adults" JANUARY 25, 2024 PREPARED WITNESS TESTIMONY Dr. Jennifer Craft Morgan

Assisted Living in the U.S.

Assisted living (AL) is a large and growing long-term care residential option for individuals who need or want additional supports for activities of daily living. There are approximately 30,600 AL communities in the U.S. with almost 1.2 million licensed beds and 818,800 residents. This industry employs a total of 478,500 workers, 66% of which are direct care workers (DCWs) (NCAL 2023). These DCWs are the first line of care. AL, though often seen by the public as interchangeable with skilled nursing homes, was built and is regulated as a social model of care. This community-based care is less restrictive and strives to be home-like.

AL typically offers 1) 24/7 availability of supervision, 2) exercise, health, and wellness programming, 3) housekeeping and maintenance, 4) meals and dining services, 5) medication management or assistance, 6) personal care, and 7) arranging for transportation (NCAL 2023). This differs from nursing home care in that there is no promise of 24/7 access to medical services or constant supervision.

AL residents vary greatly in the amount of care they need from person-to-person (Kistler et al. 2017). Some AL residents are spouses who live with their partners whose care needs have become too great but are themselves much more independent. Some move into AL communes to support medication management, house-keeping and cooking and need little other support.

Rising acuity levels, meaning the average AL resident has increasingly more health conditions and functional limitations, do mean that as residents age in place, they likely require more health services. While these services could overlay AL services, much like they would if the person needing care was living at home, these are not provided by AL communities. These health care services include primary care, home health, physical and occupational therapies, and hospice and often are performed by contracted providers, sometimes associated with the AL and sometimes contracted or arranged by the resident's family. The haphazard growth of this model and the tensions inherent have spurred calls for Assisted Living to be reimagined (Zimmerman et al. 2022).

Assisted Living Residents

About half of AL residents are over the age of 85, most are women (70%), about three quarters are not married and about 90% are White. Most AL residents need help with medications, and more than half need help with three or more activities of daily living such as bathing, dressing, or toileting (NCAL 2023; Kemp, Ball & Perkins 2019). AL residents depend on their care networks, a constellation of kin and non-kin involved in resident lives such as friends, neighbors and church or other community members, to arrange medical care, provide social support, coordinate care, engage residents in activities and bring needed supplies such as medications, favorite snacks, health and beauty items, and incontinence pads. These care networks also play an important role in advocating for residents and negotiating care with AL staff (Kemp, Ball & Perkins 2013; Kemp et al. 2018; Kemp 2021).

Many residents living in AL have dementia. While the average older person living with dementia lives between four and eight years, they can live 20 years or more (Alzheimer's Association 2023). About 42% of AL residents have a dementia diagnosis (NCAL 2023) but we can assume this is underreported as many older adults are not screened, tested, or diagnosed with dementia despite showing symptoms in memory, thinking, or making decisions that impact everyday activities.

The variability in symptoms and experiences is part of what makes people living with dementia so difficult to care for. Like all people with chronic disease, people living with dementia have good days and bad days. Person centered dementia care is needed to tailor care and support to individuals in ways that account for preferences, life experiences, communication styles and support needs that change over time (Fazio 2018). People living with dementia experience stigma and often become isolated. Residential care is an important option for combatting social isolation and exclusion often experienced by people with dementia and their care partners (Nguyen & Li 2020).

Assisted Living is an Important Long-Term Care Option

AL, unlike nursing home care, is almost entirely private pay. Only 18% of residents rely on Medicaid to pay for daily services (NCAL 2023). Most of these residents are very low-income and qualify for state Medicaid waiver programs that exist in 41 states and that often have waiting lists. According to NCAL (2023) the average monthly cost of AL is \$4500. As such, AL is inaccessible to most Americans. Yet, on the spectrum of long-term care, it is often needed. Seen as a step of care between unpaid care by loved ones and nursing home care, AL provides an important longterm care option. When the care needs of a loved one exceeds the capacity of their care network, the person needing care and their unpaid care partners are forced to manage. This is often after an event. This event could be a hospitalization, a fall, a report of self-neglect, an unsafe situation, loss of driving ability or maybe mismanaged finances or medications.

Sometimes, after a hospitalization or after insurance-supported inpatient rehabilitaing home placement. If that doesn't happen, the care network is forced to navigate, with little support or education, a variety of options, none of which are usually covered by health insurance. If they have significant financial resources, AL is a useful and attractive option. If not, managing the care situation means that care partners reduce working hours, build precarious care or financial arrangements across families, hire piecemeal personal care support or simply cross their fingers and hope things turn out okay. Given the geographic dispersion of today's families, the lack of affordable residential care options often leaves American families in tough situations

Assisted Living and Persistent Workforce Challenges

Assisted Living and refisitent workforce channelses Sixty-six percent of the AL workforce are "aides" or direct care workers (DCWs) (NCAL 2023). DCWs in AL and across long-term care are predominately women, people of color and disproportionally immigrants (PHI 2022). The typical direct care worker in AL makes about \$15 an hour, works 36 hours week in AL, and works for a non-profit company. About half have health insurance through their employer and about 22% get health insurance through Medicaid or another means tested pro-gram. About half live under 200% of the poverty line with household income at about \$46,000 (Kelly et al. 2020).

DCWs also face dangerous working conditions, persistent occupational segregation, have limited access to paid leave, and experience very little career advancement (Dill & Duffy 2022; Dill et al. 2022). As stated by Scales & Lepore (2020) "[direct care work] requires a mix of technical caregiving skills; health-related knowledge; infection prevention and control expertise; emotional intelligence and relational skills; and problem-solving and decision-making abilities, among other competencies (p. 173). " Despite highly meaningful jobs with high intrinsic rewards, the lack of extrinsic rewards including compensation, drive turnover (Dill, Morgan & Marshall 2013; Morgan, Dill & Kalleberg 2013). Turnover rates in long-term care have been persistently slow to recover since the start of the COVID 19 pandemic and the re-covery has been most difficult for women and people of color (Frogner & Dill 2022). In this context, the use of agency staff, or those that are temporarily hired from staffing agencies to all staffing shortages, has remained persistently high. Use of agency staff makes relationship-based, person-centered care difficult. Many organizations have reduced the number of new residents because they do not have the staffing to accommodate them despite having available licensed beds. More than sixty percent of AL facilities have moderate to high staffing shortages (NCAL 2022).

Assisted Living Context and Pressures

While the scope of abuse and neglect in AL facilities is unknown, several media reports have called attention to severe cases of neglect and mistreatment and the significant and surprising out-of-pocket costs that face older adults as they age in AL (Teegardin 2019; Rowland et al. 2023; Rau 2023). Abuse and neglect of our Elders and people with disabilities is unacceptable and is far too prevalent. I will say, though, in our hundreds of interviews with DCWs and other staff across the sector, I have met no "bad actors." While there are "bad actors" in all industries who are actively seeking to harm others, it is my experience that DCWs and AL staff go to work wanting to do the best they can, engage in meaningful relationships with their residents and promote their health and wellbeing. AL workers, like most direct care workers, tend to go into this line of work to give back, to make a difference, because they value Elders or because it is a calling for them (Kemp et al. 2010). Unfortunately, the system we've set up works against them. DCWs working in all long- term care settings experience low wages, few benefits, heavy workloads, dangerous jobs, and little to no career mobility. These DCWs are managing heavy workloads with unrealistic expectations of what they can get done in one shift, put themselves and their families at risk of infectious disease, are called on to do heavy emotional labor, often managing multiple jobs to make ends meet and many are experiencing burnout after the multiple personal and collective traumas experienced during and after the pandemic. For a group that was already vulnerable, these workers faced grief, uncertainty, risk, high unpaid care demands and high work demands, and mental health needs that go largely unaddressed.

For AL management and owners, there is pressure to take or keep residents with high levels of acuity. Filling beds is an imperative to cover staffng costs and now rising agency staffng costs. Well-resourced families would rather have mom in a home-like or hotel-like AL rather than an institutional nursing home if given the choice.

We gerontologists advocate for aging in place so that older adults can create home and have familiar settings in which to age well. This supports autonomy, meaningmaking, relationship-building and also supports people living with dementia to be in familiar settings to support their cognition. As a social model of care, the walls of the AL building are permeable. People go for walks, sign in and out, go visit families and go on outings. This engagement with the community is vital to the wellbeing of AL residents (Ciof, Kemp & Bender 2021). Overworked staff, lack of documentation, lack of meaningful oversight, higher acuity levels, lack of communication, and haphazard care coordination mean that residents are vulnerable without these wrap-around supports.

The tiered fee structure for additional services many Assisted Living communities offer, corresponds to the needs of residents and the need for providing additional staff to support those residents. Transparency in how those fees are determined and what impact they have on support for the residents who pay those premiums is certainly lacking. We know that 24/7 nursing home care and home health care are both, on average, more expensive than AL. The vast majority of AL services are private pay making it very difficult for residents and their care networks to plan for and understand how charges change over time.

Inconsistent Staffing and Training Requirements in AL

The AL direct care workforce is comprised of DCWs who are certified or registered (e.g., certified nursing assistants (CNAs)) and those who are not (e.g., personal care aides). AL communities make a choice between hiring CNAs, whose training and competency has been assessed by the State, or personal care aides with little to no formal training (Kemp at al. 2010). The CNA training is monitored by the state agencies responsible for facility licensure. Each state agency reviews CNA training programs for quality and state registries allow employers to verify credentials of DCWs who have completed this training and provide employers data on whether there are any outstanding complaints on file for a particular worker (Kelly et al. 2020). While many AL communities choose to hire CNAs, they lack this minimal oversight for initial training provided staff. In terms of initial and continuing education, states have sizable variability in the topics required (e.g. role of the PCA, consumer rights, ethics, and confidentiality, health care support, infection control) (Kelly et al. 2020). Several states have recently added training requirements for DCWs in AL, particularly in terms of dementia education, but these are generally loosely written and enforced with minimal oversight by state regulatory bodies.

Monitoring and Enforcement of Quality of AL

Monitoring and enforcement of quality of AL by states is inconsistent and not transparent. Kaskie et al. 2022, from their survey responses of state administrative agents, show that in half the states, monitoring and enforcement oversight of AL was dispersed across three or more agencies, staffing levels and budgets varied greatly. Fewer than 10 of the states shared information about their monitoring and enforcement procedures in a way that would be publicly accessible. Forty-five states conduct inspections at the time of licensure, 39 conduct annual or biannual inspections and only seven require AL facilities to submit an annual report (Kaskie et al. 2022).

A Mindset Shift is Needed

In her book, Disrupting the Status Quo of Senior Living: A Mindshift, Jill Vitale-Aussem (2019) lays out what I think is the crux of the problem facing senior living. AL is marketed to those who can afford it with a hospitality mindset. They advertise and compete on the basis of amenities, beautiful campuses, luxury food and furnishings, and concierge services. This model encourages residents and families to think about living in AL buildings as though they are going to a hotel or resort.

In reality, this framing, where residents are the guests and staff are encouraged to cater to their whims, increases what Dr. Bill Thomas of the Eden Alternative calls the three plagues of long-term care - helplessness, boredom and loneliness. By encouraging passivity, we leave residents with few opportunities for giving back, participating in the community or creative pursuits (Basting 2020). Instead, long-term care that is person-centered, community-minded and empowering has a much better chance of meeting the needs of residents, staff and care partners.

Person-centered care means that the person receiving care is in the driver's seat, to the extent they are able and for as long as they can. Ideally, the resident sets the goals of care collaboratively with both unpaid and paid care partners. Person-centered care practices have been associated with improved quality of life and quality of care for residents (Fazio et al., 2018; Poey et al., 2017). Shifting from a hospitality to a community mindset means that residents and the entire care network are valued members of the AL community. This shift encourages relationship building, transparent communication, interdependence and the promotion of citizenship where all members of the community have a role in improving quality of life. An open community mindset would also improve the safety culture of an AL by promoting communication, relationships and empowering all members to look out for one another.

Empowerment of residents and their care network is also vital to moving this sector forward. For residents, it's truly engaging them in their own care, using a strengthsbased approach where individuals are supported to do as much for themselves for as long as possible no mater how slow the process (Yan et al. 2023). For workers, particularly DCWs, it is more complicated. Empowerment for workers means that we listen to, respect, pay, include, collaborate with, provide for the safety of, educate, and ultimately professionalize the workforce (Morgan and Ahmad 2023). The persons (e.g. resident, staff, care partner), not the task, is what we attend to first. This means that workers have the job quality they need to be whole and happy individuals who can then have the space in their work to be creative and engaged problem-solvers in the community. Empowerment for unpaid care partners includes education on dementia, support to continue to engage and support their loved one and an open invitation to be part of the communities in which their loved one resides (Kemp 2021).

Recommendations

•Support standardization of monitoring and resources to increase state-based oversight and transparency. Standardizing state transparency and oversight supports public awareness of the industry and promotes the ability of potential residents and their care networks to make informed decisions.

•Improve and standardize initial and continuing education training for DCWs in AL. This should include realistic job preview, interactive and engaging onboarding with peer mentorship and check-ins over the first three months, a training registry that supports both initial and ongoing training and promotes portability, stackability, and career progression. Training requirements should emphasize person-centered dementia care, meaningful engagement, living well with dementia, strength-based approaches, trauma- informed and self-care, communication skills, and non-pharmacological approaches to dementia care. See https://aging.georgia.gov/ sites/aging.georgia.gov/files/GARD%20Competency%20Guide—PDF.pdf

•Professionalize the direct care workforce. This strategy needs to be engaged in collaboration across long-term care sectors. This is one workforce that moves between and across sector lines constantly. Professionalization includes: occupational credentialing that acknowledges competencies of incumbent workers, ties competency accrual to significant and meaningful career lattices that have transparent wage increases, credentialing that is stackable and leads to higher order credentials that support key areas of need including meaningful engagement of residents, person- centered dementia care, strength-based creative expression outlets (e.g. music, drama, arts, expression), health and wellbeing, trauma-informed approaches, and documentation and quality improvement practices.

•Incentivize and reward good employers who deliver high quality care. Employers can make incredible differences in the lives of their workers and residents and curb turnover and improve recruitment by enhancing hiring practices, increasing compensation, enhancing benefits, improving orientation and onboarding, increasing access to education and training and expanding career opportunities (See short microlearning videos on these topics: https://www.youtube.com/ playlist?list=PLXNnxuyRl8NQHl5kx6ukHxVHac—VjOCyn)

•Increase access to AL. Efforts should be made to increase affordable long-term care residential care options for middle class and working-class American families. This should include education about long-term care options, investment of resources in creating tools for navigating and making informed decisions about long-term care options, and incentives to develop and test inclusive models for rebalancing long-term care in ways that provides high quality care and system savings.

•Improve care coordination and resources for people living with dementia and their care partners. People living with dementia occupy many long-term care spaces. Regardless of space, they deserve high quality and coordinated care. People are not simply a diagnosis and holistic and integrated care approaches are possible and needed to support the growing number of people with dementia and their care networks. Models such as the GUIDE model (https://www.cms.gov/priorities/innovation/innovation-models/guide) have great potential to provide holistic care to people with dementia and their care partners in ways that reduce stigma, coordinate care, improve outcomes and provide needed supports for all involved.

U.S. SENATE SPECIAL COMMITTEE ON AGING

"Assisted Living Facilities: Understanding Long-Term Care Options for Older Adults"

JANUARY 25, 2024

PREPARED WITNESS TESTIMONY

Julie Simpkins

Chairman Casey, Ranking Member Braun, and members of the U.S. Senate Special Committee on Aging, thank you for inviting me here today to be a part of this important discussion on assisted living, a topic that is near and dear to my heart. My name is Julie Simpkins, and I am the co-president and chief operating officer of Gardant Management Solutions, a provider that develops and operates senior living, assisted living, and memory care communities. We are the fifth largest assisted living provider in the country and have communities in five states - Illinois, Indiana, Ohio, Maryland, and West Virginia.

I have dedicated most of my life to senior living, spending 30 years working primarily in assisted living. This is my calling, and I'd like to speak with you today about Gardant's unique model and share thoughts on how we can work together on important issues facing those who need and work in assisted living.

Gardant is uniquely focused on offering affordable assisted living to low-income seniors. Our company was founded in 1999 after the creation of the Illinois Supportive Living Program, a home- and community-based Medicaid waiver program. Now, as we have expanded into four other states, our commitment to serving this population remains. The majority of residents living in Gardant communities rely on Medicaid for their assisted living care through these waiver programs.

Gardant has been limited in where we can offer our services due to the variability with state Medicaid waiver programs. It depends on the availability of state programs, state reimbursement levels, and the number of available waiver spots. Offering affordable assisted living exclusively - or even for a majority of residents like Gardant - requires an entirely different business model altogether. We have had to persistently seek out HUD loans and income tax credits to stay viable. Therefore, we fully support efforts to make long-term care, including assisted living, more affordable to low- and middle-income seniors. With a rapidly growing elderly population, we need a public and private partnership to incentivize more providers to develop these models.

When we talk about assisted living, it's important to note that every state, every facility, and every resident is different. Efforts to standardize all assisted living communities would be both unworkable and irresponsible for resident care. State regulations recognize the diversity within assisted living while holding our profession accountable, and they are consistently updated to reflect the evolving nature of our sector and our residents.

Meanwhile, Gardant is committed to exceeding state requirements when we believe it is in the best interest of our residents. Take memory care as an example, and something that is top of mind for this Committee as well as our residents and families. Every staff member at Gardant managed memory care communities receive education and training in dementia and related diseases as well as training as a Certified Dementia Practitioner training. While elopements are rare, we overreport any to the state immediately - even something as technical as a resident walking out the door and instantly returning after a staff member sees them. We know they didn't leave our facility and our staff immediately addressed the situation, but we still report it.

The recent reports of resident elopements that were ultimately fatal are heartbreaking, and my thoughts and prayers go out to the loved ones of those residents. I serve in leadership positions on numerous national organizations dedicated to long-term care, and I know these tragic incidents are extremely rare and not indicative of the assisted living experience. The overwhelming majority of families and residents have a life-affirming, safe experience. Assisted living providers are committed to upholding our policies and procedures, as well as continuing to learn all that we can about dementia care to prevent these incidents. It is critical that policies and regulations help protect residents while still supporting freedom of movement and independence for residents living with dementia. Assisted living is a critical aspect of the long-term care continuum, dedicated to delivering person-centered care to our nation's seniors. We need collaborative, comprehensive solutions that help ensure our ability, as assisted living communities, to continue doing what we do best - providing safe, quality care to our residents. From expanding more affordable long-term care options, to workforce programs to address the growing caregiver shortage, these efforts could make a real difference. We must all work together to ensure every current and future assisted living resident is seen, safe, and served to enjoy the highest quality of life possible.

Thank you for your time and I look forward to answering your questions today.

U.S. SENATE SPECIAL COMMITTEE ON AGING "Assisted Living Facilities: Understanding Long-Term Care Options for OLDER ADULTS JANUARY 25, 2024 PREPARED WITNESS TESTIMONY **Richard Mollot**

Introduction

Good morning, Chairman Casey, Ranking Member Braun, and Members of the Committee. Thank you for inviting me to testify today on this important issue

My name is Richard Mollot. I am the executive director of the Long Term Care Community Coalition (LTCCC). LTCCC is a national non-profit, non-partisan orga-nization dedicated to improving care and quality of life for residents in nursing homes and assisted living. We conduct substantive research on long-term care policies and the extent to which essential standards of care are realized in the lives of residents, who are typically elderly and frail. In addition to conducting systemic analysis and advocacy, we educate and engage residents, families, and those who work with them, so that they are aware of their rights and are equipped to overcome the challenges that so many of our seniors face when they need residential care.

While timelines vary, essentially, assisted living emerged in the 1980s as an alterwhere the interview of the point of the size of the si positive and negative implications.

1. The needs and frailty of assisted living residents have dramatically increased;

2. Assisted living operators have adopted increasingly sophisticated and large-scale corporate models, including ownership by Real Estate Investment Trusts, Pri-vate Equity, and other sophisticated private investment structures;² and

3. Public payment and support for assisted living services has increased dramatically.

The subsequent discussion delves into some of the ramifications of these trends, followed by recommendations aimed at fostering a sustainable business model for assisted living that effectively meets the evolving needs of our expanding senior population.

The Growing Needs and Expectations of Our Expanding Senior Population to Live Safety and with Dignity

Assisted living facilities (ALFs) are increasingly viewed by seniors and their families as a desirable option for residential care, particularly for those who wish to avoid the institutional environment that typically defines life in a nursing home. In fact, assisted living is the fastest growing form of senior housing in the United States.³ While too often overlooked by policymakers and oversight agencies, assisted living facilities house a comparable number of individuals to nursing homes in the United States

Importantly, ALFs do much more than just providing accommodations and assistance with housekeeping and prepared meals, as they largely did in the past. They now provide a range of health and support services to residents with increasing needs (and vulnerabilities):

¹ Wilson, K.B., "Historical Evolution of Assisted Living in the United States, 1979 to the Present," The Gerontologist, Volume 47, Issue suppl—1, Pages 8-22 (December 2007). https:// doi.org/10.1093/geront/47.Supplement—1.8. ² See, for example, Fenne, M., "Private equity's growing presence in senior living," The Private Equity Stakeholder Project (blog post). (December 2023). https://pestakeholder.org/news/private-equitys-growing-presence-in-senior-living/. ³ Castillo, L., "Assisted Living Industry Statistics," GITNUX Marketdata Report 2024 (December 2023). https://gitnux.org/assisted-living-industry-statistics/#::text= Assisted%20care%experiences%20the%20highest%20growth%in%20 terms,fastest%20growing%20segment%20of%20the%20senior%20 housing%20market.

housing%20market.

1. Approximately 40 - 70% of assisted living residents have Alzheimer's Disease or some other cognitive impairment.⁴

2. More than half of ALF residents are 85 or older (compared to 42% in nursing homes).5

3. Over 50% have hypertension.⁶

One-third or more have heart disease or depression.⁷

5. About half need help with dressing and/or walking and 64% need help with bathing.8

6. Over 10% of ALF residents with dementia are administered antipsychotic drugs, which carry a FDA "black box" warning against use on elderly people, due to significant risks of heart attack, stroke, Parkinsonism, falls, and death

In summary, the evolving care requirements of assisted living residents have grown increasingly intricate over the years. As seniors experience longer lifespans with chronic conditions, notably dementia, the susceptibility of this demographic has heightened. Despite the escalating needs and vulnerabilities, the federal government has consistently adopted a "hands-off" stance, and state regulations are generally characterized by weakness and lax enforcement. Consequently, the assisted living sector operates under a caveat emptor - let the buyer beware - principle. We can and must do better for American seniors and their families.

We can and must do better for American seniors and their families.

The Imperative to Improve Transparency About Quality and Safety

While the notion of "buyer beware" is already disconcerting for seniors and their families, the situation is exacerbated by the pervasive lack of transparency that extends to virtually every facet of assisted living. In any typical consumer scenario, one would rightfully anticipate clear information about the services to be provided, costs, quality, and safety. However, in the realm of assisted living, obtaining crucial indicators is challenging, if not impossible. Who's providing care? How much will liv-ing and services cost? What happens when/if I need more care and services? What happens if I run out of money? What is the quality record of this facility? If a facil-ity has had issues, how do I find out what they were and, most importantly, what was done to address them?

In the world of assisted living, the answers to these vital questions are not only hard to find, they are often purposefully obfuscated by both operators and the state agencies that are supposed to be protecting residents. Unlike nursing homes, for which vigorous, professional assessments are required upon entrance and periodically, to a large extent ALFs are free to accept - and retain - whomever they want. Licensed nurses may or may not be on hand to supervise care for residents with higher needs, respond to a fall, or ensure that medications are given correctly. Care, monitoring, and dignity for individuals with dementia may be wonderful or slipshod, depending on the facility or, even, the operator's profit goals for the quarter. While approximately 75% of ALFs claim to have a "memory care unit,"10 this term is often more a marketing strategy than an accurate representation of specialized care. Seniors and their families may lean on this term when placing an individual with de-mentia, despite potentially disastrous disparities in actual care quality.

The Case for Federal Interest and Engagement in Safeguarding Quality and Integrity in the Assisted Living Industry

Although assisted living is commonly seen as a private enterprise functioning with a non-governmental payment model, it is essential to recognize the growing impor-tance of public funding and the escalating demand for federal involvement. The gov-ernment's interests have expanded over the years, emphasizing the need to ensure robust consumer protections and foster a healthy assisted living industry.

1. Close to 20% of assisted living residents currently rely on Medicaid to pay for services.11

2. Forty-seven states plus the District of Columbia provide access to Medicaid assisted living

3. The U.S. Supreme Court's landmark 1999 Olmstead decision established that the unjustified institutional isolation of people with disabilities is a form of discrimi-nation under the Americans with Disabilities Act (ADA). The court declared that states are required to make reasonable modifications to publicly funded programs to accommodate qualified individuals who desire to live in the most integrated set-ting.¹² To meet this requirement, states have been "rebalancing" access to publiclyfunded long-term care services over the last 25 years, favoring home and community-based services, which can encompass assisted living, over nursing home placement.

4. The U.S. Department of Housing and Urban Development (HUD) provides ad-vantageous loans to finance the purchase, refinance, new construction, or substantial rehabilitation of assisted living.

5. The Government Accountability Office (GAO) has focused on the need to im-prove safety and accountability in assisted living numerous times over the last 25 plus years. Unfortunately, the persistent failure to take substantive action to implement most of the GAO's recommendations over the years has resulted in untold numbers of residents suffering harm, including financial exploitation, sexual assault, and even death, due to substandard care and lack of promised supervision.

6. The LTC Ombudsman Program, which monitors care and helps residents resolve complaints under the authority of the Older Americans Act, has been authorized to monitor assisted living and provide services to residents since 1981.

7. Numerous news reports, in both local and national media, have uncovered the painful and heart-breaking problems that can occur as a result of the lack of federal standards and weak state oversight. A recent report from The Atlanta Journal-Constitution is emblematic:

"During a routine room check, an 88-year-old resident told workers that hours earlier she had been sexually assaulted by another resident." Three weeks later, an investigation by the Georgia Department of Community Health found that Savan-nah Court of Lake Oconee "failed to provide supervision consistent with the residents' needs.

Thile the incident would be distressing on its own, its timing adds a layer of alarm. The assault took place two months after the state sent Savannah Court of Lake Oconee a notice that it planned to revoke its license, and while such an action should imply serious safety concerns, the department's efforts to move the process along and ensure residents are free from harm have lacked urgency. ...Court docur ments and inspection reports reviewed by The Atlanta-Journal Constitution show that, since 2021, Savannah Court of Lake Oconee has accrued over 70 state viola-tions, including two incidents where residents died."¹³

A senior or their family would have trouble finding out this history. Savannah Court's website provides no inkling about any of these problems (no matter what steps, if any, were taken to address them). It paints an entirely rosy picture of "an

¹¹National Center for Assisted Living, Assisted Living: A Growing Aspect of Long Term Care.https://www.ahcancal.org/Advocacy/IssueBriefs/NCAL—Factsheet—2023.pdf. ¹²Long Term Care Community Coalition, Single Point of Entry for Long Term Care and Olmstead: An Introduction and National Perspective for Policy Makers, Consumers and Advo-cacy Organizations (2005).https://nursinghome411.org/single-point-of-entry-for-long-term-care-and-olmstead-an-introduction-and-national-perspective-for-policy-makers-consumers-and-advo-cacy-organizations/

and-offistead-an-introduction-and-national-perspective for policy instance responses (acception of the policy instance) (

ideal place for your loved ones to age in place while also providing you with the peace of mind that comes with knowing they are well cared for."¹⁴ The state's "Find a Facility" page only provides a single row of information with the facility's address, phone number, bed capacity, and administrator.¹⁵ One has to do a separate search in a separate database of inspection reports to find any record of what has transpired in the facility.

Beyond highlighting the imperative for substantive measures to enhance safety and quality, the substantial variances among assisted living facilities, encompassing staffing levels, services provided, and costs, underscore the need for decisive action to improve both quality assurance and transparency.

Recommendations

1. Establish and Implement National Standards to Promote Quality, Safety, and Integrity in Assisted Living:

•For years, the states have functioned as an incubator for developing assisted living policies. While this has not resulted in a high-quality system, there are many lessons that can be learned, and existing state requirements provide a logical basis for promulgating federal rules.¹⁶

•A system of regular inspections and oversight at the facility and corporate levels should be developed to ensure compliance with these standards.

2. Establish a National Assisted Living Database:

Create a centralized and standardized database that includes key metrics on assisted living facilities' performance, include: staffing (levels and competencies), ownership, charges for residential and care services, and citation history (including how those citations were corrected and any penalties that were imposed).

•This database should be easily accessible to the public, empowering families with the information needed to make informed decisions.

3. Promote Resident and Family Engagement:

•Develop rules for the rights of resident and family councils in assisted living.

•Strengthen the involvement of residents and their families in the internal policies and operation of their assisted living facility (such as by strengthening re-quirements under the Home and Community-Based Settings regulations promulgated in 2014).

Conclusion

Improving transparency, quality, and accountability in assisted living is not only a matter of public interest but a moral imperative. Now more than ever, federal action is needed to ensure that older Americans receive the care and support they deserve while fostering a system that promotes transparency and accountability within the industry

I appreciate the Committee's commitment to addressing these critical issues, and I am available to provide any additional information or answer questions that may arise during or after the hearing.

Thank you for your consideration of my testimony and the issues raised herein.

Questions for the Record

_

U.S. SENATE SPECIAL COMMITTEE ON AGING "Assisted Living Facilities: Understanding Long-Term Care Options for Older Adults" JANUARY 25, 2024 QUESTIONS FOR THE RECORD Patricia Vessenmeyer

Chairman Robert P. Casey, Jr.

Question:

What recommendations do you have to ensure that assisted living workers can provide residents with the type and quality of care that they need?

Response:

Caregiving for dementia patients is extremely difficult. There appears to be ample training options available, of which many of these facilities are not taking advantage. I would recommend that caregivers be required to take additional training classes to become certified as dementia-patient caregivers. They should also receive compensation commensurate with this higher level of training. Perhaps a program where the facility operators also reimburse the caregivers for their training costs would encourage more to enter the field.

Question:

What regulations or policies would you like to see in place to ensure that assisted living facilities are delivering on the services they promise?

Response:

Decreasing the maximum number of patients per caregiver would be very helpful. Right now, that number is controlled at the state level, and I understand that this would be a challenge to change on a national basis. However, as I mentioned in my testimony, many of these caregivers want to do a good job, but simply have too many residents in their care. Also, perhaps there could be a way to oversee performance and hold these organizations accountable.

U.S. SENATE SPECIAL COMMITTEE ON AGING "Assisted Living Facilities: Understanding Long-Term Care Options for Older Adults" JANUARY 25, 2024 QUESTIONS FOR THE RECORD Dr. Jennifer Craft Morgan

Chairman Robert P. Casey, Jr.

Question:

Please share with us the profile of the assisted living direct care workforce, workplace supports, and opportunities for job growth, or lack thereof. Can you share any policy recommendations on increasing retention and creating opportunities for job advancement, including federal policies, or state policies that could be replicated?

Response:

A full profile of workforce demographics and training can be found in the linked article below (Kelly, Morgan & Kemp 2020). Like direct care workers across long-term care, AL DCWs are predominately women, about half are people of color and about 20% are immigrants. The typical direct care worker in AL makes about \$15 an hour, works 36 hours week in AL, and works for a for-profit company. About half have health insurance through their employer and about 22% get health insurance through Medicaid or another means tested program. About half live under 200% of the poverty line with household income at about \$46,000 (Kelly et al. 2020).

DCWs also face dangerous working conditions, persistent occupational segregation, have limited access to paid leave, and experience very little career advancement (Dill & Duffy 2022; Dill et al. 2022). As stated by Scales & Lepore (2020) "[direct care work] requires a mix of technical caregiving skills; health-related knowledge; infection prevention and control expertise; emotional intelligence and relational skills; and problem-solving and decision-making abilities, among other competencies (p. 173)." Despite highly meaningful jobs with high intrinsic rewards, the lack of extrinsic rewards including compensation, drive turnover (Dill, Morgan & Marshall 2013; Morgan, Dill & Kalleberg 2013). Turnover rates in long-term care have been persistently slow to recover since the start of the COVID 19 pandemic and the recovery has been most difficult for women and people of color (Frogner & Dill 2022). In this context, the use of agency staff, or those that are temporarily hired from staffing agencies to fill staffing shortages, has remained persistently high. Use of agency staff makes relationship-based, person-centered care difficult. Many organizations have reduced the number of new residents because they do not have the staffing to accommodate them despite having available licensed beds. More than sixty percent of AL facilities have moderate to high staffing shortages (NCAL 2022).

Improve and standardize initial and continuing education training for DCWs in AL:

Policies to implement include increased requirements for initial training and continuing education of workers and implementing a coordinated way to share best practices and offer technical assistance. These practices and topics should include realistic job preview, interactive and engaging onboarding with peer mentorship and check-ins over the first three months, a training registry that supports both initial and ongoing training and promotes portability, stackability, and career progression. Training requirements should emphasize person-centered care, meaningful engagement, living well with dementia, strength-based approaches, traumainformed and self-care, communication skills, and non-pharmacological approaches to dementia care. Several states including Florida (430.5025 F.A.C.) have increased the required content for initial and continuing education for DCWs in Assisted Living. Also, while AL workers do not have to be CNAs, many of them are, so legislation that increased the continuing education requirements for the CNA workforce would raise requirements for initial and continuing education across much of long-term care.

Professionalize the direct care workforce:

This strategy needs to be engaged in collaboration across long-term care sectors. States such as Wisconsin (https://wiscaregivercna.com/) have created partnerships across provider associations and state government to establish education and career pathways for direct care workers. This is one workforce that moves between and across sector lines constantly. Professionalization includes: occupational credentialing that acknowledges competencies of incumbent workers, ties competency accrual to significant and meaningful career lattices that have transparent wage increases, credentialing that is stackable and leads to higher order credentials that support key areas of need including meaningful engagement of residents, person-centered care, strength-based creative expression outlets (e.g. music, drama, arts, expression), health and wellbeing, trauma-informed approaches, and documentation and quality improvement practices.

The Journal of Applied Gerontology has made this article publicly available upon my request: https://journals.sagepub.com/doi/full/10.1177/0733464818757000.

Question:

Please share with us how assisted living facilities work to ensure that residents are supported in their activities of daily living, as well as being emotionally and intellectually supported?

Response:

Person-centered care means that the person receiving care is in the driver's seat, to the extent they are able and for as long as they can. Ideally, the resident sets the goals of care collaboratively with both unpaid and paid care partners. Person-centered care practices have been associated with improved quality of life and quality of care for residents (Fazio et al., 2018; Poey et al., 2017). Empowerment of residents and their care network is also vital to moving this sector forward. For residents, it's truly engaging them in their own care, using a strengths-based approach where individuals are supported to do as much for themselves for as long as possible no matter how slow the process (Yan et al. 2023). Assisted Living organizations create dense activity calendars that offer things for Assisted Living residents to do, but to engage residents emotionally and intellectually, we have found that these approaches are the most successful (particularly for residents with dementia): 1) Knowing the person, 2) Connecting with and meeting them where they are, 3) Being in the moment and 4) Realizing that every interaction is an opportunity for engagement (Kemp et al. 2021).

Question:

Please share with us strategies that states use to hold assisted living facilities accountable and how they could do a better job?

Response:

Standardizing state transparency and oversight supports public awareness of the industry and promotes the ability of potential residents and their care networks to make informed decisions. This should include publishing of quality data similar to that of the nursing home sector (https://www.medicare.gov/care-compare/). This will need to include regulation and oversight where states have to report survey results and individual AL communities will have to regularly report on quality indicators, incidents and deficiencies. Coordination of technical assistance and supportive resources for providers to meet standards and implement best practices will likely be necessary (Kaskie et al. 2022).

Question:

Would you support a set of federal regulations for assisted living facilities? If so, what issues would be most critical to have federal regulations address?

Response:

I would support federal regulations for assisted living facilities that support information sharing, transparency, public access to quality data and oversight data. These aspects are key to supporting high quality. Several states have made significant improvements to regulation(https://www.ahcancal.org/Assisted-Living/Policy/ Documents/2023—reg—review.pdf). Technical assistance and support states to improve their regulation, quality data and documentation quality would be useful. The most critical issues to address are: worker initial and continuing training, career advancement, resident abuse, quality improvement efforts, efforts to combat social isolation, infection control, and strategies to support resident safety.

Senator Kirsten Gillibrand

Question:

Staffing shortages in assisted living facilities are reaching crisis levels and are exacerbated by insufficient pay and benefits, strenuous workloads, limited training and advancement opportunities, and stigma. MY National Domestic Workers Bill of Rights Act extends common workplace rights to assisted living facilities workers while at the same time creating new protections and stronger ways of enforcing them.

Is the current assisted living facilities workforce prepared to care adequately for residents with cognitive impairment and Alzheimer's Disease? Are programs or certifications available so that our ALF workforce may improve the quality of their care delivery?

Response:

No. Training is inconsistent across Assisted Living organizations and is not universally required (https://www.ahcancal.org/Assisted-Living/Policy/Pages/state-regulations.aspx). There are several training certifications that are useful but not widespread. These include but are not limited to the Eden Alternative's Certified Eden Associate Training and Dementia Beyond Drugs, Teepa Snow's Positive Approach to Care Training Certifications, and training offered by the National Council of Certified Dementia Practitioners.

Question:

How would direct care worker protections like adequate breaks during work hours and training programs also protect assisted living facility residents? Would addressing factors that contribute to assisted living facility direct care worker burnout also benefit organizations and residents?

Response:

These protections would help a great deal. Burnout is real and pervasive in these and most long-term care organizations. Resources and requirements that hold employers accountable and reward good employers are important. Employers can make incredible differences in the lives of their workers and residents and curb turnover and improve recruitment by enhancing hiring practices, increasing compensation, enhancing benefits, improving orientation and onboarding, increasing access to education and training and expanding career opportunities (See short micro-learning videos on these topics:

(https://www.youtube.com/playlist?list=PLXNnxuyRl8NQHl5kx6ukHxVHac-

VjOCyn). Greater access to mental health resources is sorely needed. This could be done through Employment Assistance programs or other collaboratives among organizations. High quality, low-cost mental health services are needed for all members of the care network, including residents. Destigmatizing and normalizing mental health and well-being promotion is vital for this industry. It is important to realize how interconnected residents, paid and unpaid care partners are in the AL context. The support of each impacts the other. Better supports for staff means they will be better positioned to provide care (Kemp 2021, Kemp et al. 2018).

Question:

What issues does marketing an assisted living facility as a "memory unit" create for consumers with cognitive impairment?

Response:

There should be standards attached to the ability to market dementia care services to potential residents and families. In my opinion, this would include environmental supports (e.g. lighting, built environment, privacy, community, safety), social supports (e.g. community engagement, meaningful engagement, avenues for contributing), and training supports (e.g. person-centered dementia care training, strengths-based & Montessori-based training, communication training, quality improvement and team training).

The Honorable John Fetterman United States Senate Washington, D.C. 20510

Re: Gardant Management Solutions' Response to January 24, 2024 Inquiry

Dear Chairman Casey, Senators Warren and Fetterman:

I am writing on behalf of my client, Gardant Management Solutions ("Gardant"), in response to your correspondence dated January 24, 2024 (the "Letter"). We appreciate the opportunity to provide information to your offices regarding Gardant's response to your Questions for the Record.

Gardant was founded in 1999 on the foundation of operating communities with dignity, compassion and enriched services and has more nearly 25 years' experience managing licensed assisted living facilities across five states, including Illinois, Indiana, Ohio, Maryland, and West Virginia). Gardant does not provide services under a Medicaid Waiver Program in Maryland or West Virginia. At each community, Gardant only serves as a manager and does not own any of the assisted living facilities it manages. Gardant currently serves as a manager for 82 properties that include independent living memory care, and assisted living facilities serving approximately 6,500 residents. Gardant is committed to applying best practices at all of its managed facilities as it serves one of the most vulnerable populations.

polsinelli.com

This letter contains Gardant's and its managed facilities' confidential, trade secret, and/or proprietary information. We have marked this letter "Confidential" and request that it not be disclosed beyond your individual offices or the United States Senate Special Committee on Aging ("Committee") or otherwise made public. We ask that you treat this letter and accompanying documents as confidential committee records in accordance with Standing Rule of the Senate XXIX, clause 5, afford them the maximum protection available to information provided to a Senate or House office or committee. We request you inform us of any proposed use of the information contained herein or accompanying documents and provide Gardant with an opportunity to be heard prior to any such proposed use.

The information contained in this response is based on Gardant's best efforts undertaken within the timeframe provided and based on its understanding of the information requested. The representations made in this response are based on information reasonably available to Gardant and may not reflect all existing relevant information. Gardant reserves the opportunity to supplement information in this response and will do so as warranted. In providing information and materials responsive to the request, Gardant does not waive any rights or legal options relating to this inquiry.

For your convenience, we have reproduced below, in bold, each question in your Letter followed by our response. Please note that our response reflects the data as of February 1, 2024.

- 1) During the hearing, Sen. Braun asked about the cost of providing care for residents and the sources of funding Gardant Management Solutions uses to pay for those costs. He was especially complementary that Gardant could provide residents with services to address their needs at a rate much lower than what Ms. Vessenmeyer paid and suggested Gardant's model might be a model for the nation. So that we can better understand the cost model for your services, please share with us the following:
 - a. All sources of Federal funding that Gardant uses to cover assisted living costs, including Federal funding that may be specific to an individual resident such as Medicaid funding and Social Security funding, and HUD funding.

Gardant is a third-party manager of these communities. As such, it bills each state's Medicaid program and payments are then sent from the Medicaid agency to the owners of the communities. The only source of Federal funding that the communities receive to cover the cost of providing assisted living services to seniors is Medicaid payments that are paid under Medicaid Waiver Programs.

b. All sources of state funding Gardant uses to cover assisted living costs, disaggregated by state.

The only state funding that the communities receive to cover the cost of providing assisted living services is Medicaid payments, which are paid under Medicaid Waiver Programs, to the extent that such payments are considered "state funding."

c. The total amount of personal funds paid by residents disaggregated by assisted living facility, for the past five years.

This below chart reflects the total funds paid by residents, including both room and board and service charges. Gardant estimates the average paid per resident is 1,600/month.

	IL – Medicaid	IN – Medicaid	OH – Medicaid
	Residents/Personal	Residents/Personal	Residents/Personal
	Funds	Funds	Funds
2019	\$	\$	
2020	\$	\$	
2021	\$	\$	
2022	\$	\$	
2023	\$	\$	\$

d. For residents who sign over their social security cash benefits, the monthly personal allowance for residents in each state.

	Illinois	Indiana	Ohio
Monthly Personal Allowance	\$90	\$52	\$50

¹ The 2023 increase in the total amount of personal funds paid by Illinois residents was the result of the addition of 14 new Supportive Living Facilities and 1 new Assisted Living Facility.

e. The total value of the Low-Income Housing Tax Credits (LIHTC) Gardant currently owns and has owned over the past five years.

Gardant is a third-party operator and does not have an ownership interest in any of the communities it manages. As a result, Gardant, does not presently own any Low Income Housing Tax Credits, nor has it owned any during the prior 5-year period.

2) In your written testimony you mentioned that you only provide assisted living in states that have sufficient or higher Medicaid reimbursement rates? What daily rate is sufficient for Gardant to provide assisted living in a state?

It would be impossible to identify one rate that would be sufficient for providing assisted living as there are a multitude of factors that impact the cost of providing care and services including construction costs, zoning limitations, property taxes, local taxes, food costs, the local labor market (availability and prevailing wages), insurance costs, and facility size/capacity.

	Assisted Living Medicaid Rate Range	Memory Care Medicaid Rate Range
Illinois	\$130.69 - \$135.53 / day	\$191.59 - \$208.35 / day
Indiana	\$101.98 - 132.04 / day	\$101.98 - 132.04 / day
Ohio	\$130 / day	\$155 / day
Maryland	N/A	N/A
West Virginia	N/A	N/A

Medicaid payments in the states we currently operate in are as follows:

3) Do you support federal requirements to publicly report assisted living facility fees, sources of funding, and incidents of injuries, elopements, and deaths? If you do not support federal regulations for any of these, please provide your rationale.

We support the existing reporting requirements under state law and the Medicaid Waiver Programs. Federal reporting would be largely duplicative of the reporting that is already

mandated through the Medicaid Waiver Programs and existing state law. The information that you suggested be reported at the federal level is already available to the Centers for Medicare and Medicaid Services ("CMS") through the Medicaid Waiver Program reporting. We would also highlight the fact that CMS reviews each Waiver Program on an annual basis.

4) How many senior living, assisted living, and memory care communities does Gardant operate?

Gardant currently serves as a manager for 82 properties that include:

- 64 assisted living communities accepting Medicaid payment for services. Five of
 - these communities also provide memory care services.
 - 8 independent living communities.
- 10 private pay communities.
 - Two of these communities provide memory care services.
 - Three of these communities provide multiple service levels (independent, assisted, and memory care).
 - o Four of these communities provide assisted living services.

a. How many residents live in each of these types of Gardant communities?

Gardant currently serves approximately 6,500 residents.

5) In what states does Gardant provide services at these facilities under a Medicaid Waiver Program?

Gardant provides services under a Medicaid Waiver Program in Illinois, Indiana, and Ohio.

a. What kind of services are provided by Gardant under these Medicaid Wavier Programs?

Medicaid Waiver Programs include assistance with activities of daily living (ADLs) (i.e., bathing, dressing, eating), medication assistance and administration, meals, laundry, housekeeping, activities, transportation for shopping and medical visits, and activity programs. Memory care programs also include specialized programming and additional security and monitoring.

b. How many residents receive services under these Medicaid Waiver Programs?

We estimate that we provide approximately 75-80 % of our residents (4,875 – 5,200) receive assisted living services under Medicaid Waiver Programs.

6) How much in total Medicaid reimbursements has Gardant received in each of the last five calendar years?

As discussed earlier, Gardant is a third-party manager of these communities. As such, it bills each state's Medicaid program and payments are then sent from the Medicaid agency to the owners of the communities. Gardant does not retain the Medicaid payments.

Year	Medicaid Payments
2019	\$
2020	\$
2021	\$
2022	\$
2023	\$

7) How often are Gardant facilities inspected by state authorities in each state where Gardant operates?

Gardant's communities are inspected annually and, as necessary, when complaints are received by the state.

a. Please provide a copy of the most recent state inspection report for each facility.

Reports are attached as Exhibit 1.

8) Your testimony indicates that Gardant reports ("overreports") all elopements to state authorities. How many reports of elopements have you made to state officials in each of the last five calendar years? Please provide a summary of all such reports.

Gardant has reported 11 elopements in the last 5 calendar years. See Exhibit 2.

9) How many "critical incidents"² have occurred at Gardant facilities in each of the last five years?

There have been 10 total incidents that have occurred at Gardant facilities in the last 5 years.

a. Please provide a detailed list of all such incidents.

Please see Exhibit 3.

10) Has Gardant been subject to any state enforcement actions related to quality of care provided at its facilities?

During the past 5 years there have been no instances in which the state took action against any of Gardant's licenses related to quality of care.

a. Please provide a detailed list of all such actions.

N/A

11) Are minimum staffing standards in place at Gardant facilities? If so, please provide a summary of those standards.

The following sets forth each state's regulatory requirement regarding the number of staff:

Illinois: Shall have staff sufficient in number with qualifications, adequate skills, education ad and experience to meet the 24-hour scheduled and unscheduled needs of residents. There are no staffing ratios.

Indiana: Staff shall be sufficient in number, qualifications, and training in accordance with applicable state laws and rules to meet the 24-hour scheduled and unscheduled needs of the residents and services provided.

² These are "incidents that may cause harm to a beneficiary's health or welfare, such as abuse, neglect, or exploitation." See, GAO, MEDICAID ASSISTED LIVING SERVICES Improved Federal Oversight of Beneficiary Health and Welfare Is Needed, at 7, January 2018, at https://www.gao.gov/assets/gao-18-179.pdf.

Maryland: There will be on-site staff in number and qualifications to meet the 24-hour scheduled and unscheduled needs of the residents. There are no staffing ratios.

Ohio: While there are not staffing ratios, at least one staff member must be on duty at all times and sufficient additional staff members must be present to meet the residents' total care needs.

West Virginia: A sufficient number of qualified employees must be on duty to provide resident with all the care and services they require.

Gardant staffs its communities taking the following factors into account: 1) resident acuity (including acuity limitations imposed by the state); 2) services required under each resident's person centered service plan; and 3) size of the community and number of residents. Based upon these factors, Gardant generally follows the internal minimum staff guidelines below:

Minimum caregiver staffing in AL setting: Days – 1/20 Afternoons – 1/25 Evenings – 1/40

Minimum nursing/caregiver staffing in MC setting: Minimum of 1/8 or 1/10

12) What training requirements are in place for Gardant facilities that provide services under Medicaid waiver programs?

Illinois

89 Ill. Admin. Code Section 146.235(e)

Illinois staffing requirements provide that a facility provide training within 30 days of beginning employment and semi-annual training, covering resident rights, ; infection control; crisis intervention; prevention and notification of abuse, neglect and financial exploitation; behavioral intervention; tuberculosis identification, prevention, control and reporting; encouraging independence; potential resident inquiry and admission

application policy; and non-discrimination policy (these subjects shall be trained as part of staff orientation and at least annually thereafter). There is no specific hour requirement given in the regulation.

89 Ill. Admin. Code Section 146.660(e)

Dementia Care: All staff who work on the unit (e.g., nurses, CNAs, housekeepers, activities staff) shall have four hours of training specific to working with persons with Alzheimer's disease or related dementia within seven days after working on the unit. They shall annually complete at least 12 hours of in-service training regarding Alzheimer's disease and other related dementia.

Indiana

410 IN ADC 16.2-3.1-14 Indiana Administrative Code

For regular care, according to 410 IAC 16.2-3.1-14 and 410 IAC 16.2-5-1.4, staff who have regular contact with residents must have a minimum of six hours of dementia-specific training within six months of initial employment, or within thirty days for personnel assigned to the Alzheimer's and dementia special care unit. They must also have three hours of dementia-specific training annually thereafter.

In addition to the required inservice hours in subsection (1), staff who have regular contact with residents shall have a minimum of six (6) hours of dementia-specific training within six (6) months of initial employment, or within thirty (30) days for personnel assigned to the Alzheimer's and dementia special care unit, and three (3) hours annually thereafter to meet the needs or preferences, or both, of cognitively impaired residents and to gain understanding of the current standards of care for residents with dementia.

Ohio

Ohio Administrative Code Chapter 3701-16 Residential Care Facility ("RCF")

Training Requirements: All staff must receive orientation and training in their job responsibilities, facility procedures, securing emergency

assistance, and residents' rights. Staff must receive 8 hours of continuing education annually in personal care techniques, observational skills, and communication skills. Training must be provided by a licensed nurse. All direct care staff must have first-aid training within 60 days of hire. Administrators must receive 9 hours of continuing education annually in gerontology, health care, business administration, and RCF operation.

Staff members employed by a RCF, or part thereof, that admits or retains residents with: (1) late-stage cognitive impairment with significant ongoing daily living assistance needs; (2) cognitive impairments with increased emotional needs or presenting behaviors that cause problems for the resident or other residents, or both; or (3) diagnoses of serious mental illness must have, within 14 days of the first day of work, 2 hours of training in the care of such residents annually. These hours may count towards the general staff training requirements described above.

13) During your testimony you indicated that Gardant had investors who provided funding for your facilities and operations.

a. Who are the company's largest investors?

As previously stated, Gardant is a third-party manager for the assisted living communities. It does not have an investment interest in any of the communities.

b. What is the return rate investors receive on their investment? Please share the return rate for each of the past five years.

Gardant does not have access to this information.

c. How are returns paid out to investors (i.e., dividends, cash disbursements, or any other method)?

Gardant does not have access to this information.

14) What fees does Gardant charge residents on top of their basic monthly costs?

a. Please provide a copy of the fee schedule for Gardant facilities.

A fee schedule summary is attached as Exhibit 4.

b. Do you charge fees for medical services?

Medical services are included in the Medicaid Waiver Program payment.

c. Do you charge fees for personal services?

We assume that the question regarding charging for "personal services" is meant to address whether we charge for assistance with ADLs. These services are included in the Medicaid Waiver Program payment.

d. What other types of fees does Gardant charge residents?

The only additional fees that residents are charged are beauty shop services, guest meals, and internet services.

e. Do you use a "point schedule" or similar approach to establish fees for certain services? If so, how does this system work?

We do not use a point system to determine fees. Our fees are based upon the costs of delivering those services, which includes the cost of staffing, overhead, etc. We develop a person-centered individualized service plan for each resident based upon an assessment of each person's condition and needs.

f. What is the average amount paid in fees by residents at Gardant facilities?

Given the diversity among the communities that we operate (e.g., size, urban vs. rural, resident acuity, tax and insurance expenses), we do not believe that an average is particularly helpful. Residents who are supported by Medicaid generally pay between \$800 to \$1,000 / month from personal funds but often less.

15) Ms. Simpkins: In your testimony, you stated that it would be "unworkable" and "irresponsible" to standardize the regulations that oversee assisted living facilities at

the federal level. Can you tell me specifically how each of the following requirements would harm residents at assisted living facilities?

- a. A minimum daily reimbursement rate for assisted living services
- b. A minimum staffing ratio for memory care units
- c. A minimum standard for dementia training, including content of training and length of training
- d. A requirement to have a nurse or other medical professional on site
- e. A standard definition for a "memory care unit" or other similarly named units

By way of clarification, Ms. Simpkins never stated that standardized regulations would harm residents. The following is a transcript of Ms. Simpkins' testimony regarding standardizing regulations at the federal level.

When we talk about assisted living, it is important to note that every State, every community, and every resident is different. Efforts to standardize all assisted living communities would be both unworkable and irresponsible for resident care.

State regulations appropriately recognize the diversity within assisted living by holding our profession accountable, and they are consistently updated to reflect the evolving nature of our sector and our residents.

We believe that existing Medicaid Waiver Program requirements that were initially reviewed and approved by CMS and are reviewed annually by CMS are appropriate and sufficient to address the issues identified including but limited to staffing, training, and reporting, which allows CMS to monitor and review facility performance.

Assisted living provides life-affirming care for nearly one million seniors every day, and residents and families are consistently satisfied with the care they receive. The safety and security of those residents are our number one priority. We continue to collaborate with State regulators

and share best practices with other care providers throughout the United States to continuously improve policies, procedures, education, and training to meet the current and future needs of the people we serve, including those living with dementia and the employees that serve them.

Gardant appreciates the opportunity to provide your offices with information regarding this critical industry. Gardant looks forward to working with your offices to ensure that all residents continue to receive appropriate support and care.

Respectfully submitted, GARDANT MANAGEMENT SOLUTIONS

U.S. SENATE SPECIAL COMMITTEE ON AGING "ASSISTED LIVING FACILITIES: UNDERSTANDING LONG-TERM CARE OPTIONS FOR OLDER ADULTS" JANUARY 25, 2024 QUESTIONS FOR THE RECORD Richard Mollot

Chairman Robert P. Casey, Jr.

Question:

Can you tell us what standard information about assisted living facilities would be most useful to families and who should be collecting and disseminating that information?

Response:

Seniors and their families would strongly benefit from the following information about assisted living facilities:

1. Staffing, including:

a. the licensure, certification, and training levels of all staff providing resident care or services;

b. whether there is a RN, MD, or other professional (i.e., individual with licensure to provide professional supervision, such as assess residents and manage medications) on staff with a regular presence in the nursing home (full time or part time indicated);

c. the numbers of each type of care staff present in the building by shift and weekday vs. weekend based upon payroll or other auditable records; and

d. Whether there are staff in the building 24/7 (indicating whether or not staff are required to be awake during their shifts).

2. Services offered, including:

a. Care: Whether or not the facility provides specialized dementia care, aging in place, hospice, palliative, and/or Medicaid assisted living (or other reduced cost options), the extent to which these services are available (such as entire facility or one wing), the licensure/certification of individuals providing any special services;

b. Community: Including whether there are resident and/or family councils (with contact information), a recent calendar of activities that the facility provides to residents, and how the facility provides connections to the broader community (i.e., bus to local shopping, religious services, etc.)

3. Costs of residential, care, and other services in a clear and concise manner (including costs of residence, cost of meals, cost of assistance and other services; what is included in base rate vs what will cost extra now or in the future).

4. Resident rights in the facility under state and federal law, including ADA and other non-discrimination rights, rights to access to LTC Ombudsman services, contacts for the LTC Ombudsman, Adult Protective Services, state oversight agency, law enforcement, emergency services and state "No Wrong Door" access point (see https://nwd.acl.gov/index.html).

5. Quality & Safety of facility, including access to complete inspection and citation records that are unredacted (except for the name(s) of residents).

6. Facility policies, including transfer/discharge policies, whether the facility imposes a pre-dispute arbitration clause in its residency agreements, whether residents have rights to have pets, smoking and drinking policies, etc.

7. Ownership of facility, including any individual or entity with 5% or greater ownership interest and the administrator of the facility, in a searchable federal database that provides information on ownership within and across states, with access to inspection and citation records.

To the greatest extent possible, this information should be collected and published by the federal government in an online tool similar to Home Health Compare, Hospice Compare, etc. In addition, facilities should be required to have this information available for inspection by residents, families, and visitors in the facility and on its website (if it has one). The information provided by the facility should be in English and any other language of the residents that it has accepted into its facility.

Question:

The written testimony of Ms. Julie Simpkins stated that federal regulations would be irresponsible. Based on your research, do you think industry standardizations would be irresponsible for resident care?

Response:

The growing body of news media reports, Government Accountability Office reports, and peer-reviewed studies all indicate that, in fact, it is irresponsible not to have baseline federal assisted living standards to protect residents from physical, emotional, and financial harm. It is important to provide some background here. In order to fight growing calls for baseline federal standards, the industry has fallen back on the argument that such standards would inhibit its ability to provide individualized care and services. This is a false argument. Federal regulations are needed to ensure baseline safety, quality, transparency, and accountability. They would actually foster improvements in resident-centered care, by helping individuals and families understand what they have a right to expect and the extent to which a facility will be able to fulfill their needs, expectations, and goals now and in the future.

Question:

Can you speak to ways in which the industry standards could be improved, while still recognizing the diversity within assisted living?

Response:

Some ways in which industry standards could be improved include:

1. Setting baseline requirements for the individuals providing care and services in assisted living (including the minimum numbers of care staff in a facility and the licensure/certification of those staff;

2. Establishing clear definitions of "memory care" and "aging in place" and other terminology used by the industry (so that they are more than just hollow marketing terms);

3. Ensuring that facilities fulfill their promises to seniors and families by establishing standards for government oversight including annual inspections carried out by state inspection teams with relevant core competencies (i.e., nurse, dietician, social worker) and meaningful penalties for violations that impact resident safety and dignity.;

4. Fire, emergency planning, safety requirements;

5. Implement federal community characteristic standards - which were recently promulgated for Medicaid assisted living - for all assisted living.

None of these categories of standards would in any way impede an operator's ability to meet the diverse needs of the community it is serving. For more specific information on these and other policies that would improve quality of life and quality of care in assisted living, please see our report, "Assisted Living: Promising Policies and Practices for Improving Resident Health, Quality of Life, and Safety." https:// nursinghome411.org/ltccc-report-assisted-living-promising-policies-and-practices/

Question:

Ms. Simpkins also states in her testimony that state regulations are "consistently updated." Is it your experience that state regulations are consistently updated? If not, what are your recommendations for how and when they should be updated?

Response:

To my knowledge, state laws and regulations are not consistently updated. In fact, in my experience, state legislators tend to be disinclined to promulgate new assisted living laws and when changes or updates are implemented, they tend to be in response to pressure from industry lobbyists, resulting in a significant weakening of state rules and their enforcement.

Senator Kirsten Gillibrand

Question:

Assisted living facilities are not required to disclose inspection reports, financial reinvestment in patient care, or staffing requirements for services offered. Residents and families should be aware of safety violations found during inspections, but this information is not always made public. In New York, citations are available, but the full inspection report is not.

How would resident care improve by making information from current assisted living facilities inspections public?

Response:

Better information would enable prospective residents to make informed choices about where they are going. It would enable current residents and families to be aware of what is going on in their assisted living - their home - and hold their facility accountable for addressing the problems.

Question:

Does a lack of information exacerbate the health and financial burdens for residents and their families to house loved ones in assisted living facilities? What information should be available to the aging population to help them prepare for long-term care?

Response:

In short, yes. People tend to think that their base monthly payment will cover most if not all of their costs. However, additional costs often arise unexpectedly, particularly as an individual's needs increase. A resident may not realize when they ask for a helping hand it will come with a price tag.

Seniors and their families need accessible information on what services are available to them, where they can access those services (with meaningful information on the potential strengths and weaknesses of different options), who will be providing the services (nurse, certified nurse aide, or someone with less or no training), how much services will cost, and options for paying for those services. Furthermore, seniors and their families should be informed, in clear language, about the agencies or companies that are providing services and the quality record of those providers.

Question:

Would transparency in the assisted living facility industry help residents during the transition from assisted living to skilled nursing facilities?

Response:

Yes. Due to lax state rules and oversight, too many assisted living retain residents for whom they can no longer provide safe care. Transparency would empower residents and families to make choices appropriate for their needs.

Question:

Private equity firms have capitalized on assisted living facilities as a real estate opportunity to collect higher profit yields than other investments in offices and hotels. Assisted living facilities increasingly house older adults whose the health needs demand care and specialization, but private equity firms have minimal accountability for the services they provide.

When residents suffer harm while living in assisted living facilities, are they able to choose a course of action, such as a jury trial or arbitration, to hold assisted living facilities accountable. Does the current process adequately protect residents and the public from unnecessary harm? Does it facilitate transparency?

Response:

Too often, the answer to this question is no. Many assisted living companies insert pre-dispute arbitration clauses into their residency agreements, which effectively prevents someone from suing, even when their loved one has been severely harmed or dies as a result of neglect or grossly substandard care.

Question:

What consequences do private equity firms face when negligent behavior or harm occurs to residents or workers under their supervision?

Response:

Unfortunately, due to the lack of accountability and transparency, we have no way of knowing specifics about consequences for assisted living operators. However, we do know in the senior care industry generally that the use of complex investment vehicles in which the facility itself is depleted of assets is a common technique for avoiding accountability for negligence or, even, avoidable death.

Question:

How well is private equity delivering on the concept of an assisted living facilities as a social model? Are private equity-operate assisted living facilities performing comparably with the rest of the industry?

Response:

Based on what we have seen in nursing homes (and other areas of health care) quality and safety tend to degrade significantly when private equity investment enters the sector.

Alzheimer's Association and Alzheimer's Impact Movement Statement for the Record

United States Senate Special Committee on Aging Hearing on "Assisted Living Facilities: Understanding Long-Term Care Options for Older Adults"

January 25, 2024

The Alzheimer's Association and Alzheimer's Impact Movement (AIM) appreciate the opportunity to submit this statement for the record for the Senate Special Committee on Aging hearing on "Assisted Living Facilities: Understanding Long-Term Care Options for Older Adults." The Association and AIM thank the Committee for its continued leadership on issues important to the millions of individuals living with Alzheimer's and other dementia and their caregivers. This statement highlights the importance of policies that will help ensure a quality direct care workforce that can meet the unique needs of our nation's growing number of Americans living with Alzheimer's and other dementia.

Founded in 1980, the Alzheimer's Association is the world's leading voluntary health organization in Alzheimer's care, support, and research. Our mission is to eliminate Alzheimer's and other dementia through the advancement of research; to provide and enhance care and support for all affected, and to reduce the risk of dementia through the promotion of brain health. AIM is the Association's advocacy affiliate, working in a strategic partnership to make Alzheimer's a national priority. Together, the Alzheimer's Association and AIM advocate for policies to fight Alzheimer's disease, including increased investment in research, improved care and support, and the development of approaches to reduce the risk of developing dementia.

An estimated 6.7 million Americans age 65 and older are living with Alzheimer's dementia in 2023. Total payments for all individuals with Alzheimer's or other dementias are estimated at \$345 billion (not including unpaid caregiving) in 2023. Medicare and Medicaid are expected to cover \$222 billion or 64 percent of the total health care and long-term care payments for people with Alzheimer's or other dementias, which are projected to increase to more than \$1.1 trillion by 2050. These mounting costs threaten to bankrupt families, businesses, and our health care system. Unfortunately, our work is only growing more urgent.

Assisted living is one of the fastest-growing options for residential housing for older Americans. There are approximately 30,600 assisted living communities with nearly 1.2 million licensed beds in the United States today. Assisted living bridges the gap between living independently and living in a nursing home and more assisted living providers are offering services designed specifically for people with dementia.

Use and Costs of Long-Term Care for Individuals with Alzheimer's and Dementia

People living with Alzheimer's and other dementia make up a significant portion of all long-term care residents, comprising 48 percent of residents in nursing homes and 34 percent of all residents in assisted living communities and other residential care facilities. Twenty-four percent of Medicare beneficiaries with Alzheimer's or other dementias reside in a nursing home, compared with one percent of Medicare beneficiaries without these conditions. Approximately 75 percent of individuals with Alzheimer's disease diagnosed at age 70 will reside in a nursing home by age 80, compared with only four percent of the general population surviving to age 80. Given our constituents' intensive use of these services, the quality of this care is of the utmost importance. As a result, we encourage the Committee to consider the following recommendations to improve long-term care and support for the growing number of Americans affected by Alzheimer's and other dementia.

Best Practices in Dementia Care

Given our constituents' intensive use of these services, the quality of this care is of the utmost importance. To this end, the Alzheimer's Association developed the <u>Alzheimer's Association's</u> <u>Dementia Care Practice Recommendations</u>. Grounded in the fundamentals of person-centered care and published in a special supplement of *The Gerontologist*, the Dementia Care Practice Recommendations for quality care practices based on a comprehensive review of current evidence, best practice, and expert opinion. The Dementia Care Practice Recommendations were developed to better define quality care across all settings, including assisted living, and throughout the disease course. They are intended for professional care providers who work with individuals living with dementia and their families in long-term and community-based care settings.

Assisted living communities should ensure that the care and services provided have a Person Centered Focus which includes: (1) Knowing the person living with dementia. The individual living with dementia is more than a diagnosis. It is important to know the unique and complete person including his/her values, beliefs, interests, abilities, likes and dislikes --- both past and present. This information should inform every interaction and belief; (2) Recognize and accept the person's reality. It is important to see the world from the perspective of the individual living with dementia. Doing so recognizes behavior as a form of communication, thereby promoting effective and empathetic communication that validates feeling and connects with the individual and his/her reality; (3) Identify and support ongoing opportunities for meaningful engagement. Every experience and interaction can be seen as an opportunity for engagement. Engagement should be meaningful to, and purposeful for, the individual living with dementia. It should support interests and preferences, allow for choice and success, and recognize that even when the dementia is most severe, the person can experience joy, and comfort, and meaning in life; (4) Create and maintain a supportive community for individuals, families and staff. A supportive community allows for comfort and creates opportunities for success. It is a community that values each person and respects individual differences, celebrates

accomplishments and occasions, and provides access to and opportunities for autonomy, engagement, and shared experiences; (5) **Evaluate care practices regularly and make appropriate changes.** It is important to regularly evaluate practices and models, share findings, and make changes to interactions, programs, and practices as needed. A culture of continuous quality improvement is a continuing theme throughout all of the recommendations.

Detection and diagnosis is one of two new areas of focus in the Dementia Care Practice Recommendations. Assisted living communities should: (1) make information about brain health and cognitive aging readily available to older adults and their families; (2) all non-physician care staff should be trained to know the signs and symptoms of cognitive impairment, that signs and symptoms do not constitute a diagnosis of dementia, and that a diagnostic evaluation is essential for diagnosis of dementia; (3) non-physician care staff should listen for concerns about cognition, observe for signs and symptoms of cognitive impairment, and note changes that occurs abruptly or slowly over time; (4) develop and maintain procedures for detection of cognition and referral for diagnostic evaluation; (5) use a brief mental status to detect cognitive impairment only if such testing is with the scope of practice of the non-physician care staff, the non-physician care staff has been trained to use the test, required consent procedures are know and used and there is an established procedure for offering a referral for individuals who score below a preset score on the test to a physician for a diagnostic evaluation; (6) encourage older adults whose physician has recommended a diagnostic evaluation to follow through on the communication; (7) support a better understanding of a dementia diagnosis.

Assessment and care planning is crucial to provide quality dementia care. Assisted living communities should: (1) perform regular, comprehensive person-centered assessments and timely interim assessments; (2) use assessment as on opportunity for information gathering, relationship building, education, and support; (3) approach assessment and care planning with a collaborative team approach; (4) use documentation and communication systems to facilitate the delivery of person-centered information between all care providers; (5) advance care planning is another continuing theme throughout the Recommendations. An early and ongoing discussion of what matters, including values, quality of life and goals of care, are essential for person-centered care. Encourage advance planning to optimize physical, psychosocial, and fiscal well-being and to increase awareness of all care options, including palliative and hospice care.

Medical management is the second new topic area of the Recommendations. Assisted living communities must ensure that: (1) non-physician staff adopt a holistic person-centered approach to care and embrace a positive approach to the support for persons living with dementia and their caregivers that acknowledges the importance of individuals' ongoing medical care to their well-being and quality of life; (2) staff understand the role of medical providers in the care of persons living with dementia and the contributions they make towards a shared vision of care; (3) staff are educated on common comorbidities of aging and dementia and encourage persons living with dementia and their families to talk with the person's physician about how to manage comorbidities in a residential setting; (4) nonpharmacologic interventions

are the first line of treatment in managing behavioral and psychological symptoms of dementia; (5) although nonpharmacological interventions are preferred, there are times when pharmacological treatment may be warranted for behavioral and psychological symptoms; (6) there is an understanding of the general principles for starting and more importantly, ending pharmacological treatments and there must be regular medication reviews to consider the discontinuation of medications when appropriate.

Information, education and support is crucial for persons living with dementia and their care partners. Assisted living communities should: (1) provide education and support early in the disease to prepare for the future; (2) encourage care partners to work together and plan together; (3) build culturally sensitive programs that are easily adaptable to special populations; (4) ensure education, information, and support programs are accessible during times of transition; (5) use technology to reach more families in need of education, information, and support.

A large majority of residents in assisted living need assistance with Activities of Daily Living (ADLs). Assisted living communities should: (1) acknowledge support of ADL function must recognize the activity, the individual's functional ability to perform the activity, and the extent of cognitive impairment; (2) follow person-centered practices when providing support for all ADL needs; (3) when providing support for dressing, attend to dignity, respect and choice; and the dressing environment; (4) when providing support for toileting, attend to dignity and respect the toileting process, the toileting environment, and health and biological considerations; (5) when providing support for eating, attend to dignity, respect and choice the dining environment; health and biological considerations; adaptations and functioning; and food, beverage, and appetite.

Up to 97 percent of persons living with dementia experience at least one **Dementia-Related Behavior**, the most common being apathy, depression, irritability, agitation, and anxiety. Assisted living communities should: (1) identify characteristics of the social and physical environment that trigger or exacerbate behavioral and psychological symptoms for the person living with dementia; (2) implement non-pharmacological practices that are person-centered, evidence-based, and feasible in the care setting; (3) recognize the investment required to implement non-pharmacological practices, including staff training and equipment costs; (4) adhere to protocols of administration to ensure that practices are used when and as needed, and sustained in ongoing care; (5) develop systems for evaluating effectiveness of practices and make changes as needed.

An adequate and well-trained **Workforce** is fundamental to providing quality dementia care. Assisted living communities should: (1) provide a thorough orientation program for new staff, as well as ongoing training; (2) develop systems for collecting and disseminating person-centered information; (3) encourage communication, teamwork, and interdepartmental/interdisciplinary collaboration; (4) establish an involved, care and supportive leadership team; (5) promote and encourage resident, staff, and family relationships; (5) evaluate systems and progress routinely for continuous improvement. To maintain a strong dementia care workforce assisted living communities should: (1) have staffing levels adequate to allow for proper care at all times — day and night; (2) ensure that all staff be sufficiently trained in all aspects of care, including dementia care; (3) staff should be adequately compensated for their valuable work; (4) staff should work in a supportive atmosphere that appreciates their contributions to overall quality care because improved working environments will result in reduced turnover in all care settings; (5) ensure that staff have the opportunity for career growth. Additionally, we know that consistent assignment is an important component of quality care for staff working with residents with dementia.

A **Supportive and Therapeutic Environment** contributes significantly to the quality of life for persons with dementia. Assisted living communities should: (1) create a sense of community within the care environment; (2) enhance comfort and dignity for everyone; (3) support courtesy, concern, and safety; (4) provide opportunities for choice for all persons; (5) offer opportunities for meaningful engagement to members of the community.

Persons with dementia often have **Transitions** between assisted living and other settings including emergency rooms, hospitals, and nursing homes. Assisted living communities should: (1) prepare and educate persons living with dementia and their care partners about common transitions in care: (2) ensure complete and timely communication of information between, across and within settings; (3) evaluate the preferences and goals of the person with dementia along the continuum of transitions of care; (4) create strong interprofessional collaborative team environments to assist persons living with dementia and their care partners as they make transitions; (5) initiate/use evidence-based models to avoid, delay, or plan transitions of care.

While much of the training for long-term care staff is regulated at the state level, we encourage the Committee to consider proposals that support state health departments in implementing and improving dementia training for direct care workers and their oversight of these activities. Training policies should be competency-based, should target providers in a broad range of settings and not limited to dementia-specific programs or settings, and should enable staff to (1) provide person-centered dementia care based on a thorough knowledge of the care recipient and their needs; (2) advance optimal functioning and high quality of life; and (3) incorporate problem-solving approaches into care practices.

We also urge the Committee to support state dementia efforts in the following ways: (1) any training curriculum should be delivered by knowledgeable staff that has hands-on experience and demonstrated competency in providing dementia care; (2) continuing education should be offered and encouraged; and (3) training should be portable, meaning that these workers should have the opportunity to transfer their skills or education from one setting to another.

Acuity-Based Staffing

Fifty-eight percent of assisted living communities offer programs for residents with Alzheimer's or other dementias, and 19 percent have a dementia care unit. Staffing requirements in long-term care settings providing dementia care vary by the setting and state. Residential care, including assisted living communities, is licensed by the respective state agencies, though most states do not specify minimum staffing levels or ratios in dementia care. Appropriate staffing ratio practices affect the quality of life for those in assisted living communities, especially those living with dementia. However, there is limited research identifying an optimal ratio of staffing.

In residential long-term care settings, staffing is a key driver of quality care. A review of scholarly literature on this subject verifies that there is a clear association between higher levels of licensed staff and higher quality of care. A resident's individual outcomes (including the presence of weight loss, bed sores, and general functional ability), are regularly linked to staffing and there is an association between higher turnover rates and lower quality of care.

Beyond meeting any mandatory staffing numbers required in organizations serving persons with dementia, there is a growing awareness of the need to deploy staff in a manner that aligns with resident routines and needs. A simple staffing ratio, while clear, may not be sufficient to consistently deliver high-quality care. The makeup of the resident population including, for example, the number of people with dementia, should impact the numbers of nursing staff present at any given time. Encouraging the implementation of acuity-based staffing models could improve the quality of care individuals receive in assisted living communities. Acuity-based staffing refers to "the allocation of clinical expertise and caregiver resources necessary to ensure a resident's quality of care/life, based on their medical complexity, ADL dependency, and behavior challenges, as defined by a formal assessment process."

For long-term care communities, developing the appropriate acuity-based nurse staffing levels can be challenging but existing research has provided guidance to inform facilities and policymakers. According to Harrington et. al. (2020), there are five steps to determine sufficient nurse staffing levels: (1) determine the collective resident acuity and care needs; (2) determine the facility's actual per resident per day staffing levels; (3) determine appropriate nurse staffing levels based on resident acuity; (4) identify evidence regarding the adequacy of staffing; (5) analyze the adequacy of facility staffing.

Expanding the Health Care Workforce Serving Older Adults

As highlighted above, while the prevalence of Alzheimer's disease increases, so does the need for well-trained members of the paid dementia care workforce. Shortages in direct care workers in long-term care settings will place an even bigger burden on family and friends who provide unpaid care — already an effort equivalent to nearly \$257 billion annually. From 2016 to 2026, the demand for direct care workers is projected to grow by more than 40 percent, while their availability is expected to decline. The United States will have to nearly triple the number of geriatricians to effectively care for the number of people projected to have Alzheimer's in 2050, while efforts to increase recruitment and retention remain slow. In 48 U.S. states, double-digit

percentage increases in home health and personal care aides will be needed by 2028 to meet demand. An estimated 1.2 million additional direct care workers will be needed between 2020 and 2030 — more new workers than in any other single occupation in the United States.

Although more direct care workers will be needed in the years ahead, the long-term care field is already struggling to fill existing direct care positions. Turnover rates are high in this workforce — estimated at 64 percent annually for direct care workers providing home care and 99 percent for nursing assistants in nursing homes — and recruitment and retention are long-standing challenges. In turn, instability in the workforce and understaffing across care settings can lead to stress, injury, and burnout among direct care workers while also compromising care access and quality.

State-Level Actions to Improve Quality Dementia Care

The Committee may find the following state-based efforts instructive, and we would be pleased to provide additional examples at your request.

PENNSYLVANIA

In 2022, skilled nursing facility regulations were updated in Pennsylvania (Regulation No. 10-224 #3343) and require dementia training as part of all staff orientation.

In addition to looking to the states for ways to ensure safe, quality, person-centered care in assisted living facilities, Congress should consider the steps it can take at the federal level, including expanding the necessary workforce and improving dementia training standards and access.

GEORGIA

In Georgia, where there are currently over 150,000 individuals living with Alzheimer's, House Bill 987 (Act 403 of 2020) was enacted, establishing memory care licensure and dementia training for all direct care workers and all other LTC staff in memory care centers. The legislation requires that all Assisted Living Facilities and Personal Care Homes that offer memory care receive a certificate to operate from the Department of Community Health, and it requires the Department of Community Health to establish additional requirements to better serve people with dementia in memory care centers in the areas of (1) admissions, assessment, and care planning; (2) physical settings to accommodate and protect residents; and (3) protocols to prevent elopement.

Further, the legislation requires memory care centers to have at least one dementia-trained direct care staffer for every 12 residents during the daytime and one to 15 overnight (based on a monthly average); that all staff receive four hours of dementia training within their first 30 days of employment including (1) basic education on the process and management of Alzheimer's and other dementias; (2) reducing challenging dementia behaviors; (3) identifying and reducing

safety risks to residents with dementia; and (4) successful communication techniques with individuals with dementia. The legislation also required direct care staff in the memory center to receive at least 16 hours of specialized dementia training within their first 30 days of employment and eight hours of dementia training each year thereafter. The dementia training for direct care staff must incorporate (1) the nature of Alzheimer's and other dementias; (2) the center's philosophy related to the care of residents with dementia; (3) policies and procedures for dementia care; (4) dementia-related behaviors and positive interventions to reduce them; (5) maintaining the safety of the resident; and (6) the role of the family in caring for residents with Alzheimer's and other dementias.

INDIANA

Introduced in 2021, Indiana Senate Bill 169 (Public Law 48 of 2021) requires assisted living facilities that provide memory care services to disclose their dementia-specific care, staffing levels, and transfer/discharge policies. Introduced in 2022, Senate Bill 0353 (Public Law 44 of 2022) establishes dementia training standards for home health aides caring for people with dementia, requiring three hours of annual continuing education on dementia and six hours of initial dementia training for new hires.

Conclusion

The Alzheimer's Association and AIM appreciate the Committee's steadfast support and commitment to advancing issues important to the millions of individuals living with Alzheimer's and other dementia, as well as their caregivers. We look forward to working with the Committee and other members of Congress in a bipartisan way to advance policies that will ensure individuals living with Alzheimer's and other dementia have adequate access to high-quality assisted living and all long-term and community-based care services, especially as the population of Americans living with dementia continues to grow.

January 25, 2024

The Honorable Bob Casey Chairman United States Senate Special Committee on Aging G16 Dirksen Senate Office Building Washington, DC 20510

The Honorable Mike Braun Ranking Member United States Senate Special Committee on Aging G16 Dirksen Senate Office Building Washington, DC 20510

Dear Chairman Casey and Ranking Member Braun:

On behalf of Argentum, the largest national association representing assisted living communities and the older adults and families they serve, thank you for holding this important hearing on longterm care options for older Americans. Approximately 1.4 million seniors reside in assisted living or memory care, and more than 1.6 million individuals work in our communities. Assisted living is critically important to both the residents it serves, and as a solution to the care crisis for our rapidly aging nation.

Assisted living was created to provide seniors with a choice and dignity in care in a residential setting, as opposed to institutional nursing home facilities. Assisted living communities are not nursing homes or institutional care settings. Our communities are individual apartment homes where residents share caregivers who focus on activities of daily living (ADLs), as well as the social determinants of health. Not only is care provided, but our social model promotes restaurant-like nutritious meals, abundant social and educational activities and strong resident engagement. Pets and family involvement are strongly encouraged. Our goal is to assist seniors in living well.

By focusing on the social determinants of health, assisted living provides more of what matters when it comes to helping seniors stay as healthy, happy, and independent as possible. Assisted living consistently receives extremely high customer satisfaction rates from residents and their families, and by helping to lower costs within the health care system, preserves vital resources for public health programs like Medicare and Medicaid and veterans' health.

Caring for an Aging Population

According to the Census Bureau, the U.S. population is aging at the fastest rate in more than a century. Last year, the Bureau reported the highest median age in history, and this trend will only accelerate in the coming years. Today, the average age of an American is 39; by 2100, it will grow to at least 49.¹

¹ U.S. Census Bureau, America Is Getting Older, June 22, 2023 <u>https://www.census.gov/newsroom/press-releases/2023/population-estimates-characteristics.htm</u>

Each day, more than 10,000 Americans turn 65—a trend that will continue as the youngest Baby Boomers reach 65 in the next five years. There are currently 62 million Americans aged 65 and above, accounting for 18% of the population. In just 30 years, 84 million adults 65 and older will make up an estimated 23% of the population. In this same period, the number of centenarians will more than quadruple, from an estimated 101,000 today to roughly 422,000 in 2054. By 2029, there will be more seniors than children for the first time in American history.²

The number of Americans needing long-term care will increase as well. Federal data shows that someone turning 65 today has a 70% chance of needing some type of long-term care in their lifetime, 50% will need more extensive care in a skilled nursing facility or assisted living community, and 20% will need it for five years or more. By 2050, the number of Americans requiring paid long-term care will grow to more than 27 million.³

According to a study by the National Institutes of Health (NIH), 94% of assisted living residents have at least one chronic condition, while 76% have two or more.⁴ A separate study by the Nonpartisan and Objective Research organization (NORC) at the University of Chicago found that the average assisted living resident manages 14 chronic conditions. The most common include Alzheimer's disease and other dementias (42%), heart disease (34%), depression (28%), diabetes (17%) and COPD (15%).⁵ By coordinating care and managing these chronic conditions, assisted living communities improve the health and wellbeing of their residents while decreasing the financial strain on the healthcare system.

Assisted Living is the Most Cost Effective Care Model, Saving Families and Health Programs Billions

Compared to other long-term care providers, assisted living offers lower costs, improved quality of life, better health outcomes, and reduced health care costs. The average cost of a private room in a nursing home is \$108,405 and \$95,000 for a semi-private room. The average cost of a home health aide is \$61,776 (based on 40 hours a week) but can reach as much as \$235,000 for 24/7 coverage, and does not cover the costs of housing, meals, transportation, or offer socialization, all of which are core components of assisted living. The national average for assisted living is \$54,000.⁶

⁶ Genworth Financial, Cost of Care Survey (2021), <u>https://www.genworth.com/aging-and-you/finances/cost-of-</u> <u>care.html</u>

Assisted living preserves vital social safety net programs. Today, Medicaid is the largest payer of long-term care. According to estimates, if assisted living were not an option, as many as 61% of senior residents may be forced into far-costlier skilled nursing facilities at a cost of \$43.4 billion. This additional cost would cripple state Medicaid budgets and expedite the potential insolvency of Medicare and Medicaid.

The assisted living care model focuses on the social determinants of health, chronic disease management, social interaction and often facilitates care coordination with other healthcare providers. Though no assisting living facility receives Medicare dollars, this coordinated care, including social and preventative care, keeps seniors healthier and saves Medicare an estimated \$15.4 billion through reduced hospitalizations and readmissions, less social isolation, and delay in far costlier skilled nursing care.⁷

The savings are not isolated to just Medicare and Medicaid. In 2021, the Department of Veterans Affairs reported to Congress the critical need for increasing veterans access to different long-term care settings as the high cost and institutional nature care continue to overburden VA budgets. The VA found that veteran placement in a nursing home costs \$120,000 annually, compared to only \$51,000 in an assisted living community. The report states that providing care at an assistant living community would save almost \$70,000 per veteran per year.⁸

The nonprofit Family Caregiver Alliance reports that more than 1 in 6 Americans working full-time or part-time assist with the care of an elderly or disabled family member, relative, or friend, and 70% suffer work-related difficulties due to their dual roles. The survey estimates that 61% of caregivers who work outside the home experience at least one employment change due to their caregiving responsibilities, such as cutting back work hours, taking a leave of absence, or disciplinary actions tied to performance or attendance.⁹

Recent findings estimate that family care giving led to the loss of 656,000 jobs, with an additional 791,000 family caregivers suffering from absenteeism at work. These job losses and absenteeism among family members and informal caregivers have a direct annual economic impact of \$43.9 billion, and indirect costs of \$221 billion in lost productivity. By easing these burdens, assisted living can improve the financial well-being of families.¹⁰

Assisted Living Enjoys Consistently High Customer Satisfaction

Assisted living consistently receives very high customer satisfaction ratings. According to the J.D. Power 2023 US Senior Living Satisfaction Survey, senior living communities received a satisfaction score of 837 (on a 1,000-point scale) — higher than industries like travel and

hospitality, which received a score of 596.¹¹ And based on industry surveys, more than 90% of residents report high levels of satisfaction, 85% report high value, 70% report an improved health outlook, and nearly 75% report an improved quality of life. Additionally, 99% feel safe living in their community, and 91% feel safer than living on their own.

Assisted Living Not Immune to Workforce Shortage But Provides Solutions

The United States is currently experiencing a labor shortage, and the senior living industry is no exception. After losing hundreds of thousands of jobs during the pandemic, today, there is a shortage of 400,000 caregivers across all long-term care settings.¹²

While there has been some improvement since the depths of the pandemic, many communities are still facing significant workforce shortages. To recruit and retain staff, more than 90% of assisted living communities are offering higher wages, 70% are offering signing bonuses, and many are having to rely on staffing agencies, which can cost upwards of two, three, or more times as much per hour as full-time employees.¹³

Total employment in the long-term care industry is projected to reach almost 8.3 million by 2040, an increase of some 2.5 million jobs—or 42.1%—from its 2021 employment level of 5.8 million. In addition to the new jobs that will be created, there will be an additional 18 million job openings that result when employees either exit the labor force or transfer to a different occupation. In total, the combined senior care industry will need to fill more than 20.2 million occupational openings by 2040.⁴

The federal government administers successful workforce development programs via the Departments of Labor and Health & Human Services, but there has not been a focus on addressing the care needs of America's seniors. Simply modifying the priorities of these existing workforce programs, such as apprenticeships, to highlight the opportunities and career pathways within senior care would dramatically increase the pipeline of new caregivers.

Argentum has been working with members of Congress on both sides of the aisle to help solve the workforce crisis, and helped pass legislation to help transform existing education and training programs, and to make necessary investments to develop the senior care workforce. The bill provides \$285 million to expand workforce opportunities through apprenticeships grants, \$65 million for Strengthening Community College Training Grants; and \$1.8 billion for Job Corps.

Workforce shortages will not be solved by legislation alone. In 2023, Argentum released a new strategic plan that, in part, seeks to engage, develop, and support 2 million career opportunities in the profession. One way that Argentum is working to address the workforce shortage is to

https://www.idpower.com/business/press-releases/2023-us-senior-living-satisfaction-study ¹² Argentum, Workforce Projections for Senior Care Sectors, March 2023 https://www.argentum.org/argentumsworkforce-projections-for-senior-care-report-sees-a-need-to-fill-20-million-iob-openings-through-2040/ ¹³ Leading Age, Workforce Informal Snap Poll: Toplines, <u>https://leadingage.org/wp-</u> content/uploads/2023/03/Workforce-Snap-Poll-Toplines-2023-1.pdf

¹¹ J.D. Power 2023 US Senior Living Satisfaction Survey, November 15, 2023

¹⁴ Argentum, Workforce Projections for Senior Care Sectors, March 2023 <u>https://www.argentum.org/argentums-workforce-projections-for-senior-care-report-sees-a-need-to-fill-20-million-job-openings-through-2040/</u>

partner with Job Corps centers to create new senior living programs. There are presently three pilot sites, in Maryland, Kentucky, and Nevada, where students can learn more about the breadth of career opportunities in senior living, covering areas like caregiving and nursing, hospitality and resident service, dining and culinary services, building maintenance and housekeeping, sales, marketing, office support, and management.

This is a unique collaboration that can serve as a blueprint for matching interested Job Corps students to jobs serving senior living communities. There are real career-long pathways for young people in caring for residents in assisted living, memory care, and other senior living settings.

Argentum administers a national Department of Labor apprenticeship program, the Healthcare Apprenticeship Expansion Program that will serve as the framework for including Job Corps students as recipients of the national apprenticeship program. The HAEP collaborative is addressing the skills gap in healthcare and healthcare IT occupations by expanding apprenticeship pathways for positions like CNAs, LPNs, RNs, and rehab technicians, as well as creating new apprenticeship programs for healthcare leadership positions such as nursing directors and executive directors. Argentum and its partners plan to enroll and support over 7,200 apprentices by the end of this year.

It is worth noting that despite recent efforts to set minimum federal staffing standards for longterm care providers, there is no evidence that nationally mandated staffing levels would improve health outcomes. In fact, a 2023 Kaiser Family Foundation report stated that there was "no single staffing level that would guarantee quality care."¹⁵

Assisted living communities are licensed and regulated in all 50 states. This regulatory framework encourages states to innovate and explore ways to provide cost-effective long-term care at a much more local level than could ever be replicated by one-sized-fits-all federal regulations.

Last year, Argentum, the American Seniors Housing Association (ASHA), LeadingAge, and the National Center for Assisted Living (NCAL), together with the National Association for Regulatory Administration (NARA) formed the Quality in Assisted Living Collaborative to identify, define, and develop model guidance for assisted living. This industrywide initiative is expected to result in greater consistency across states, and the Collaborative's resources will be available to aid and educate providers, regulators, policymakers, and other stakeholders.

Resident Safety

Many Americans prefer to age in place in their own homes, but this is not always the best, or safest option for everyone. Assisted living communities offer dignity and peace of mind to those who can no longer live independently, or that require more assistance than an informal caregiver can provide, which is why surveys find that 91% of residents say they feel safer than living on their own.

¹⁵ KFF News, CMS Study Sabotages Efforts to Bolster Nursing Home Staffing, Advocates Say, August 29, 2023 <u>https://kffhealthnews.org/news/article/cms-study-nursing-home-staffing-levels/</u>

The Alzheimer's Association estimates that 60% of people living with dementia will wander at least once; many do so repeatedly and without warning.¹⁶ Professionally managed communities have security procedures such as exit/entry logs, wearable tracking devices, and cameras in place to keep residents safe, but assisted living communities are residents' homes and unless an independent physician has deemed them a risk for their own safety, they are free to come and go from their home as they choose.

A recent article by *The Washington Post* examined tragic but isolated incidents of resident elopements. Resident safety is job one, and any fatality is one too many. However, the reporting failed to note just how rare these incidents are. According to the Post's own data, which we have not been able to review or corroborate, 99.97% of assisted living residents never experience a wandering episode like those the article portrays, and fatalities due to wandering represent a small percentage (0.0015%) of the 6.2 million assisted living residents served in the last five years.

The article also failed to note what Argentum told the reporters before publication and in a joint industry letter to the editor with other long-term care providers that the Post declined to publish — nothing is more important than our residents' safety. When protocols and safety procedures are not followed, appropriate disciplinary action should be taken. Argentum strongly supports state regulations already in place to investigate incidents and punish any wrongdoing, up to, and including, community closures, if warranted.

Conclusion

In conclusion, I want to thank you for the opportunity to provide comments for today's hearing. Argentum and its members look forward to working with you and your colleagues to pursue costeffective solutions to meet the challenges of our rapidly aging population. Please contact Maggie Elehwany, J.D., Argentum Senior Vice President of Government affairs at <u>melehwany@argentum.org</u> with any questions or requests for additional information.

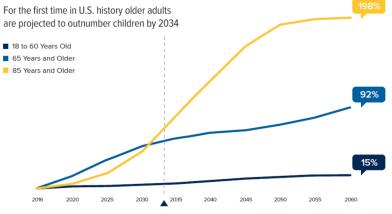

Sincerely,

James Balda President & CEO Argentum

The Honorable Bob Casey Chairman United States Senate Special Committee on Aging G16 Dirksen Senate Office Building Washington, DC 20510

The Honorable Mike Braun Ranking Member United States Senate Special Committee on Aging G16 Dirksen Senate Office Building Washington, DC 20510

Dear Chairman Casey and Ranking Member Braun:

Oregon Health Care Association (OHCA) is a nonprofit trade association that represents 518 assisted living and residential care providers in Oregon. OHCA has improved the lives of older adults and persons with disabilities in Oregon by advocating for quality care since 1950, and our team of qualified staff works each day to ensure that Oregon remains a leader in providing excellent long term care. Our top priority has always been, and continues to be, a commitment to helping members provide quality care while supporting the staff who provide that care.

Assisted living is highly regulated in Oregon, with regulations governing all aspects of care from preadmission disclosures to staffing levels and staff training and much more. The regulations reflect Oregon's values and philosophies on providing quality, person-centered care. These regulations are "designed to enhance the dignity, independence, individuality, and decision making ability of the resident in a safe and secure environment while addressing the needs of the resident in a manner that supports and enables the individual to maximize abilities to function at the highest level possible."

Required Disclosure to Promote Transparency

During the recent Senate hearing, testimony was shared that residents and families need to have information to make informed decisions. To promote transparency and informed decision making, Oregon regulations require assisted living facilities to provide potential residents and their family members with different types of disclosure documents prior to move-in. The first is a "Consumer Summary Statement" that is specific to the facility and must address the following components:

- A summary of the services provided by the facility.
- A summary of the services and types of care the facility *does not* provide.
- A statement that, if the facility is not capable of meeting the resident's needs for care and services, the facility may require the resident to move to another facility or care setting, in accordance with applicable regulations.

105

Oregon's Voice for Long Term Care & Senior Housing

 A statement explaining that, if a resident leaves the facility to receive acute medical, psychiatric, nursing or other specialized care, the facility will evaluate the facility's ability to meet the resident's care needs before the resident is permitted to return to the facility, in accordance with applicable regulations.

Of equal importance, the Consumer Summary Statement *must be signed* by the resident or the person acting on behalf of the resident to confirm they received the disclosure statement and understand the content and implications of the information shared. The Consumer Summary Statement is also made available to the public through the state licensing agency's website: <u>Oregon Dept of Human Service</u> <u>Consumer Summary webpage</u>.

The second disclosure form is the "Uniform Disclosure Statement," which again is specific to the facility. The "Uniform Disclosure Statement" is concise, but thorough and must address the services offered, whether the cost of those services is included in the base rate or are available at an additional cost, and common questions that residents and/or families may have about operations (e.g., medication administration, typical staffing patterns, staff training, and discharges/move-outs). You can access a copy of this form here: <u>ODHS Uniform Disclosure Statement APD Form 9098A</u>

The third disclosure document is the Residency Agreement, which must be reviewed by the state licensing agency before it can be used with residents and their families. Under Oregon regulations, the Residency Agreement must address:

- Terms of occupancy.
- Payment provisions including the basic rental rate and what it includes, cost of additional services, billing method, payment system and due dates, deposits, and non-refundable fees, if applicable.
- The method for evaluating a resident's service needs and assessing the costs for the services provided.
- Policy for increases, additions, or changes to the rate structure, including but not limited to the
 minimum requirement that residents be provided 30 days prior written notice of any facilitywide changes to the rates.
- Refund and proration conditions.
- A description of the scope of resident services available.
- A description of the service planning process.
- Additional available services.
- The philosophy of how health care and activity of daily living services are provided to the resident.
- · Resident rights and responsibilities.
- The facility's system for packaging medications including the option for residents to choose a pharmacy.
- Criteria, actions, circumstances, or conditions that may result in a move-out notification or intrafacility move consistent with applicable regulations.
- Resident rights pertaining to notification of involuntary move-out.
- Notice that the state licensing agency has the authority to examine resident records as part of the evaluation of the facility.
- The facility's staffing plan.

106

Staffing to Meet Residents' Needs

Unlike skilled nursing facilities, which provide 24-hour skilled services and medical assistance, assisted living providers provide a wide range of support with activities of daily living in a non-medical, home-like environment. Assisted living residents can be independent with only a need for medication assistance or they can require cueing and direction with personal hygiene as well as assistance with ambulation and transfers. The population of residents at each assisted living facility is unique and assisted living providers therefore need to assess staffing levels based on the overall needs of its specific resident population at any given time.

Oregon recognizes that staffing an assisted living facility is an art, not a science because the needs of each resident are unique.

Oregon has an overarching requirement that assisted living facilities must have sufficient staff to "meet the 24-hour scheduled and unscheduled needs of each resident." Assisted living facilities are also required to adopt and implement a technology-based Acuity-Based Staffing Tool (ABST) to help them account for each resident's scheduled needs in determining staffing levels. Based on the resident acuity captured in an ABST and other factors, including but not limited to the facility's physical design, fire safety evacuation standards, and residents who require the assistance of two direct care staff, the facility develops and implements an appropriate staffing plan.

To promote transparency, the facility's staffing plan must be posted in the facility in a public area. Information on a facility's staffing levels is therefore readily accessible and available to potential residents and their families as well as current residents and their families.

Required Dementia Care Training

As previously noted, assisted living providers serve a broad range of residents including some with cognitive impairments or dementia. To invest in our frontline staff and better serve residents in assisted living, **Oregon requires specific dementia care training for all direct care staff.** The training must occur *before* the direct care staff starts providing services to residents and required topics include:

- Education on the dementia disease process, including the progression of the disease, memory loss, and psychiatric and behavioral symptoms.
- Techniques for understanding, communicating, and responding to distressful behavioral
- symptoms, including, but not limited to, reducing the use of antipsychotic medications for nonstandard uses.
- Strategies for addressing social needs of persons with dementia and engaging them with
- meaningful activities.
- Information concerning specific aspects of dementia care and ensuring the safety of residents
- with dementia, including, but not limited to, how to:
 - Identify and address pain.
 - Provide food and fluids.
 - Prevent wandering and elopement.
 - Use a person-centered approach.
- Environmental factors that are important to residents' well-being (e.g. noise, staff interactions,
- lighting, room temperature, etc.).

- Family support and the role the family may have in the care of the resident.
- How to recognize behaviors that indicate a change in the resident's condition and report behaviors that require on-going assessment.

For assisted living providers that are also endorsed memory care communities, *all staff* working in the facility, including those who are not involved with direct care, must complete the pre-service dementia training outlined above. In addition, all of the direct care staff must complete a minimum of sixteen (16) hours of annual training with six (6) of those hours specifically focused on dementia care.

Publicly Available Information on Facilities

As previously noted, every assisted living provider must have a "Consumer Summary Statement" that summarizes the scope of services offered and not offered by that facility, and every facility's "Consumer Summary Statement" is made publicly available through the state licensing agency's website. To further help prospective residents and their families make informed decisions about their care, Oregon's state licensing agency manages a consumer facing website (<u>https://ltclicensing.oregon.gov/</u>) that shares detailed information on each facility, including their licensing status, survey history, regulatory violations as well as the severity of those violations, and any state action that has been taken against the license. This added layer of transparency allows consumers to research the performance history of a facility and make informed decisions prior to moving in.

In conclusion, OHCA thanks you for the opportunity to provide comments. OHCA and our provider members remain committed to pursuing solutions to meet the challenges of our rapidly aging population and to providing the highest level of quality care.

Sincerely,

Phil Bentley President and CEO Oregon Health Care Association

To: Senate Aging Committee From: Health Care Association of Michigan Date: January 31, 2024

Subject: Testimony in Response to the Senate Aging Committee hearing, "Assisted Living Facilities: Understanding Long-Term Care Options for Older Adults."

The Health Care Association of Michigan represents more than 240 assisted living communities across the state. The association and its members are dedicated to ensuring quality services are provided to seniors and adults residing in our state's assisted living communities.

On January 25, 2024, U.S. Senator Bob Casey (D-PA), Chairman of the U.S. Senate Special Committee on Aging, made several statements during the "Assisted Living Facilities: Understanding Long-Term Care Options for Older Adults" hearing where he questioned whether residents and their families have the information they need to make informed decisions when it comes to assisted living.

In Michigan, assisted living operates under two separate licenses: Adult Foster Care (AFC) and Homes for the Aged (HFA).

In general, a home for the aged (HFA) provides care to persons who are aged 55 or older while an adult foster care (AFC) home can provide care to any adult in need of adult foster care services. Both licenses have disclosure requirements mandating specific information that must be shared with residents and their families.

Both are required to adopt and provide to each resident at admission, and publicly post in the facility, a policy describing the rights and responsibilities of residents. Residents must be treated in accordance with the policy.

HCAM fully supports transparency and ensuring residents can make informed decisions.

LeadingAge Testimony for the Record U.S. Senate Special Committee on Aging Hearing: "Assisted Living Facilities: Understanding Long-Term Care Options for Older Adults" January 25, 2024

Chairman Casey, Ranking Member Braun, and distinguished members of the Senate Special Committee on Aging (the Committee), we appreciate the opportunity to submit written testimony from LeadingAge on your hearing titled, "Assisted Living Facilities: Understanding Long-Term Care Options for Older Adults".

LeadingAge represents more than 5,000 nonprofit aging services providers, and other missionminded aging services organizations. Alongside our members and 36 state partners, representing 41 states, we use applied research, advocacy, education, and community-building to make America a better place to grow old. Our membership encompasses the continuum of services for people as they age, including serving older adults with complex care needs in assisted living settings.

Most of LeadingAge's members who provide assisted living services do so as one component of multi-service settings. Almost all are nonprofit organizations. In 2020, approximately 17.1% of the nation's assisted living organizations were classified as nonprofit providers.¹ Similar to other long-term care settings, that percentage is trending down.

The Committee's focus today on critical issues in long-term services and supports, and assisted living specifically -- access, quality, staffing, and financing issues -- are top concerns of LeadingAge and our members. Quality care in every care setting, including assisted living, is our top priority. In addition, we embrace state efforts to balance the need to protect the safety of residents while maximizing autonomy and providing the highest quality care. This is the goal of assisted living.

We Have No Tolerance for Bad Care

LeadingAge and our nonprofit, mission-driven members are committed to improving quality of care and quality of life for older adults. We make no apology or excuses for poor quality of care; bad performers must improve and there must be accountability for wrongdoing. Every assisted living community should be striving for excellence every day.

We support state systems that provide complete transparency about complaints, their resolution, and quality ratings so that consumers have all the knowledge they need before they move into a residential setting. We do not believe it would be effective to attempt imposing a federal regulation or reporting structure on a set of services that evolved to respond to state and local consumer interest in supportive care – but not nursing care – and a distaste for nursing homes.² Multiple models can be successful.

In addition to being an unsuitable fit and the prohibitive costs of a misaligned regulatory overlay, a federal standards and enforcement system for a service that is primarily purchased privately by consumers using their own funds, however limited, will not improve quality. Rather, a federal regulatory system would dramatically halt innovation and drive the best providers out of the field, limiting consumer options just as our aging population needs more, not fewer good providers of care.

2519 Connecticut Ave., NW | Washington, DC 20008-1520 P 202.783.2242 | F 202.783.2255 | LeadingAge.org

The Trusted Voice for Aging

We would like to use this opportunity to make several key points:

- There is no federal definition of assisted living and minimal federal funding.
- Equity in access is a significant concern and lack of options severely limits the ability of older adults and their families to find the right care for their situations. The vast majority of assisted living spending is by consumers, out of pocket. Only 17.5% of spending is generated from public sources, primarily the state-federal Medicaid program.³ In addition to inadequate funding, structural barriers in Medicaid hinder access to Medicaid-funded assisted living care.
- Assisted living providers must, above all, provide high-quality, person-centered care and transparent reporting. Providers who consistently offer poor care should not be in business. States should take swift enforcement action to ensure these providers are not allowed to harm seniors.
- Federal investment in the caregiving workforce is needed immediately. This should include training resources, including a focus on dementia care, pipeline programs, and expedited immigration for those willing to move to the U.S. to work in long-term care. The impact of the Biden Administration's nursing home staffing mandate, if implemented as proposed, will reverberate throughout the healthcare system; assisted living providers will compete with others to recruit and retain the limited number of available workers.
- As the population of the country continues to age, there will be fewer family caregivers and
 increasing older individuals seeking quality residential care they can trust. Families seeking
 assisted living services and their family members need resources to better understand the
 options and the costs.
- Assisted living all long-term care has costs attached to it. Most older people and their families cannot afford care today and, as time goes on, even more will not have the funds to pay for the help they need. Comprehensive long-term care financing is urgently needed.

We offer recommendations for the Committee's consideration:

- Establish and fund a clearinghouse and technical assistance center to expand knowledge about the wide variety of state approaches to regulating assisted living, evaluate their impact on quality, including consumer satisfaction, and support adoption of the most effective models by states.
- Take steps immediately to expand domestic and international pipelines to increase the pool of committed, qualified people available to deliver care to residents.
- Establish and fund a national resource center for assisted living staff training, including training in dementia care.
- Provide more federal funding through the Department of Health and Human Services' (HHS) Administration on Community Living to support the development of federal and state consumer materials to help people seeking care in assisted living settings that cover: the service offering; complaints reported, resident quality ratings, and the cost of care.
- Take steps to establish a national system to finance long-term care services to ensure that the 50% of people over age 65 who will need paid long-term care before they die have options and financing to cover their care.

The remaining sections of this testimony describe these key points and recommendations in more detail.

States Define and Regulate Assisted Living

Assisted living emerged from a community need for residential places where older people could live safely and relatively independently, with access to care and services if they need them. It had its roots in the belief that a non-medical, non-nursing home setting was missing – with the goal of providing options for people who needed some support they could not easily get in their home in the community, but less than the more intensive care provided by nursing homes.

Absent common agreement on the definition of assisted living, multiple models have continued to evolve based on what developers and providers have offered and states have regulated.⁴ The HHS/Centers for Disease Control and Prevention (CDC) National Center for Health Statistics (NCHS) spent years creating a very basic definition for the purpose of conducting what is now known as the residential living component of the National Post-Acute and Long-Term Care Survey (NPALS), the only federal source of national data on assisted living.

That definition includes "a care setting regulated by states to provide room and board to 4 or more residents, at least 2 meals a day, around the clock supervision, and help with personal care to a predominantly adult population." Using those parameters, NCHS identified 28,900 communities across the U.S. in 2020, serving just under 1 million people. However, there is enormous variation across models that are offered and regulated, with extensive inconsistency in the balance of medical and social models.

While that diversity promotes innovation and consumer-responsive models, it also makes it challenging to agree on minimum components and regulatory requirements. Over the past three decades, as assisted living has become more widely offered across the country, there have been calls for federal regulations similar to the approach used in nursing homes.

With more than 50 different definitions and regulatory approaches and very little federal (or even public) funding, it is unclear how the federal government would define assisted living.

One particular concern is that attempts to impose federally mandated staffing ratios could force closures of many assisted living communities. The wide diversity of models in the cluster of communities under the rubric of assisted living means that there will never be one "right" staffing ratio.

A federal regulatory system aimed at the minority of "bad actors" will be ineffective and inefficient. Targeting punitive policy interventions to the lowest common denominator has not achieved its intended goal of quality improvement; there's little reason to believe similar efforts in assisted living would be successful. Most LeadingAge members say that providers who routinely do not protect the safety of residents should not be offering assisted living (or any) services to older people.

Finally, the CMS-state nursing home survey enterprise – that must reach the country's 15,000 nursing homes - is suffering terribly from both the same staffing challenges faced in long-term care settings, with long delays, and inadequate state-federal funding.

LeadingAge partners with the National Association for Regulatory Administration (NARA) and three other associations to create the Quality in Assisted Living Collaborative (QALC), to identify, define, and develop model guidance for assisted living. The Collaborative's resources will be available to aid and educate providers, regulators, policymakers, and other stakeholders.

Recommendations:

- Congress should establish and fund a clearinghouse and technical assistance center to expand knowledge about the wide variety of state approaches to regulating assisted living, evaluate their impact on quality, including consumer satisfaction, and support adoption of the most effective models by states.
- Members of the Committee might want to review the work of the Quality in Assisted Living Collaborative (the NARA collaborative work). Provider organizations are working together to identify a set of recommended guidelines for states to consider adopting. They are beginning with guidelines related to infection prevention and control.

Consumers Do Not Consistently Have the Information They Need About Services Offered, Costs, Quality Reporting and Transparency

Individuals looking for an assisted living community for themselves or a loved one are already in a stressful position. They should have access to all the information they need, including the total cost of housing, care, and services. If there are going to be additional costs, consumers should know this up front. Recent articles in the media have highlighted stories of consumers caught unaware by unanticipated added costs.

The information available to consumers in some states includes complaints that have been made and how they have been resolved. To help consumers make good decisions, transparency about staffing, ownership and complaints is essential. LeadingAge supports efforts in a number of states to maintain online reporting of complaints and some consumer ratings of quality.

Recommendation:

 Provide more federal funding through the HHS Administration on Community Living to support the development of federal and state consumer materials to help people seeking care to understand what they are being offered, complaints reported, resident quality ratings, and the cost of care before they move in.

Staff are Paramount to Quality: The Workforce Shortage Limits Access to Good Care

Successful aging services organizations employ enough staff to meet their commitment to provide high quality care. Like the entire field of aging services and most other industries in the nation, assisted living providers face near-paralyzing shortages of staff, particularly frontline, direct service staff (e.g., personal care aides), dining, and activities. In organizations (and states) that require nurses, the nursing shortage is clearly felt across assisted living communities.

Members of LeadingAge report that as many as 20% of vacant positions go unfilled, with no applicants. Because they are mostly nonprofit, mission focused providers, they limit admissions if they do not have staff to serve people.

In an environment with unemployment rates consistently below 3%, aging services providers compete with retail, restaurant, and entertainment venues, where entry level employees can earn as much or more per hour for work that is typically less taxing and less complex.

It is gratifying that many workers in LeadingAge organizations argue that aging services jobs are more rewarding than other similarly paid positions. However, it is essential to understand that the skills, abilities, knowledge, and commitment required to work in assisted living settings should also be more highly valued. LeadingAge member communities report holding frequent conversations and town meetings with residents to connect monthly costs to staff wages.

An article in the January 21 Washington Post reported that teenage workforce participation has reached a 14 year high.⁵ Many LeadingAge provider members have joined with local high schools and community colleges to invite young workers, early in their careers to check into jobs available in long-term care. Many seasoned leaders in long-term care tell stories of starting in aging services in their teen years. These provider school partnerships require dedication, but they also require the formal attention of policymakers and funding. The Health Resources Services Administration's training programs are limited in scope and reach. We need more as well as dedicated funding for the aging services workforce, including for assisted living staff.

Many aging services providers, again, like other industries, faced with an economy that typically has 1.5 jobs for every available job seeker, turn to other countries to recruit and hire staff. For a few select professional categories (including nurses), the U.S. immigration system offers some legal pathways to employment. However, these visa programs are difficult and expensive to navigate, require the coordination of at least three federal departments, and LeadingAge members report delays of anywhere from two to ten years.

There are no such opportunities for frontline workers in jobs that do not require at least a bachelor's degree. Yet, one in four direct care workers in the U.S. were born in other countries.⁶ These individuals have mostly come to the United States as part of a family ("chain migration"). LeadingAge members report that they are some of the most dedicated staff members, and, in fact, the best recruiters, often bringing relatives and friends into the organization too.

The U.S. immigration system is broken at a time when we cannot fill jobs with native born workers. There are not enough people to fill the jobs, much less qualified, committed people. Policymakers frequently fall into the false assumption that issues with illegal border crossing and legal immigration are two separate issues. Expert observers note that to fix illegal border crossing issues we must fix the root cause, our outdated legal immigration system.

Recommendations

- Take steps immediately to expand domestic and international pipelines so there are more committed, qualified people available to deliver care to residents.
- Modify current immigration authorities to expedite processing of applications for workers in aging and long-term care settings.
- Establish new immigration channels for frontline workers.
- Promote refugee resettlement program partnerships with aging services provider organizations.

Ongoing Evidence Based Training is Inconsistent

Just as service definitions, staffing requirements, and regulations differ from state to state and across provider organizations, training and minimum qualifications vary as well. As they serve more and more people with increasingly higher levels of need, assisted living communities require more highly skilled professionals—with a range of skill sets, from clinical care to "soft skills" needed for delivery of activities of daily living. The latter are developed over time and are more difficult to measure based on a universal standard.

As noted earlier in this testimony, individuals entering positions in assisted living must be well trained, using evidence-based methods, in a wide array of essential skills. They must receive continuous, ongoing in-service training to expand their skills and keep up with rapidly changing demands, needs, and knowledge.

Extensive training materials are available for frontline staff but many providers, especially smaller, single site organizations, are confused by the offerings. There are no tried and true ways to evaluate which work and in what settings. Which are evidence based? Marketers may stretch the underlying science to sell a training product. There is no neutral party to help providers select the best training.

In addition, training programs can be costly and out of reach for many smaller providers, particularly those who depend more heavily on Medicaid dollars and serve residents with lower incomes.

Further, onerous and outdated requirements for certified nurse aide programs make it exceedingly difficult to launch and sustain direct care training programs.

At the same time training enables staff members to increase their value to the organization – and their ability to provide even better care and services to residents – wages and job opportunities must keep pace or individuals will leave to seek better positions where they can keep growing.

Competitive wages are critical to recruiting and retaining direct care staff who work in long term care, including assisted living. Our <u>Making Care Work Pay</u> research, using publicly available data and standard economic simulation techniques, demonstrates that higher wages would bring myriad benefits to direct care workers, the direct care field, care recipients, and local communities—for a relatively modest cost.

Increased wages are one of several changes needed to recruit and retain a stable direct care workforce in long-term care, including assisted living.

Recommendations

- Establish and fund a national resource center for assisted living staff training, including training in dementia care.
- Review the LeadingAge LTSS Center @UMass Boston publication <u>"Feeling Valued"</u> <u>Vision for Professionalizing the Direct Care Workforce</u>, which offers strategies for reimagining the professional direct care workforce across long-term care settings.
- Create a national training curriculum and testing program for direct care workers.

Most Americans Cannot Access Care Because They Cannot Afford It

Assisted living is one of the few care settings in which government reimbursement through either Medicare or Medicaid is not the most common payer. Assisted living is almost exclusively out-of-pocket, private pay. Medicare does not cover long-term care, including assisted living services. Medicaid can cover the services offered in an assisted living but cannot pay for the room and board components of meals or shelter. But fewer than half of assisted living providers accept any Medicaid funds because the rates simply do not cover the cost of care.

It is not surprising that 90% of residents in assisted living identify as white, non-Hispanic, while the Census bureau reports that two-thirds of Americans identify with this racial group. Access to all long-term care depends on the ability to pay. The inequities in assisted living are especially stark.

By 2033 there will be more people in the United States over the age of 65 than under the age of 18. While lower income people are losing years of expected high quality life, wealthier Americans are gaining in life expectancy, further increasing disparities.

Half of Americans turning 65 will need some amount of paid long-term care before they die, typically 18 months to 2.5 years. The average cost of care in assisted living is \$4,500 per month, or \$54,000 annually.⁷ Few Americans plan for a healthy retirement let alone for the possibility or likelihood that they will need to also pay for long-term care.

When Medicare was created in 1965, most individuals did not live much past the age of 65. If they did and they required help, many more family members were available to provide that help, along with a place to live. Churches and other nonprofit community organizations filled in for those without caregivers.

Today, people are living much longer, they have fewer caregivers, and many more organizations exist to serve them. But few people can afford the care they need -- only the very wealthy, with sufficient out of pocket resources and those with incomes and resources low enough to qualify for Medicaid. This situation exacerbates equity concerns.

Aging services – long-term care – is an essential part of health care and, like the rest of health care, it has a price tag. Long-term care financing reform is essential – to ensure that all Americans are able to have choices about how and where they get the help that many of them will need in their later years. As a nation we committed in 1965 to not allowing older people to impoverish themselves and lose years of life because they cannot pay for the health care they need. It is long past time for bold policymakers to finish making good on the commitment.

Recommendation

 Take steps to establish a national system to finance long-term care services to ensure that the 50% of people over age 65 who will need paid long-term care before they die have options and financing to cover their care. The various public and public-private options have been identified and discussed for decades. Bold policymakers must step up and take action.

Medicaid Barriers Impede Equitable Access to Care

For the 17.5% of assisted living care that is covered by Medicaid, there are additional, unique challenges. In 48 states, assisted living is provided as a Medicaid service, typically under a waiver, but it is considered a home and community-based service.⁸ Unlike nursing home care, it does not cover room and board, which must come out of Social Security/SSI. Reimbursement for Medicaid funded assisted living makes it a challenging service to offer – this financial challenge combined with regulatory barrier contributes to the dearth of options available.

As a home and community-based service, assisted living services must be delivered in a manner that is person centered, optimizes community integration, and protects residents according to requirements outlined in the "HCBS Settings" or "Olmstead" rule. They include, for example, restrictions about locked doors and outings into the community. The requirements of the settings rule

have been open to interpretation by state agencies and, in many cases, make it nearly impossible to provide assisted living under Medicaid, leading to even more concerns about equity in access and quality -- some members have reported a chilling effect on their state's willingness to offer Medicaid funded assisted living or expand the availability.

Recommendation

Congress should authorize and appropriate funds to study policy barriers to states
offering Medicaid assisted living including funding and the settings rule and other
existing regulations. The report should offer policy options to expand the availability
and viability of Medicaid funded assisted living.

CONCLUSION

Chairman Casey, Ranking Member Braun, and members of the Committee, LeadingAge appreciates this opportunity to provide written testimony for the January 25 hearing on assisted living and we stand ready to introduce you to our nonprofit, mission driven provider members across the country. If you would like to meet or discuss issues raised in this written testimony or any other long-term care or aging services related issues, please contact Ruth Katz, Senior Vice President for Policy and Advocacy (<u>rkatz@leadingage.org</u>).

JUSTICE IN AGING

SPECIAL REPORT

An Illusion of Protection: Meaningless Federal "Quality Measures" Endanger Assisted Living Residents

FEBRUARY 2024

Eric Carlson, Director, Long-Term Services and Supports Advocacy

How can older Americans have confidence in the quality of Medicaid-funded assisted living? Federal policy points to assisted living performance measures, but, as demonstrated in this report, those measures are of little use to consumers or anyone else.

Through a public records request and subsequent lawsuit, Justice in Aging obtained California's "performance measure" data from the state's Medicaid assisted living program. The data demonstrate deep problems in both federal and state Medicaid policies. Under government policy, assisted living quality measures don't measure assisted living or quality.

Specifically, California administers 18 assisted living performance measures, but none provide useful information about the care received by assisted living residents. Many of the measures are trivial — for example, a finding of perfect performance based on the one participating home health agency maintaining its licensure each year. Also, because all of the data are aggregate, none of the measures distinguish between individual facilities.

Federal Medicaid Standards For Assisted Living Care	. 5	
HCBS Performance Measures in Practice: California's Assisted Living Waiver	.7	
Analysis	. 9	
Observations & Policy Recommendations.	13	
Appendix	16	

EXECUTIVE SUMMARY

As demonstrated by California's Assisted Living Waiver (ALW), federal assisted living quality measures are largely ineffectual.

Under federal law, a state Medicaid program can use a home and community-based services (HCBS) waiver to cover at-home personal care and certain facility-based care, including assisted living. HCBS coverage is open only to those persons with significant care needs — specifically, persons who need the equivalent of nursing facility care.

Federal HCBS protocols require the state to monitor HCBS waiver program quality through performance measures. These performance measures focus primarily on the actions of agencies administering the waiver, and are not designed to measure quality of care or identify the better service providers.

Under the federal protocols, performance scores are expressed through percentages; a score of 85% or less requires a state to conduct appropriate remediation activities. States choose their own performance measures and may see easy-to-meet performance measures as the path of least resistance.

Using the HCBS waiver authority, California operates an Assisted Living Waiver (ALW) that covers care provided in assisted living facilities and, less commonly, certain other settings. The ALW currently funds assisted living services for roughly 12,000 participants, with another 3,000 persons (approx.) on a waitlist.

As detailed in this report, California's ALW provides a striking example of the inherent flaws in the federal performance measures system. In general, the performance measures provide little value to anyone — not federal or state governments, not assisted living facilities and other service providers, not facility residents, and not the general public.

ALW performance measures are kept from the public.

Across the country, assisted living waiver performance measures generally are not available to the public. In California, the California Department of Health Care Services (DHCS) does not post its ALW performance measure information on its website, or otherwise make the information available to the public. Accordingly, in December 2021, Justice in Aging submitted a public records act request to DHCS for information related to ALW performance measures. DHCS failed to comply with the request for over a year, finally turning over documents only after Justice in Aging filed a lawsuit in December 2022.

ALW performance measures are virtually worthless.

The information eventually turned over by DHCS covers the three-year period from March 2019 through February 2022. The information indicates that DHCS administers 18 performance measures within the ALW. These 18 measures are comprised of:

- Seven easy-to-satisfy measures with purported 100% compliance;
- Six case-file-review measures with suspiciously identical results;
- Two measures based on facilities meeting basic licensure and in-service training requirements;
- One faulty measure; and

EXECUTIVE SUMMARY

 Two potentially useful measures relating to payment processes.

Overall, the measures provide little to no value. Consistent with federal protocols, as discussed above, the measures focus heavily on agency performance rather than provider quality. Five of the measures supposedly evaluate quality in some fashion: three of those look only at qualifications, i.e., licensure, while another merely records whether the provider offered in-service training. The fifth measure purportedly documents whether services were delivered in accordance with the service plan, but the results from that measure are drawn from a dubious case review process discussed below.

In general, few of the measures seem to offer any insight as to how DHCS might improve the ALW. Many of the measures are designed to be easy, with perfect or near-perfect performance virtually guaranteed. For example, one measure records whether participating home health agencies retained provider qualifications, i.e., licensure, during the year. Because only one home health agency participates in the ALW, and that agency was licensed for all three years, this measure yielded a 100% score for each year.

Similarly, a related measure considers whether facilities held licenses when they were accepted for participation during the year. Again, not surprisingly, the measure recorded a 100% score for each year, since licensure is a minimal threshold requirement for provider enrollment.

Six measures involve case review, and for each of these six measures the case review produced the exact same result: compliance in 26 of 27 reviewed files in the first year, compliance in all 75 reviewed files in the second year, and compliance in 478 of 483 reviewed files in the third year. Such lockstep results suggest strongly that review was cursory, compliance was virtually automatic, and noncompliance was found only when a file was unavailable or compromised in some way. Finally, none of the performance measures are useful in distinguishing between providers. For many other types of health care providers, Medicare's Care Compare website provides data that allow for comparison of one provider to others. Such provider-specific information can be extremely useful — for example, for a consumer choosing a provider, or an inspector looking for potential quality of care problems. The ALW's performance measures, however — like all HCBS performance measures, under federal protocols — aggregate data across the entire state.

Federal and state governments should reorient HCBS performance measures towards usefulness and transparency.

Current federal procedures prescribe HCBS performance measures largely as a means of tracking a state's performance, rather than the performance of individual providers. As described in this report, California's ALW performance measures fall short in their current state-procedure-focused objective. Also, of course, they provide no information whatsoever regarding individual providers.

California is not an outlier. Many performance measure problems stem from federal procedures, and many states' performance measures have problems similar to California's.

The federal government should reorient HCBS performance measures to focus on quality of care rather than administrative processes. When possible, measures should distinguish between individual providers; this is particularly true for assisted living facilities and other residential facilities, since they are more likely to be larger. Similarly, measures as appropriate should be stratified based on participant characteristics including care needs, race, and

EXECUTIVE SUMMARY

gender, in order to facilitate identification and reduction of care disparities.

Also, federal standards should require true transparency. All performance measure information must be made available in a timely fashion on the internet, in a format reasonably accessible to consumers.

Most importantly, the federal government should reset the approach to performance measures to focus on real-world usefulness. Mediocre performance measures represent both a poor use of resources and a lost opportunity to improve care.

California should make similar changes, i.e, evaluate performance of individual providers (including assisted living facilities), make information public and accessible, and reorient performance measures towards real-world usefulness. California has stated its intent to reevaluate the entire ALW in the near future, making this a particularly favorable time in which to consider performance measure revisions.

FEDERAL MEDICAID STANDARDS FOR ASSISTED LIVING CARE

Medicaid can pay for assisted living care through Home and Community-Based Services waivers.

Federal Medicaid law does not provide an "assisted living" benefit comparable to Medicaid's coverage of (for example) hospital care or nursing facility care. Instead, if a state Medicaid program wishes to cover assisted living care, the state in most cases proceeds through a federal waiver - most commonly, a Home and Community-Based Services (HCBS) waiver. HCBS waivers are frequently used to cover personal care assistance provided in a participant's house or apartment, but they also can be used to cover care in certain residential facilities, including assisted living. The waiver pays for care services while the participant retains financial responsibility for room and board expenses. Provision of the Medicaid-funded services is guided by a service plan developed with the participant's involvement.¹

An HCBS waiver is intended to provide an alternative to nursing facility care; accordingly, each participant must have care needs significant enough to qualify them for nursing facility care. On the financial side, a state HCBS program at a minimum must demonstrate cost neutrality, i.e., that the cost of waiver services does not exceed the cost that would have been incurred had the participant received nursing facility care rather than HCBS. Notably, HCBS waivers allow a state to limit the number of participants and, when a program is at full capacity, place applicants on waitlists for potentially months or years.²

A state applies for an HCBS waiver through a form application developed by the Centers for Medicare

& Medicaid Services (CMS). Original approval is granted for up to three years, while renewals may extend for five years.³

States must report "performance measure" percentage data to support assurances made to federal government.

As a condition of an HCBS waiver, a state Medicaid program must provide CMS with formal assurances that "necessary safeguards" (including adequate standards for provider participation) have been taken to protect the health and welfare of individuals provided services under the waiver and to assure financial accountability for funds expended with respect to such services."⁴ In implementing this requirement, CMS requires specific assurances of state compliance in six specified areas. In addition, for each of these six assurances, CMS requires one or more specific subassurances to better flesh out compliance realities, with a total of 16 subassurances:

- 1. Administrative authority (1 subassurance);
- 2. Level of care determinations (2 subassurances);
- 3. Provider qualifications (3 subassurances);
- 4. Waiver service plans (4 subassurances);
- 5. Health and welfare (4 subassurances); and
- 6. Financial accountability (2 subassurances).5

To document compliance with subassurances, the state devises and administers "performance measures" (subject to CMS approval) to measure

JUSTICE IN AGING | SPECIAL REPORT | www.justiceinaging.org |

123

whether the waiver program is meeting assurances. The performance measures are expressed in a percentage, with a percentage score of 86% or above considered satisfactory. If a performance measure yields a score below 86%, the state must implement a remediation plan to address the situation.⁶ For this reason, a state has an incentive to use performance measures that will produce scores above 85%, in order to avoid the additional work of developing, implementing, and documenting a remediation plan.

As an example of the HCBS performance measure system, consider the Level of Care assurance, in which the state assures the federal government that the state implements waiver-designated processes and instruments for evaluating whether participants' care needs would qualify them for nursing facility services. In the two associated subassurances, a state must assure CMS that 1) all applicants receive a level of care evaluation; and 2) waiver-designated processes and instruments are appropriate to determine participant level of care needs. In California's assisted living waiver (as discussed below), these subassurances are monitored through two corresponding performance measures: 1) the percent of new participants whose initial level-ofcare determination was performed by a registered nurse from a care coordination agency; and 2) the percent of determinations in which specified processes and instruments were used appropriately in determining participants' level of care needs.

As demonstrated in these examples, current performance measures focus primarily on the actions of agencies administering the waiver, and are not designed to distinguish between individual providers or identify disparities in care. The measures do little or nothing to help a consumer choose a provider, direct inspectors to potential instances of substandard care, or support quality improvement projects by individual providers.

CMS IS PROPOSING FUTURE CHANGES TO HCBS PERFORMANCE MEASURES

In July 2022, CMS released a new HCBS Quality Measure Set. Although use of the Quality Measure Set (QMS) is voluntary at this time, CMS stated its intention to incorporate the QMS into HCBS reporting requirements.⁷

The QMS includes 97 separate performance measures. Almost half of these measures relate to current HCBS waiver assurances, either Waiver Service Plans (29 measures), or Health and Welfare (14 measures). The remaining measures address access (15 measures), rebalancing state programs away from institutional care (6 measures), and community integration (including compliance with the recently-implemented federal regulations to promote non-institutional practices and environments) (33 measures).⁶

HCBS PERFORMANCE MEASURES IN PRACTICE: CALIFORNIA'S ASSISTED LIVING WAIVER

California utilizes HCBS waiver authority to cover assisted living care.

California offers coverage of assisted living care through a Medicaid HCBS waiver called the Assisted Living Waiver (ALW).⁹ The vast majority of ALW participants live in Residential Care Facilities for the Elderly (RCFEs), which is California's licensing term for assisted living facilities. Many fewer ALW participants live in Adult Residential Facilities (ARFs), which are licensed to care for persons under age 65. ALW participants may also reside in publicly subsidized housing, with services provided by home health agencies, but this slice of the ALW participant population is extremely small: ALW approval has been extended only to eight publicly subsidized housing sites and one home health agency.¹⁰

The ALW operates in only 15 counties, mostly in urban areas.¹¹ Within these counties, 686 individual facilities are approved for ALW participation, with an aggregate capacity of approximately 27,000.¹² The ALW, however, due largely to the state-set enrollment cap, had an August 2023 enrollment of only 11,657, with a waitlist of 3,032 applicants.¹³

California monitors Assisted Living Waiver with eighteen performance measures.

As discussed above, federal performance measure protocols focus on waiver program operations, rather than care quality. CMS requires state Medicaid programs to issue assurances and subassurances, and then to use corresponding performance measures to document compliance. California's Department of Health Care Services (DHCS) monitors the ALW with eighteen separate performance measures. Most of the performance measures relate to service plans (five measures), provider qualifications (four), or health and welfare (four). Two measures relate to level of care determinations, and another two measures relate to financial accountability. A final measure relates to administrative authority.

Not surprisingly, the ALW's subassurances and 18 performance measures track the 16 subassurances required by CMS. The "extra" two performance measures are attributable to DHCS using three separate performance measures for the providers-are-qualified subassurance (+two) and two separate performance measures for the service-plan-revision subassurance (+one), while not using a performance measure for an unlicensed provider subassurance (-one) (because the ALW does not utilize unlicensed providers).¹⁴

Details about the ALW performance measures, including three years of data, are set forth in a table in the Appendix. The table includes assurances, subassurances, performance measures, and the data related to those measures. The data were obtained from DHCS pursuant to a public records act request.

CALIFORNIA'S PERFORMANCE MEASURES FOR ASSISTED LIVING WAIVER

- Percent of applications from care coordination agencies that resulted in agency being enrolled into program.
- 2. Percent of level-of-care determinations performed by registered nurse.
- 3. Percent of level-of-care determinations conducted appropriately.
- 4. Percent of enrolled home health agencies that maintained provider qualifications.
- 5. Percent of enrolled facilities qualified to provide waiver services.
- 6. Percent of enrolled facilities that did not allow licensure or certification to lapse.
- 7. Percent of enrolled providers that held mandatory in-service training for staff.
- 8. Percent of waiver service plans that reflect participant's needs.
- 9. Percent of waiver service plans submitted within ten days of assessment's completion.
- Percent of participants with reassessments whose services plans were revised to address changed needs.
- Percent of participants with services delivered in accordance with waiver service plan.
- Percent of participants offered choice between waiver services and nursing facility care.
- 13. Percent of Serious Incident Reports involving abuse, neglect or exploitation.
- 14. Percent of resolved cases among reported cases of abuse, neglect or exploitation.
- 15. Percent of waiver service plans that do not call for restraints or seclusion.
- Percent of reviewed cases indicating that state monitored overall health care standards.
- 17. Percent of participants enrolled prior to claim submission.
- Percent of claims coded and paid in accordance with reimbursement methodology.

California currently is applying to renew Assisted Living Waiver.

The ALW's current five-year term expires on February 29, 2024, and DHCS currently is preparing an application for another five-year renewal. DHCS circulated a draft waiver application for public comment; the comment period ended on October 5, 2023.

The draft waiver application proposes to retain 12 of the 18 performance measures, but does not mention the other six measures — ## 3, 10, 12, 14, 15 & 16. It is unclear if these omissions are meant to be permanent or, on the other hand, the omissions just reflect the application's draft status.¹⁵

Most likely, DHCS does not at this point intend to delete the six measures, many of which may be needed to meet CMS-required subassurances. In a bullet-point "Major Changes" introductory section to the draft application, DHCS simply lists "Updated Performance Measures." In accord, a DHCS e-mail to stakeholders stated that it intended only minor changes in this draft application.¹⁶

JUSTICE IN AGING | SPECIAL REPORT | www.justiceinaging.org |

126

ANALYSIS

Performance measures do not measure provider quality.

Few of the 18 performance measures actually relate to the quality of Medicaid-certified providers. And for those few that do relate at least somewhat to quality, the data from the performance measures are generally unimportant or unrevealing.

Specifically, only five of the performance measures purport to evaluate provider quality in some way:

- #4. Percent of enrolled home health agencies that maintained provider qualifications.
- #5. Percent of enrolled facilities that were qualified to provide waiver services.
- #6. Percent of enrolled facilities that did not allow licensure or certification to lapse.
- #7. Percent of enrolled providers that held mandatory in-service training for staff.
- #11. Percent of participants with services delivered in accordance with waiver service plan.

66

Few ALW performance measures relate to quality, and data from those few measures are generally unimportant or unrevealing.

The first three of these are trivial: in each case, the measure is simply whether the provider met basic prerequisites for participating in the ALW. The data reflect the measure's triviality. For measures #4 and #5, DHCS reports a measure of 100% for each of

the three reported waiver years, while measure #6 yields similarly high results: 98.95%, 96.67% and 98.45% for waiver years 1 through 3, respectively.

Performance measure #7 — the percent of providers that conducted mandatory in-service trainings also has little relationship to care actually provided. Again, DHCS reports high percentages — 99.48%, 96.67% and 98.45% for waiver years 1 through 3 — but those high percentages say more about the measure's triviality than quality of care.

Performance measure #11 theoretically could relate to quality, based on the measure's description, but data and other contextual information indicate that the measure actually has little value. The measure is comprised of the percent of participants with services delivered in accordance with the waiver service plan — notably, results are based solely on facility case file reviews. DHCS reports the following results:

- Year #1: 96.30%; 26 of 27 files reviewed (5,643 participants overall).
- Year #2: 100%; 75 of 75 files reviewed (6,782 participants overall).
- Year #3: 98.96%; 478 of 483 files reviewed (7,811 participants overall).

Although at first glance these high percentages are attractive, further examination reveals these data to be hollow. Review simply was not designed to truly determine whether participants received needed services. Data were drawn merely from reviewing facility case files, and not from any independent inquiry or interview with program participants. Also, review only included a small percentage of participant case files.

Most significantly, the reported data indicate that case review was extremely cursory. The three bullets above list the *EXACT* three-year results not only for measure #11, but also for measures ## 8, 9, 12,

15, and 16.* For each of those six measures, in a review of a total of 585 files, reviewers evidently found perfect compliance in Year #2, and one and five instances of noncompliance, respectively, in Years ## 1 and 3. This suspicious data pattern indicates that 1) reviewers accepted almost any level of documentation as proof of compliance for the six performance measures at issue; and 2) six files were either missing or severely compromised, leading to the limited findings of noncompliance in Years ## 1 and 3.

Thus, measure #11 has little to say about whether participants actually received adequate services. Compliance evidently was virtually guaranteed by measure #11's design and implementation, except in the rare instances when a file was unavailable or compromised.

Case review is not meaningful.

As discussed immediately above, the data indicate that ALW case review is perfunctory. A full six measures — measures ## 8, 9, 11, 12, 15, and 16 produced **EXACTLY** the same results: compliance in 26 of 27 reviewed files reviewed in Year #1, in all 75 reviewed files in Year #2, and in 478 of 483 reviewed files in Year #3.

Under CMS procedures, these high percentages — 96.30% to 100% compliance — supposedly indicate strong performance, e.g., that service plans reflected a participant's needs (measure #8), participants were given a choice between waiver services and nursing facility services (#12), and the state monitored overall health care standards (#16). The lockstep nature of the results, however,

66

The six measures based on case review had identical results, suggesting that review was cursory, finding compliance whenever a case file was intact.

indicates that neither the case review process nor the data are meaningful. As a practical matter, the data suggest that reviewers found compliance whenever a case file was available and intact. Then, in the rare instances in which a file was unavailable or compromised for some reason, the reviewer found noncompliance for each of the six relevant performance measures, leading to identical percentages for each of the measures.

This conclusion — that purported "case review" is not meaningful — is reinforced by consideration of measure #15, which is the percentage of waiver service plans not calling for restraints or seclusion. In fact, the ALW prohibits restraints or seclusion, making it even more likely that a finding of noncompliance is due to the lack of an intact case file, rather than a service plan calling for an explicitly prohibited intervention.¹⁷ Also, this measure is trivial like many of the "perfect compliance" measures discussed immediately below, since a perfect or near-perfect score is virtually guaranteed.

"Perfect" compliance indicates that measures are not meaningful.

For obvious reasons, trivial performance measures lead to "perfect" or near-perfect scores. DHCS reported three-year 100% compliance for 7 of the 18 performance measures (## 1, 2, 3, 4, 5, 10 & 14). This report already has discussed measures ## 4 (qualified home health agencies) and 5 (qualified

Measures ## 8, 9, 12, 15 & 16 are, respectively: "waiver service plans that reflect participant's needs," "waiver service plans submitted within ten days of assessment's completion," "participants offered choice between waiver services and nursing facility care," "waiver service plans not calling for restraints or seclusion," and "reviewed cases indicating that state monitored overall health care standards."

Supposed "perfect" compliance for over 20,000 level of care determinations and over 1,000 service plans suggests that "in compliance" findings were virtually automatic.

facilities). Here are the other five instances in which DHCS reported 100 percent compliance over the three relevant years:

- Measure #1: 15 of 15 applying care coordination agencies enrolled in ALW during relevant years.
- Measure #2: 7,541 of 7,541 level-of-care determinations performed by a registered nurse, as required by program standards.
- **Measure #3**: 20,236 of 20,236 level-of-care determinations in which processes and instruments were used appropriately.
- Measure #10: 1,020 of 1,020 waiver service plans in which service plans were revised to address changed needs.
- Measure #14: 0 of 0 cases in which reports of abuse, neglect or exploitation were resolved.

Measure #1 is trivial, merely reflecting the fact that applications from care coordination agencies were processed. Measure #2 also is relatively trivial, since the ALW requires that all level-of-determinations be performed by a registered nurse. As a measure of performance, this measure makes little more sense than evaluating surgical performance by considering whether the surgeon graduated from medical school.

Measures ## 3 and 10 also are not meaningful. A careful evaluation of level-of-care determinations

(measure #3) or service plans (#10) would require time and professional judgment. But clearly, as a practical matter, no such judgment was applied to 20,236 level-of-care determinations and 1,020 waiver service plans. Instead, all evidence suggests that the relevant computer programs generated "in compliance" findings as a matter of course.

The final instance of "perfect" compliance, measure #14, is an odd situation in which DHCS reached 100% compliance by dividing zero by zero. The genesis of the zero was the absence of any substantiated reports of abuse, neglect and/or exploitation in Serious Incident Reports. Measure #14 is described by DHCS in a confusing way (see Appendix), but the desired "performance" seems to be the percentage of relevant cases resolved. The absence of incidents of abuse, neglect and/ or exploitation resulted in a numerator and denominator of zero for all three years, which DHCS logged as 100% compliance.

(Also troubling is the absence of any substantiated instances of abuse, neglect or exploitation from over 5,000 Serious Incident Reports during the relevant three-year period.)

The only potentially meaningful performance measures relate to payment processes.

This report thus far has discussed all measures but three: measures ## 13, 17 & 18. Measure #13, relating to Serious Incident Reports, had a faulty design; as a result, DHCS could not collect relevant data.

Measures ## 17 and 18 each relate to payment: the percent of participants who were enrolled prior to submission of claims (#17), and the percent of claims coded and paid for in accordance with reimbursement methodology (#18). Performance

over the three years ranged from 93.7% to 99.7% for each of the measures. It may be that these two measures are of some use to DHCS in evaluating current payment procedures. Notably, however, these two measures have almost nothing to say about quality of care and waiver participants' lives.

SUMMARY OF PERFORMANCE MEASURES

18 Performance Measures:

- Seven easy-to-satisfy measures with purported 100% compliance (## 1, 2, 3, 4, 5, 10 & 14)
- Six case-file-review measures with suspiciously identical results (## 8, 9, 11, 12, 15 & 16)
- Two measures based on facilities meeting basic licensure and in-service training requirements (## 6 & 7).
- One faulty measure (#13)
- Two potentially useful measures relating to payment processes (## 17-18)

Performance measures are aggregate across California, and do nothing to identify strong or weak providers or disparities in care.

In many health care settings, performance measure data are stratified by provider. Provider-specific data can be used by state agencies to identify problems, and by consumers to choose a provider. Most prominently, Medicare's Care Compare website includes provider-specific data for eight categories of providers, including physicians, hospitals, nursing facilities, and hospice care agencies.¹⁸

Additionally, health care data often are stratified by patient populations — for example, to

distinguish between care needs, gender, race, age, sexual orientation, primary language, and other characteristics. Analysis of these data can identify disparities in care and aid both policymakers and providers in addressing those disparities.

HCBS waiver performance measures, however, are aggregated across an entire state and, as discussed above, focus primarily on waiver program operations themselves. Accordingly, the ALW performance measures do not distinguish between individual providers even though, in some cases, the performance measures themselves are based on actions of RCFEs (performance measures ## 5-7), home health agencies (#4), and care coordination agencies (## 2 & 3). Because of the data's aggregate nature, the measures provide none of the utility that Care Compare offers to policymakers, providers and consumers, and do not allow for comparison of urban and rural settings, large and small facilities, or other provider classifications.

Likewise, aggregate ALW performance measures have little value in identifying participant-toparticipant care disparities. Even assuming useful data, aggregation prevents DHCS and CMS from making distinctions between (for example) men and women, and participants of various ethnicities, or with differing care needs. And, of course, the inability to identify disparities makes it impossible to diagnose and then rectify the problems.

Performance measures are kept secret within federal and state government.

DHCS keeps ALW performance measure information entirely private, aside from mandatory reports to CMS. This privacy sharply limits performance measures' potential usefulness. Even if, for example, performance measures included comparative information about individual providers, that information provides little benefit

if participants and other members of the public are kept in the dark.

The current no-disclosure status quo is not accidental, as demonstrated by DHCS's refusal to comply with a relevant public records act request. Through the California Public Records Act, Justice in Aging requested the ALW performance measure information from DHCS on December 14, 2021.¹⁹ In response, over the following year, DHCS did not provide a single document, despite numerous communications from Justice in Aging including, in June 2022, a draft of a public records act complaint that could be filed against DHCS. Never during this period did DHCS claim that the information was exempt from production; instead, aside from sporadic communications, the state simply refused to comply.

Ultimately Justice in Aging filed a public records act case against DHCS on December 8, 2022.²⁰ Shortly thereafter, on January 3, 2023, DHCS began providing the requested information.

66

California did not provide requested information until being sued under the state public records act.

OBSERVATIONS & POLICY RECOMMENDATIONS

If not the first, this report represents one of the few investigations into HCBS performance measures as actually implemented by states. For a variety of reasons, HCBS performance measures have flown largely under the radar, outside a small group of government officials and academics. This lack of attention has not been healthy for public policy, as demonstrated by the performance measures discussed in this report. Simply put, California's ALW performance measures appear to provide little value to anyone. This state of affairs has been allowed to develop and continue in California and across the country because the performance measure mechanism is entirely invisible to anyone outside government.

The status quo represents a tremendous wasted opportunity. DHCS has many strong reasons to monitor ALW performance; also, information about the ALW and its service providers could be useful to consumers and other stakeholders, and stratification by participant population would assist DHCS in identifying and addressing care disparities. But the current ALW performance measure system does not appear to meet the needs of government, consumers or anyone else. Instead, performance measures are calculated solely to fulfill bureaucratic requirements, with negligible interest in using performance measures as they are intended — to identify problems and improve public policy.

Notably, this critique applies not only to California, but also to CMS and to the other states operating assisted living waivers and other HCBS waivers. Across the country, the reality of performance measures falls far short of their potential.

Federal Policy Recommendations

In fairness to DHCS, it should be noted that the overall approach to HCBS performance measures is largely set by the federal government. As described above, federal guidance requires that performance measures focus on six specific areas: administrative authority, level of care determinations, provider qualifications, waiver service plans, health and welfare, and financial accountability. Overall, the federal guidance calls for a system that monitors

waiver programs themselves, rather than (for example) waiver service providers.

As a result, many of the shortcomings in ALW performance measures are largely attributable to federal policy. This report criticizes the ALW for not measuring provider quality and, by using only aggregate data, not distinguishing between individual providers. Each of these criticisms is best laid at the feet of CMS: the federal HCBS performance measure system is not designed to evaluate individual providers and, by focusing on aggregate agency-level measures within ALW operations, DHCS has merely implemented federal policy.

As discussed above (see page 5), CMS recently announced a new Quality Measure Set that includes 97 separate performance measures.²¹ Critique of those 97 measures is beyond the scope of this report, but review of the CMS-related guidance indicates that it largely does not address the issues identified in this report.

Five overarching recommendations address many issues raised in this report:

1. Monitor individual provider performance.

First, CMS should consider how to monitor performance of individual HCBS providers, including assisted living facilities. Such monitoring, accompanied by extensive data sharing on the Care Compare website, is an accepted and prominent part of CMS policy towards hospitals, physicians, nursing facilities, and other federally-certified providers. Implementation of this recommendation should take into account the relatively small size of many HCBS providers.

2. Improve quality monitoring of residential facilities.

Second, and relatedly, CMS should consider how to best monitor HCBS-funded residential facilities

(e.g. assisted living facilities). Overall, most HCBS waiver participants receive services in their own houses and apartments; the residential facility waivers are relative outliers. Many performance measures may be relevant for at-home care but not for facility-based care, or vice versa.

CMS review of this issue also should consider strategies beyond performance measures. Currently, both CMS and state Medicaid agencies have little control over assisted living standards and quality. CMS routinely accepts a state Medicaid agency's assurances that residents' health and welfare is safeguarded, and then treats the matter as settled. Furthermore, the state Medicaid agency likewise may have little control over assisted living, since state assisted living licensing standards generally will be developed and enforced by a different state agency. Particularly given the recent federal regulations to promote non-institutional practices and environments in HCBS-funded settings (see p. 6), CMS can no longer maintain what has largely been a hands-off posture towards monitoring and maintaining quality in federally-certified assisted living facilities. CMS should take a more proactive approach, which will require CMS to both set and enforce standards, and to build up the policy infrastructure to make those efforts possible.

3. Use performance measures to address health care disparities.

Third, CMS should expand the scope of performance measures as appropriate to capture resident-specific information including care needs, gender, race, age, sexual orientation, primary language, and other characteristics. CMS and states can use these data to identify disparities in care and then develop strategies to address those disparities.

4. Make performance measure information available to public.

Fourth, states must be required to make up-to-date performance measure information readily available

to the general public, in an accessible format. CMS generally touts transparency as an essential piece in data-driven improvement strategies.²² Particularly compared to the extensive publicfacing data available on Care Compare, current HCBS performance measures are strikingly nontransparent, to the extent in this case that litigation was necessary to extricate performance measure information from the state.

5. Reorient performance measures towards actual policy improvements.

Fifth, CMS should change the orientation of HCBS performance measures to focus more on actual policy improvements. CMS purportedly utilizes a continuous quality improvement cycle in which discovery leads to remediation, which leads to improvement, which leads to design, which leads again to discovery, whereupon the process continues.²³ Needless to say, data from the California ALW give little indication of any such a quality improvement orientation, and CMS complacency is suggested both by the ALW performance measures themselves, and by the process-over-content nature of the relevant DHCS-CMS communications.²⁴

California Policy Recommendations

As noted, the current five-year ALW approval will end on February 29, 2024, and DHCS currently is preparing an application for another five-year renewal. In an e-mail to stakeholders, DHCS announced a two-phased approach: an initial renewal application with only minor changes, followed by "a subsequent amendment that will comprehensively address the suggestions raised by stakeholders."²⁵

All of the federal recommendations above apply also to California: use performance measures to distinguish between individual providers including assisted living facilities, monitor assisted living quality, use performance measures to address disparities, make performance measure information easily accessible, and change the orientation of performance measure programs to focus on actual policy improvements.

The most needed change is an organizational attitude adjustment towards the performance measure process. The current performance measures seem to be of little use to anyone, and the public measure information is unavailable to the public.

Now is the time for a reset on ALW performance measures, given both the new federal Quality Measure Set and DHCS's stated intention to "comprehensively address" stakeholder suggestions in the ALW Renewal's second phrase. As an initial, necessary step in that reset, CMS should convene a stakeholder session for an honest discussion of the current system and the possibilities for reform.

The performance measure data from the table below are taken largely from the DHCS report entitled "California State Medicaid Agency Oversight of the Assisted Living Waiver," which is part of a document that DCHS in the footer identifies as CA-0431.R06. The "Oversight" report begins on page 5 of the larger document, which begins on the first page with the California Home and Community-Based Assisted Living Waiver: Waiver Fact Sheet. Citations within the table refer to this report as the "Oversight Report."

In the case of performance measures ## 1, 5, 6, 7, 14, 17 & 18, data from the Oversight report subsequently were modified by <u>CMS's Final Report</u>, Home and Community-Based Services Review, California Assisted Living Waiver, Control #CA-0431.R06, dated February 28, 2023. Citations within the table refer to this report as the "Final Report."

The Final Report includes redacted material on pages 23, 24 and 27. DHCS made those redactions prior to turning over the Final Report, on the grounds that the redacted information pertains to technical details of the State's computer systems, and disclosure of that information could jeopardize system security.

Performance Measures for California's Assisted Living Waiver

March 2019 through February 2022

- » Year 1: March 2019 February 2020
- » Year 2: March 2020 February 2021
- » Year 3: March 2221 February 2022

ADMINISTRATIVE AUTHORITY

ASSURANCE

State retains ultimate administrative authority over waiver program, and administration of waiver program is consistent with waiver application.

▶ SUBASSURANCE

Medicaid agency retains ultimate administrative authority by exercising oversight of other governmental and contracted agencies.

PERFORMANCE MEASURE #1

Percent of complete applications from care coordination agencies that resulted in DHCS enrolling the agency in the waiver program within the waiver year.

PERFORMANCE MEASURE #1 RESULT: 100%

- » Year 1: 5 of 5 applying agencies enrolled.
- » Year 2: 9 of 9 applying agencies enrolled.
- » Year 3: 1 of 1 applying agencies enrolled.
- Data from <u>Final Report</u>, p. 7.

LEVEL OF CARE DETERMINATIONS

ASSURANCE

State implements waiver-designated processes and instruments for evaluating whether participants' care needs would qualify them for nursing facility services.

► SUBASSURANCE

All applicants receive level of care evaluation, if there is reasonable indication that applicant may need waiver services in the future.

PERFORMANCE MEASURE #2

Percent of new participants whose initial level-ofcare determination was performed by a registered nurse from a care coordination agency. (The waiver requires that these initial determinations be performed by registered nurses.)

PERFORMANCE MEASURE #2 RESULT: 100% » Year 1: 2,078 of 2,078 participants. » Year 2: 2,475 of 2,475 participants.

- » Year 3: 2,988 of 2,988 participants.
- Data from <u>Oversight Report</u>, p. 11.

▶ SUBASSURANCE

Waiver-designated processes and instruments are appropriate to determine participant level of care needs.

PERFORMANCE MEASURE #3

In determining participant's level-of-care needs, percent of determinations in which specified processes and instruments were used appropriately.

PERFORMANCE MEASURE #3 RESULT: 100%

- » Year 1: 5,643 of 5,643 participants.
- » Year 2: 6,782 of 6,782 participants.
- » Year 3: 7,811 of 7,811 participants.
- Data from Oversight Report, p. 14.

PROVIDER QUALIFICATIONS

ASSURANCE

State has designed and implemented an adequate system to ensure that waiver service providers are qualified.

► SUBASSURANCE

Providers initially and continually meet licensure/certification standards and other state standards.

PERFORMANCE MEASURE #4

Percent of enrolled home health agencies that maintained provider qualifications.

- PERFORMANCE MEASURE #4 RESULT: 100% » Year 1: 1 of 1 home health agencies.
- » Year 2: 1 of 1 home health agencies.
- » Year 3: 1 of 1 home health agencies.
- Data from Oversight Report, p. 16.

PROVIDER QUALIFICATIONS—CONTINUED

PERFORMANCE MEASURE #5 Percent of facility providers qualified to provide waiver services, of providers enrolled during the waiver year.	PERFORMANCE MEASURE #5 RESULT: 100% » Year 1: 74 of 74 enrolled facility providers. » Year 2: 110 of 110 enrolled facility providers. » Year 3: 176 of 176 enrolled facility providers. Data from <u>Final Report</u> , p. 14.
PERFORMANCE MEASURE #6 Percent of enrolled facility providers that did not allow licensure and/or certification to lapse, of providers that received onsite monitoring reviews during the year.	 PERFORMANCE MEASURE #6 RESULT: 96.67% TO 98.95% » Year 1: 98.95%; 189 of 191 facilities with onsite reviews. » Year 2: 96.67%; 29 of 30 facilities with onsite reviews. » Year 3: 98.45%; 190 of 193 monitoring reviews. Data from Final Report, p. 15.
SUBASSURANCE Provider training is conducted in accordance with wa	iver requirements.
PERFORMANCE MEASURE #7	PERFORMANCE MEASURE #7 RESULT:

Percent of enrolled providers that held mandatory in-service training for staff.

While reporting data, DHCS announced its intention going forward to modify the performance measure to the following: Percent of enrolled facility providers that held mandatory in-service training for staff, of providers that received onsite monitoring reviews during the year.

PERFORMANCE MEASURE #7 RESULT: 96.67% TO 99.48%

- » Year 1: 99.48%; 190 of 191 providers.
- » Year 2: 96.67%; 29 of 30 providers.
- » Year 3: 98.45%; 190 of 193 providers.
- Data from Oversight Report, p. 22, as modified by Final <u>Report</u>, p. 16.

WAIVER SERVICE PLANS

ASSURANCE State has adequate system for viewing service plan adequacy. ► SUBASSURANCE Service plans address all participants' assessed needs and personal goals. PERFORMANCE MEASURE #8 RESULT: PERFORMANCE MEASURE #8 96.30% TO 100% Percent of participants with a waiver service plan that reflected the participant's needs, based on » Year 1: 96.30%; 26 of 27 files reviewed (5,643 the assessment, clinical records, and participant's personal preferences, as determined through review of a subset of participant case files. participants overall). » Year 2: 100%; 75 of 75 files reviewed (6,782

JUSTICE IN AGING | SPECIAL REPORT | www.justiceinaging.org |

Navigating a Broken System

Arizona's long-term care system is fragmented, expensive, and inequitable. Over the last several years, countless news stories have exposed horrific instances of abuse, neglect, and exploitation of vulnerable adults due to systemic failures. Families have repeatedly conveyed that they need help navigating the complex system and ensuring that their loved ones receive proper care.

In response, AARP Arizona and the Arizona Republic partnered to create the following resource guide to help families better understand Arizona's long-term care system and to protect their loved ones from harm. The guide delves into such topics as comparing types of facilities, signs that someone may need additional support, and questions to ask when choosing a facility. It also exposes where the system has failed and provides some recommendations for improvement.

Critical improvements to Arizona's long-term care system are imperative to ensure that everyone has access to high-quality, affordable care that protects them from abuse, neglect, and exploitation. In the 2024 legislative session, AARP Arizona aims to reform the state's long-term care system through measures that strengthen licensing and enforcement policies, improve quality of care standards, and enhance reporting processes. To learn more about our efforts, please contact Brendon Blake at bblake@aarp.org or 602-245-8801.

CONTENTS

- Understanding the difference between assisted living and Δ nursing homes

- Ask these questions when you're choosing a facility 11
- Research like a reporter: How to do a background check on a facility 14

AARP Arizona: How do we 22 improve the system?

Acknowledgments and

rizona's long-term care and residential facilities system is broken. Throughout 2023, The Arizona Republic published a series of investigative reports looking at the problems, and Arizonans responded to the journalism with shock.

They felt overwhelmed and unsure how to protect people they love.

Arizona's only tool for backgrounding assisted living facilities doesn't provide the full picture, is not intuitive and isn't designed for comparison of options.

One woman, whose mother suffered from poor care at a Mesa facility, asked a Republic reporter: "Why is it so hard for someone like me to find out everything you know? It shouldn't be that hard for someone like me to research these facilities."

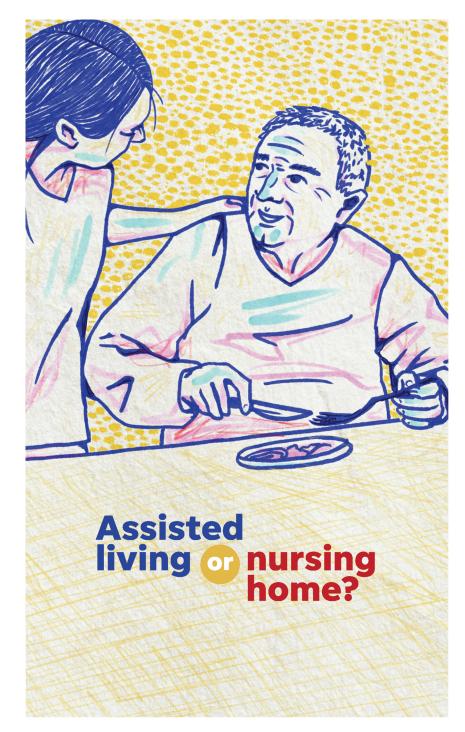

We agree.

So, in partnership with AARP Arizona, we created this pamphlet to help families better understand the system and to help them find the best senior living care option for their loved ones.

Most of this pamphlet focuses on assisted living facilities, as they tend to provide more permanent living arrangements but are less regulated than nursing homes and more difficult to research.

Reporting and analysis: Caitlin McGlade, Sahana Jayaraman | **Editing:** Greg Burton, Wyatt Buchanan, Becca Dyer | **Illustrations:** Emily Nizzi | **Design:** Andrea Brunty

How to navigate 2 different care models with different rules

ome Arizonans are surprised to learn that assisted living facilities don't have to follow the same rules as nursing homes. Here's how they are different.

ASSISTED LIVING

What is assisted living?

Arizona has about 1,900 licensed assisted living homes and centers. These facilities offer longterm housing to people who need varying levels of help. "Homes" serve 10 or fewer residents, while "centers" serve 11 or more.

They are licensed in the tiers listed below. While most facilities are licensed to provide the highest level of care, many serve a range of care levels.

Supervisory care: General supervision and the ability to intervene in a crisis. This is the lowest level of care.

Personal care: Assistance with daily tasks such as getting dressed, mobility or basic hygiene, the coordination of intermittent nursing services or medication administration.

Directed care: This designation, which is the highest level of care, includes programs and services for residents who are incapable of recognizing danger, asking for help, expressing need or making basic decisions.

Who works there?

Most employees working with assisted living residents are either certified caregivers who are 18 or older and have taken a course approved by the Health Department or the board that licenses facility managers; or, they are assistant caregivers who require supervision. The rules that govern assisted living operation stipulate that assistants must be at least 16 years old and have "qualifications, skills and knowledge" to do their job.

These facilities are not required to have medical professionals on staff, though some do. You might hear caregivers referred to as "med techs," but this is simply an industry term and does not indicate any additional or specialized training.

Assisted living facilities do not have to report how many employees work each shift to any government body, but they can get cited for inadequate staffing if a state surveyor finds an issue during a visit, such as failing to schedule a certified caregiver during any particular shift.

How often are assisted living centers inspected?

The Arizona Department of Health Services is charged with inspecting assisted living facilities once a year, with one big caveat: If a facility comes out of an annual inspection with no citations, state law prohibits inspectors from returning for two years unless they receive a complaint.

When an employee suspects abuse, neglect or exploitation of a resident, they need to report it to either Adult Protective Services or police. The facility is also required to conduct an internal investigation and keep it on file for a year, but they generally do not have to share the results with anyone unless a state inspector asks for it.

NURSING HOMES

What are nursing homes?

Nursing homes, most of which are federally regulated and receive Medicare and Medicaid funding, are designed to provide aroundthe-clock medical care, 24-hour supervision, three meals a day, assistance with daily living and rehabilitation services. They serve long-term residents with chronic, disabling conditions or people who need short-term rehabilitation after acute illnesses or injuries. There are about 140 skilled nursing homes in Arizona.

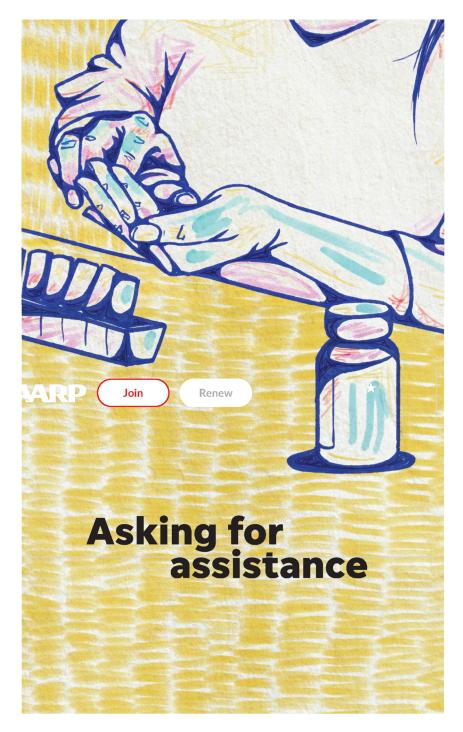

Who works there?

Nursing homes have a director of nursing who oversees registered nurses, licensed practical nurses and certified nursing assistants. They may also have occupational and physical therapists. These employees have medical training. Nursing homes must report daily staffing levels, and that information is tracked by the Centers for Medicaid and Medicare Services.

How often are they inspected?

State law requires that nursing homes be inspected annually, and the Centers for Medicare and Medicaid Services stipulate that they be inspected once every 15 months. The state also receives and investigates complaints about them. They must report any suspected abuse, neglect or exploitation to the Arizona Department of Health Services.

What are some signs someone needs more help at home?

ne thing that AARP Arizona has repeatedly heard from older adults is that they want to stay in their homes for as long as possible. Home- and community-based services (HCBS) play a substantial role in helping people to remain in their homes.

If someone needs additional care at home due to difficulty completing basic activities of daily living (ADLs), such as feeding, bathing, toileting, and medication management, homeand community-based services help provide necessary care.

Broadly, HCBS can provide services such as home-delivered meals, paid in-home caregivers, adult day centers, adult day health centers, transportation, housekeeping, visiting nurses, personal care, respite care and more. These services also provide support to family caregivers.

Here is a list of some statewide resources for home- and community-based services:

- Area Agencies on Aging (Region-Based; Region 1 for Maricopa, www.aaaphx.org).
- Arizona Caregiver Coalition, azcaregiver.org.
 Arizona Long Term Care System (ALTCS)
- through AHCCCS.
 Many cities and towns provide transportation and meals and recreation programs to reduce social isolation.

While many resources require private pay, there may be some opportunities for reduced or covered care based on your insurance.

What if home- and community-based services are not enough?

Deciding to move a loved one into a long-term care facility is a tremendously difficult decision.

If home- or community-based services aren't an option, consider these questions:

- Does the individual live alone? ۲
- If not,

•

- How often do they receive assistance • and with what types of activities? Does the person giving care also work?
- Is the person giving care in good health? • How many activities of daily living can the
- individual perform alone?
- Can they manage their finances by themselves?
- Are they able and know how to get help if • needed?
- Are they able to manage their medication?
- Are they falling a lot?

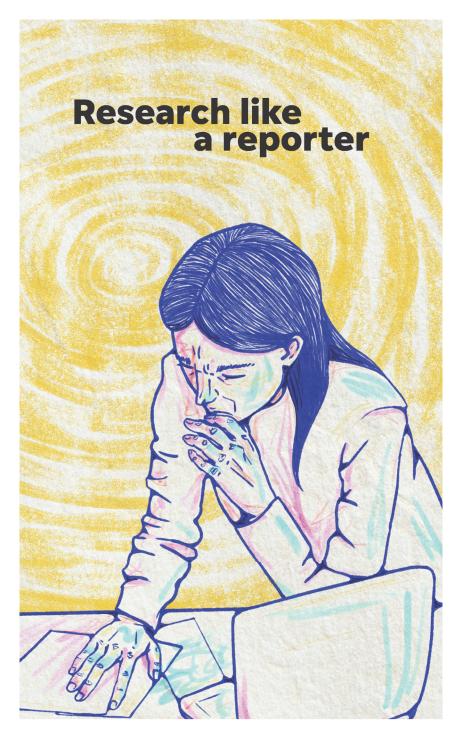

Ask these questions when choosing an assisted living facility

ell-manicured grounds, sparkling lobbies and friendly tour guides can easily woo prospective residents and their families. But you should come prepared with questions when shopping for facilities. Find a printable checklist from AARP at https://shorturl.at/nsAPV to take with you on tours. We've also interviewed families of residents, assisted living employees, attorneys and industry experts and created this list of questions that are most helpful:

- What is the facility's certified-caregiver-toresident ratio during peak hours, overnight and on weekends? Compare these ratios when evaluating options. There isn't a nationwide standard, though some states require minimums. For example, Nevada requires one employee for every six residents during waking hours for facilities licensed to serve people with dementia. South Carolina requires one employee per eight residents during peak hours. Generally, the more certified caregivers per resident means more attentive care. But the key word is "certified," as only those caregivers can work solo with residents and - in a pinch - facilities sometimes put assistant caregivers on tasks they're not trained to do.
- Does the facility have an on-site nurse or a medical team? Keep in mind that the state doesn't require assisted living to have medical professionals on staff.
- What does the facility do to ensure that employees know the residents? A key factor in quality care is tailoring activities and engagement to each resident's specific personality, preferences and needs.

- requirements do managers and caregivers receive to work with people with dementia? The state requires assisted living managers to take eight hours of training on developing systems for managing residents with dementia, Alzheimer's disease or difficult behaviors. Caregivers have to take four hours of instruction on the care of cognitively impaired residents, such as those with dementia.
- If a facility claims to have a behavioral unit, ask to see their behavioral license. Just because a facility bills itself as specializing in "behavioral" or "memory" care, don't assume that it's licensed any differently than other assisted living facilities, or is staffed with workers trained any differently than certified caregivers.

How to background check an assisted living facility

range of resources exists to help you dig into a facility's record. Depending on how much time and energy you have, try the following steps that reporters and editors at The Arizona Republic use when doing an investigation.

TIME AND EFFORT LEVEL: LOW

Finding actions from Arizona Department of Health Services ADHS posts all citation reports and enforcement actions against assisted living facilities to Azcarecheck. com. To find them, start by clicking "Residential Facilities" on the homepage. This will launch a search page.

Note that the "Status" defaults to "ACTIVE." You should set it to "ALL." Some facilities get new licenses, which means any citation or enforcement action they received under their old license won't appear within "active" license searches. If you see multiple entries for the facility you are searching, check each one to capture their full record.

When you click on an entry, you'll find one or more surveys you can download. These will spell out each citation the facility received, if there were any.

You can also see if the state fined a facility from this page, under "enforcement actions."

This information is updated daily and contains files dating back to exactly three years from the date you are searching. The Arizona Republic and azcentral. com also have created a secondary search tool that captures the past three years of citation data for assisted living centers licensed to serve people who need the most help.

The tool allows you to find any citation, links to the reports and – unlike the state's website – also plainly summarizes what the facility was cited for. You also can see how common each particular citation is, which will help you more easily compare facilities.

Find the tool at seniorcare.azcentral. com.

Check out our resident-onresident harm database

In 2022, The Republic requested police reports about resident injuries at hundreds of facilities from about 40 different police jurisdictions.

We built a database documenting each incident we found of residents hurting each other or staff. The state doesn't track this information, so our site is the only place you'll find it.

You can find that here at https:// shorturl.at/fqsFR.

A couple caveats: We didn't get everything we asked for. So don't assume that a facility's absence from the database means they've got a clean record.

Also, some facilities may call the police for incidents that others wouldn't, so don't assume that a facility is more troubled than others based on the incident count.

If you find an incident that happened at a facility you're considering, we recommend asking the management about how they handled it and what they do to prevent similar issues from happening again.

If you're interested in seeing the entire police report, ask us!

Manager license actions

You can find out if your facility's manager has a record by checking https://elicense.az.gov/ARDC_LicenseSearch.

You may have to call a facility to find out who its manager is, but

once you have the name you can search the license history. The state's license search tool links to any disciplinary actions taken against the manager.

Facility ownership and affiliation

Knowing what company, or who, owns your facility is important information to understand their motives and their track record around the state or across the country.

Sometimes it is unclear what parent company owns or operates a given assisted living facility. You might find out by asking the staff, but if that doesn't work, check the Arizona Corporation Commission.

Visit https://ecorp.azcc.gov/ EntitySearch/Index.

The "principal information" you find here will tell you what other entities are associated with the facility. You may need to put those names into the search tool again to go a layer deeper about who the entities actually are.

TIME AND EFFORT LEVEL: MEDIUM

Court records

Search your facility's name, and the company or individuals associated with it, in your county's court records. Most courthouses have online search engines that show if cases against a particular entity exist. Once you identify a case, you'll likely need to physically go to the courthouse to understand the nature of the case. Complaint documents filed in a case will spell out what the allegations are.

Other state records

If your facility is owned, operated or affiliated with a company that operates in another state, you might find more complete data about its other properties. Colorado, for example, has a robust assisted living search tool. You can find that here: https:// cdphe.colorado.gov/find-and-

Complaints

compare-facilities.

The Arizona Department of Health Services received more than 3,000 complaints against assisted living centers from 2017 to late 2023.

When the state substantiates complaints - meaning investigators determined rules were broken – it posts its findings to azcarecheck.com, but the allegations from the rest are never publicized. You may want to read up on these unpublicized allegations. The state's investigations have not always been thorough and – at least for abuse, neglect or exploitation claims - the Health Department depends on Adult Protective Services and law enforcement to determine whether the harm occurred. A 2023 audit slammed protective services for inadequate investigations.

You can find out if a facility had complaints filed against it by searching The Arizona Republic's complaint tool. This source will tell you the Intake ID, the date the complaint was filed and the state's finding.

From there, you'll need to file a public records request for the documents that explain the complaint. (The Republic's tool provides template language and a link to the state's public records request form.)

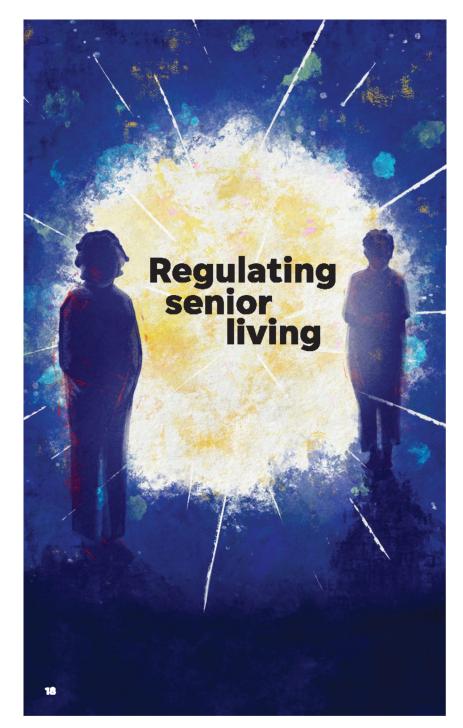

TIME AND EFFORT LEVEL: HIGH

Police reports

Assisted living facilities are required by law to report suspected abuse, neglect or exploitation to either Adult Protective Services or the police. Adult Protective Services won't tell you anything – but police reports are a public record. Police reports may tell you about dangerous or traumatizing incidents that a facility was never cited for.

If you have time and energy to go this route, we recommend requesting from the relevant police jurisdiction a list of calls for service stemming from the address of the facility you are interested in. Most police departments will turn around calls for service fairly quickly.

Once you get the list, we recommend selecting incident reports having to do with fights, assaults, sex assaults, abuse or neglect of an elder and other keywords similar to these. Request the incident reports using their incident report ID numbers. Depending on the agency, this could take weeks to months. If you're requesting from Phoenix police or the Maricopa County Sheriff's Office, it could take more than a year.

Learn about these state agencies and how you can file complaints

The Arizona Department of Health Services (ADHS)

This state agency is responsible for licensing both nursing homes and assisted living centers, inspecting them regularly and investigating complaints about the facilities. ADHS cites and fines facilities when they break rules designed to ensure quality care, though penalties are capped at \$500 per day per violation. The department does not investigate managers who run the facility.

You can file a complaint about a facility online at azcarecheck.com by selecting "Online Complaint Forms" in the side rail. If you need assistance, call 602-364-2639 for help filing assisted living complaints and 602-364-2690 for nursing home complaints.

A complaint will result in one of three outcomes:

- The state will be unable to substantiste your allegations, meaning its investigators couldn't find evidence a rule was broken.
- The state will find your allegations unsubstantiated, meaning that there was definitive evidence that a rule was not broken.
- The state will substantiate your allegations, issue citations, require a corrective action plan and potentially fine the facility.

If the state substantiates your allegations, findings are posted online in reports the department calls "statements of deficiencies," and the department will send you a letter telling you what report to look for. The letter won't tell you how to find the report. Refer to Chapter 4 of this booklet for instructions on how to do that.

This board licenses nursing home administrators and assisted living managers, investigates complaints filed against them and licenses training programs for both managers and caregivers. (The board does not, however, license caregivers nor does any regulatory body. They get certificates from the companies the board approves for training.)

The board receives cases in one of two ways: ADHS sends citation reports that resulted in an enforcement action to the board or individuals file complaints. (Most come from ADHS.)

If you want to file a complaint specifically about the manager of a facility, go to https://elicense. az.gov/ARDC_FileComplaint. You also can mail a complaint to 1740 W. Adams St., Suite 2490, Phoenix, AZ 85007.

To reach the Investigations Department, call 602-364-2374, Option #2.

Complaints should be filed within one year of the alleged problem.

The board tries to notify complainants before their allegation goes before the board, but complainants do not always need to be present for the board's discussion or hearing.

The board may dismiss the case, revoke or suspend manager licenses, require additional training or issue letters of concern.

Adult Protective Services (APS)

Adult Protective Services is a program within the state's Department of Economic Security. It's responsible for taking and investigating reports of the abuse, neglect and exploitation of vulnerable adults across Arizona, including those living in nursing homes and assisted living facilities.

You can file a report — which APS refers to as an "allegation" — with the agency online 24/7 at https:// des.az.gov/services/basic-needs/ adult-protective-services by clicking "File an APS report online," or over the phone at 877-767-2385. Phone lines are staffed between 7 a.m.-7 p.m. Monday-Friday, and from 10 a.m. to 6 p.m. on weekends and state service holidays.

To substantiate an allegation, APS must find that more than 50% of the evidence points to abuse, neglect or exploitation having occurred and been perpetrated by an identified individual. Reports filed with APS that meet its criteria for investigation will have one of three outcomes:

- The agency will not substantiate your allegation, meaning they couldn't find enough evidence to prove abuse, neglect or exploitation occurred and was perpetrated by an identified person or persons.
- The agency will verify your allegation, meaning they found enough evidence to prove that abuse, neglect or exploitation occurred but could not identify a perpetrator, the allegation was of self-neglect, the perpetrator died or the perpetrator was another vulnerable adult.
- The agency will substantiate

your allegation, putting a perpetrator on its registry, where their name, date of birth and a description of what happened will remain for 25 years. It's important to note that facilities can still hire people on this registry; that's up to an employer's discretion.

Substantiation is a complex process: APS has the Arizona Attorney General's Office review evidence for any allegation it plans to substantiate. Alleged perpetrators have the chance to appeal to an administrative law judge; if they choose to request a hearing, the Department of Economic Security director has to review the judge's findings before making the ultimate decision about whether a perpetrator will go on the registry.

If you are the alleged victim in a case reported to Protective Services, you can expect that they will contact you at the end of their investigation if your allegation was unsubstantiated or verified. If your allegation is proposed for substantiation, they'll tell you whether the alleged perpetrator has requested a hearing in the allotted time frame, and they'll let you know whether they have decided to substantiate your allegation.

If you're the person who filed a report about abuse, neglect or exploitation with Protective Services — but not an alleged victim — you'll get a letter telling you the outcome of the case. You may also be interviewed if Protective Services needs additional information or if you were party to the case (a family member or witness, etc.).

How do we improve the state's system?

ARP Arizona has advocated for family caregivers for over a decade. Here are some of the key areas for improvement:

Give the Arizona Department of Health Services more tools:

- Allow the department to hold facilities
- accountable with penalties greater than \$500.
- Improve transparency of facility ownership.

Require more from facilities:

- Necessitate improved training standards.
- Require facilities to review the Adult Protective Services' registry before hiring new staff.
- Define memory care standards, specifically:
 - Staffing ratios.
 - Minimum training standards for all staff, such as dementia-specific training.
 - Strong therapy and activity programming.
 - Comprehensive design that lowers resident confusion and agitation.
 - Cognitive and behavioral screening.
- Require facilities to report every injury to the Arizona Department of Health Services.

Consumer improvements:

- A "No Wrong Door" Policy, which would mean that, regardless of which agency is contacted to report abuse or neglect, each department will cross-report to the correct agency.
- Improve the Arizona Department of Health Services' website. Currently, the website is very difficult to navigate and hard for regular consumers to get an accurate picture of the facility and the care that they provide.
- As is allowed in group homes for those with developmental disabilities, if families agree, they should be allowed to have a camera in the room of their loved ones for their safety.

To the families and individuals who trusted The Arizona Republic with your grief, your trauma and your anger: Thank you. We know it's difficult to relive some of your most painful moments and we know you did it with the hope to bring change to the system for others.

We want to acknowledge people we wrote about who passed away after shocking senior living incidents or dementia complications: Estalyn Bouchard, Joyce Dinet, Anita Ferretti, Jennie Fischer, Kevin Rodrigues, Joann Thompson, Bernadine Wick. We did this work for you, and for future residents in hopes that they will not suffer similar problems.

Thank you to the researchers who spent hours on the phone with us and provided valuable context so we could tell these stories in the most sensitive way possible. Eilon Caspi from the University of Connecticut, Charlene Harrington from the University of California-San Francisco, Lori Reynolds, who has a doctorate in gerontology and worked with Northern Arizona University — you were all instrumental to the impact of our reporting in the series, The Bitter End, at azcentral.com.

We also want to thank our colleagues, both current and former, at The Arizona Republic and USA TODAY, who worked tirelessly to produce the series that exposed Arizona's broken assisted living system.

Submitted Statement of LaShuan Bethea J.D., M.Ed., BSN, RN Executive Director, National Center for Assisted Living

For the U.S. Senate Special Committee on Aging Hearing, Assisted Living Facilities: Understanding Long-Term Care Options for Older Adults

February 1, 2024

Chairman Casey, Ranking Member Braun, and members of the committee:

Thank you for holding the recent hearing, Assisted Living Facilities: Understanding Long-Term Care Options for Older Adults. Assisted living is a critical part of the long term care continuum, providing life-affirming care for nearly one million seniors every day. The National Center for Assisted Living appreciates the opportunity to share our perspective on how policymakers and providers can work together to improve accessibility to assisted living and ensure residents and families have the information they need to make informed decisions.

The people who work in this profession do it because they love it. They have a passion for serving seniors and are dedicated to providing a safe, secure, home-like environment while honoring every resident as an individual. This is one of the contributing factors of why the vast majority of assisted living residents love their communities. Surveys find that 99 percent of residents feel safe in their communities, and 91 percent say they feel safer than living on their own.

Every assisted living community is unique and has the ability to adapt to the needs and wants of residents and local communities. Regulation at the state level allows for a dynamic, localized model that allows for individualized, person-centered care and promotes innovation. State-based regulation of assisted living is strong, as reported in the National Center for Assisted Living's "Assisted Living State Regulatory Review." The report found that two-thirds of states reported changes between 2020-2022 and another 31 percent between 2022-2023.

Because every community is different, the best way for someone to determine if an assisted living community is the right place for them is to visit. Many people who seek this type of care are searching locally, close to family and what they know and love. This is a very personal decision. It is important to find the right fit in a community where they are comfortable with how things operate, including resident rights, physical safety, staff training, and other central factors that are available through state survey data. A national database cannot match this personal experience in ensuring residents find the right care.

Regarding the cost of assisted living care, we fully support transparency in pricing. Residents and their family members should fully understand the true cost of care. Assisted living

providers are committed to transparency, and that is why it is common practice for these communities to provide prospective residents with written information regarding services, costs, fees, conditions for residency, and policies/procedures. Further, <u>over 90 percent</u> of states require consumer disclosure agreements and/or resident bill of rights to ensure residents and their families get the information they need to make informed decisions.

Most residents pay for assisted living through personal finances (or private pay), according to an October 2023 report by the Congressional Research Service, and consumer demand for private pay assisted living remains strong. However, the fact remains that affording long term care out-of-pocket is really challenging for many, especially since assisted living is a combination of housing and some health-related services. Meanwhile, few Americans are planning for the cost of long term care. While many assisted living providers will continue to meet ongoing demand by private pay consumers, many other providers recognize the potential to serve a growing elderly population who may not have the means. Yet, challenges such as absence of a state Medicaid waiver program, low Medicaid waiver rates, limited public funding make it difficult for some assisted living providers to develop more affordable models that are viable. We need a public-private partnership to identify opportunities to increase affordable assisted living options for low to moderate income older adults who can no longer live at home. It is also vital to look at expanding and properly funding Medicaid assisted living services to allow more providers to participate in the program. NCAL outlined these recommendations and more in the white paper, The Importance of Expanding Affordable Assisted Living Options and Proposed Solutions.

Thank you for the opportunity to provide written testimony. We look forward to continuing this discussion and demonstrating that assisted living provides high quality care at a high value to our nation's seniors.

February 1, 2024

Dear Sens. Casey, Braun, and members of the Senate Special Committee on Aging,

On behalf of the nearly 200 senior living communities — including personal care homes and assisted living residences — that fall within the membership of the Pennsylvania Health Care Association, I am writing to you in response to the recent hearing held by your committee to understand long-term care options for older adults — specifically, assisted living residences.

My name is Zach Shamberg, and I serve as the president and CEO of the Pennsylvania Health Care Association (PHCA). We are an advocacy organization for long-term care providers and the residents they care for — a statement proven by our record of advancing the long-term care continuum and improving care outcomes. Our membership includes 184 senior living communities — 166 personal care homes and 18 assisted living residences — that account for more than 15,000 licensed beds. We also serve more than 240 nursing home providers across the state.

From a national standpoint, I am also proud to serve on the Board of Representatives for the National Center for Assisted Living (NCAL).

We write to you today in response to your hearing, as we aim to meet your goal of providing further education about senior living in Pennsylvania and across the country. We appreciate the opportunity to provide additional insight and feedback in this letter, and we welcome any opportunity to participate in future meetings or hearings.

First and foremost, it's important to recognize that like anything relative to meeting health care needs, there is no one-size-fits-all model that works. We are all different and our care should be handled as such. This is why we have various levels of long-term care.

Pennsylvania is unique when it comes to senior living. In our commonwealth, there are two separate licenses for these levels of care: assisted living residences and personal care homes.

These senior living options are designed to allow a resident to age in place within a community — while respecting the resident's independence and rights — without having to move the

resident to a licensed nursing facility until their care needs increase. Both personal care homes and assisted living residences design programs to meet individual needs — for short-term stays when support services are required and for permanent residency when chronic conditions exist.

Pennsylvania Health Care Association 315 N. Second Street Harrisburg, Pennsylvania 17101 phca.org | pennsylvania.careforth eaging.org The differences between our two types of senior living options include construction, amenities, and levels of care offered. A person who needs the level of care of a nursing facility is not permitted to reside in a personal care home and must transfer to a higher care setting when their needs become too great. That same person, however, will be able to remain in an assisted living residence where they will be provided with the services they need to age in place.

Regardless of the type of provider, state regulations and safeguards are in place, and it is the state's responsibility to uphold those regulations. Any concerns addressed during the hearing should be directed to the regulatory agency in the state where the resident was receiving care. Federal intervention would simply add new layers of bureaucracy and result in slower processes and more expensive care for our elderly.

In Pennsylvania, transparency already exists. License Inspection Summaries (LIS) are available on our state's Department of Human Services website. The most recent LIS must be posted in a public place and available to review at all times in each senior living community.

Providers are also required to disclose specific information prior to resident admissions, such as contracts, services available, cost of living, community rules, a resident handbook, inspection results, and any agency-approved waivers.

Residents also have rights, that are clearly outlined in the regulations. Providers must manage and balance what legislators and regulators think is best versus what families and loved ones deem is best — all while factoring in the actual rights of the resident, who still has autonomy in their living and care.

As part of the established regulations, providers are required to appropriately train their staff based on resident care needs, including required training for elopement risk and dementia units. Such training includes that of specialized physical plants, design, modeling, and program development as the need increases. Policies and procedures are in place to balance resident needs, family wants, and various regulatory requirements, including reporting adverse incidents.

In Pennsylvania, our Department of Human Services will investigate to ensure adequate care and staff education are in place while maintaining resident independence and safety. If this is not the approach in other states, Pennsylvania can certainly serve as a model.

It's also important to note that Pennsylvania senior living communities do not receive Medicaid or Medicare funding to support the care of residents. Assisted living and personal care rely almost exclusively on private pay.

That is an emerging challenge in Pennsylvania, as we must recognize the growing demand for senior care and the lack of financial resources seniors will have in the years to come. Roughly one in three adults aged 65 and older are economically insecure. In Pennsylvania, if a resident can't afford senior living and that resident doesn't qualify for Medicaid to receive care in a

nursing home, the resident has no option but to stay home. This is why PHCA continues to advocate for state legislation that would bring a Medicaid waiver to assisted living, just as dozens of states across the country have already done.

PHCA has also supported state legislation that would implement a state retirement savings program to help our population save for their future. Retirement is not just about taking the trips and vacations we always wanted — we need to consider care and living situations in the later years of our lives. This program would ensure Pennsylvanians are better prepared.

The cost of care only continues to grow with the evolving scarcity of workers needed within long-term care. Providers are trying to remain competitive with wages to recruit and retain staff, but that is difficult to do when revenue comes from seniors on fixed incomes.

Where can federal leaders be helpful to the long-term care continuum? We believe you have an important role to play in establishing a workforce pipeline that can match the rapidly increasing demand for senior care — that includes comprehensive immigration reform, regulating staffing agencies, and a number of other initiatives.

The committee's hearing, in some ways, felt like a search for a problem. With the regulations and oversight we have outlined above, perhaps the problem is with the regulators in other states. If there are ever growing concerns over the inability of a provider to deliver care, the state's regulatory body should address it — we know it would be addressed here in Pennsylvania.

The committee should recognize that senior living providers have already been advancing care without the involvement of the federal government, including the evolution of memory and dementia care. With an increased need to care for residents living with dementia, senior living providers are working to evolve communities into secure dementia communities to increase the safety and security of the residents they serve.

Ultimately, we believe assisted living residences and personal care homes are critical to our health care continuum. Providers aren't just supporting our elderly population, they are serving communities by providing care and housing to adults living with mental and physical disabilities. While we appreciate the interest in long-term care and its importance to all of our communities, we believe this latest hearing was a search for damaging issues and negative stories that failed to provide a complete picture of the work our providers do, every single day. This is counterproductive to serving a population in need of care, and we ask for your support in collaborating on ways to strengthen our continuum — in Pennsylvania and beyond.

Once again, due to the unique entities throughout the long-term care continuum and the differences in regulations from state to state, federal government involvement — albeit well-intentioned — will only create issues for residents and providers, just as it has for nursing homes.

We would appreciate the opportunity to continue this conversation and connect with any member of the committee to answer your questions or provide additional information.

I can be reached at zshamberg@phca.org or 717-221-7925.

Thank you.

Zach Shamberg President & CEO

January 22, 2024

The Honorable Robert P Casey Jr. Chair, Senate Special Committee on Aging 200 N. 3rd Street, Suite 14A Harrisburg, PA 17101

Dear Senator Casey:

We are writing to ask you to help to open the US to greater numbers of immigrant workers to help tackle the workforce shortage across the healthcare industry. We believe that the quality and affordability concerns you are investigating are fundamentally caused by a shortage of workers willing to do the hands-on care that is needed in the long-term care field. We do not believe the solution to this worker shortage is greater regulation.

As you know our family owns and operates two assisted living organizations, Country Meadows Retirement Communities and Providence Place Senior Living. Together these two firms serve nearly 3,200 Pennsylvania seniors and employ more than 3,000 team members at 26 licensed personal care and assisted living communities across the Commonwealth.

Like others in long-term care, we have been stressed in the past two years by challenges in recruiting and hiring good staff members. Those problems have sometimes necessitated us to use temporary agency staff and have caused us to increase our salaries and wages to attract applicants. Those increased wages have helped to reward team members for the important work they do, but they have also significantly increased costs, which must eventually be passed on to customers.

The current unusually low level of unemployment in the Commonwealth has created a serious scarcity of candidates for front-line caregiver positions. Despite state-wide efforts made to offer training and to publicize these job opportunities, we believe that the solution will require increasing our access to immigrant workers willing and able to do this type of work. Whether through increasing targets for legal immigration or by creating easier access to work visas or guestworker programs, the healthcare industry (and other service areas) needs more immigrant workers. There simply aren't enough people currently interested in doing this type of hands-on work.

It is probably true that this crisis in staffing has caused a few providers to dip below PA regulatory standards for required hours of care and has created some situations in which the quality of care has suffered. Nevertheless, we believe that most providers have maintained an acceptable standard of quality. Those few who have repeatedly demonstrated lapses in quality and have received frequent complaints about care should be, and in PA frequently are, given technical support, provisional licenses, and if quality is not quickly improved, they are fined or lose their license to operate.

It is tempting at times like this-- when challenges with staffing and caregiver turnover have created quality concerns-- to believe that the fix is more regulation, or even federal regulation following the nursing home model. We think that would be a mistake.

Country Meadows Home Office 830 Cherry Drive | Hershey, PA 17033 PHONE: 717.533.2474 | FAX: 717.533.6202 www.countrymeadows.com

As you know, our family started in long-term-care in the skilled nursing business. In the 1970s and 1980s Leader Nursing Centers was the largest provider of skilled nursing in the Commonwealth. Nevertheless, we decided to back away from owning and operating skilled nursing facilities primarily because the federal regulation, though well-intentioned, was excessively burdensome to the point of being counterproductive.

In our opinion skilled nursing regulation has created the institutional environment that is so often criticized by patients and their families. More importantly, we believe overly prescriptive regulation has negatively impacted quality of life for patients in skilled facilities.

Some examples of long-term care regulations negatively affecting patient quality of life include:

- The huge range of special diets that must be offered complicates cooking to such a degree that the focus is on compliance. As a result, the overall quality of meals is notoriously poor in most nursing homes.
- Fall prevention is such a high priority in the regulations that nursing homes are incented to discourage ambulation and many use measures that act as passive restraints to walking.
- Professional nurses spend the bulk of their time on paperwork, MDS documentation and other regulatory reviews, rather than with patients.

The federal regulations of skilled nursing are often so prescriptive that they leave little or no flexibility to adjust to a patient's wishes.

The strength of the assisted living profession is that we are driven by the need to satisfy the wishes of our residents and their families. Our PA regulations establish solid boundaries and give direction to our policies & procedures. Nevertheless, our current regulations normally permit us to adapt our clinical and personal care to meet the needs and wishes of our residents.

We fear that, despite the best of intentions, federal regulation would institute requirements that would take our nurses away from patients and hamper our ability to adapt to resident's individual needs--which would ultimately reduce the quality of life of our residents.

The driving force of assisted living is the need to please our customers. We would hate to see that ever change.

Sincerely yours,

Michael Leader Executive Chairman Country Meadows

David Leader President & CEO Providence Place

meredet mills Meredith Mills

U.S. Senate Special Committee on Aging

Re: Assisted Living Facilities - a personal and professional experience

Date: February 1, 2024

I appreciate your interest in the Assisted Living setting. This is an area where there has already been intense discussion, legislative, and regulatory action in Delaware.

Our Assisted Living environments are licensed, surveyed, and overseen by the State Division of Health Care Quality, the same group that provides the same very precise and documented survey inspections of Skilled Nursing Facilities in our small state. The facilities are extremely varied in size and capabilities. With a few exceptions, the residents pay privately for care. Delaware has not embraced Assisted Living as a Home and Community-Based Option. There are only two out of thirty-four buildings in Delaware that have a sizable number of residents who receive care through the Medicaid program. One of those is for individuals with Traumatic Brain Injury who can live more independently in an Assisted Living Facility and help avoid moving to a Skilled Nursing Facility.

The legislation that provides residents and/or their representatives with disclosure requirements and more information about Assisted Living, is located in the Delaware Code, Title 16, Chapter 11. ¹ Specific regulatory details for Assisted Living Facilities can be found in Delaware's Administrative Code, Title 16, Department of Health and Social Services: Division of Health Care Quality 3225: Assisted Living Facilities. ²

Within the Administrative code are details and definitions for: Assisted Living, Contract, Resident Assessment, Service Agreements, Shared Responsibility, and Uniform Assessment Instruments to name a few terms that could help to eliminate communication and misunderstanding between parties. As someone who found it necessary to find an Assisted Living placement for my mother, I am aware of how important the transparency and communication outlined in the process in Delaware statute and administrative code was to her and our family.

It is also important for families and caregivers to tour buildings and get to know the staff and fellow residents to ensure that they are making an appropriate choice. We did that with my mother and I highly recommend that approach to others. It would be helpful if your group could help educate the public - especially families and individuals who are considering Assisted Living - about what each of the various long-term settings can and cannot provide, how their services are covered (or not) by

¹ https://delcode.delaware.gov/title16/c011/index.html

https://regulations.delaware.gov/AdminCode/title16/Department%20of%20Health%20and%20Social%20Se rvices/Division%20of%20Health%20Care%20Quality/3225.shtml

the government or insurance, and the variability between providers. Another service your group could provide would be to encourage insurers to re-engage in long-term care insurance – which is difficult to purchase for today's consumers as they plan for future needs.

As Executive Director for the state association, I participated with state legislators, advocates, industry representatives, and others in a long study of Delaware's Long-Term Care and Memory Care environment on a state-appointed task force. The group looked carefully at our changing demographics. It developed a lengthy list of recommendations that included support for additional funding, workforce development initiatives, memory care enhancements, and improvements to communication methods shared at admission and assessment. We wholeheartedly support transparency and informed decision-making because it will improve resident care and hopefully lessen misunderstandings between parties.

Most individuals in the Assisted Living environment are happy with the arrangement. But it can be expensive because building appropriate buildings, retrofitting other buildings, adding amenities, making them safe, adding commercial kitchens, recreational areas, and most of all finding the staff is a very expensive proposition. My mother preferred to supplement care in her assisted living with one of her caregivers whom she met living independently. She had the luxury of going back and forth between her home, our home, and the assisted living as circumstances allowed. Her caregiver helped her, in each of those environments and added to the services she received while in the congruent setting.

Please feel free to reach out to me if you have any questions. My experience as a caregiver for my mother, long before I became affiliated with the industry, gives me a unique perspective on these concerns. Thank you again for caring about these watershed issues for our citizens.

Sincerely,

Cheryl Heiks

U.S. Senator Bob Casey, Chair U.S. Senate Special Committee on Aging G16 Dirksen Senate Office Building Washington, DC 20510-6050

Re: Testimony in response to hearing on assisted living

Dear Members of the U.S. Senate Special Committee on Aging:

Thank you for the opportunity to submit this testimony in response to the committee's January 25, 2024, hearing on assisted living (AL).

Our organization represents 230 nonprofit, governmental, and proprietary AL communities through their membership with Nebraska Assisted Living Association. We also administer the only known private, accredited post-secondary college operated by a long-term care association. Our college is one of three entities approved by the State of Nebraska to train AL administrators.

Nebraska-licensed AL administrators are required to ensure their facilities are compliant with the following laws and regulations:

- In Nebraska, AL is designed to promote the goals of individualized decision-making and personal autonomy. [Neb. Rev. Stat. 71-5902]
- Each AL facility is required to provide written information about the practices of the facility to each
 applicant for admission to the facility or his or her authorized representative, including a description of
 the services provided by the facility, the staff available to provide the services, and the charges for
 services provided by the facility. [Neb. Rev. Stat. 71-5905(3)]
- Any AL facility which offers to provide or provides care for persons with Alzheimer's disease, dementia, or a related disorder by means of an Alzheimer's special care unit is required to disclose the form of care or treatment provided to the department and to any person seeking placement within an Alzheimer's special care unit. The information is required to include the Alzheimer's special care unit's written statement of its overall philosophy and mission; the process and criteria for placement in, transfer to, or discharge from the unit; the process used for assessment and establishment of the plan of care and its implementation; four hours of annual education for direct care staff; the physical environment to support the functioning of cognitively impaired adult residents; the frequency and types of resident activities; the involvement of families and the availability of family support programs; and the costs of care and any additional fees. [Neb. Rev. Stat. 71-516.04(1-2)]
- The AL facility is required to provide residents their rights in writing upon admission and for the duration of their stay, including their right to:
 - 1. Be treated with dignity and provided care by competent staff;
 - 2. Be an equal partner in the development of the resident service agreement while retaining final decision making authority;
 - Be informed in advance about care and treatment and of any changes in care and treatment that may affect the resident's well-being;
 - 4. Be informed in writing of the pricing structure and/or rates of all facility services;

1200 Libra Drive, Suite 100, Lincoln, NE 68512 402-435-3551 nehca.org Nebraska Nursing Facility Association • Nebraska Assisted Living Association Nebraska Health Care Learning Center • Nebraska Health Care Foundation

- Self-direct activities, participate in decisions which incorporate independence, individuality, privacy and dignity and make decisions regarding care and treatment;
- 6. Choose a personal attending physician;
- Voice complaints and grievances without discrimination or reprisal and have those complaints/grievances addressed;
- Examine the results of the most recent survey of the facility conducted by representatives of the Department;
- 9. Refuse to perform services for the facility;
- 10. Refuse to participate in activities;
- 11. Privacy in written communication including sending and receiving mail;
- 12. Receive visitors as long as this does not infringe on the rights and safety of other residents;
- Have access to the use of a telephone with auxiliary aides where calls can be made without being overheard;
- 14. Have the right to have a telephone in his/her room at the resident's expense;
- 15. Retain and use personal possessions, including furnishings, and clothing, as space permits, unless to do so would infringe upon the rights and safety of other residents;
- 16. Share a room with a person of his or her choice upon consent of that person;
- 17. Self-administer medications if it is safe to do so;
- 18. Be free of chemical and physical restraints;
- 19. Exercise his or her rights as a resident of the facility and as a U.S. citizen or resident;
- 20. Form and participate in an organized resident group that functions to address facility issues;
- 21. Review and receive a copy within two working days of their permanent record;
- 22. Be free from abuse, neglect, and misappropriation of their money and personal property; and
- 23. Be free from involuntary transfer or discharge without 30 days advance written notice except in situations where the transfer or discharge is necessary to protect the health and safety of the resident, other residents or staff. [175 Neb. Admin. Code 4]
- The AL facility is required to evaluate each resident and have a written service agreement negotiated with the resident and authorized representative, if applicable, to delineate the services to be provided and the costs for those services. [175 Neb. Admin. Code 4]
- Each AL facility must provide residents care and services in accordance with their established resident service agreements which maximize the residents' dignity, autonomy, privacy and independence [175 Neb, Admin. Code 4]

In addition to the above, Nebraska statute requires that AL direct care staff annually receive four hours of training on topics pertaining to Alzheimer's and dementia care and treatment.

Each state has developed AL services and regulatory oversight to meet the needs of its population. Nebraska regulations are already successfully designed to protect AL residents' needs and rights, including those related to health, safety, privacy, dignity, and disclosure of information. Nebraska is taking care of our assisted living residents.

Sincerely,

Jalere Carpenter

Jalene Carpenter President and CEO

Scott Bickel The United States Senate Special Committee on Aging G16 Dirksen Senate Office Building Washington, DC 205-6050

Subject: Hearing on Assisted Living Facilities: Understanding Long-Term Care Options for Older Adults

Dear Mr. Bickel:

This letter is in response to the recent hearing on assisted living facilities, specifically focused on understanding long-term care options for older adults. As CEO of the Florida Health Care Association which represents assisted living providers in the state of Florida, I believe it is crucial to address the challenges faced by our aging population and find ways to make assisted living a more affordable option.

One key aspect that was emphasized during the hearing is the need for assisted living communities to have disclosure requirements on costs. Florida has regulations that require transparency and disclosure of costs, services included in the cost and other necessary information for the resident and families to make informed decisions.

It is imperative to recognize that the elderly population is growing rapidly, and their needs are evolving. As a result, it is essential to explore innovative solutions to ensure that assisted living remains an accessible and affordable option.

In conclusion, I urge the Senate Aging Committee to prioritize funding options for assisted living facilities. By focusing on the costs and finding ways to make assisted living more affordable, we can empower older adults and their families to make informed decisions about their long-term care.

Thank you for your attention to this matter. I look forward to the outcomes of the hearing and the positive impact it will have on the lives of older adults.

Sincerely,

J. Emmeth Reed

J. Emmett Reed Chief Executive Officer

STATEMENT FOR THE RECORD

SUBMITTED TO THE

Special Committee on Aging

United States Senate

Hearing: Assisted Living Facilities: Understanding Long-Term Care Options for Older Adults

January 25, 2024

American Seniors Housing Association (ASHA) 5225 Wisconsin Avenue, N.W. Suite 500 Washington, D.C. 20005

For further Info, contact: David Schless, President & CEO, david@ashaliving.org Jeanne McGlynn Delgado, VP, Government Affairs, jeanne@ashaliving.org

The American Seniors Housing Association (ASHA) appreciates the opportunity to submit this statement for the record regarding the Senate Aging Committee hearing, *Assisted Living Facilities: Understanding Long-Term Care Options for Older Adults.*

ASHA is a national organization of over 500 senior living companies who own, operate, or provide services to approximately 7,000 senior living communities across the U.S., including active adult, independent living, assisted living, memory care and life plan/continuing care retirement communities. Our members' communities serve a wide range of seniors, from those who require very little assistance with activities of daily living such as eating, bathing and dressing to those with significant needs associated with Alzheimer's disease and related forms of dementia. The Association's programs are focused on promoting quality and innovation, advancing research, exchanging strategic business information, and educating seniors and their families about the merits of senior living.

As such, we have a keen interest in the policy agenda of the Senate Aging Committee and encourage the committee to look to ASHA as a resource for timely and relevant research on issues that impact seniors relative to their housing options and long-term care needs.

As the Committee seeks to understand the many facets of assisted living as a long-term care option for older adults, we think it is important to address what we believe to be unfair and inaccurate characterization of the assisted living industry as reported in late 2023 by the *Washington Post* series "Memory, Inc." and the *New York Times*, "Dying Broke." Given that these series of articles have partly prompted this hearing, we felt it important to address some of these issues as well as call attention to our nation's aging population's growing demand for long term care.

The *Washington Post* series reported on isolated but tragic incidents of elopement from assisted living and memory care communities over a five-year time frame. Any incident of injury or death due to human error or neglect is devastating to all who are impacted, including the resident, their family, and to the senior living community itself – other residents and staff members alike. Needless to say, poor quality of care in senior living should never be tolerated.

Notwithstanding, we believe this reporting is one sided, lacks context, and misrepresents the vast majority of assisted living communities across the country. It is a disservice to the senior living owners and operators who provide quality assisted living and demeans the work of the dedicated assisted living caregiving workforce. It also fails to recognize the hundreds of thousands of highly satisfied residents and families who choose assisted living and benefit greatly from this option of care.

Elopement is a Not a Routine Event in America's Growing Senior Assisted Living Industry

The five-year *Washington Post* investigation identified almost 100 cases of elopements from assisted living communities that tragically resulted in death. However, over that same time period, the industry provided full-time housing and care for approximately six million seniors, making this a highly rare occurrence.

According to the Alzheimer's Association, approximately 60% of people with dementia will wander at some point. They will wander in assisted living communities, nursing homes and certainly while living in a private home with a spouse, child, or paid caregiver. Communities that serve these residents thoughtfully include design features to prevent elopements and incorporate safety devices, technology, and alerts to quickly identify potential "exit seekers" and respond. Trained caregivers and nurses in assisted living and memory care communities face these odds every day and work creatively and passionately to avoid the outcomes reported by the *Washington Post*. In this regard they overwhelmingly succeed.

The Federal Government Does Not Regulate Assisted Living ... States Do

It is true that the federal government does not regulate assisted living like nursing homes. However, the industry is highly and appropriately regulated at the state level where rigorous oversight is provided and laws are updated as needed or desired.

Strict licensing and practice requirements are imposed on every community and while state variations exist, they generally all address the core elements of operation and practice: residency agreements, disclosure of service costs, resident need assessments and care planning (pre- and post- admission), resident rights, community policies, staffing and training requirements (including dementia training), medication assistance services, food and dietary provisions, third-party provider offerings, resident safety, limitations on services, community survey requirements, physical plant and life safety mandates, and much more. In addition, assisted living is subject to local health department and fire safety rules and regulations.

State regulation of assisted living and memory care allows for a more responsive process when policymakers, industry, consumers, and other stakeholders call for a change in rules. ASHA and LeadingAge have jointly published a *Seniors Housing Regulatory Handbook* for the last 18 years, compiling the latest in state regulatory agency requirements for all 50 states and the District of Columbia. Over the last five years, 19 states on average each year reported changes to key licensure and/or regulatory requirements for assisted living, demonstrating the level to which states are actively engaged to ensure vigorous and ongoing oversight is in place.

Also noteworthy is that the four assisted living provider associations (ASHA, Argentum, Leading Age and NCAL) along with the National Association of State Regulatory Administrators (NARA) are currently working on the Quality in Assisted Living Collaborative (QALC) to develop Model Guidelines for states to consider adopting in key areas, such as infection prevention and control, dementia training and emergency preparedness. The group also seeks input from a designated workgroup of industry stakeholders, regulators, and consumers. These approaches to creating industry guidance or models are an appropriate and productive way to improve outcomes in assisted living, identify new challenges and inform future policy recommendations for assisted living. These initiatives should be encouraged.

The Long-Term Care Options for Older Adults is Limited

The *New York Times* series was more financially focused and called attention to a very real problem America's rapidly aging population is facing; how to pay for long-term care. Assisted living is largely a private pay model of care that grew in the late -1980's from consumers' desire for options other than a federally regulated nursing home. Our industry recognizes the challenges of meeting the growing demand and specifically meeting the needs of those in the middle-income market. A small percentage of providers engage in the Medicaid Waiver program in states that allow assisted living participation as a home and community-based service. It is a good option for Medicaid eligible seniors, but the dollars are limited, and it is not available for assisted living in all states.

It is noteworthy that among available settings, assisted living remains the lowest cost option for long-term care:

Provider	Setting	Monthly Cost	Yearly Cost
Home Health Care (44 hours per week/52 weeks)	Homemaker Health Aide	\$5,148	\$61,776
Assisted Living Community (12 months of care/housing)	Private, One Bedroom	\$4,500	\$54,000
Nursing Home Care (365 days of care)	Semi- Private Room	\$7,908	\$94,896
(505 days of early)	Private Room	\$9,034	\$108,408
Adult Day Health Care (5 days per week/52 weeks)	Day Program	\$1,690	\$20,280

Source: Genworth, Monthly Median Costs: National (2021)

Note that home care is not a 24/7 service, nor does it provide housing, meals, snacks, utilities, housekeeping, and resident engagement activities which are included in the assisted living setting.

As ASHA wrote in a Letter to the Editor to the *New York Times*, "many Americans do have sufficient savings and home equity to pay for long-term care at home or in assisted living. But many have underestimated the consequences of longer life spans and have either been unable to adequately save or have not prepared for the costs associated with the myriad physical and cognitive care needs that are common at advanced ages."

Policymakers, along with stakeholders must collaborate to address ways to incentivize retirement savings, pursue policy options to reignite the long-term care insurance market and/or consider new government assistance programs to subsidize the cost of care. We look forward to working with the Committee to do that.

The Workforce Shortage Requires an "All of the Above Approach"

There is a workforce shortage in the overall health care industry, and it is especially challenging in the senior living industry. As most understand, the pandemic was and continues to be a significant contributor to the shortage. Assisted living providers are making great strides to attract and retain a solid workforce by offering higher wages and benefits, responding to the call for more flexibility in scheduling to address childcare and other obligations, offering enhanced training and creating career paths for team members. According to data from the Bureau of Labor Statistics (BLS), wages in key metropolitan statistical areas (MSAs) have increased by double digits in most markets for Certified Nursing Assistants since pre-COVID.

MSA	CNA Average Hourly Pay 2019	CNA Average Hourly Pay 2022	% Increase in Average Hourly Pay 2019 to 2022

The work is hard and demands a person who has compassion for older adults. Not all workers in this country are suited for this mission driven work which makes the challenge even greater. There are simply not enough native-born workers to meet the current and future demand for long-term care. Left unresolved, it will ultimately impact the ability to care for older adults. It is time to look beyond our borders and give immigration reform serious attention. We understand the need to couple border security with legal immigration reform. We support efforts to address both challenges. However, there are thousands of people here in the U.S. awaiting work authorization. Therefore, we urge action to expedite work authorization documents for those who are currently eligible.

We also need to work toward creating a pipeline of caregivers in this country, through workforce training and development programs. Existing federal workforce development grant programs

should be made available to all providers to ensure the greatest reach for those willing to participate. Without care providers, the U.S. cannot responsibly care for its seniors.

The Value Proposition of Senior Living is Significant

Making the transition to senior living allows older adults the ability to be socially connected and feel engaged with life. This becomes more important as we age, and not just for mental health reasons. Isolation is a serious health risk for older adults. We now know that people who do not or cannot maintain connections with friends, family and neighborhood will experience greater numbers of chronic and life-limiting health problems, such as heart disease, diabetes, and cancer. The benefits of belonging to a community and spending leisure time productively are too important to ignore.

The industry welcomes the opportunity to create more awareness among the Senate Aging Committee about what the industry is achieving in senior care for residents, caregivers, families, and the broader healthcare system. The hard work and dedication of senior living professionals and the overwhelming resident and family satisfaction deserves to be recognized.

The aging population and demand for long-term care in the very near future requires policy makers to give serious thought to innovative approaches to create more options for older adults who need care and housing. We look forward to working with the Committee to advance opportunities to meet this critical need.

Center for Excellence in Assisted Living CEAL @ UNC

Center for Excellence in Assisted Living University of North Carolina at Chapel Hill Statement for the Record

United States Senate Special Committee on Aging

Hearing on "Assisted Living Facilities: Understanding Long-Term Care Options for Older Adults"

January 25, 2024

The Center for Excellence in Assisted Living (CEAL) was established in 2003 in response to the U.S. Senate Special Committee on Aging's Assisted Living Workgroup Report, as a unique national collaborative of diverse organizations working together to promote excellence in assisted living. In 2023, CEAL joined with the University of North Carolina at Chapel Hill (UNC) to create a closer partnership with research and provide more capacity to advance the well-being of the people who live and work in assisted living through research, practice, and policy. Information about CEAL@UNC is available at its <u>website</u>.

CEAL@UNC appreciates the opportunity to submit this statement for the record to the Senate Special Committee on Aging regarding the hearing Assisted Living Facilities: Understanding Long-Term Care Options for Older Adults. The statement presents six interrelated topics that are central to understanding assisted living; each topic concludes with an issue that requires attention to improve assisted living going forward. The statement ends with potential actions for the future.

1. Assisted living is referred to as a "community" rather than a "facility," reflecting its philosophy and variation.

The term "community" has been the preferred term for assisted living since the 1990's; in contrast to the word "facility," community intends to convey residential-style living, consumer autonomy, and person-centeredness.^{1,2} In fact, assisted living is formally recognized as a home and community-based setting. Relatedly, the definition of assisted living is broad to allow for a range of person-centered options: a congregate setting that includes "core services such as access to health-related, social and recreational services, as well as access to staff 24 hours daily. The core principles include resident-centered services and policies that promote each resident's quality of life, right to privacy, choice, dignity and independence as defined by that resident.⁴³

 Due to the range of assisted living communities and services, each community must provide clear and transparent information about their scope of services to allow consumers to make informed choices.

2. Assisted living is the largest provider of residential long-term care in the nation.

Most often, older adults and others who require supportive care initially receive that support from family and paid home care; when family and other home-based supports are no longer available or sufficient, they turn to residential care settings. Although there are more nursing home beds than there are beds/units/apartments in assisted living communities, half of older adults who require residential long-term care now receive it in assisted living (55% versus 45% in nursing homes); approximately 918,700 older adults reside in 31,400 assisted living communities across the nation.⁴ However, the communities are disproportionately distributed; they are more often located in counties with a higher percentage of individuals who are non-Hispanic white (89% of residents are non-Hispanic white), and have a higher socioeconomic status and more education.^{4,5}

• Expanding equitable access to assisted living services should be prioritized.

3. Assisted living is primarily private-pay, providing access to those who can afford it.

Assisted living evolved as a less expensive alternative to nursing home care for people who did not need intensive nursing services and could pay privately; it still largely relies on individuals' personal savings, retirement accounts, social security, pensions, and (if available) family members' incomes. The annual median cost for assisted living (in 2021) was \$54,000,⁶ which is out of reach for approximately 40% of middle-income older adults even after selling their home (but less expensive than nursing home care or around-the-clock home care).⁷ Medicaid is available on a limited waiver basis to cover assisted living services (but not housing costs) in almost all states, but is available for roughly only one in five assisted living residents.⁸

• Steps must be taken to strengthen access to assisted living for the "forgotten middle" market of older adults.

4. Assisted living residents have significant care needs, and many have Alzheimer's disease or related dementia. Health and supportive care options for older adults have been evolving over the last decades, changing the profile of assisted living residents. Shorter hospital stays have resulted in increased use of nursing homes for post-acute care following hospitalization, and individuals who do not require ongoing nursing care are now the residents of assisted living. Today, more than half of assisted living residents are 85 years of age or older, need help with mobility, and have medical, cognitive, and affective conditions.^{9,10} Importantly, assisted living has become the largest residential care provider for persons with Alzheimer's disease or related dementia; including for persons with moderate or advanced dementia: 25% of communities are devoted to or have a unit devoted to memory care, compared to 14% of nursing homes.¹¹ Residents' care needs are multiple: based on Medicaid eligibility alone, 19% have needs that meet nursing home requirements,⁹ and a notable portion receive end-of-life care in assisted living.¹²

• Service provision must consistently meet residents' needs for care.

- 5. The quality of assisted living care depends on the quality and quantity of staff; providing care is labor-intensive. Staffing is the primary challenge for assisted living; wages are relatively low, and staff recruitment and retention are major concerns just as they are in nursing homes. Most residents' care needs are personal and supportive; in response, staff provide help with daily activities including bathing and locomotion, and attend to safety and social engagement.⁴ Medical monitoring and medication management also are important, typically provided by non-nursing staff who have medication training. That said, nursing presence is more common in assisted living than in the past. Forty percent of communities have a registered nurse (RN); a similar percentage have a licensed practical/vocational nurse (LPN/LVN).⁴ Depending on the community -- and consistent with the variability that is virtually definitional of assisted living in travenous medications.¹³ Together with personal care assistants/aides, they provide roughly 4½ hours of care per day per resident, compared to 2½ hours in nursing homes.⁴ In addition to time, training is needed to help staff capably attend to residents' psychosocial care needs, especially for residents with dementia who commonly experience depression, irritability, agitation, and anxiety; all too often, these residents are treated with antipsychotic medications when staff do not have the time or are unaware of how to prevent or lessen their distress.^{14,15}
 - Sufficient numbers of well-trained staff are critically needed to strengthen assisted living care.

6. Families play a vital role in assisted living.

Families continue to provide care after a resident moves to assisted living, including monitoring health, well-being, and finances, and participating in end-of-life care.¹⁶⁻¹⁸ The importance of families became especially evident during the COVID-19 pandemic when they became recognized as essential caregivers.¹⁹⁻²¹ Families also are centrally involved in helping to choose an assisted living community for their relative, but often lack necessary information to make a knowledgeable decision about which communities would best meet their relative's needs and preferences.²² • Families require support to fulfil their role in assisted living to the best of their ability.

Potential Actions

Numerous feasible solutions have been suggested that may improve care and outcomes in assisted living.² For example, related to the variability of assisted living, the need for consumer information, and the intent to promote personcentered care, solutions include (1) promoting consumer education using common definitions and providing relevant details (e.g., added charges, move-out policies); (2) endorsing standardized reporting (an effort that was begun by the federal government years ago, but not completed);²³ and (3) decoupling services from housing to promote choice. Access and equity could in part be addressed by (4) expanding Medicaid coverage; (5) diversifying housing options and modifying services; and (6) offering tax incentives and public subsidies to owners and operators who open the door to the forgotten middle market. The quality of care and outcomes could potentially be improved by (7) adopting regulations that encourage quality improvement (already being implemented in numerous states);²⁴ (8) promoting quality initiatives by implementing and evaluating promising programs, processes, and measures (for example, accreditation is currently being evaluated in the state of NC);²⁵ and (9) adhering to consensus recommendations for medical and mental health care.¹⁰ Finally, staffing might become more sufficient if (10) guidance or standards for staff training, supervision, compensation, and other factors were explored; (11) supportive immigration policies were adopted;¹¹ (12) acuity-based staffing was established (which is actively being addressed in the state of OR);²⁶ and (13) funds were made available to support family involvement in care (for example, modeled off the U.S. Department of Veterans Affairs Program that provides stipends to family caregivers).²⁷ These examples are but a few of the potential solutions to address critical issues and improve care and outcomes in assisted living.

The Role of the Center for Excellence in Assisted Living@UNC

Since its inception 20 years ago, the mission of CEAL has been to advance the well-being of the people who live and work in assisted living through research, practice, and policy. Organizations involved in CEAL represent assisted living providers; nurses, physicians, and other clinicians; experts and advocates in Alzheimer's disease and dementia care; state agencies supporting long-term services and supports; leaders in eldercare transformation; workforce experts transforming quality direct care jobs; and numerous others. To note but a few of its efforts over the last years, CEAL has worked with researchers to develop quality measures for assisted living, examine the impact of potential minimum wage increases, and evaluate change in assisted living following the initial Assisted Living Workgroup Report provided to the U.S. Senate Special Committee on Aging in 2003.²⁸⁻³² Current efforts include consulting on the ongoing Centers for Disease Control and Prevention (CDC)-funded "Moving Needles" initiative to make routine immunization a standard of care in assisted living; leading the national Be Well in AL Coalition to promote adoption of recommended medical and mental health recommendations; compiling State Transitions Plans responsive to the Centers for Medicare & Medicaid Services (CMS) Home and Community-Based services regulations; and translating research for policy and practice, all available on the CEAL@UNC website.

CEAL@UNC welcomes the opportunity and stands poised to work with the Committee and other members of Congress in a bipartisan manner to advance excellence in assisted living.

RESPONSE TO ON-SITE REVIEW FINDINGS Page 2 of 10

For non-compliance found during an interim review or interim/final completed simultaneously-

The Response to On-Site Review Findings form must be provided to the SLP provider within ten working days after the conclusion of the on-site review. The SLP provider must complete and return the Response to On-site Review Findings form to the BLTC regional supervisor within 14 calendar days from the date it was received from the review team. The SLP provider's response must include dates of correction for each finding.

For non-compliance involving immediate jeopardy-

The Response to On-Site Review Findings form must be provided to the SLP provider within five working days after the conclusion of the on-site review. The SLP provider should complete and return the form to the BLTC regional supervisor within five calendar days from the date it was received from the review team. The SLP provider has ten working days from the date it was received from the review team. The SLP provider date it was received from the review team. The SLP provider date at the arceive team to correct the non-compliance. No extension of the ten-day period will be granted. BLTC staff must conduct a follow-up review within ten working days after the conclusion of the ten-day immediate jeopardy correction period. If the follow-up continues to show immediate jeopardy, the regional supervisor should notify the area manager and BLTC central office. BLTC suff agreement.

For non-compliance involving non-immediate jeopardy-

The Response to On-Site Review Findings form must be provided to the SLP provider within ten working days after the conclusion of the on-site review. The SLP provider should complete and return the form to the BLTC regional supervisor within 14 calendar days from the date it was received from the review team. Initially, no correction date is to be later than 30 days from the date that the findings were presented to the SLP unless there is justification documented by the SLP provider. Within those 30 days, the SLP provider is responsible for notifying the regional supervisor the status of the corrections or that the corrections have been completed. The regional supervisor or designated staff will make a follow-up visit to the SLP provider within 10 working days of the notification or take other appropriate steps to determine if all corrective action has been taken. If the first 30-day follow-up review continues to show non-compliance, the SLP provider is granted a second 30-day period to correct the noncompliance issues. If the second follow-up continues to show non-compliance, the regional supervisor should notify the area manager and BLTC central office. BLTC central office will take action to apply one or more of the sanctions allowed depending on the severity of the non-compliance.

89 ILLINOIS ADMINISTRATIVE CODE Chapter I, Section 146.235 Subchapter d

Section 146.235 Staffing

HFS

- a) The SLF shall have a manager or a qualified designee present at the SLF during normal business hours plus whenever necessary to ensure attention to the management and administration of the resident contracts. Staff shall have access to the manager or the manager's designee at all times. The manager shall designate a qualified individual capable of acting in an emergency during his or her absence from the SLF.
- b) The manager shall have at least five years experience in providing health care services to adults with disabilities or the elderly population either in an assisted living program, inpatient hospital, long term care setting, adult day care or in a Department approved health related field. The manager shall also have at least two years of management experience.
- c) The SLF shall have licensed and certified staff sufficient in number to meet the needs of the population being served.
- d) Licensed nurses or certified nursing assistants on duty at the SLF shall not be utilized in an adjoining or other part of the building not certified as the SLF. This includes, but is not limited to, a nursing facility, assisted living facility, and independent living facility.
- e) Staff Training. All staff training materials shall be available for review by the Department. If required by the Department, the SLF shall make changes in the training materials.
 - 1) The SLF shall provide staff and subcontractors who provide direct care with:
 - A) training that takes place no later than 30 days after beginning employment and semi-annual training in areas related to their employment;
 - B) training that covers resident rights; infection control; crisis intervention; prevention and notification of abuse, neglect and financial exploitation; behavioral intervention; tuberculosis identification, prevention, control and reporting; and encouraging independence (these subjects shall be trained as part of staff orientation and at least annually thereafter);
 - C) documented training performed by qualified individuals in their area or areas of responsibility;

HFS		89	ILLINOIS ADMINISTRATIVE CODE Chapter I, Section 146.235 Subchapter d
		D)	training geared toward the manner in which services are to be performed;
		E)	training that includes techniques for working with persons with disabilities and the elderly populations; and
		F)	in the case of an SLF serving persons with disabilities, disability specific sensitivity training conducted by an outside entity familiar with working with persons with disabilities. The training shall occur for all staff initially prior to certification, at staff orientation for new staff, and at least annually thereafter.
	2)	SLF	e case of subcontractors, training by the SLF is not required if the can document that similar training is being provided through the ontractor's employer.
f)	The	SLF sha	Il employ certified nursing assistants (CNAs) as follows:
	1)	Qual	ifications:
		than Depa	be 18 years of age or older and have successfully completed no later 120 days after employment a nursing assistant training course or a rtment of Public Health approved equivalent training and etency evaluation.
	2)		es of CNAs shall be checked against the Illinois Department of Public h's Health Care Worker Registry prior to employment.
	3)	Job re	sponsibilities shall include, but not be limited to:
		A)	Follow and help carry out a resident's written service plan;
		B)	Provide personal care services for residents, including but not limited to bathing, eating, dressing, personal hygiene, grooming, toileting, ambulation and assistance with transfer;
		C)	Observe the resident's functioning, maintain written records of the observations and report any changes to the licensed nurse; and
		D)	Attend initial training, in-service training sessions and staff conferences.
g)	The SL	.F shall	employ or contract with a dietitian. The dietitian shall comply with

HFS 89 ILLINOIS ADMINISTRATIVE CODE Chapter L Section 146.235 Subchapter d

the following:

- The dietitian shall be licensed under the Dietetic and Nutrition Services Practice Act [225 ILCS 30].
- Job responsibilities shall include, but not be limited to, consultation and training in all food service procedures such as menu planning and review, food preparation, food storage, food service, safety, sanitation and management of therapeutic diets.
- 3) The dietician shall come on-site at least twice per quarter for a period of not less than a cumulative total of eight hours.
- h) The SLF shall employ a minimum of one cook who shall have at least one year of experience in commercial food preparation.
- i) Twenty-four hour response staff shall be at least 18 years of age and possess at least a high school diploma or a GED. Response staff shall be certified in emergency resuscitation. The staff shall respond to scheduled or unpredictable needs and emergency calls from residents.
- Nurses on staff, or subcontracted, shall be licensed by the State of Illinois and shall be responsible for nursing services set forth in Section 146.230.
- k) The SLF shall designate a trained staff person to be responsible for planning and directing social and recreational activities. This person shall be at least 18 years of age and possess at least a high school diploma or a GED.
- 1) The SLF shall ensure that all employees who have or may have contact with residents or have access to the living quarters or the financial, medical or personal records of residents undergo a criminal history background check that conforms to the Health Care Worker Background Check Act [225 ILCS 46]. No SLF shall knowingly hire, employ or retain any individual in a position, with duties involving contact with residents, access to resident living quarters or access to the financial, medical or personal records of residents, who has been convicted of committing or attempting to commit one or more of the offenses defined under the Health Care Worker Background Check Act unless that individual has obtained a waiver issued by the Department of Public Health. An SLF may conditionally employ an applicant for up to three months pending the results of the criminal history record check.
- m) Each employee and volunteer shall have a tuberculin skin test in accordance with the Control of Tuberculosis Code (77 Ill. Adm. Code 696).

Section 14	6.245 Assessment and Service Plan and Quarterly Ev	aluation
a)	Interview: The SLF shall conduct a standardized inte resident's service needs at or before the time of occup	

- b) Initial Assessment: The SLF shall complete an initial assessment and service plan within 24 hours after admission that identifies needs and potential immediate problems. Each assessment shall be completed by, or co-signed by, a licensed practical nurse or a registered nurse.
- c) Comprehensive Resident Assessment: The SLF shall complete a Comprehensive Resident Assessment Instrument (RAI) within 14 days after admission, annually and upon a significant change in the resident's mental or physical status. Each RAI shall be completed by, or co-signed by, a registered nurse.
- d) Service Plan: Within seven days after completion of the RAI, a written service plan shall be developed by, or co-signed by, a registered nurse, with input from the resident and his or her designated representative. This includes coordination and inclusion of services being delivered to a resident by an outside entity. The service plan shall include a description of expected outcomes, approaches, frequency and duration of services provided and whether the services will be provided by licensed or unlicensed staff. The service plan must be individualized to address the health and behavior needs of each resident. The service plan shall document any services recommended by the SLF that are refused by the resident. The service plan shall be reviewed and updated in conjunction with the quarterly evaluation or as dictated by changes in resident needs or preferences.
- e) Quarterly Evaluation: A quarterly evaluation of the health and behavior status of each resident using a Department designated form shall be completed by, or co-signed by, a registered nurse.
- f) Service Plan for Identified Sex Offenders: Within seven days after completion of the RAI, a written service plan shall be developed by, or co-signed by, a registered nurse that addresses the following:
 - 1) the amount of supervision required by the individual to ensure the safety of all residents, staff and visitors; and
 - determination of approaches developed in the service plan are appropriate and effective in dealing with any behaviors specific to the identified offender.
- g) Progress Notes: Progress notes shall be completed at least monthly to document

89 ILLINOIS ADMINISTRATIVE CODE Chapter I, Section 146.245 Subchapter d

decline or improvement in resident status. A progress note does not have to be completed if there is no change in resident status. Any SLF staff may write progress notes.

h) The SLF manager or licensed nursing staff shall alert the resident, his or her physician and his or her designated representative when a change in a resident's mental or physical status is observed by staff. Except in life-threatening situations, such reporting shall be within 24 hours after the observation. Serious or life-threatening situations should be reported to the physician and the resident's designated representative immediately. The SLF staff shall be responsible for reporting only those changes that should be apparent to observers familiar with the conditions of older persons or persons with disabilities.

Section 14	6.245 Assessment and Service Plan and Quarterly Evaluation
a)	Interview: The SLF shall conduct a standardized interview geared toward the resident's service needs at or before the time of occupancy.
b)	Initial Assessment: The SLF shall complete an initial assessment and service plan within 24 hours after admission that identifies needs and potential immediate problems. Each assessment shall be completed by, or co-signed by, a licensed practical nurse or a registered nurse.
c)	Comprehensive Resident Assessment: The SLF shall complete a Comprehensive Resident Assessment Instrument (RAI) within 14 days after admission, annually and upon a significant change in the resident's mental or physical status. Each RAI shall be completed by, or co-signed by, a registered nurse.
d)	Service Plan: Within seven days after completion of the RAI, a written service plan shall be developed by, or co-signed by, a registered nurse, with input from the resident and his or her designated representative. This includes coordination and inclusion of services being delivered to a resident by an outside entity. The service plan shall include a description of expected outcomes, approaches, frequency and duration of services provided and whether the services will be provided by licensed or unlicensed staff. The service plan must be individualized to address the health and behavior needs of each resident. The service plan shall document any services recommended by the SLF that are refused by the resident. The service plan shall be reviewed and updated in conjunction with the quarterly evaluation or as dictated by changes in resident needs or preferences.
e)	Quarterly Evaluation: A quarterly evaluation of the health and behavior status of each resident using a Department designated form shall be completed by, or co-signed by, a registered nurse.
f)	Service Plan for Identified Sex Offenders: Within seven days after completion of the RAI, a written service plan shall be developed by, or co-signed by, a registered nurse that addresses the following:
	 the amount of supervision required by the individual to ensure the safety of all residents, staff and visitors; and
	2) determination of approaches developed in the service plan are appropriate and effective in dealing with any behaviors specific to the identified offender.
g)	Progress Notes: Progress notes shall be completed at least monthly to document

89 ILLINOIS ADMINISTRATIVE CODE Chapter I, Section 146.245 Subchapter d

decline or improvement in resident status. A progress note does not have to be completed if there is no change in resident status. Any SLF staff may write progress notes.

h) The SLF manager or licensed nursing staff shall alert the resident, his or her physician and his or her designated representative when a change in a resident's mental or physical status is observed by staff. Except in life-threatening situations, such reporting shall be within 24 hours after the observation. Serious or life-threatening situations should be reported to the physician and the resident's designated representative immediately. The SLF staff shall be responsible for reporting only those changes that should be apparent to observers familiar with the conditions of older persons or persons with disabilities.

HFS	89 ILLINOIS ADMINISTRATIVE CODE	Chapter 1, Section 146.295
		Subchapter d

Section 146.295 Emergency Contingency Plan

For the purpose of this Section, "emergency" means an event, as a result of a mechanical failure or natural force such as water, wind, fire or loss of electrical power, that poses a threat to the safety and welfare of residents, personnel, and others present in the SLF.

- a) Each SLF shall have a written plan, which shall be part of the SLF's Quality Assurance Plan, for protection of all persons in the event of mechanical failure or natural force emergency, for keeping persons in place, for evacuating persons to areas of refuge, and for evacuating persons from the building when necessary. The plan shall:
 - address the physical and cognitive needs of residents and include special staff response, including the procedures needed to ensure the safety of any resident. The plan shall be amended or revised whenever any resident with unusual needs is admitted;
 - provide for the temporary relocation of residents for any emergency requiring relocation;
 - provide for the movement of residents to safe locations within the SLF in the event of a tornado warning or severe thunder storm warning issued by the National Weather Service;
 - 4) provide for the health, safety, welfare and comfort of all residents when the heat index/apparent temperature, as established by the National Oceanic and Atmospheric Administration, inside the residents' living, dining, activities, or sleeping areas of the SLF exceeds a heat index/apparent temperature of 80°F, or falls below 55°F, for 12 hours or more;
 - address power outages, including how residents call for help, how resident safety is monitored, and how food spoilage is checked while power is out;
 - 6) include contingencies in the event of flooding, if located in a flood plain; and
 - 7) be reviewed by local emergency response entities, such as fire department, ambulance and EMT services. The emergency response entities shall direct recommendations to the SLF concerning the SLF's plan and any issues that could be life threatening, and the SLFs shall make changes to the plan, as appropriate.

HFS	89 ILLINOIS ADMINISTRATIVE CODE Chapter 1, Section 146.295				
	Subchapter d				
b)	All personnel employed on the premises shall be instructed in the emergency contingency plan and the use of fire extinguishers.				
c)	A diagram of emergency evacuation routes shall be posted in at least all corridors and common areas and all personnel employed on the premises shall be aware of the route.				
d)	There shall be a means of notification to the SLF when the National Weather Service issues a tornado warning covering the area in which the SLF is located. The notification mechanism must be other than commercial radio or television. Notification measures include being within range of local tornado warning sirens, an operable National Oceanic and Atmospheric Administration weather radio in the SLF, or arrangements with local public safety agencies (police, fire, ESDA) to be notified if a warning is issued.				
e)	Each resident shall be oriented to the emergency plans within ten days after the resident's admission. Orientation shall include assisting residents in identifying and using emergency exits. Documentation of the orientation shall be signed and dated by the resident or the resident's representative.				
f)	The SLF shall conduct at least two drills per year. At least one drill shall cover evacuation during a fire and the other shall cover evacuation during a tornado.				
g)	The SLF shall evaluate the effectiveness of emergency plans, procedures and training.				
h)	Drills shall include residents, SLF personnel, and other persons in the SLF.				
r)	Drills shall include making a general announcement throughout the SLF that a drill is being conducted or sounding an emergency alarm. Drills may be announced in advance to residents.				
j)	Drills shall involve the actual evacuation of residents to an assembly point as specified in the emergency plan and shall provide residents with experience using various means of escape.				
k)	A written evaluation of each drill shall be submitted to the SLF manager and the Quality Assurance Committee and shall be maintained for one year from the date of the drill. The evaluation shall include the date and time of the drill, names of employees participating in the drill, and identification of any residents who received assistance for evacuation.				

89 ILLINOIS ADMINISTRATIVE CODE	Chapter 1	, Section 146.295
		Subchapter d

- Upon the occurrence of an emergency resulting from a mechanical failure or natural force requiring hospital service, police, fire department or coroner, the SLF manager or designee must provide a preliminary report to the Department by fax within 24 hours after the occurrence. This includes, but is not limited to, loss of electrical power in excess of an hour, physical injury suffered by residents during a mechanical failure or force of nature, evacuation of residents for any reason, and fire alarm activation that results in an on-site response by the local fire department. It does not include fire department response that is the result of resident cooking mishaps that only cause minimal smoke limited to a resident's apartment or false alarm as determined by the local fire department. This preliminary report shall include, at a minimum:
 - 1) name and location of the SLF;
 - 2) type of emergency;
 - 3) number of injuries or deaths to residents,
 - 4) names of residents involved in the emergency;
 - 5) number of units not usable due to the occurrence;
 - 6) estimate of the extent of damages to the SLF;
 - 7) type of assistance needed, if any;
 - 8) location of displaced residents, if any; and
 - 9) other State or local agencies notified about the problem.
- m) The SLF manager or designee shall submit a final report to the Department that includes how the emergency was handled, final outcome, who was involved, and what steps are being taken to prevent the situation in the future.

NO 🗖 FINDINGS CORRECTED: YES

For non-compliance found during an interim review or interim/final completed simultaneously-

The Response to On-Site Review Findings form must be provided to the SLP provider within ten working days after the conclusion of the on-site review. The SLP provider must complete and return the Response to On-site Review Findings form to the BLTC regional supervisor within 14 calendar days from the date it was received from the review team. The SLP provider's response must include dates of correction for each finding.

For non-compliance involving immediate jeopardy-

The Response to On-Site Review Findings form must be provided to the SLP provider within five working days after the conclusion of the on-site review. The SLP provider should complete and return the form to the BLTC regional supervisor within five calendar days from the date it was received from the review team. The SLP provider has ten working days from the date it was received from the review team to correct the non-compliance. No extension of the ten-day period will be granted. BLTC staff must conduct a follow-up review within ten working days after the conclusion of the ten-day immediate jeopardy correction period. If the follow-up continues to show immediate jeopardy, the regional supervisor should notify the area manager and BLTC central office. BLTC supervise with the state of the state.

For non-compliance involving non-immediate jeopardy-

The Response to On-Site Review Findings form must be provided to the SLP provider within ten working days after the conclusion of the on-site review. The SLP provider should complete and return the form to the BLTC regional supervisor within 14 calendar days from the date it was received from the review team. Initially, no correction date is to be later than 30 days from the date that the findings were presented to the SLP unless there is justification documented by the SLP provider. Within those 30 days, the SLP provider is responsible for notifying the regional supervisor the status of the corrections or that the corrections have been completed. The regional supervisor or designated staff will make a follow-up visit to the SLP provider within 10 working days of the notification or take other appropriate steps to determine if all corrective action has been taken. If the first 30-day follow-up review continues to show non-compliance, the SLP provider is granted a second 30-day period to correct the noncompliance issues. If the second follow-up continues to show non-compliance, the regional supervisor should notify the area manager and BLTC central office. BLTC central office will take action to apply one or more of the sanctions allowed depending on the severity of the non-compliance.

RESPONSE TO ON-SITE REVIEW FINDINGS Page 2 of _12____

For non-compliance found during an interim review or interim/final completed simultaneously-

The Response to On-Site Review Findings form must be provided to the SLP provider within ten working days after the conclusion of the on-site review. The SLP provider must complete and return the Response to On-site Review Findings form to the BLTC regional supervisor within 14 calendar days from the date it was received from the review team. The SLP provider's response must include dates of correction for each finding.

For non-compliance involving immediate jeopardy-

The Response to On-Site Review Findings form must be provided to the SLP provider within five working days after the conclusion of the on-site review. The SLP provider should complete and return the form to the BLTC regional supervisor within five calendar days from the date it was received from the review team. The SLP provider has ten working days from the date it was received from the review team to correct the non-compliance. No extension of the ten-day period will be granted. BLTC staff must conduct a follow-up review within ten working days after the conclusion of the ten-day immediate jeopardy correction period. If the follow-up continues to show immediate jeopardy, the regional supervisor should notify the area manager and BLTC central office. BLTC entral office.

For non-compliance involving non-immediate jeopardy-

The Response to On-Site Review Findings form must be provided to the SLP provider within ten working days after the conclusion of the on-site review. The SLP provider should complete and return the form to the BLTC regional supervisor within 14 calendar days from the date it was received from the review team. Initially, no correction date is to be later than 30 days from the date that the findings were presented to the SLP unless there is justification documented by the SLP provider. Within those 30 days, the SLP provider is responsible for notifying the regional supervisor the status of the corrections or that the corrections have been completed. The regional supervisor or designated staff will make a follow-up visit to the SLP provider within 10 working days of the notification or take other appropriate steps to determine if all corrective action has been taken. If the first 30-day follow-up review continues to show non-compliance, the SLP provider is granted a second 30-day period to correct the noncompliance issues. If the second follow-up continues to show non-compliance, the regional supervisor should notify the area manager and BLTC central office. BLTC central office will take action to apply one or more of the sanctions allowed depending on the severity of the non-compliance.

employees). Submit the corresponding identifier key with this form.	COMPLAINT/FINDING DESCRIPTION (Must include rule cite)	Section 146.235 Staffing, I) The SLP provider shall ensure that all employees who have or may have contact with residents or have access to the living quarters or the financial, medical or personal records of residents undergo a criminal history background check that conforms to the Health Care Worker Background Check Act [225 ILCS 46]. No SLP provider shall knowingly hire, employ or retain any individual in a position, with duties involving contact with residents, access to resident living quarters or access to the financial, medical or personal records of residents, who has been convicted of committing or attempting to commit one or more of the offenses defined under the Health Care Worker Background Check Act unless that individual has obtained a waiver issued by the Department of Public Health. An SLP provider may conditionally employ an applicant for up to three months pending the results of the criminal history record check. For E-1, E-2, and E-3: The facility failed to have the Authorization signed prior to the first shift and to print/retain the six required registries, the HCWBC and the 30 days verification upon hire.

() GENERAL FINDINGS (Use for findings noted during informal visits to SLP) Findings should be written under this section for non-compliance of rules that impact the health and safety of residents and/or staff.

BEGIN DATE: _____ EXIT DATE: _____

RESPONSE TO ON-SITE REVIEW FINDINGS Page 2 of _2___

For non-compliance found during an interim review or interim/final completed simultaneously-

The Response to On-Site Review Findings form must be provided to the SLP provider within ten working days after the conclusion of the on-site review. The SLP provider must complete and return the Response to On-site Review Findings form to the BLTC regional supervisor within 14 calendar days from the date it was received from the review team. The SLP provider's response must include dates of correction for each finding.

For non-compliance involving immediate jeopardy-

The Response to On-Site Review Findings form must be provided to the SLP provider within five working days after the conclusion of the on-site review. The SLP provider should complete and return the form to the BLTC regional supervisor within five calendar days from the date it was received from the review team. The SLP provider has ten working days from the date it was received from the review team to correct the non-compliance. No extension of the ten-day period will be granted. BLTC staff must conduct a follow-up review within ten working days after the conclusion of the ten-day immediate jeopardy correction period. If the follow-up continues to show immediate jeopardy, the regional supervisor should notify the area manager and BLTC central office. BLTC suff agreement.

For non-compliance involving non-immediate jeopardy-

The Response to On-Site Review Findings form must be provided to the SLP provider within ten working days after the conclusion of the on-site review. The SLP provider should complete and return the form to the BLTC regional supervisor within 14 calendar days from the date it was received from the review team. Initially, no correction date is to be later than 30 days from the date that the findings were presented to the SLP unless there is justification documented by the SLP provider. Within those 30 days, the SLP provider is responsible for notifying the regional supervisor the status of the corrections or that the corrections have been completed. The regional supervisor or designated staff will make a follow-up visit to the SLP provider within 10 working days of the notification or take other appropriate steps to determine if all corrective action has been taken. If the first 30-day follow-up review continues to show non-compliance, the SLP provider is granted a second 30-day period to correct the noncompliance issues. If the second follow-up continues to show non-compliance, the regional supervisor should notify the area manager and BLTC central office. BLTC central office will take action to apply one or more of the sanctions allowed depending on the severity of the non-compliance.

The SLP provider has ten working days after the conclusion of the ten-day immediate jeopardy correction period. If the follow-up continues to show immediate jeopardy correction period. If the follow-up continues to show immediate jeopardy, the regional supervisor should notify the area manager and BLTC central office. BLTC suff agreement.

For non-compliance involving non-immediate jeopardy-

The Response to On-Site Review Findings form must be provided to the SLP provider within ten working days after the conclusion of the on-site review. The SLP provider should complete and return the form to the BLTC regional supervisor within 14 calendar days from the date it was received from the review team. Initially, no correction date is to be later than 30 days from the date that the findings were presented to the SLP unless there is justification documented by the SLP provider. Within those 30 days, the SLP provider is responsible for notifying the regional supervisor the status of the corrections or that the corrections have been completed. The regional supervisor or designated staff will make a follow-up visit to the SLP provider within 10 working days of the notification or take other appropriate steps to determine if all corrective action has been take. If the first 30-day follow-up review continues to show non-compliance, the SLP provider is granted a second 30-day period to correct the noncompliance issues. If the second follow-up continues to show non-compliance, the regional supervisor should notify the area manager and BLTC central office. BLTC central office will take action to apply one or more of the sanctions_4llowed depending on the severity of the non-compliance.

For non-compliance found during an interim review or interim/final completed simultaneously-

The Response to On-Site Review Findings form must be provided to the SLP provider within ten working days after the conclusion of the on-site review. The SLP provider must complete and return the Response to On-site Review Findings form to the BLTC regional supervisor within 14 calendar days from the date it was received from the review team. The SLP provider's response must include dates of correction for each finding.

For non-compliance involving immediate jeopardy-

The Response to On-Site Review Findings form must be provided to the SLP provider within five working days after the conclusion of the on-site review. The SLP provider should complete and return the form to the BLTC regional supervisor within five calendar days from the date it was received from the review team. The SLP provider has ten working days from the date it was received from the review team to correct the non-compliance. No extension of the ten-day period will be granted. BLTC staff must conduct a follow-up review within ten working days after the conclusion of the ten-day immediate jeopardy correction period. If the follow-up continues to show immediate jeopardy, the regional supervisor should notify the area manager and BLTC central office. BLTC BLTC suff agreement.

For non-compliance involving non-immediate jeopardy-

The Response to On-Site Review Findings form must be provided to the SLP provider within ten working days after the conclusion of the on-site review. The SLP provider should complete and return the form to the BLTC regional supervisor within 14 calendar days from the date it was received from the review team. Initially, no correction date is to be later than 30 days from the date that the findings were presented to the SLP unless there is justification documented by the SLP provider. Within those 30 days, the SLP provider is responsible for notifying the regional supervisor the status of the corrections or that the corrections have been completed. The regional supervisor or designated staff will make a follow-up visit to the SLP provider within 10 working days of the notification or take other appropriate steps to determine if all corrective action has been taken. If the first 30-day follow-up review continues to show non-compliance, the SLP provider is granted a second 30-day period to correct the noncompliance issues. If the second follow-up continues to show non-compliance, the regional supervisor should notify the area manager and BLTC central office. BLTC central office will take action to apply one or more of the sanctions allowed depending on the severity of the non-compliance.

For non-compliance found during an interim review or interim/final completed simultaneously-

The Response to On-Site Review Findings form must be provided to the SLP provider within ten working days after the conclusion of the on-site review. The SLP provider must complete and return the Response to On-site Review Findings form to the BLTC regional supervisor within 14 calendar days from the date it was received from the review team. The SLP provider's response must include dates of correction for each finding.

For non-compliance involving immediate jeopardy-

The Response to On-Site Review Findings form must be provided to the SLP provider within five working days after the conclusion of the on-site review. The SLP provider should complete and return the form to the BLTC regional supervisor within five calendar days from the date it was received from the review team. The SLP provider has ten working days from the date it was received from the review team to correct the non-compliance. No extension of the ten-day period will be granted. BLTC staff must conduct a follow-up review within ten working days after the conclusion of the ten-day immediate jeopardy correction period. If the follow-up continues to show immediate jeopardy, the regional supervisor should notify the area manager and BLTC central office. BLTC central office will take action to suspend or terminate provider agreement.

For non-compliance involving non-immediate jeopardy-

The Response to On-Site Review Findings form must be provided to the SLP provider within ten working days after the conclusion of the on-site review. The SLP provider should complete and return the form to the BLTC regional supervisor within 14 calendar days from the date it was received from the review team. Initially, no correction date is to be later than 30 days from the date that the findings were presented to the SLP unless there is justification documented by the SLP provider. Within those 30 days, the SLP provider is responsible for notifying the regional supervisor the status of the corrections or that the corrections have been completed. The regional supervisor or designated staff will make a follow-up visit to the SLP provider within 10 working days of the notification or take other appropriate steps to determine if all corrective action has been taken. If the first 30-day follow-up review continues to show non-compliance, the SLP provider is granted a second 30-day period to correct the non-compliance issues. If the second follow-up continues to show non-compliance, the regional supervisor should notify the area manager and BLTC central office. BLTC central office will take action to apply one or more of the sanctions allowed depending on the severity of the non-compliance.

RESPONSE TO ON-SITE REVIEW FINDINGS Page2of&

Fornon-compliance found during an interim review or interim/final completed simultaneously-

The Response to On-Site Review Findings form must be provided to the SLP provider within ten working days after the conclusion of the on-site review. The SLP provider must complete and return the Response to On-site Review Findings form to the BLTC regional supervisor within 14 calendar days from the date it was received from the review team. The SLP provider's response must include dates of correction for each finding.

For non-compliance involving immediate jeopardy-

The Response to On-Site Review Findings form must be provided to the SLP provider within five working days after the conclusion of the on-site review. The SLP provider should complete and return the form to the BLTC regional supervisor within five calendar days from the date it was received from the review team. The SLP provider has ten working days from the date it was received from the review team to correct the non-compliance. No extension of the ten-day period will be granted. BLTC staff must conduct a follow-up review within ten working days after the conclusion of the ten-day immediate jeopardy correction period. If the follow-up continues to show immediate jeopardy, the regional supervisor should notify the area manager and BLTC central office. BLTC settral office will take action to suspend or terminate provider agreement.

For non-compliance involving non-immediate jeopardy-

The Response to On-Site Review Findings form must be provided to the SLP provider within ten working days after the conclusion of the on-site review. The SLP provider should complete and return the form to the BLTC regional supervisor within 14 calendar days from the date it was received from the review team. Initially, no correction date is to be later than 30 days from the date that the findings were presented to the SLP unless there is justification documented by the SLP provider. Within those 30 days, the SLP provider is responsible for notifying the regional supervisor the status of the corrections or that the corrections have been completed. The regional supervisor or designated staff will make a follow-up visit to the SLP provider within IO working days of the notification or take other appropriate steps to determine if all corrective action has been taken. If the first 30-day follow-up review continues to show non-compliance, the SLP provider is granted a second 30-day period to correct the noncompliance issues. If the second follow-up continues to show non-compliance, the regional supervisor should notify the area manager and BLTC central office. BLTC central office will take action to apply one or more of the sanctions allowed depending on the severity of the non-compliance.

Facility Name: CARRIAGE COURT OF GROVE CITY

Survey Findings

Specific Cited Code	Substandard Care	Immediate Jeopardy
<u>R - 0369</u>	No	No
<u>R - 0614</u>	No	No
<u>R - 0615</u>	No	No
R - 0657	No	No

Records: 1 - 4 of 4

Finding for regulation: R - 0369

Based on record review, review of facility policy, and staff interview, the facility failed to ensure all pets received annual checkup and vaccinations. This affected one (Feline #1) of five pet records reviewed. This had the potential to affect all 30 residents residing in the facility.

Findings include:

Review of the veterinarian records for Feline #1 revealed the last examination was performed on 11/27/20. The veterinarian record revealed all examinations and vaccinations were due on 11/27/21.

Interview on 02/01/22 with Executive Director #500 (ED) verified the veterinarian records were overdue. ED #500 stated the family was going to make an appointment that day.

Review of the facility's policy titled Visiting Pets dated 05/26/21 revealed staff will ensure that any pet, regardless of ownership, will not jeopardize the health, safety, comfort, treatment, or well-being of residents or staff. Policy states that copies of current veterinarian health certificates are to be maintained on file at the Community and all vaccinations and local licensing requirements are met.

Finding for regulation: R - 0614

Based on record review and staff interview, the facility failed to conduct fire drills on all three shifts every three months. This had the potential to affect all 30 residents residing in the facility.

Findings include:

Review of the fire drill reports from 01/01/21 to 12/31/21 revealed the facility completed fire drills on day shift on 01/27/21, 02/28/21, 03/29/21, 08/30/21, 10/19/21, and 12/16/21. On second shift, the facility completed three fire drills on 05/10/21, 07/29/21, and 11/26/21. On third shift, the facility completed only one fire drill on 09/23/21.

Facility Name: CARRIAGE COURT OF GROVE CITY

Interview on 02/01/22 at 1:14 P.M. with Maintenance Director #600 verified there was only one drill conducted on third shift and only three drills conducted on second shift.

Finding for regulation: R - 0615

Based on observation and interviews, the facility failed to conduct a tornado drill during the months of March through July. The facility census was 30.

Findings include:

Review of the facility's disaster drills from 01/01/21 to 12/31/21 revealed there was no tornado drill performed in 2021.

Interview on 02/01/22 at 1:14 P.M. with Maintenance Director #600 verified there was no tornado drill completed in 2021.

Finding for regulation: R - 0657

Based on observations, facility record review, and staff interviews, the facility failed to maintain safe water temperatures in the resident rooms. This affected six resident rooms. This had the potential to affect all 30 residents residing in the facility.

Findings include:

Observations on 02/01/22 of the resident room's water temperatures revealed the following:

- At 9:02 A.M., Room 60 was 124 degrees Fahrenheit (F).
- At 10:43 A.M., Room 54 was 122 degrees F.
- At 10:49 A.M., Room 58 was 122 degrees F.
- At 10:58 A.M., Room 51 was 124 degrees F.
- At 10:59 A.M., Room 53 was 122 degrees F.
- At 11:00 A.M., Room 62 was 122 degrees F.

Observation on 02/01/22 at 12:06 P.M. with Maintenance Director #600 verified the thermostat on the facility's two water heater tanks was set at 130 degrees F. Maintenance Director #600 turned thermostats down to 120 degrees F.

Review of the facility's water temperature log dated 01/25/22 revealed Room 31 was 129 degrees F, Room 41 was 128 F, and Room 57 was 126 degrees F. On 01/18/22, the water temperature log had the following recordings: Room 37 was 125 degrees F, Room 48 was 130 degrees F, and Room 59 was 125 degrees F and on 01/09/22, Room 48 was 130 degrees F. and Room 59 was 124 degrees F.

Facility Name: CARRIAGE COURT OF GROVE CITY

Interview on 02/01/22 at 10:55 A.M. with Executive Director (ED) #700 verified no residents have had any instances with burns or complaints about water temperatures. ED #700 stated all higher water temperatures were on the Assisted Living area and residents were able to adjust the water faucets.

Interview on 02/01/22 at 11:15 A.M. with Maintenance Director #600 verified the water temperatures have been running 124 degrees F and upwards to 130 degrees F on the new section. Maintenance Director #600 stated he thought the regulation was 130 degrees F.

RESPONSE TO ON-SITE REVIEW FINDINGS Page 2 of 2

For non-compliance found during an interim review or interim/final completed simultaneously-

The Response to On-Site Review Findings form must be provided to the SLP provider within ten working days after the conclusion of the on-site review. The SLP provider must complete and return the Response to On-site Review Findings form to the BLTC regional supervisor within 14 calendar days from the date it was received from the review team. The SLP provider's response must include dates of correction for each finding.

For non-compliance involving immediate jcopardy-

The Response to On-Site Review Findings form must be provided to the SLP provider within five working days after the conclusion of the on-site review. The SLP provider should complete and return the form to the BLRC regional supervisor within five calendar days from the date it was received from the review team. The SLP provider has tran working days from the date it was received from the review team to concret the non-compliance. No extension of the ten-day period will be granted. BLTC smff must conduct a follow-up review within ten working days after the conclusion of the ten-day merident be updry correction period. If the follow-up continues to show immediate jeopardy, the regional supervisor should notify the area manager tud BLTC central office. BLTC central office will take action to suspend or terminate provider agreement.

For non-compliance involving non-immediate jcopardy-

The Response to On-Site Review Findings form must be provided to the SLP provider within ten working days after the conclusion of the on-site review. The SLP provider should complete and return the form to the BLTC regional supervisor within 14 calendar days from the date it was received from the review team. Initially, no correction date is to be later than 30 days from the date that the findings were presented to the SLP unless there is justification documented by the SLP provider. Within those 30 days, the SLP provider is responsible for notifying the regional supervisor the status of the corrections or that the corrections have been completed. The regional supervisor or designated staff will make a follow-up visit to the SLP provider within 10 working days of the notification or take other appropriate steps to determine if all corrective action has been taken. If the first 30-day follow-up review continues to show non-compliance, the SLP provider is granted a second 30-day period to correct the noncompliance issues. If the second follow-up catinate to show non-compliance, the regional supervisor should notify the area manager and BLTC contral office. BLTC central office, MLTC central office, MLTC central office, WLTC second solve with the area that on a provider within the area that and the depending on the severity of the non-compliance.

RESPONSE TO ON-SITE REVIEW FINDINGS Page 2 of _22____

For non-compliance found during an interim review or interim/final completed simultaneously-

The Response to On-Site Review Findings form must be provided to the SLP provider within ten working days after the conclusion of the on-site review. The SLP provider must complete and return the Response to On-site Review Findings form to the BLTC regional supervisor within 14 calendar days from the date it was received from the review team. The SLP provider's response must include dates of correction for each finding.

For non-compliance involving immediate jeopardy-

The Response to On-Site Review Findings form must be provided to the SLP provider within five working days after the conclusion of the on-site review. The SLP provider should complete and return the form to the BLTC regional supervisor within five calendar days from the date it was received from the review team. The SLP provider has ten working days from the date it was received from the review team. The SLP provider should complete and return the form to the BLTC extension of the ten-day period will be granted. BLTC staff must conduct a follow-up review within ten working days after the conclusion of the ten-day immediate jeopardy correction period. If the follow-up continues to show immediate jeopardy, the regional supervisor should notify the area manager and BLTC central office. BLTC entral office will take action to suspend or terminate provider agreement.

For non-compliance involving non-immediate jeopardy-

The Response to On-Site Review Findings form must be provided to the SLP provider within ten working days after the conclusion of the on-site review. The SLP provider should complete and return the form to the BLTC regional supervisor within 14 calendar days from the date it was received from the review team. Initially, no correction date is to be later than 30 days from the date that the findings were presented to the SLP unless there is justification documented by the SLP provider. Within those 30 days, the SLP provider is responsible for notifying the regional supervisor the status of the corrections or that the corrections have been completed. The regional supervisor or designated staff will make a follow-up visit to the SLP provider within 10 working days of the notification or take other appropriate steps to determine if all corrective action has been taken. If the first 30-day follow-up review continues to show non-compliance, the SLP provider is granted a second 30-day period to correct the non-compliance issues. If the second follow-up continues to show non-compliance first with a start office will take action to apply one or more of the sanctions allowed depending on the severity of the non-compliance.

whether the needs are within the SLP provider capability or beyond the SLP provider capacity is determined by the DHS- DDD ISC or DHS-DMH PAS agent, and		
Based on document review, it was determined that the SLP failed to ensure that every resident had received a SLP Initial Screen, prior to admission, to ensure they are appropriate for the SLP setting.		
Findings include: 1. R4 was admitted to the SLP on 3/18/2023. The SLP did not complete the SLP Initial Screen, that determines that		
 R4 is appropriate for the SLP setting, prior to R4's admission. R4's SLP Initial Screen was dated 8/23/2023. 2. R5 was admitted to the SLP on 3/15/2023. R5's SLP 		
Initial Screen indicated that SLP comprehensive assessment was required. The SLP did not ensure that the		
SLP comprehensive assessment was completed prior to admission, as required. R5 was determined to be		
appropriate for the Stat Setting OII of 20/2023.

RESPONSE TO ON-SITE REVIEW FINDINGS Page 2 of _____

For non-compliance found during an interim review or interim/final completed simultaneously-

The Response to On-Site Review Findings form must be provided to the SLP provider within ten working days after the conclusion of the review. The SLP provider must complete and return the Response to On-site Review Findings form to the BLTC regional supervisor within 14 calendar days from the date it was received from the review team. The SLP provider's response must include dates of correction for each finding.

For non-compliance involving immediate jeopardy-

The Response to On-Site Review Findings form must be provided to the SLP provider within five working days after the conclusion of the review. The SLP provider should complete and return the form to the BLTC regional supervisor within five calendar days from the date it was received from the review team. The SLP provider has ten working days from the date it was received from the review team to correct the non-compliance. No extension of the ten-day period will be granted. BLTC staff must conduct a follow-up review within ten working days after the conclusion of the ten-day immediate jeopardy correction period. If the follow-up continues to show immediate jeopardy, the regional supervisor should notify the area manager and BLTC central office. BLTC central office will take action to suspend or terminate provider agreement.

For non-compliance involving non-immediate jeopardy-

The Response to On-Site Review Findings form must be provided to the SLP provider within ten working days after the conclusion of the review. The SLP provider should complete and return the form to the BLTC regional supervisor within 14 calendar days from the date it was received from the review team. Initially, no correction date is to be later than 30 days from the date that the findings were presented to the SLP unless there is justification documented by the SLP provider. Within those 30 days, the SLP provider is responsible for notifying the regional supervisor the status of the corrections or that the corrections have been completed. The regional supervisor or designated staff will complete a follow-up within 10 working days of the notification or take other appropriate steps to determine if all corrective action has been taken. If the first 30-day follow-up review continues to show noncompliance, the SLP provider is granted a second 30-day period to correct the non-compliance issue. If the second follow-up continues to show non-compliance, the regional supervisor should notify the area manager and BLTC central office. BLTC central office will take action to apply one or more of the sanctions allowed depending on the severity of the non-compliance.

Re: Annual Licensure Survey:

Survey Date: 8/1/23

Dear Executive Director,

On 8/1/23, staff from the Illinois Department of Public Health (IDPH) conducted an annual licensure survey at your establishment. Upon review of the records and on-site analysis, it was determined your establishment was in general compliance with the requirements of the Assisted Living and Shared Housing Establishment Code. Your license will be issued.

If you have any questions regarding this correspondence, please contact my office at 630-520-9331. You may also telephone the Department's TTY number for the hearing impaired at 1-800-547-0466.

Sincerely,

1

RE: Plan of Correction Accepted

The Office of Health Care Quality (OHCQ) has reviewed and accepted the Plan of Correction you submitted on 1/5/24 in response to a survey conducted on 11/20/23 - 11/22/23, Survey Event ID Number IL1R11.

The assisted living program is required to fully implement the actions described in the Plan of Correction. OHCQ may conduct an unannounced follow-up survey to determine if the plan was fully implemented.

If you have any questions regarding the survey process, please contact Sincerely,

Health Facilities Survey Coordinator II Office of Health Care Quality

RE: Notice of Deficiencies

On 11/20/2023 - 11/22/2023, the Office of Health Care Quality (OHCQ) completed a survey at your assisted living program to determine compliance with the requirements contained in <u>COMAR 10.07.14</u> and other applicable federal, State, and local requirements. The attached Statement of Deficiencies for Survey Event ID Number IL1R11 explains each deficiency, including the State Tag number, the citation, and the findings.

Plan of Correction

A Plan of Correction (PoC) for the deficiencies identified in the attached Statement of Deficiencies must be submitted within 10 calendar days of your receipt of this notice. Attached is a Plan of Correction form that you must complete. The PoC and any attachments are public documents, so do not use the names of residents. Refer to residents by the Resident Number assigned to them on the Resident Roster that was provided to you during the survey. For each State tag, answer the following questions:

- 1. How are you going to correct the deficiency?
- 2. What is the date when you will have each deficient practice corrected?
- 3. How are you going to prevent the deficient practice from reoccurring?
- 4. Who will be responsible for ensuring the deficiency does not reoccur?

201 W. Preston Street - Baltimore, MD 21201 - health maryland.gov - Toll Free 1-877-463-3464 - Deaf and Hard of Hearing Use Relay

Failure to submit an acceptable PoC in 10 days may result in the imposition of enforcement remedies.

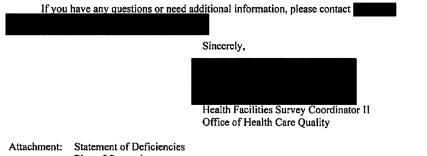

Informal Dispute Resolution Conference

The written request for an IDR must fully describe the disagreement with the statement of deficiencies and must be accompanied by any supporting documentation. At the discretion of the Office of Health Care Quality, the IDR may be held in-person, by telephone, or in writing. IDRs are informal in nature and are not attended by counsel.

When a licensee requests an IDR, the licensee shall file a plan of correction within the required time, except to the extent that the licensee contests specific findings, in which case absent OHCQ's specific directive, a licensee may delay submitting its plan of correction with respect to those specific findings until 5 days after the licensee is provided oral or written notice of the outcome of the IDR.

A request for an IDR will not delay the effective date of any enforcement action.

RESPONSE TO ON-SITE REVIEW FINDINGS Page2of_2_

For non-compliance found during an interim review or interim/final completed simultaneously-

The Response to On-Site Review Findings form must be provided to the SLP provider within ten working days after the conclusion of the on-site review. The SLP provider must complete and return the Response to On-site Review Findings form to the BLTC regional supervisor within 14 calendar days from the date it was received from the review team. The SLP provider's response must include dates of correction for each finding.

For non-compliance involving immediate jeopardy-

The Response to On-Site Review Findings form must be provided to the SLP provider within five working days after the conclusion of the on-site review. The SLP provider should complete and return the fonn to the BLTC regional supervisor within five calendar days from the date it was received from the review team. The SLP provider has ten working days from the date it was received from the review team to correct the non-compliance. No extension of the ten-day period will be granted. BLTC staff must conduct a follow-up review within ten working days after the conclusion of the ten-day immediate jeopardy correction period. If the follow-up continues to show immediate jeopardy, the regional supervisor should notify the area manager and BLTC central office. BLTC sentral office will take action to suspend or tenninate provider agreement.

For non-compliance involving non-immediate jeopardy-

The Response to On-Site Review Findings fonn must be provided to the SLP provider within ten working days after the conclusion of the on-site review. The SLP provider should complete and return the form to the BLTC regional supervisor within 14 calendar days from the date it was received from the review team. Initially, no correction date is to be later than 30 days from the date that the findings were presented to the SLP unless there is justification documented by the SLP provider. Within those 30 days, the SLP provider is responsible for notifying the regional supervisor the status of the corrections or that the corrections have been completed. The regional supervisor or designated staff will make a follow-up visit to the SLP provider within 10 working days of the notification or take other appropriate steps to determine if all corrective action has been taken. If the first 30-day follow-up review continues to show non-compliance, the SLP provider visit granted a second 30-day period to correct the noncompliance issues. If the second follow-up continues to show non-compliance, the regional supervisor should notify the area manager and BLTC central office. BLTC central office will take action to apply one or more of the sanctions allowed depending on the serverity of the non-compliance.

Section 146.235 Staffing	5. Remediation of Employees sited have been corrected	
 f) The SLF shall employ certified nursing assistants (CNAs) as follows: 		
I) Qualifications:		
This requirement has not been met.		
EI. DOH 8/4/21. Per HCWR CNA class was completed 3/6/87. No competency on file. E3 was notified, EI was taken off the schedule 1/25/23 to 1/27/23 until E3 was told by IDPH that El's competency was "grandfathered" and that the website would be updated. IDPH was not contacted until it was brought to the SLFs attention by HFS Staff. E2. DOH 5/4/22. Per the Healthcare Worker Registry		
(HCWR), there was no CNA course completion or competency on file. E3 supplied documentation that E2 completed a CNA course through Quality CNA Training on 10/2/20 and that CNA certification exam was completed on 10/2/4/20 in Wisconsin. E3 said E2 was given a form to fill outto have the certification transferred to Illinois. Form was not given to E2 until it was brought to the SLPs attention by HFS staff.

E-10 was hired on 12/4/22. TB signs and symptoms have been completed late on 5/30/23. The TB screening was completed late, with the first step done on 5/30/23 and the second step done on 6/7/23.	
E-29 was hired on $8/22/22$. TB signs and symptoms have been completed late on $5/30/23$.	
E-30 was hired on 11/21/22. TB signs and symptoms have been completed late on 5/24/23. The TB screening was completed late, with the first step done on 5/24/23.	
Section 146.245 Assessment and Service Plan and Quarterly Evaluation a) Interview: The SLP provider shall conduct a standardized interview geared toward the resident's service needs at or before the time of occupancy but not before the DON, or successor tool, and other required PAS assessments are completed and determinations provided to the SLP provider.	

R-14 was admitted to the SLP on 2/22/22. The SLP completed the standardized interview on 12/28/22, not at or before admission.	
R-19 was admitted to the SLP on 12/21/22. The SLP completed the standardized interview on 6/13/23, not at or before the admission as required.	
R-27 was admitted to the SLP on 12/27/22. The SLP completed the standardized interview on 6/8/23, not at or before the admission as required.	
R-30 was re-admitted on 12/22/22, the standardized interview was completed late on 6/14/23.	
Section 146.245 Assessment and Service Plan and Quarterly Evaluation b) Initial Assessment: The SLP provider shall complete an initial assessment and service plan within 24 hours after admission that identifies needs and potential immediate problems. Each assessment shall be completed by, or co- signed by, a licensed practical nurse or a registered professional nurse.	
R -3 was admitted 6/24/22. The initial assessment was completed on 6/16/22 before the admission and not within 24 hours after admission.	
R-8 was admitted 1/22/23, the initial assessment completed on late on 2/22/23, not within 24 hours after admission.	
R-14 was admitted on 2/22/22. The initial assessment and service plan were not signed or dated.	
2.778168269	

R-19 was admitted on 12/21/22. The initial assessment and service plan were completed on 6/12/23, not within 24 hours of admission.	
R-25 was admitted on 2/28/23. The SLP completed the initial assessment and service plan on 3/14/23, not within the required 24 hours of admission.	
R-26 was admitted on 3/3/23. The SLP completed the initial assessment on 6/13/23, not within the required 24 hours of admission.	
R-27 was admitted on 12/27/22, The SLP did not complete the initial assessment and service plan within 24 hours after admission, 6/8/23.	
R-29 was admitted on 8/25/22. The initial assessment and service plan were completed 8/29/23, not within the required 24 hours of admission.	
R-30 was re-admitted on 12/22/22, initial assessment and service plan completed late on 6/14/23, not within the required 24 hours of admission.	
Section 146.245 Assessment and Service Plan and Quarterly Evaluation c) Comprehensive Resident Assessment: The SLP provider shall complete a Comprehensive Resident Assessment Instrument (RAJ) within 14 days after admission, annually and upon a significant change in the resident's mental or physical status. Each RAI shall be completed by, or co-signed by, a registered professional nurse.	
R-1 was admitted 1/5/22, RAI was completed late on 8/15/22.	
93531577.2	

R-4 was admitted 6/24/22, RAI was completed late on 8/15/22, not within 7-14 days after admission,	
R-7 was admitted 8/19/22, RAI was completed late on 9/6/22.	
R-9 was admitted 1/22/23, RAI done late on 2/25/23.	
R-12 was admitted on 11/2/22. The RAI was completed late on 11/17/22. R-12's RAI was not thoroughly completed. Remediated onsite, new RAI completed on 6/13/23.	
R-14 was admitted on 2/22/22. RAI was completed late on 3/24/22, not the required 7-14 days after admission. RAI not signed.	
R-15 was admitted 3/28/23, RAI was completed late on 5/19/23, not the required 7-14 days after admission.	
R -16 was admitted 11/14/22, R Al was completed late on 1/6/23, not the required 7-14 days after admission.	
R-17 was admitted 11/18/22, RAI was completed late on 2/7/23, not the required 7-14 days after admission.	
R-19 was admitted on 12/21/22. RAI completed on 3/30/23, not within 7-14 days after admission.	
R -20 was admitted on 11/15/22. The RAI was completed late on 12/22/22, not within the 7-14 days after admission. The RAI was not thoroughly completed. It was remediated onsite and completed 6/14/23.	
R-23 was admitted on 12/1/22. The RA I was completed on 2/7/23, not within the required 7-14 days after admission.	
0351577.2	

R-26 was admitted on 3/3/23. The RAI was completed late on 3/30/23, not the required 7-14 days after admission.	
R-28 was admitted on 3/6/23. The RAI was completed late on 4/13/23, not the required 7-14 days after admission.	
R-29 was admitted on 8/25/22. The RAI was completed on 9/12/22, not the required 7-14 days after admission.	
R-30 was re-admitted on 12/22/22, no RAI completed for 12/22/22 re-admission, the last RAI was completed on 5/19/22.	
R-31 was admitted 1/16/23. The RAI was completed late on 2/10/23, not the required 7-14 days after admission.	<u>0</u>
R-33 was admitted 2/10/23, the RAI was completed late on 3/13/23, not within 7-14 days as required.	
R-34 was admitted on 11/16/22. The RA1 was completed on 1/6/23, not within the required 7-14 days after admission.	
R-37 was admitted 7/1/15, the last two RAIs were completed on 5/2/21 and 6/16/22, not within 366 days of the previous assessment.	
R-39 was admitted 6/24/22, the RAI was completed late on 8/15/22, not as required in 7-14 days after admission.	
R-40 was admitted 2/22/23. The RAI was completed on 3/21/23, greater than 7-14 days after admission.	
R-42 was admitted 5/16/23. The RAI was completed 6/2/23, greater than 7-14 days after admission.	

646

R-43 was admitted 9/2/20, the RAI was completed on 6/19/22, greater than 366 days from the previous RAI was completed on $6/7/21$.	
\mathbb{R} -44 was admitted 10/1/16, the \mathbb{R} AI is not accurate as the \mathbb{R} AI has the medication assistance scored "2," the care plan states no physical assistance needed.	
R-47 was admitted 6/3/20, the RAI was completed 6/19/22, greater than 366 days from the previous RAI was completed 6/9/21.	
R-48 has no RAI for 2022. The RAIs present are dated 3/26/23 and 9/6/21, greater than 366 days apart.	
R-51 was admitted 8/22/21, the RAI, completed on 9/26/22, scored "2" for medication administration, ISS indicates that R-51 receives assistance with order and set up only. Resident interview confirmed that R-51 is independent with medication administration.	
 Section 146.245 Assessment and Service Plan and Quarterly Evaluation d) Service Plan: Within seven days after completion of the RAL, a written service plan shall be developed by, or cosigned by, a registered professional nurse, with input from the resident and his or her designated representative. This includes coordination and inclusion of services plan shall include a description of expected outcomes, approaches, frequency, and duration of services provided and whether the service plan must be individual commended by licensed or unlicensed staff. The service plan must be individualized to address the health and behavior needs of each resident. The service plan shall address the health and behavior needs of each resident. The service plan stall document any services recommended by 	

the SLP provider that are refused by the resident. The service plan shall be reviewed and updated in conjunction with the quarterly evaluation or as dictated by changes in resident needs or preferences.	
R-1's ISP completed late 3/27/23 for the RAI completed on 8/15/22.	
R-2, no ISP for 22. RAI completed on 9/14/22.	
R-5 has an ISS completed on 11/13/22, instead of an ISP.	
R-6 has an ISS completed on 11/13/22 instead of an ISP.	
R-12 was admitted on 11/2/22. R-12 had an ISS completed on 11/17/22, not the required ISP.	
R-10 was admitted on 12/23/22. The RAI was completed on 1/6/23 with the ISP completed on 3/30/23; not within the required 7 days of completed the comprehensive assessment.	
R-11 has an ISS completed instead of an ISP on 9/28/22.	
R-13 has an ISS completed instead of an ISP on 9/6/22.	
R-14 was admitted 2/22/22. R-14 did not have an ISP completed in 22. The only ISP was completed on 4/18/23.	
R-20 was admitted to the SLP on 11/15/22. The SLP completed the ISP on 6/14/23 not within the required 7 days of completing the RAI.	
R-22 has an ISS instead of an ISP completed on 11/11/22.	
93531577.2	

the ISP on 2/17/23, not within 7 days of completing the RAL.	
R-24 has an ISS completed on 10/3/22 instead of an ISP.	
R-31 has an ISP completed on 2/17/23 instead of ISS, as required.	
R-32 does not have an ISS completed in 2022, and RSP was completed on 7/16/22.	
R-33 has an ISP completed on 3/13/23 instead of an ISS, as required.	
R-34 was admitted on 11/16/22. The SLP completed the ISS on 3/27/23, not within 7 days of completing the RAI.	
R-39 was admitted 6/24/22. An RSP was completed on 8/21/22 instead of ISP.	
R-43 has an ISP completed on 6/19/22 instead of ISS, as required.	
R-46 No ISS was completed for 2022.	
R-47 has an ISP completed on 6/19/22, instead of an ISS, as required.	
R-50 was admitted to the SLP on 7/30/19. The ISS was completed 1/10/23, while the RAI was completed on 11/17/22. The ISSs were not completed within 7 days of completing the RAIs.	

R-52 was admitted on 4/17/21. The ISP was completed 8/31/21, while the RAI was completed on 5/14/21, not within 7 days of completing the RAI.	
Section 146.245 Assessment and Service Plan and Quarterly Evaluation e) Quarterly Evaluation: A quarterly evaluation of the health and behavior status of each resident using a Department designated form shall be completed by, or co- signed by, a registered professional nurse.	
R-1. Missing Quarterly evaluation around 11/14/22.	
R-3. Missing quarterly evaluation around 12/14/22.	
R-6 Quarterly evaluation completed late, greater than 92 days after RAI. RAI dated 11/13/22, quarterly evaluation dated 2/13/23.	
R-10 was admitted to the SLP on 12/23/22. The SLP did not complete the required quarterly assessment. R-10 was enrolled in Managed Care Organization on 7/1/23.	
R-12 was admitted to the SLP on 11/2/22. R-12 had a quarterly evaluation completed on 2/22/23, not every 92 days (2/17/23) as required	
R-13 was admitted to the SLP on 8/23/22. The SLP completed a quarterly assessment on 3/26/23, not within the required 92 days.	
R-14 was admitted to the SLP on 2/22/22. The SLP completed quarterly evaluations on 8/5/22 and 5/26/23, not every 92 days as required.	
9331577.2]

R -23 was admitted to the SLP on 12/1/22. The SLP completed the RAI on 2/17/23 and the quarterly evaluation on 5/26/23, not the required every 92 days.	
R-35 was admitted 5/6/22, last quarterly evaluations completed 8/5/22 and 11/1/22, not every 92 days.	
R-36 was admitted 7/20/18, RAI completed on 7/26/22, Quarterly evaluations missing 1/2/23 and 4/3/23.	
R-38 Quarterly evaluation missing 12/16/23.	
R-39 12/15/22 Quarterly evaluation missing.	
R-41 was admitted 5/6/22, quarterly not done every 92 days, only available for 3/26/22 and 6/3/23.	
 Section 146.295 Emergency Contingency Plan For the purpose of this Section, "emergency" means an event, as a result of a mechanical failure or natural force such as water, wind, fire or loss of electrical power, that poses a threat to the safety and welfare of residents, personnel, and others present in the SLF. e) Each resident shall be oriented to the emergency plans within ten days after the resident's admission. Orientation shall include assisting resident's admission. Orientation signed and dated by the resident or the resident's representative. R-9 was admitted on 1/25/23 and oriented to the emergency plan tate on 6/3/23. 	
93531577.2	

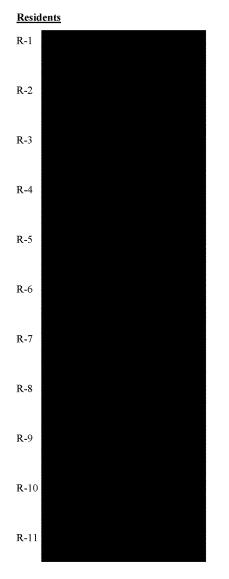

R-10 was admitted to the SLP on 12/23/22. No evidence that R- 10 was oriented to the emergency plan within ten days after admission.	
R-14 was admitted to the SLP on 2/22/22. No evidence that R-14 was oriented to the emergency plan within ten days after admission.	
R-19 was re-admitted to the SLP on 12/21/22. No evidence that R-19 was re-oriented to the emergency plan within ten days after re-admission.	
R-20 was admitted to the SLP on 11/15/22. No evidence that R-20 was oriented to the emergency plan within ten days after admission.	
R-24 was admitted on 10/2/22, R-24 was oriented to emergency plans on 9/30/22, not within 10 days after admission.	
R-30 was re-admitted on 12/22/22, emergency plans orientation not done for re-admission on 12/22/22.

FINDINGS CORRECTED: YES D NO D

For non-compliance found during an interim review or interim/final completed simultaneously-

The Response to On-Site Review Findings form must be provided to the SLP provider within ten working days after the conclusion of the on-site review. The SLP provider must complete and return the Response to On-site Review Findings form to the BLTC regional supervisor within 14 calendar days from the date it was received from the review team. The SLP provider's response must include dates of correction for each finding.

For non-compliance involving immediate jeopardy-

The Response to On-Site Review Findings form must be provided to the SLP provider within five working days after the conclusion of the on-site review. The SLP provider should complete and return the form to the BLTC regional supervisor within five calendar days from the date it was received from the review team. The SLP provider has ten working days from the date it was received from the review team to correct the non-compliance. No extension of the ten-day period will be granted. BLTC staff must conduct a follow-up review within ten working days after the conclusion of the ten-day immediate jeopardy correction period. If the follow-up continues to show immediate jeopardy, the regional supervisor should notify the area manager and BLTC central office. BLTC central office will take action to suspend or terminate provider agreement.

For non-compliance involving non-immediate jeopardy-

The Response to On-Site Review Findings form must be provided to the SLP provider within ten working days after the conclusion of the on-site review. The SLP provider should complete and return the form to the BLTC regional supervisor within 14 calendar days from the date it was received from the review team. Initially, no correction date is to be later than 30 days from the date that the findings were presented to the SLP unless there is justification documented by the SLP provider. Within those 30 days, the SLP provider is responsible for notifying the regional supervisor the status of the corrections or that the corrections have been completed. The regional supervisor or designated staff will make a follow-up visit to the SLP provider within 10 working days of the notification or take other appropriate steps to determine if all corrective action has been taken. If the first 30-day follow-up review continues to show non-compliance, the SLP provider is granted a second 30-day period to correct the non-compliance issues. If the second follow-up continues to show non-compliance, the regional supervisor should notify the area manager and BLTC central office. BLTC central office will take action to apply one or more of the sanctions allowed depending on the severity of the non-compliance.

RESPONSE TO ON-SITE REVIEW FINDINGS Page 2 of 2

For non-compliance found during an interim review or interim/final completed simultaneously-

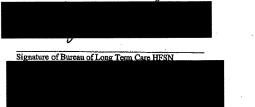

The Response to On-Site Review Findings form must be provided to the SLP provider within ten working days after the conclusion of the on-site review. The SLP provider must complete and return the Response to On-site Review Findings form to the BLPC regional supervisor within 14 calendar days from the date it was received from the review team. The SLP provider's response must include dates of correction for each finding.

For non-compliance involving immediate jeopardy-

The Response to On-Site Review Findings form must be provided to the SLP provider within five working days after the conclusion of the on-site review. The SLP provider should complete and return the form to the BLTC regional supervisor within five calendar days from the date it was received from the review team. The SLP provider has ten working days from the date it was received from the review team to correct the non-compliance. No extension of the ten-day period will be granted. BLTC staff must conduct a follow-up review within ten working days after the conclusion of the ten-day immediate jeopardy correction period. If the follow-up continues to show immediate jeopardy, the regional supervisor should notify the area manager and BLTC central office. BLTC central office will take action to suspend or terminate provider agreement.

For non-compliance involving non-immediate jeopardy-

The Response to On-Site Review Findings form must be provided to the SLP provider within ten working days after the conclusion of the on-site review. The SLP provider should complete and return the form to the BLTC regional supervisor within 14 calendar days from the date it was received from the review team. Initially, no correction date is to be later than 30 days from the date it was received from the review team. Initially, no correction date documented by the SLP provider. Within those 30 days, the SLP provider is responsible for notifying the regional supervisor the status of the corrections or that the corrections have been completed. The regional supervisor or designated staff will make a follow-up visit to the SLP provider is responsible for notifying the regional other appropriate steps to determine if all corrective action has been taken. If the first 30-day follow-up review continues to show non-compliance, the SLP provider is granted a second 30-day period to correct the noncompliance issues. If the second follow-up continues to show non-compliance, the regional supervisor should notify the area manager and BLTC central office. BLTC central office will take action to apply one or more of the sanctions allowed depending on the severity of the non-compliance.

RESPONSE TO ON-SITE REVIEW FINDINGS Page2of_2_

For non-compliance round during an interim review or interim/final completed simultaneously-

The Response to On-Site Review Findings form must be provided to the SLP provider within ten working days after the conclusion of the on-site review. The SLP provider must complete and return the Response to On-site Review Findings fonn to the BLTC regional supervisor within 14 calendar days from the date it was received from the review team. The SLP provider's response must include dates of correction for each finding.

For non-compliance involving immediate jeopardy-

The Response to On-Site Review Findings form must be provided to the SLP provider within five working days after the conclusion of the on-site review. The SLP provider should complete and return the form to the BLTC regional supervisor within five calendar days from the date it was received from the review team. The SLP provider has ten working days from the date it was received from the review team to correct the non-compliance. No extension of the ten-day period will be granted. BLTC staff must conduct a follow-up review within ten working days after the conclusion of the ten-day immediate jeopardy correction period. If the follow-up continues to show immediate jeopardy, the regional supervisor should notify the area manager and BLTC central office. BLTC central office will take action to suspend or tenninate provider agreement.

For non-compliance involving non-immediate jeopardy-

The Response to On-Site Review Findings form must be provided to the SLP provider within ten working days after the conclusion of the on-site review. The SLP provider should complete and return the fonn to the BLTC regional supervisor within 14 calendar days from the date it was received from the review team. Initially, no correction date is to be later than 30 days from the date that the findings were presented to the SLP unless there is justification documented by the SLP provider. Within those 30 days, the SLP provider is responsible for notifying the regional supervisor the status of the corrections or that the corrections have been completed. The regional supervisor or designated staff will make a follow-up visit to the SLP provider within 10 working days of the notification or take other appropriate steps to detennine if all corrective action has been taken. If the first 30-day follow-up review continues to show non-compliance, the SLP provider is granted a second 30-day period to correct the noncompliance issues. If the second follow-up continues to show non-compliance, the regional supervisor should notify the area manager and BLTC central office. BLTC central office will take action to apply one or more of the sanctions allowed depending on the severity of the non-compliance.

A new Determination of Need (DON), or successor tool, screen is not needed for a resident who is transferring between SLP providers or comes from a nursing facility with no break in service. It is the admitting SLP provider's responsibility to ensure that a screening document is received from the transferring SLP setting or nursing facility.		
R-3 was readmitted on 2/27/23 after a greater than 30-day nursing facility stay and a new SLP Initial Screen was not completed.

715

For non-compliance found during an interim review or interim/final completed simultaneously-

The Response to On-Site Review Findings form must be provided to the SLF within ten working days after the conclusion of the on-site review. The SLF must complete and return the Response to On-site Review Findings form to the BLTC regional supervisor within 14 calendar days from the date it was received from the review team. The SLF's response must include dates of correction for each finding.

For non-compliance involving immediate jeopardy-

The Response to On-Site Review Findings form must be provided to the SLF within five working days after the conclusion of the on-site review. The SLF should complete and return the form to the BLTC regional supervisor within five calendar days from the date it was received from the review team. The SLF has ten working days from the date it was received from the review team to correct the non-compliance. No extension of the ten-day period will be granted. BLTC staff must conduct a follow-up review within ten working days after the conclusion of the ten-day immediate jeopardy correction period. If the follow-up continues to show immediate jeopardy, the regional supervisor should notify the area manager and BLTC central office. BLTC central office will take action to suspend or terminate the SLF's provider agreement.

For non-compliance involving non-immediate jeopardy-

The Response to On-Site Review Findings form must be provided to the SLF within ten working days after the conclusion of the on-site review. The SLF should complete and return the form to the BLTC regional supervisor within 14 calendar days from the date it was received from the review team. Initially, no correction date is to be later than 30 days from the date that the findings were presented to the SLF unless there is justification documented by the SLF. Within those 30 days, the SLF is responsible for notifying the regional supervisor the status of the corrections or that the corrections have been completed. The regional supervisor or designated staff will make a follow-up visit to the SLF within 10 working days of the SLF's notification or take other appropriate steps to determine if all corrective action has been taken. If the first 30-day follow-up review continues to show noncompliance, the facility is granted a second 30-day period to correct the non-compliance issues. If the second follow-up continues to show non-compliance, the regional supervisor should notify the area manager and BLTC central office. BLTC central office will take action to apply one or more of the sanctions allowed depending on the severity of the non-compliance.

There were no ill effects suffered by the residents as a result of this finding. Heritage Woods of Dwight is committed to following SLF Regulations and applicable Gardant Management Solutions policies.

The Marking Director will be in service by the Administrator to ensure all residents' background checks are done completely and in a timely manner. All background checks performed will be printed with the time and date stamps on them and put into the resident office file.

A QA Study will be conducted to monitor compliance for all move-ins from 06/2023 through 09/2023 with any necessary follow up actions taken to ensure compliance. The Administrator will assure compliance.

RESPONSE TO ON-SITE REVIEW FINDINGS Page 2 of 2

For non-compliance found during an interim review or interim/final completed simultaneously-

The Response to On-Site Review Findings form must be provided to the SLP provider within ten working days after the conclusion of the on-site review. The SLP provider must complete and return the Response to On-site Review Findings form to the BLTC regional supervisor within 14 calendar days from the date it was received from the review team. The SLP provider's response must include dates of correction for each finding.

For non-compliance involving immediate jeopardy-

The Response to On-Site Review Findings form must be provided to the SLP provider within five working days after the conclusion of the on-site review. The SLP provider should complete and return the form to the BLTC regional supervisor within five calendar days from the date it was received from the review team. The SLP provider has ten working days from the date it was received from the review team to correct the non-compliance. No extension of the ten-day period will be granted. BLTC staff must conduct a follow-up review within ten working days after the conclusion of the ten-day immediate jeopardy correction period. If the follow-up continues to show immediate jeopardy, the regional supervisor should notify the area manager and BLTC central office. BLTC central office will take action to suspend or terminate provider agreement.

For non-compliance involving non-immediate jeopardy-

The Response to On-Site Review Findings form must be provided to the SLP provider within ten working days after the conclusion of the on-site review. The SLP provider should complete and return the form to the BLTC regional supervisor within 14 calendar days from the date it was received from the review team. Initially, no correction date is to be later than 30 days from the date that the findings were presented to the SLP unless there is justification documented by the SLP provider. Within those 30 days, the SLP provider is responsible for notifying the regional supervisor the status of the corrections or that the corrections have been completed. The regional supervisor or designated staff will make a follow-up visit to the SLP provider within 10 working days of the notification or take other approprint stops to determine if all corrective action has been taken. If the first 30-day follow-up review continues to show non-compliance, the SLP provider is granted a second 30-day period to correct the noncompliance issues. If the second follow-up continues to show non-compliance, the regional supervisor should notify the area manager and BLTC central office. BLTC central office will take action to apply one or more of the sanctions allowed depending on the severity of the non-compliance.

## RESPONSE TO ON-SITE REVIEW FINDINGS Page 2 of 2

For non-compliance found during an interim review or interim/final completed simultaneously-

The Response to On-Site Review Findings form must be provided to the SLP provider within ten working days after the conclusion of the on-site review. The SLP provider must complete and return the Response to On-site Review Findings from to the BLTC regional supervisor within 14 calendar days from the date it was received from the review team. The SLP provider's response must include dates of conrection for each finding.

For non-compliance involving immediate jeopardy-

The Response to On-Site Review Findings form must be provided to the SLP provider within five working days after the conclusion of the on-site review. The SLP provider should complete and return the form to the BLTC regional supervisor within five calendar days from the date it was received from the review team. The SLP provider has ten working days from the date it was received from the review team concompliance. No extension of the tea-day period will be granted BITC staff must conduct a follow-up review within ten working days after the conclusion of the tea-day immediate jeopardy correction period. If the follow-up continues to show immediate jeopardy, the regional supervisor should notify the area namager and BLTC central office. BLTC central office will take action to suspend or terminate provider agreement.

For non-compliance involving non-immediate jeopardy-

The Response to On-Site Review Findings form must be provided to the SLP provider within ten working days after the conclusion of the on-site review. The SLP provider should complete and return the form to the BLTC regional supervisor within 14 calendar days from the date if was received from the review team. Initially, no correction date is to be later than 30 days from the date that the findings were presented to the SLP unless there is justification documented by the SLP provider. Within those 30 days, the SLP provider is responsible for notifying the regional supervisor within 14 concentrations or that the corrections have been completed. The regional supervisor or designated staff will make a follow-up visit to the SLP provider within 10 working days of the notification or take other appropriate steps to determine if all corrective setion has been taken. If the first 30-day follow-up review continues to show non-compliance, the SLP provider is granted a second 30-day period to correct the noncompliance issues. If the second follow-up continues to show non-compliance, the regional supervisor should notify the area manager and BLTC central office. BLTC central office will take action to apply one or more of the sanctions allowed depending on the severity of the non-compliance.

# RESPONSE TO ON-SITE REVIEW FINDINGS Page 2 of 2

# For non-compliance found during an interim review or interim/final completed simultaneously-

The Response to On-Site Review Findings form must be provided to the SLP provider within ten working days after the conclusion of the on-site review. The SLP provider must complete and return the Response to On-site Review Findings form to the BLTC regional supervisor within 14 calendar days from the date it was received from the review team. The SLP provider's response must include dates of correction for each finding.

For non-compliance involving immediate jeopardy-

The Response to On-Site Review Findings form must be provided to the SLP provider within five working days after the conclusion of the on-site review. The SLP provider should complete and return the form to the BLTC regional supervisor within five calendar days from the date it was received from the review team. The SLP provider has ten working days from the date it was received from the review team. The SLP provider should be the date it was received from the review team to correct the non-compliance. No extension of the ten-day period will be granted. BLTC staff must conduct a follow-up review within ten working days after the conclusion of the ten-day immediate jeopardy correction period. If the follow-up continues to show immediate jeopardy, the regional supervisor should notify the area manager and BLTC central office. BLTC central office will take action to suspend or terminate provider agreement.

# For non-compliance involving non-immediate jeopardy-

The Response to On-Site Review Findings form must be provided to the SLP provider within ten working days after the conclusion of the on-Site review. The SLP provider should complete and return the form to the BLTC regional supervisor within 14 calendar days from the date it was received from the review team. Initially, no correction date is to be later than 30 days from the date that the findings were presented to the SLP unless there is justification documented by the SLP provider. Within those 30 days, the SLP provider is responsible for notifying the regional supervisor the status of the corrections or that the corrections have been completed. The regional supervisor or designated staff will make a follow-up visit to the SLP provider within 10 working days of the notification or take other appropriate stops to determine if all corrective action has been taken. If the first 30-day follow-up review comfuse to show non-compliance, the SLP provider is granted a second 30-day period to correct the non-compliance issues. If the second follow-up continues to show non-compliance, the regional supervisor should notify the area manager and BLTC central office. BLTC central office will take action to apply one or more of the sanctions allowed depending on the severity of the non-compliance.

For non-compliance found during an interim review or interim/final completed simultaneously-

The Response to On-Site Review Findings form must be provided to the SLP provider within ten working days after the conclusion of the on-site review. The SLP provider nust complete and return the Response to On-site Review Findings form to the BLTC regional supervisor within 14 calendar days from the date it was received from the review team. The SLP provider's response must include dates of correction for each finding.

For non-compliance involving immediate jeopardy-

The Response to On-Site Review Findings form must be provided to the SLP provider within five working days after the conclusion of the on-site review. The SLP provider should complete and return the form to the BLTC regional supervisor within five calendar days from the date it was received from the review team. The SLP provider has ten working days from the date it was received from the review team to correct the non-compliance. No extension of the ten-day period will be granted. BLTC staff nust conduct a follow-up review within ten working days after the conclusion of the ten-day immediate jeopardy correction period. If the follow-up continues to show immediate jeopardy, the regional supervisor should notify the area manager and BLTC central office. BLTC central office will take action to suspend or terminate provider agreement.

For non-compliance involving non-immediate jeopardy-

The Response to On-Site Review Findings form must be provided to the SLP provider within ten working days after the conclusion of the on-site review. The SLP provider should complete and return the form to the BLTC regional supervisor within 14 calendar days from the date it was received from the review team. Initially, no correction date is to be later than 30 days from the date that the findings were presented to the SLP unless there is justification documented by the SLP provider. Within those 30 days, the SLP provider is responsible for notifying the regional supervisor the status of the corrections or that the corrections have been completed. The regional supervisor or designated staff will make a follow-up visit to the SLP provider within 10 working days of the notification or take other appropriate steps to determine if all corrective action has been taken. If the first 30-day follow-up review continues to show non-compliance, the SLP provider is granted a second 30-day period to correct the noncompliance issues. If the second follow-up continues to show non-compliance, the regional supervisor should notify the area manager and BLTC central office. BLTC central office will take action to apply one or more of the sanctions allowed depending on the severity of the non-compliance.

Section 146.245 Assessment and Service Piao and Quarterly Evaluation d) Service Plan: Within seven days after completion of the RAI, a written service plan shall be developed by, or co-signed by, a registered nurse, with input from the resident and his or her designated representative. This includes coordination and inclusion of services being delivered to a resident by an outside entity. The service plan shall include a description of expected outcomes, approaches, frequency and duration of services provided and whether the services will be provided by licensed or unilconsed saff. The service plan must be individualized to address the health and behavior needs of each resident. The service plan shall document any services recommended by the SLF that are refused by the resident. The service plan shall be reviewed and updated in conjunction with the quarterly reviewed and updated in conjunction with the quarterly references.		
R-2 - RAI dated 6/14/23 F.3.g Phone usage is coded 2- "Done		

93531595.2

with Help" however ISP dated 6/14/23 does not address phone	
usage.	
R-8 - ISS dated 12/6/22 was completed prior to the RAI dated 12/9/22.	
R-10 ISP dated 01/30/23 the resident did not initial the ISP	
indicating that choose SLP waiver services. The circle for the I	
choose is filled in and the date line has a date of O1/30/23 but	
there is no resident initial/signature. Remediated onsite 07/05/23.	
The resident did not sign or initial that received a copy of the	
Resident Rights SLP brochure. The line for this date is dated	
1/30/23 but the resident signature line is blank. Remediated	
onsite 7/05/23.	
R-11 ISP dated 10/11/22 "What is important to me" is blank.	
The ISP is not signed by the resident, the resident did not	
sign/initial that choose or did not choose SLP waiver services.	
Both remediated on 07/05/23. The resident did not sign/initial	
that received a copy of the SLP's resident rights. Remediated on	
07/05/23. The ISP dated 10/11/22 inaccurately stated that	
resident requires assist with dressing lower body, set up and	
oversight with dressing upper body, and assist with zippers,	
buttons, and fasteners. DON confirmed on 07/05/23 that resident	
is Independent with dressing as coded on the RAI dated I 0/11/22	
coded (0). Shopping is coded as a (3), transportation is coded (3)	
and transfers is coded (0). The ISP inaccurately stated that the	
resident is able to shop with assist, sets up own transportation	
with assist from staff/family and requires assist with transfers.	
Per DON on 07/05/23 resident is totally dependent on staff and	
family for shopping and transportation arrangements and does	
not require transfer assist.

COMPLAINT/FINDING DESCRIPTION Addres include and origo	SLF RESPONSE	CORRECTION DATE
Informational Notice dated 12/12/07 Re: Readmission of Residents from Nursing Facility: Residents from Nursing Facility: Residents of supportive living facility us the discharged from the SLF on the Department's Recipient Data Base to allow admission data for the nursing facility to be added. An SLF may hold the resident's apartment during the nursing facility stay if it is anticipated to be a short-term stay. An SLF may hold the apartment free of charge or make arrangements with the resident's family to pay. The Resident Contract should provide the SLF's policy for holding an apartment for a short-term stay, including the length of time the apartment will be held, the charge to hold the apartment and the need for the SLF. Coorduct an assessment prior to readmission to ensure the resident's needs can continue to be met by the SLF. If a resident returns to the same SLF from a nursing facility within 30 days without a break in service, a new Resident Assessment Instrument (RAI) and Resident		

Informational Notice dated 12/12/07 Re: Readmission of	
Resident From Nursing Facility Continued:	
Service Plan (RSP) does not have to be completed unless	
there is a significant change in the resident's status. If	
there is no significant change, the RAJ and RSP in place	
prior to the resident's discharge to the nursing facility	
must be reviewed and updated accordingly, within 24-	
hours of readmission to the SLF. Since the resident is not	
technically discharged from the SLF, completion of	
future assessments remains on the same timeline.	
The SLF does not have to do the following at the time of	
readmission to the SLF if readmission from the nursing	
facility is within 30 days, without a break in service, from	
the date of the SLF discharge: Determination of Need	
(DON), sign a new Resident Contract, advance directives,	
sex offender registration website, and tuberculosis test.	
R-4 - Admission date 9/1/22. Orientation checklist with	
emergency plan is dated 6/13/23 (greater than 10 days).	
(Readmission greater than 30 days).	
R-5 - Standardized Interview and Initial Assessment were not	
provided for review from readmission greater than 30 days.

# Page 2 of _2___ **RESPONSE TO ON-SITE REVIEW FINDINGS**

For non-compliance found during an interim review or interim/final completed simultaneously-

The Response to On-Site Review Findings form must be provided to the SLP provider within ten working days after the conclusion of the on-site review. The SLP provider must complete and return the Response to On-site Review Findings form to the BLTC regional supervisor within 14 calendar days from the date it was received from the review team. The SLP provider's response must include dates of correction for each finding.

For non-compliance involving immediate jeopardy-

The Response to On-Site Review Findings form must be provided to the SLP provider within five working days after the conclusion of the on-site review. The SLP provider should complete and return the form to the BLTC regional supervisor within five calendar days from the date it was received from the review team. The SLP provider has ten working days from the date it was received from the review team to correct the non-compliance. No extension of the ten-day period will be granted. BLTC staff must conduct a follow-up review within ten working days after the conclusion of the ten-day immediate jeopardy correction period. If the follow-up continues to show immediate jeopardy, the regional supervisor should notify the area manager and BLTC central office. BLTC central office will take action to suspend or terminate provider agreement.

For non-compliance involving non-immediate jeopardy-

The Response to On-Site Review Findings form must be provided to the SLP provider within ten working days after the conclusion of the on-site review. The SLP provider should complete and return the form to the BLTC regional supervisor within 14 calendar days from the date it was received from the review team. Initially, no correction date is to be later than 30 days from the date that the findings were presented to the SLP unless there is justification documented by the SLP provider. Within those 30 days, the SLP provider is responsible for notifying the regional supervisor the status of the corrections or that the corrections have been completed. The regional supervisor or designated staff will make a follow-up visit to the SLP provider within 10 working days of the notification or take other appropriate steps to determine if all corrective action has been taken. If the first 30-day follow-up review continues to show non-compliance, the SLP provider is granted a second 30-day period to correct the non-compliance issues. If the second follow-up continues to show non-compliance, the regional supervisor should notify the area manager and BLTC central office. BLTC central office will take action to apply one or more of the sanctions allowed depending on the severity of the non-compliance.

# RESPONSE TO ON-SITE REVIEW FINDINGS Page 2 of 5

# For non-compliance found during an interim review or interim/final completed simultaneously-

The Response to On-Site Review Findings form must be provided to the SLP provider within ten working days after the conclusion of the on-site review. The SLP provider must complete and return the Response to On-site Review Findings form to the BLTC regional supervisor within 14 calendar days from the date it was received from the review team. The SLP provider's response must include dates of correction for each finding.

### For non-compliance involving immediate jeopardy-

The Response to On-Site Review Findings form must be provided to the SLP provider within five working days after the conclusion of the on-site review. The SLP provider should complete and return the form to the BLTC regional supervisor within five calendar days from the date it was received from the review team. The SLP provider has ten working days from the date it was received from the review team to correct the non-compliance. No extension of the ten-day period will be granted. BLTC staff must conduct a follow-up review within ten working days after the conclusion of the ten-day immediate jeopardy correction period. If the follow-up continues to show immediate jeopardy, the regional supervisor should notify the area manager and BLTC central office. BLTC central office will take action to suspend or terminate provider agreement.

### For non-compliance involving non-immediate jeopardy-

The Response to On-Site Review Findings form must be provided to the SLP provider within ten working days after the conclusion of the on-site review. The SLP provider should complete and return the form to the BLTC regional supervisor within 14 calendar days from the date it was received from the review team. Initially, no correction date is to be later than 30 days from the date that the findings were presented to the SLP unless there is justification documented by the SLP provider. Within those 30 days, the SLP provider is responsible for notifying the regional supervisor the status of the corrections or that the corrections have been completed. The regional supervisor or designated staff will make a follow-up visit to the SLP provider within 10 working days of the notification or take other appropriate steps to determine if all corrective action has been taken. If the first 30-day follow-up review continues to show non-compliance, the SLP provider is granted a second 30-day period to correct the noncompliance issues. If the second follow-up continues to show non-compliance, the regional supervisor should notify the area manager and BLTC central office. BLTC central office will take action to apply one or more of the sanctions allowed depending on the severity of the non-compliance.

# RESPONSE TO ON-SITE REVIEW FINDINGS Page 2 of A

## For non-compliance found during an interim review or interim/final completed simultaneously-

The Response to On-Site Review Findings form must be provided to the SLP provider within ten working days after the conclusion of the on-site review. The SLP provider must complete and return the Response to On-site Review Findings form to the BLTC regional supervisor within 14 calendar days from the date it was received from the review team. The SLP provider's response must include dates of correction for each finding.

### For non-compliance involving immediate jeopardy-

The Response to On-Site Review Findings form must be provided to the SLP provider within five working days after the conclusion of the on-site review. The SLP provider should complete and return the form to the BLTC regional supervisor within five calendar days from the date it was received from the review team. The SLP provider has ten working days from the date it was received from the review team to correct the non-compliance. No extension of the ten-day period will be granted. BLTC staff must conduct a follow-up review within ten working days after the conclusion of the ten-day immediate jeopardy correction period. If the follow-up continues to show immediate jeopardy, the regional supervisor should notify the area manager and BLTC central office. BLTC central office will take action to suspend or terminate provider agreement.

## For non-compliance involving non-immediate jeopardy-

The Response to On-Site Review Findings form must be provided to the SLP provider within ten working days after the conclusion of the on-site review. The SLP provider should complete and return the form to the BLTC regional supervisor within 14 calendar days from the date it was received from the review team. Initially, no correction date is to be later than 30 days from the date that the findings were presented to the SLP unless there is justification documented by the SLP provider. Within those 30 days, the SLP provider is responsible for notifying the regional supervisor the status of the corrections or that the corrections have been completed. The regional supervisor or designated staff will make a follow-up visit to the SLP provider within 10 working days of the notification or take other appropriate steps to determine if all corrective action has been taken. If the first 30-day follow-up review continues to show non-compliance, the SLP provider is granted a second 30-day period to correct the noncompliance issues. If the second follow-up continues to show non-compliance, the regional supervisor should notify the area manager and BLTC central office. BLTC central office will take action to apply one or more of the sanctions allowed depending on the severity of the non-compliance.

## RESPONSE TO ON-SITE REVIEW FINDINGS Page 2 of 2

## For non-compliance found during an interim review or interim/final completed simultaneously-

The Response to On-Site Review Findings form must be provided to the SLP provider within ten working days after the conclusion of the on-site review. The SLP provider must complete and return the Response to On-site Review Findings form to the BL/TC regional supervisor within 14 calendar days from the date it was received from the review team. The SLP provider's response must include dates of correction for each finding.

## For non-compliance involving immediate jeopardy-

The Response to On-Site Review Findings form must be provided to the SLP provider within five working days after the conclusion of the on-site review. The SLP provider should complete and return the form to the BLTC regional supervisor within five calendar days from the date it was received from the review team. The SLP provider has ten working days from the date it was received from the review team to correct the non-compliance. No extension of the ten-day period will be granted. BLTC staff must conduct a follow-up review within ten working days after the conclusion of the ten-day immediate jeopardy correction period. If the follow-up continues to show immediate jeopardy, the regional supervisor should notify the area manager and BLTC central office. BLTC central office will take action to suspend or terminate provider agreement.

## For non-compliance involving non-immediate jeopardy-

The Response to On-Site Review Findings form must be provided to the SLP provider within ten working days after the conclusion of the on-site review. The SLP provider should complete and return the form to the BLTC regional supervisor within 14 calendar days from the date it was received from the review team. Initially, no correction date is to be later than 30 days from the date that the findings were presented to the SLP unless there is justification documented by the SLP provider. Within those 30 days, the SLP provider is responsible for notifying the regional supervisor the status of the corrections or that the corrections have been completed. The regional supervisor or designated staff will make a follow-up visit to the SLP provider within 10 working days of the notification or take other appropriate steps to determine if all corrective action has been taken. If the first 30-day follow-up review continues to show non-compliance, the SLP provider is granted a second 30-day period to correct the noncompliance issues. If the second follow-up continues to show non-compliance, the regional supervisor should notify the area manager and BLTC central office. BLTC central office will take action to apply one or more of the sanctions allowed depending on the severity of the non-compliance.

Section 146.245 Assessments and Service Plan and Quarterly Evaluation d)

SLP regulations provide for a completed Service Plan. Within seven days after completion of the RAI, a written service plan shall be developed by, or co-signed by, a registered professional nurse, with input from the resident and his or her designated representative. This includes the coordination and inclusion of services being delivered to a resident by an outside entity. The service plan shall include a description of expected outcomes, approaches, frequency, and duration of services provided and whether the services will be provided by licensed or unlicensed staff. The service plan must be individualized to address the health and behavior needs of each resident. The service plan shall document any services recommended by the SLP provider that are refused by the resident. The service plan shall be reviewed and updated as dictated by changes in resident needs or preferences.

Of the records reviewed, the following was discovered:

12 records were not signed/late/no residents rights/ISP incorrect form

There were no ill effects suffered by the residents as a result of this finding.

Because the facility is dedicated to providing the best possible care and maintaining compliance with SLF rule and regulations regarding documentation standards, the licensed nursing personnel will be inserviced on timeliness, correct form, necessary signatures and resident right signature page according to the SLF rule by the corporate Director of Health Services.

The Licensed Nurse and the Administrator are responsible for compliance with all SLF documentation requirements. Resident records will be audited monthly by Administrator and/or nursing staff as part of a Quality Assurance Process to ensure ongoing compliance. Ten percent of records will be audited.

Section 146.245 Assessments and Service Plan and Quarterly Evaluation c)

SLP regulations provide for a completed Comprehensive Resident Assessment Instrument (RAI) within 14 days after admission, annually and upon a significant change in the resident's mental or physical status. Each RAI shall be competed by or co-signed by a registered professional nurse.

Of the records reviewed, the following was discovered:

15 records were inaccurate (not individualized), not thorough or late.

There were no ill effects suffered by the residents as a result of this finding.

Because the facility is dedicated to providing the best possible care and maintaining compliance with SLF rule and regulations regarding documentation standards, the licensed nursing personnel will be inserviced on timeliness and individualization of service plans, and signed, completed RAI's according to the SLF rule by the corporate Director of Health Services.

The Licensed Nurse and the Administrator are responsible for compliance with all SLF documentation requirements. Resident records will be audited monthly by Administrator and/or nursing staff as part of a Quality Assurance Process to ensure ongoing compliance. Ten percent of records will be audited.

#### RESPONSE TO ON-SITE REVIEW FINDINGS Page 2 of 6

#### For non-compliance found during an interim review or interim/final completed simultaneously-

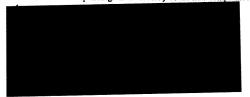

The Response to On-Site Review Findings form must be provided to the SLP provider within ten working days after the conclusion of the on-site review. The SLP provider must complete and return the Response to On-site Review Findings form to the BLTC regional supervisor within 14 calendar days from the date it was received from the review team. The SLP provider's response must include dates of correction for each finding.

#### For non-compliance involving immediate jeopardy-

The Response to On-Site Review Findings form must be provided to the SLP provider within five working days after the conclusion of the on-site review. The SLP provider should complete and return the form to the BLTC regional supervisor within five calendar days from the date it was received from the review team. The SLP provider has ten working days from the date it was received from the review team to correct the non-compliance. No extension of the ten-day period will be granted. BLTC staff must conduct a follow-up review within ten working days after the conclusion of the ten-day immediate jeopardy correction period. If the follow-up continues to show immediate jeopardy, the regional supervisor should notify the area manager and BLTC central office. BLTC central office will take action to suspend or terminate provider agreement.

For non-compliance involving non-immediate jeopardy-

The Response to On-Site Review Findings form must be provided to the SLP provider within ten working days after the conclusion of the on-site review. The SLP provider should complete and return the form to the BLTC regional supervisor within 14 calendar days from the date it was received from the review team. Initially, no correction date is to be later than 30 days from the date that the findings were presented to the SLP unless there is justification documented by the SLP provider. Within those 30 days, the SLP provider is responsible for notifying the regional supervisor the status of the corrections or that the corrections have been completed. The regional supervisor or designated staff will make a follow-up visit to the SLP provider within 10 working days of the notification or take other appropriate steps to determine if all corrective action has been taken. If the first 30-day follow-up review continues to show non-compliance, the SLP provider is granted a second 30-day period to correct the noncompliance issues. If the second follow-up continues to show non-compliance, the regional supervisor should notify the area manager and BLTC central office. BLTC central office will take action to apply one or more of the sanctions allowed depending on the severity of the non-compliance.

### RESPONSE TO ON-SITE REVIEW FINDINGS Page 2 of 2

### For non-compliance found during an interim review or interim/final completed simultaneously-

The Response to On-Site Review Findings form must be provided to the SLP provider within ten working days after the conclusion of the on-site review. The SLP provider must complete and return the Response to On-site Review Findings form to the BLTC regional supervisor within 14 calendar days from the date it was received from the review team. The SLP provider's response must include dates of correction for each finding.

#### For non-compliance involving immediate jeopardy-

The Response to On-Site Review Findings form must be provided to the SLP provider within five working days after the conclusion of the on-site review. The SLP provider should complete and return the form to the BLTC regional supervisor within five calendar days from the date it was received from the review team. The SLP provider has ten working days from the date it was received from the review team to correct the non-compliance. No extension of the ten-day period will be granted. BLTC staff must conduct a follow-up review within ten working days after the conclusion of the ten-day immediate jeopardy correction period. If the follow-up continues to show immediate jeopardy, the regional supervisor should notify the area manager and BLTC central office. BLTC central office will take action to suspend or terminate provider agreement.

#### For non-compliance involving non-immediate jeopardy-

The Response to On-Site Review Findings form must be provided to the SLP provider within ten working days after the conclusion of the on-site review. The SLP provider should complete and return the form to the BLTC regional supervisor within 14 calendar days from the date it was received from the review team. Initially, no correction date is to be later than 30 days from the date that the findings were presented to the SLP unless there is justification documented by the SLP provider. Within those 30 days, the SLP provider is responsible for notifying the regional supervisor the status of the corrections or that the corrections have been completed. The regional supervisor or designated staff will make a follow-up visit to the SLP provider within 10 working days of the notification or take other appropriate steps to determine if all corrective action has been taken. If the first 30-day follow-up review continues to show non-compliance, the SLP provider is granted a second 30-day period to correct the noncompliance issues. If the second follow-up continues to show non-compliance, the regional supervisor should notify the area manager and BLTC central office. BLTC central office will take action to apply one or more of the sanctions allowed depending on the severity of the non-compliance.

### RESPONSE TO ON-SITE REVIEW FINDINGS Page 2 of 2

For non-compliance found during an interim review or interim/final completed simultaneously-

The Response to On-Site Review Findings form must be provided to the SLP provider within ten working days after the conclusion of the on-site review. The SLP provider must complete and return the Response to On-site Review Findings form to the BLTC regional supervisor within 14 calendar days from the date it was received from the review team. The SLP provider's response must include dates of correction for each finding.

For non-compliance involving immediate jeopardy-

The Response to On-Site Review Findings form must be provided to the SLP provider within five working days after the conclusion of the on-site review. The SLP provider should complete and return the form to the BLTC regional supervisor within five calendar days from the date it was received from the review team. The SLP provider has ten working days from the date it was received from the review team to correct the non-compliance. No extension of the ten-day period will be granted. BLTC staff must conduct a follow-up review within ten working days after the conclusion of the ten-day immediate jeopardy correction period. If the follow-up continues to show immediate jeopardy, the regional supervisor should notify the area manager and BLTC central office. BLTC central office will take action to suspend or terminate provider agreement.

For non-compliance involving non-immediate jeopardy-

The Response to On-Site Review Findings form must be provided to the SLP provider within ten working days after the conclusion of the on-site review. The SLP provider should complete and return the form to the BLTC regional supervisor within 14 calendar days from the date it was received from the review team. Initially, no correction date is to be later than 30 days from the date that the findings were presented to the SLP unless there is justification documented by the SLP provider. Within those 30 days, the SLP provider is responsible for notifying the regional supervisor the status of the corrections or that the corrections have been completed. The regional supervisor or designated staff will make a follow-up visit to the SLP provider within 10 working days of the notification or take other appropriate steps to determine if all corrective action has been taken. If the first 30-day follow-up review continues to show non-compliance, the SLP provider is granted a second 30-day period to correct the noncompliance issues. If the second follow-up continues to show non-compliance, the regional supervisor should notify the area manager and BLTC central office. BLTC central office will take action to apply one or more of the sanctions allowed depending on the severity of the non-compliance.

### **Comments for Prairie Winds Urbana WY23 Annual Review**

146.220 Resident Participation Requirements a) The SLP setting may admit or retain whose needs can be met through the services described in Section 146.230. The following criteria shall be met prior to admission to the SLP setting.

2) Be screened by the appropriate Department on Aging contracted Care Coordination Unit ( DoA CCU) or the Department of Human Services Division of Rehabilitation Services (DHS-DRS) screening agency and found to be in need of nursing facility level of care. A new Determination of Need ( DON ), or successor tool, screen is not needed for a resident who is transferring between SLP providers or comes from a nursing facility with no break in service. It is the admitting SLP provider's responsibility to ensure that a screening document is received from the transferring SLP provider's network of a developmental disability or serious mental illness, as evidenced in the medical history accompanying the individual, the SLP provider must submit a referral for a specialized evaluation to be completed by the DHS Division of Developmental Disabilities ( DHS-DDD) Independent Service Coordination (ISC) agency or the Division of Mental Health (DHS-SMH) Preadmission Screening Resident Review (PASRR) agency to evaluate for need for active treatment or the existence of serious functional risk and needs associated with the diagnosis to determine if they exceed the capacity of the SLP setting. Private pay individuals may choose to be admitted into the SLP setting when the screening assessment does not justify nursing facility level of care.

R-5 did not have DON screen. Per E-28," R-5 moved from a different state and did not have one completed". R-5 was admitted 1/6/22. A DON screen was requested 11/23/22.

R-33, R-35, R-36 and R-37 had an initial DON screen completed but did not have a conversion screen completed. Appointment was made per E-28 to get screens done.

**Comment:** A DON screen should be completed prior to admission unless there is an allowable post screen, the resident transferred directly from another SLP provider or a Nursing facility, <60 days break from a Nursing facility or the resident received a Medicaid conversion screening. Please follow the rule as noted above.

146.245 Assessment and Service Plan and Quarterly Evaluation h) The SLP manager or licensed nursing staff shall alert the resident, his or her physician and his or her designated representative when a change in a resident's mental or physical status is observed by staff. Except in life-threatening situations, the reporting shall be within 24 hours after the observation. Serious or life-threatening situations should be reported to the physician and the resident's designated representative immediately. The SLP staff shall be responsible for reporting only those changes that should be apparent to observers familiar with the conditions of older persons or persons with disabilities.

R-31, no evidence of designated representative notification for hospital send-out on 4/1/22.

**Comment:** As stated in the rule above, whenever a change in a resident's mental or physical status is observed, the SLP manager or licensed nursing staff shall alert the resident, his or her physician and his or her designated representative. Please follow the rule as noted <u>above.</u>

## RESPONSE TO ON-SITE REVIEW FINDINGS Page 2 of 14

### For non-compliance found during an interim review or interim/final completed simultaneously-

The Response to On-Site Review Findings form must be provided to the SLP provider within ten working days after the conclusion of the on-site review. The SLP provider must complete and return the Response to On-site Review Findings form to the BLTC regional supervisor within 14 calendar days from the date it was received from the review team. The SLP provider's response must include dates of correction for each finding.

### For non-compliance involving immediate jeopardy-

The Response to On-Site Review Findings form must be provided to the SLP provider within five working days after the conclusion of the on-site review. The SLP provider should complete and return the form to the BLTC regional supervisor within five calendar days from the date it was received from the review team. The SLP provider has ton working days from the date it was received from the review team to correct the non-compliance. No extension of the ten-day period will be granted. BLTC staff must conduct a follow-up review within ten working days after the conclusion of the ten-day immediate jeopardy correction period. If the follow-up continues to show immediate jeopardy, the regional supervisor should notify the area manager and BLTC central office. BLTC BLTC central office will take action to suspend or terminate provider agreement.

### For non-compliance involving non-immediate jeopardy-

The Response to On-Site Review Findings form must be provided to the SLP provider within ten working days after the conclusion of the on-site review. The SLP provider should complete and return the form to the BLTC regional supervisor within 14 calendar days from the date it was received from the review team. Initially, no correction date is to be later than 30 days from the date that the findings were presented to the SLP unless there is justification documented by the SLP provider. Within those 30 days, the SLP provider is responsible for notifying the regional supervisor the status of the corrections or that the corrections have been completed. The regional supervisor or designated staff will make a follow-up visit to the SLP provider within 10 working days of the notification or take other appropriate steps to determine if all corrective action has been taken. If the first 30-day follow-up review continues to show non-compliance, the SLP provider is granted a second 30-day period to correct the noncompliance issues. If the second follow-up continues to show non-compliance, the regional supervisor should notify the area manager and BLTC central office. BLTC central office will take action to apply one or more of the sanctions allowed depending on the severity of the non-compliance.

St. Anthony of Lansing Response to Findings Referral Date: 7/29/2022

#### Section 146.220 Resident Participation Requirements

- a) The SLF may admit or retain residents whose needs can be met through services described in Section 146.230. The following criteria shall be met prior to admission to a SLE.
  - Have name checked against the United States Department of Justice Dru Sjodin National Offender Public Website at <u>www.nsopr.gov</u>, the Illinois Sex
     Offender Registration website at www.isp.state.il.us and the

Illinois Department of Corrections registered sex offender database at <u>www.idoc.state.il.us</u>. Refer to Section 146.215 for facility requirements if a person whose name appears on either registry is admitted to a SLF.

#### Alleged findings:

- R-3: Admit date 11/5/20. Three required Sex offender searches completed on 11/6/20 1 day late.
- R-6: Admit date 10/19/20. IL sex offender and national sex offender search completed on 7/26/21 and parolee search on 12/20/21-done after admission.
- R7: Admit date 12/30/20. IL and national sex offender search completed on 7/26/21 -almost 7months later.
- R20: Admit date 5/30/20. Three required Sex offender search completed on 4/11/21 -late.

Administrator or Assistant Administrator will in-service the MIC and Marketing Director on the community background check policy for residents prior to admission.

Administrator, Assistant Administrator or MIC will assure all new residents names are checked against the United States Department of Justice Dru Sjodin National Offender Public Website at 222.nsopr.gov,, The Illinois Sex Offender Registration website at <u>www.isp.state.il.us</u> and the Illinois Department of Corrections registered sex offender database at <u>www.idoc.state.il.us</u>.

Administrator or Assistant Administrator will conduct Quality Assurance monthly to ensure compliance of this regulation.

Completion date systemic changes will be completed: August 30, 2022

Assure any new resident has background checks prior to admission:

Topic: Resident Background Checks Important Points for Successful Implementation.

- admission. Include websites of the United States Department of Justice Dru Sjodin National Offender Public Website at <u>www.nsopr.gov</u>,the Illinois Sex Offender Registration website at <u>www.isp.state.il.us</u> and the Illinois Department of Corrections registered sex offender database at <u>www.idoc.state.il.us</u>. Refer to Section 146.215 for facility requirements if a person whose name appears on either registry is admitted to the community.
- Pay special attention to assure the Illinois Department of corrections registered sex offender database is run and not the inmate search.
- Assure documents are kept together and filed promptly in the Resident Background Check Binder.
- Add the resident name, date of admission and date of checks to the log for QA purposes.
- Assure the Resident Background check binder remains up to date and available for review. All background checks should be promptly filed.
- Any questions or concerns about the results or inactivity of the system should be promptly discussed with the Administrator and Regional Director.

#### St. Anthony of Lansing Response to Findings Referral Date: 7/29/2022

#### Section 146.220 Resident Participation Requirements

a) The SLF may admit or retain residents whose needs can be met through the services described in Section 146.230. The following criteria shall be met prior to admission to the SLF:

1) Be screened by the Department or other State agency screening entity and found to be in need of nursing facility level of care and that SLF placement is appropriate to meet the needs of the individual. A new screen is not needed for a resident who is transferring between SLFs or comes from a nursing facility with no break in service. It is the admitting SLF's responsibility to ensure that a screening document is received from the transferring SLF or nursing facility. Private pay individuals may choose to be admitted into the SLF when the screening assessment does not justify nursing facility level of care; and

2) Be without a primary or secondary diagnosis of developmental disability or serious and persistent mental illness. The developmental disability or mental illness must be determined by a qualified Department of Human Services screening agent; and

Administrator or Assistant Administrator will in-service the MIC and Marketing Director on DON screenings policy and regulation (146.220) for all new residents.

Administrator or Assistant Administrator will assure all new residents names be screened by the appropriate Department on Aging contracted Care Coordination Unit (DOA CCU) or the Department of Human Services Division of Rehabilitation Services (DHS-DRS) screening agency and found to be in need of nursing facility level of care.

Administrator or Assistant Administrator will conduct Quality Assurance monthly to ensure compliance of this regulation.

Completion date systemic changes will be completed: August 30, 2022

#### St. Anthony of Lansing PLAN OF CORRECTION Referral Date: 7/29/2022

#### **Community Response**

Please accept the following as the facility's plan of correction. This plan of correction does not constitute an admission of guilt or liability by the facility and is submitted only in response to the regulatory requirement.

#### Section 146.245 Assessment and Service Plan and Quarterly Evaluation

a) Interview: The SLP provider shall conduct a standardized interview geared toward the resident's service needs at or before the time of occupancy but not before the DON, or successor tool, and other required PAS assessments are completed, and determinations provided to the SLP provider.

- 1. What corrective actions(s) will be accomplished for those residents found to have been affected by the deficient practice:
- R5-Resident a re-admit on 1-16-19. No standardized interview on record to review. Reviewer requested for one, facility unable to provide
- Admit date 6-5-19. No standardized interview on record to review. Reviewer requested for one, facility unable to provide.
- 2. How the facility will identify other residents having the potential to be affected by the same deficient practice and what corrective action will be taken:
  - All residents of the facility have the potential to be affected by the same alleged deficient practice. Clinical nurses will be in-serviced on completing the standardized interview prior to admission and for residents out of the community more than 30 days.
- 3. What measures will be put into place or what systematic changes the facility will make to ensure that the deficient practice does not recur:
  - The Director of Nursing will include completing the standardized interview in the QA Plan for St. Anthony of Lansing.
- 4. How the corrections will be monitored to ensure the deficient practice will not recur, i.e., what quality assurance program will be put into place:
  - Administrator/DON/Designee will develop, monitor, and conduct routine as well as Quality Assurance monthly audits for one month to ensure compliance of the standardized interview. The audits will be discussed during our monthly QI meetings

for trends, patterns, and areas of concern. QI committee will determine if continued auditing is necessary once 100% compliance threshold is achieved for three consecutive months. This plan to be amended when indicated.

Completion date systemic changes will be completed: August 30, 2022

Regional Director of Health Services

#### St. Anthony of Lansing PLAN OF CORRECTION Referral Date: 8/1/2022

#### **Community Response**

Please accept the following as the facility's plan of correction. This plan of correction does not constitute an admission of guilt or liability by the facility and is submitted only in response to the regulatory requirement.

#### Section 146.245 Assessment and Service Plan and Quarterly Evaluation

b) Initial Assessment: The SLP provider shall complete an initial assessment and service plan within 24 hours after admission that identifies needs and potential immediate problems. Each assessment shall be completed by, or co-signed by, a licensed practical nurse or a registered professional nurse.

- 1. What corrective actions(s) will be accomplished for those residents found to have been affected by the deficient practice:
- R3: Date of admission 11-5-20. Initial assessment and service plan completed on 11-8-20 was 3 days late.
- R5: Date of admission 1-16-19. No Initial assessment and service plan on record. Reviewer requested for one, facility unable to provide.
- R7: Date of admission 12-30-20. Initial assessment and service plan completed on 12-29-20-completed before admission. Per rule to be completed within 24 hours after admission.
- R8: Admit date 6-5-19. No Initial assessment and service plan on record. Reviewer requested for one, facility unable to provide.
- R9: Admit date 6-16-19. Initial assessment and service plan completed 6-26-19 was 10 days late.
- R27: Admit date 4-2-19, initial assessment completed on 12-16-19, over 8 months.
- 2. How the facility will identify other residents having the potential to be affected by the same deficient practice and what corrective action will be taken:
- All residents of the facility have the potential to be affected by the same alleged deficient practice. Clinical nurses will be in-serviced on completing the initial assessment within 24 hours of admission that identifies needs and potential immediate problems. Each assessment shall be completed by, or co-signed by, a licensed practical nurse or a registered professional nurse.

# 3. What measures will be put into place or what systematic changes the facility will make to ensure that the deficient practice does not recur: The Director of Nursing will include completing the initial assessment in the QA Plan for St. Anthony of Lansing.

- 4. How the corrections will be monitored to ensure the deficient practice will not recur, i.e., what quality assurance program will be put into place:
- 5. Administrator/DON/Designee will develop, monitor, and conduct routine as well as Quality Assurance monthly audits for one month to ensure compliance of the Initial assessment. The audits will be discussed during our monthly QI meetings for trends, patterns, and areas of concern. QI committee will determine if continued auditing is necessary once 100% compliance threshold is achieved for three consecutive months. This plan to be amended when indicated.

Completion date systemic changes will be completed: August 30, 2022

Regional Director of Health Services

#### St. Anthony of Lansing PLAN OF CORRECTION Referral Date: 8/1/2022

#### **Community Response**

Please accept the following as the facility's plan of correction. This plan of correction does not constitute an admission of guilt or liability by the facility and is submitted only in response to the regulatory requirement.

#### Section 146.245 Assessment and Service Plan and Quarterly Evaluation

d.) Service Plan: Within seven days after completion of the RAI, a written service plan shall be developed by, or co-signed by, a registered professional nurse, with input from the resident and his or her designated representative. This includes coordination and inclusion of services being delivered to a resident by filling outside entity. The service plan shall include a description of expected outcomes, approaches, frequency md duration of services provided and whether the services will be provided by licensed or unlicensed staff. The service plan 1 must be individualized to address the health m1d behavior needs of each resident. The service plan shall document the services recommended by the SLP provider that are refused by the resident. The service plan shall be reviewed md updated in conjunction with the quarterly evaluation or as dictated by changes in resident needs or preferences.

- 1. What corrective actions(s) will be accomplished for those residents found to have been affected by the deficient practice:
  - R4: RAI completed md signed by the RN on 1-17-21, ISP completed md signed by the RN on 3-19-21. ISP almost 3 months late, ISP due on 1-23-21.
  - RI9: RAI completed and signed by the RN on 1-27-20, ISP completed and signed by the RN on 2-11-20. ISP late; due on 2-2- 20.Per SLF rules, ISP to be completed within 7 days of completing the RAI.
- 2. How the facility will identify other residents having the potential to be affected by the same deficient practice and what corrective action will be taken:
  - All residents of the facility have the potential to be affected by the same alleged deficient practice. Clinical nurses will be in-serviced on completing the service plan within 7 days of the completion of the RAI.
- 3. What measures will be put into place or what systematic changes the facility will make to ensure that the deficient practice does not recur:

- The Director of Nursing will include completing the completion of the service plan in the QA Plan for St. Anthony of Lansing.
- 4. How the corrections will be monitored to ensure the deficient practice will not recur, i.e., what quality assurance program will be put into place:
  - Administrator/DON/Designee will develop, monitor, and conduct routine as well as Quality Assurance monthly audits for one month to ensure compliance of the service plan. The audits will be discussed during our monthly QI meetings for trends, patterns, and areas of concern. QI committee will determine if continued auditing is necessary once 100% compliance threshold is achieved for three consecutive months. This plan to be amended when indicated.

#### Section 146.245 Assessment and Service Plan and Quarterly Evaluation

e.) Quarterly Evaluation: A quarterly evaluation of the health and behavior status of each resident using a Department designated form shall be completed by, or co-signed by, a registered professional nurse.

- 1. What corrective actions(s) will be accomplished for those residents found to have been affected by the deficient practice:
  - Rl: Based on quarterly dated 4-22-21, quarterly dated 7-25-21 was late. Due on 7-22-21.
  - R2: Based on quarterly assessment dated 3-10-21, quarterly assessment dated 6-10-21 was 1 day late.
  - R3: Based on quarterly dated 2-6-21, quarterly dated 5-9-21 was I day late. 3rd quarterly due on 8-7-21 was not completed. Reviewer requested for quarterly, facility unable to provide quarterly.
  - R4: RAI completed on 1-17-21, 1" quarterly dated 4-20-21 was 2 days late, due on 4-18-21.
  - R5: Admit date 1-16-19, Most recent Quarterly dates as follows 10-9-20, 4-21-21 and 7-2-21. RAI was completed 1-8-21, Quarterly dated 4-12-21 was 3 days late. Due 4-9-21.
  - R11: 1st quarterly dated and signed by the RN on 12-7-20 was 1 day late. Per RAI dated 9-6-20, 1st Quarterly was due on 12-6-20.
- 2. How the facility will identify other residents having the potential to be affected by the same deficient practice and what corrective action will be taken:
  - All residents of the facility have the potential to be affected by the same alleged deficient practice. Clinical nurses will be in-serviced on completing the quarterly assessments on time per HFS regulations.
  - ٠

- 3. What measures will be put into place or what systematic changes the facility will make to ensure that the deficient practice does not recur:
  - The Director of Nursing will include completing the Quarterly assessments in the QA Plan for St. Anthony of Lansing.
- 4. How the corrections will be monitored to ensure the deficient practice will not recur, i.e., what quality assurance program will be put into place:
  - Administrator/DON/Designee will develop, monitor, and conduct routine as well as Quality Assurance monthly audits for one month to ensure compliance of the Quarterly assessment. The audits will be discussed during our monthly QI meetings for trends, patterns, and areas of concern. QI committee will determine if continued auditing is necessary once 100% compliance threshold is achieved for three consecutive months. This plan to be amended when indicated.

Completion date systemic changes will be completed: August 30, 2022

Regional Director of Health Services

93531634.2

St. Anthony of Lansing Response to Findings Referral Date: 7/29/2022

#### **Community Response**

Please accept the following as the facility's plan of correction. This plan of correction does not constitute an admission of guilt or liability by the facility and is submitted only in response to the regulatory requirement.

#### Section 146.245 Assessment and Service Plan and Quarterly Evaluation

a) Interview: The SLP provider shall conduct a standardized interview geared toward the resident's service needs at or before the time of occupancy but not before the DON, or successor tool, and other required PAS assessments are completed, and determinations provided to the SLP provider.

- 5. What corrective actions(s) will be accomplished for those residents found to have been affected by the deficient practice:
- R5-Resident a re-admit on 1-16-19. No standardized interview on record to review. Reviewer requested for one, facility unable to provide
- Admit date 6-5-19. No standardized interview on record to review. Reviewer requested for one, facility unable to provide.
- 6. How the facility will identify other residents having the potential to be affected by the same deficient practice and what corrective action will be taken:
  - All residents of the facility have the potential to be affected by the same alleged deficient practice. Clinical nurses will be in-serviced on completing the standardized interview prior to admission and for residents out of the community more than 30 days.
- 7. What measures will be put into place or what systematic changes the facility will make to ensure that the deficient practice does not recur:
  - The Director of Nursing will include completing the standardized interview in the QA Plan for St. Anthony of Lansing.
- 8. How the corrections will be monitored to ensure the deficient practice will not recur, i.e., what quality assurance program will be put into place:
  - Administrator/DON/Designee will develop, monitor, and conduct routine as well as Quality Assurance monthly audits for one month to ensure compliance of the

standardized interview. The audits will be discussed during our monthly QI meetings for trends, patterns, and areas of concern. QI committee will determine if continued auditing is necessary once 100% compliance threshold is achieved for three consecutive months. This plan to be amended when indicated.

Completion date systemic changes will be completed: August 30, 2022

Regional Director of Health Services

#### St. Anthony of Lansing Response to Findings Referral Date 7/29/2022

#### **Community Response**

<u>Regulation</u> 146.235 Staffing e) Staffing Training. All staff training materials shall be available for review by the Department. If required by the Department, the SLF shall make changes in the training materials. 1)the SLF shall provide staff and subcontractors who provide direct care with A) training that takes place no later than 30 days after beginning employment and semi-annual training in areas related to their employment. B) training that covers resident rights; infection control; crisis intervention; prevention and notification of abuse, neglect, and financial exploitation; behavioral intervention; tuberculosis identification, prevention, control, and reporting, and encouraging independence (these subjects shall be trained as part of staff orientation and at least annually thereafter).

**<u>Findings</u>**: This requirement is not met as evidence by nine employees did not have 30-day training after beginning employment. Eighteen employees did not have semi-annual training. Eight employees did not have annual training.

Response: St. Anthony of Lansing will provide training to employees no later than 30 days after beginning employment and employees have completed semi-annual training in areas related to their employment. A monthly audit to ensure compliance will be conducted by the Administrator or Assistant Administrator and monthly; thereafter, for the next three months.

Correction Date

- The first audit will be completed by August 30, 2022, to review employees have completed training no later than 30 days from date of employment and that employees have completed semi-annual training (as appropriate). This audit will continue to occur monthly for the next three months.
- An in-service on the Staff Training Policy and Procedure was completed by the Administrator, Assistant Administrator and D.O.N. on July 28, 29, 2022 and August 3rd and August 4th, 2022. This will be documented and located in the Quality Assurance binder.
- E-1 completed department specific training on 10/30/2019-1/18/2020 and 3/5/2020 an employee HCWR and registry was late completed on 10/1/19.
- E-2 is no longer employed at the community termed 6/16/22.
- E-3 2/9/20, no training on record within 30 days of employment.
- E-4 completed annual training annual was completed on 7/28/2021, HCWR and registry was completed late on 10/12/19.
- E-8 Hire date 1/8/20, no trainings completed on Behavior intervention; Crisis intervention; Infection control was completed on 9/11/20; TB; encouraging

independence; Non-discrimination policy; and Resident inquiry and APP were not completed within 30 days of employment.

- E-9 hire date 3/22/19, no trainings completed on Behavior intervention; Crisis intervention; Infection control; TB: Encouraging independence; Residents rights; Abuse and neglect; Non-discrimination policy; and Resident inquiry and APP: emergency plan; fire Extinguisher within 30 days of employment.
- E-13 Hire date: 6/26/17 Trainings on record were dated 6/26/17 and 1/29/20, no training on non-discrimination and resident inquiry for training dated 1/29/20 on record, certificates of completion for semi-annual training was completed on 7/28/17, Resident Abuse 9/20/17, residents rights 11/17/17.
- E-5, E-6, E-7, E-10, E-11, E-12, E-14, E-16, E-18, E-19, E-20, E-21 are no longer employed at the community.
- E-15 Hire Date: 8/31/13, trainings on record were dated semi-annual completed on 1/26/18, semi-annual completed 7/27/18, semi-annual 1/21/21 and 7/28/21. certificates of completion attached.
- E-17 Hire Date: 9/5/17, trainings on record were dated semi-annual 7/27/18, semiannual 1/26/18, semi-annual 1/31/19, semi-annual 7/31/19, semi-annual 1/29/20, semiannual 7/28/20 and semi-annual 7/28/21 were completed certificates of completion attached.
- E-28 Hire date: 9/10/18 no training on record for 2019 and 202. Training was completed on semi-annual 1/31/19 and 7/21/19 certificates of completion are attached.

Response to Findings Referral Date 7/29/2022

### Community Response:

St. Anthony of Lansing

#### Section 146.295 Emergency Contingency Plan

Each resident shall be oriented to the emergency plans WITHIN ten days after the resident's admission. Orientation shall include assisting residents in identifying and using emergency exits. Documentation of the orientation shall be signed and dated by the resident or the resident's representative.

#### Community Response:

- The Regional Director of Environmental Services or the Regional Director of Operations will in-service the Administrator and all staff and residents on the community Emergency Contingency Plan 146.295 to ensure compliance.
- Administrator will conduct routine as well as Quality Assurance monthly to ensure compliance to notify HFS when loss of electrical power or other utilities for more than an hour occurs in the community.
- The Administrator shall monitor the above to assure compliance of regulation by 8/30/2022.

#### Findings:

#### The following actions were taken :

- R4-admitted 1/4/21 no longer resides at the community.
- R5: admitted 1/16/19 Maintenance Director and Regional Director of Healthcare completed in-service training on the emergency contingency plan with R5on 8/8/2022.

Completion date systemic changes will be completed: August 30, 2022

D	CORRECTION DATE	09/16/2023 for all findings	
	SLF RESPONSE	An In-service will be completed with the BOM and ED on the proper steps to completing Health Care worker Background checks by the Regional Director of Operations. The ED or Designee will audit all employee files to make sure all background checks have been completed on all current staff in the building. We will then complete a monthly QA to make sure that all Health Care worker background checks have been completed and in the correct time frames on all new hire employees. To be completed by the ED or receptionist.	
key with this form.	COMPLAINT/FINDING DESCRIPTION (Must include rule cite)	<ul> <li>146.235 Staffing</li> <li>146.235 Staffing</li> <li>(1) The SLP provider shall ensure that all employees who have or may have contact with residents or have access to the living quarters or the financial, medical or personal records of residents undergo a criminal history background check that conforms to the Health Care Worker Background Check Act [225 ILCS 46]. No SLP provider shall knowingly hire, employ or retain any individual in a position, with duties involving contact with residents, access to resident living quarters or access to the financial, medical or personal records of residents, who has been convicted of committing or attempting to commit one or more of the offenses defined under the Health Care Worker Background Check Act unles that individual has obtained a waiver issued by the Department of Public Health. An SLP provider may conditionally employ an applicant for up to three months pending the results of the criminal history record check.</li> <li>This requirement was not met as evidenced by: HCWR checks completed late for El, E5, E6, E9</li> </ul>	

1162

	<ul> <li>(m) Our Regional Director of Nursing will complete an in-service with all nursing staff on the proper steps to completing TB testing.</li> </ul>	The Director of Nursing will audit all employee files to see if TB testing has been completed correctly. And if not she will complete the testing again.	The ED or Designec will then complete monthly QA checks to ensure that any new firtes coming into the building have been completed correctly and on time.	<ul> <li>IJy. (n) The Regional Director of Nursing will complete an in-service with all CNA staff about completing the daily welfare checks.</li> </ul>	The DON or Designee will do an audit on all Daily check sheets. If not completed, they will speak with the CNA that worked to get it completed.	Ce The Executive Director or Designee will check the sheets every morning to ensure they have been completed. If they have not been completed disciplinary action with begin.	<ol> <li>(d) The Regional Director of Nursing will complete an in-service with the DON and LPN's on giving TB testing to the residents.</li> </ol>	All resident charts will be audited to make sure they are in compliance with TB regulations.	The ED and Designce will do monthly QA checks to ensure the compliance of TB testing for any new residents that move into the building.
146.235 Staffing	(m) Each employee and volunteer shall have a tuberculin skin test in accordance with the Control of Tuberculosis Code (77 III. Adm. Code 696).	This requirement was not met as evidenced by: TB late/2 nd step not given or late/read and given same day-E1, E2, E3, E4, E5, E6, E7.	Section 146.230 Services	(n) Daily Check The SLF shall implement a system to check on the welfare of each resident daily. This requirement was not met as evidenced by:	missing well-being checks for R20, R26, R28 Section 146.220 Resident Participation Requirements	(d) Each prospective resident shall have a tuberculin skin test in accordance with the Control of Tuberculosis Code (77 III. Adm. Code 696). This requirement was not met as evidenced by:	TB late/2 nd step not given or late/read and given same day/no s/s checklist for R3, R6, R7, R8, R16, R19, R20, R21, R23, R25, R26, R27, R28, R29		

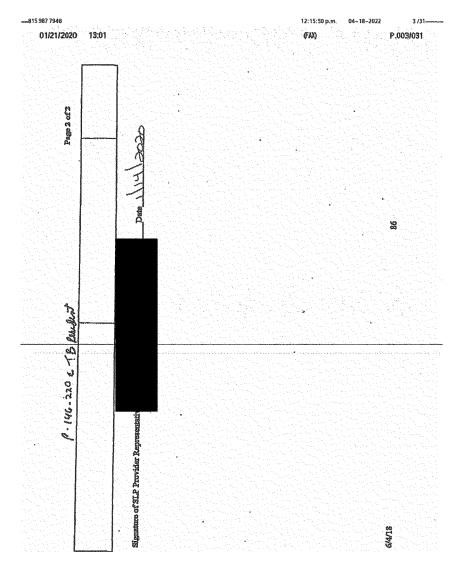

<ul> <li>(a)The Regional Director of Nursing will complete an in-service with nursing staff and the Executive Director about completing the assessment.</li> <li>The nursing staff will check all resident charts to make sure that they have all had the assessment completed.</li> <li>The ED or Designee will do a QA check that the assessment is completed before move in on all new residents.</li> </ul>	(b) The Regional Director of Nursing will complete an in-service with the nursing staff on the guidelines for completing the initial assessment and service plan with-in 24 hours of move in. All resident charts will be checked to make sure they all have the 24 hour assessments and the service plans completed. This will be done by the		(c) Our Regional Director of Nursing will complete an in-service with nursing staff on doing the RAI within 14 days of admission.	All resident charts will be checked to make sure an RAI has been completed by nursing staff.	The ED or Designee will check twice a month to see if we had any new move ins and to make sure the RAI has been completed.
Section 146.245 Assessment and Service Plan and Quarterly Evaluation (a) Interview: The SLP provider shall conduct a standardized interview geared toward the resident's service needs at or before the time of occupancy but not before the DON, or successor tool, and other required PAS assessments are completed and determinations provided to the SLP provider. This requirement was not met as evidenced by: Standardized assess not completed-R6, R16, R19, R22, R24, R25	(b) Initial Assessment: The SLP provider shall complete an initial assessment and service plan within 24 hours after admission that identifies needs and potential immediate problems. Each assessment shall be completed by, or co-signed by, a licensed practical nurse or a registered professional nurse. This requirement was not met as evidenced by: 24hour assessment and service plan not completed for R6, R19, R23	(c) Comprehensive Resident Assessment: The SLP provider shall complete a Comprehensive Resident Assessment Instrument (RAI) within 14 days after admission, annually and upon a significant change in the resident's mental	or puysical status. Each KAA shall be completed by, or co-signed by, a registered professional nurse. This requirement was not met as evidenced by:	R41 late/incomplete/missing signature for R2, R4, R5, R6, R10, R11, R12, R13, R16, R17, R18, R19, R20, R25, R26, R28, R29	

<ul> <li>(d) An in-service will be completed by our Regional Director of Nursing to any nurse araff on this process.</li> <li>An audit will be completed to be sure that all residents have their Service plan completed by Nurse staff or Designee.</li> <li>A monthly QA will be done to ensure that we are staying in compliance with the Service plans by the ED or Designee.</li> </ul>		<ul> <li>Cour Regional Director of Nursing will in- service the DON on how to properly complete the Quarterly evaluations.</li> </ul>	The Nursing staff will audit all resident files to make sure a quarterly evaluation was completed and if there was not one we will complete one.	The ED or Designee will do quarterly monitoring so make sure that all evaluations are being completed.	
(d) Service Plan: Within seven days after completion of the RAI, a written service plan shall be developed by, or co-signed by, a registered professional nurse, with input from the resident and his or her designated representative. This includes coordination and inclusion of services being delivered to a resident by an outside entity. The service plan shall include a description of expected outcomes, approaches, frequency and duration of services provided and whether the services will be provided by licensed or unlicensed and whether the service plan must be individualized to address the health and behavior needs of each resident. The service plan shall be reviewed and updated in conjunction with the quarterly evaluation or as dictated by changes in resident needs or with the quarterly evaluation or as dictated by changes in resident to a proferences.	This requirement was not met as evidenced by: ISP late/missing signature/date- R2, R5, R9, R10, R14, R15, R16, R18, R20, R24, R25	(e) Quarterly Evaluation: A quarterly evaluation of the heatth and behavior status of each resident using a Department designated form shall be completed by, or co-signed by, a registered professional nurse. This requirement was not met as evidenced by: Ouarterlies late/missing- R2. R7. R8. R17. R18. R20. R22. R23	146.295 Emergency Contingency Plan (e) Each resident shall be oriented to the emergency plans within fen dave	(v) can be represented on the restrict of the residents of the residents in identifying and using emergency exits. Documentation of the orientation shall be signed and dated by the resident or the resident's representative. This requirement use not meries as evidenced hy.	No documentation of orientation to emergency plans for R3, R4, R5, R8, R24

P.025/031

Policy and Procedure: Policy Number: Issue Date: QUARTERLY ASSESSMENT OF RESIDENTS WN 207 CURRENT 03/17

PURPOSE

Quarterly assessments will detect any changes in the condition of a resident that may require medical attention or changes in the Resident Service Plan.

POLICY

Nurses will conduct a thorough assessment of each resident each quarter or upon change of condition.

PROCEDURE

1. Obtain the resident's record for reference for previous assessments, physician orders, notes, etc.

 Review all information included in the resident's record since the prior assessment (new orders, progress notes, labs, medication and treatment records, etc.). Make a notation of any special assessments or questions that need to be explored during the visit with the resident.

3. Meet with the resident and explain the assessment process. Ask the resident about any specific concerns and make notations as appropriate.

4. Review monthly vital signs and weight for the quarter. Compare vital signs and weight to previous records for any significant changes and make notations as appropriate.

5. Complete the items on the quarterly assessment form make notations of any changes in condition.

6. Review the assessment form with the resident and with the family if appropriate. Provide an opportunity for the resident to ask questions and voice concerns.

7. Provide health teaching, suggestions, and/or recommendations as appropriate.

8. Share the assessment information with the team and coordinate any modifications to the Resident Service Plan.

9. Notify physician of any pertinent information.

10. Review the Quarterly Assessment form to make sure all documentation is complete.

11. Record any other additional pertinent information in the Resident Record.

26/31

12:22:53 p.m. 04-18-2022

# 01/21/2020 13:05 (FAN) P.026/031 Policies and Procedures Pathway Management Policy and Procedure: MEDICATION MANAGEMENT Policy Number: WN 501 A (IL) Issue Date: CURRENT 01/17 PURPOSE To ensure that the right resident receives the right medication, in the right dosage, at the right time, via the right route, with the right documentation. POLICY Medications will be managed to ensure proper administration. PROCEDURE To ensure that he right her the mode is a proper administration.

- The pharmacy distributes the medication in a multi dose packet that is labeled with the resident's name, date and time the medication should be taken. The label also has the name and dose of each medication in the packet.
- A nurse will be responsible to check the delivered medication against the Physicians Order Sheet. The nurse will then deliver the medication to the resident's apartment looking in the secured storage area or will store the medications in the wellness center medication secured storage areas.

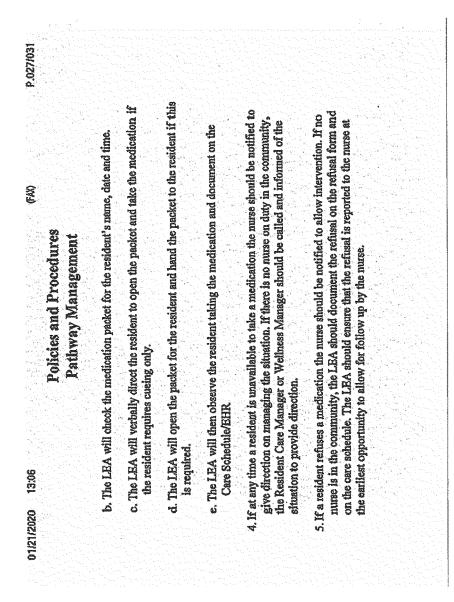

#### Assessment

All residents must have a Self-Medication Assessment completed by the nurse upon admission to ensure that the proper service level is provided to allow safe medication management. The determined service level will be documented on the Resident Service plan and reviewed quarterly and as needed with a change in status.

#### Three levels of medication assistance

- 1. Independent, this means that the resident has been assessed and the conclusion is that the resident may self-administer his or her own medication.
- 2. Reminders with observation. This means that a LEA will go to the resident's apartment and remind them it is time to take their medication.
  - a. The Life Enrichment Aid (LEA) will unlock the medication drawer.
  - b. The LEA will check the medication packet for the resident name, date and time.
  - c. The LEA will then observe the resident taking the medication and document on the Care Schedule/EHR.
- 3. Medication assistance. This means that the LEA will provide assistance to the resident by verbally cueing or by physically assisting the resident to open the package.

a. The LEA will unlock the medication drawer.

# Policies and Procedures Pathway Management

(FAX)

P.028/031

Policy and Procedure: Policy Number: Issue Date:

#### MEDICATION ADMINISTRATION WN 502 A (IL) CURRENT 03/17

#### PURPOSE

To maintain the well being of residents by ensuring proper medication administration.

#### POLICY

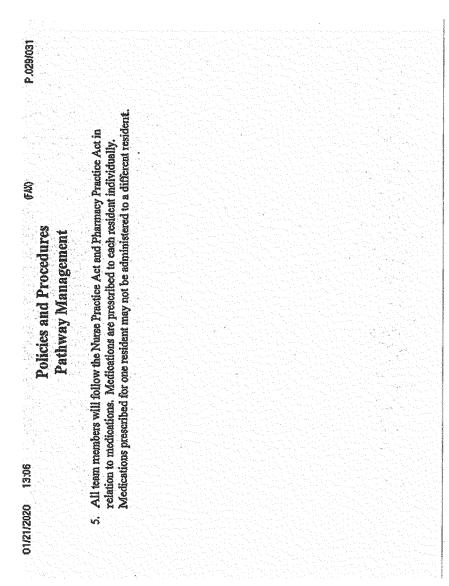

The right resident will receive the right medication, in the right dosage, at the right time, via the right route with the right documentation.

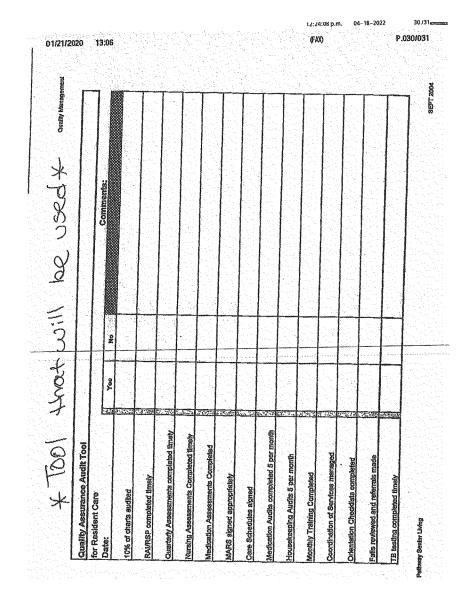

#### PROCEDURE

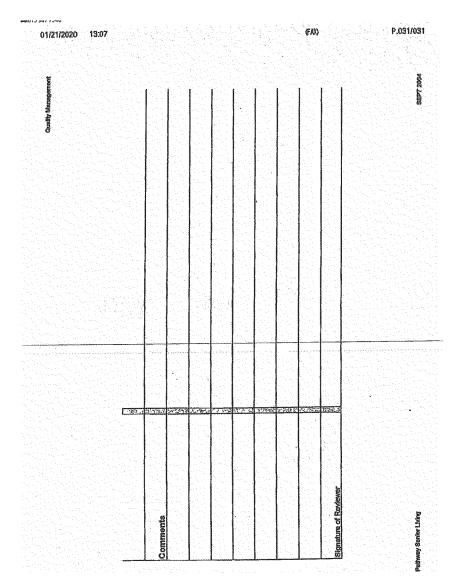

- The pharmacy distributes the medication in a multi-dose packet that is labeled with the resident's name, date and time the medication should be taken. The label also has the name and dose of each medication in the packet.
- A nurse will be responsible to check the delivered medication against the Physicians Order Sheet and administer the medication to the resident as prescribed.
- 3. The medication will be looked in a secured storage area in the wellness center. Residents will be required to come to the wellness center to receive medications. However when a resident is unable to come to this desired location the nurse must go to the apartment and essess the resident's status. The LEA may escort the resident as needed.

## Medication Administration:

- Only Licensed nurses will provide medication administration. Any time a judgment must be made regarding the medication such as what day, time, or dose a licensed nurse will be responsible for the decision. Any time a change must be made in the medication only a licensed nurse will make the change.
- Medications such as eye drops, car drops, patches, inhalers, nebulizer treatments, accuchecks, or insulin must be administered by a nurse, for residents who are not deemed outpable of self-administration.
- When the level of medication management service requires, the removal of medication from container and assisting resident in consuming or applying medication may be performed. (This must be done by a licensed nurse)
- 4. Nurses will assist the residents with blood glucose monitoring when they are unable to perform the task without hands-on assistance. When the resident can perform the task, they must do so in the presence of a nurse if the results will require insulin management by the nurse.

#### RESPONSE TO ON-SITE REVIEW FINDINGS Page 2 of 13

#### For non-compliance found during an interim review or interim/final completed simultaneously-

The Response to On-Site Review Findings form must be provided to the SLP provider within ten working days after the conclusion of the on-site review. The SLP provider must complete and return the Response to On-site Review Findings form to the BLTC regional supervisor within 14 calendar days from the date it was received from the review team. The SLP provider's response must include dates of correction for each funding.

#### For non-compliance involving immediate jeopardy-

The Response to On-Site Review Findings form must be provided to the SLP provider within five working days after the conclusion of the on-site review. The SLP provider should complete and return the form to the BLTC regional supervisor within five calendar days from the date it was received from the review team to correct the non-compliance. No extension of the ten-day period will be granted. BLTC staff must conduct a follow-up review within ten working days after the conclusion of the ten-day immediate jeopardy correction period. If the follow-up continues to show immediate jeopardy, the regional supervisor should notify the area manager and BLTC central office. BLTC entral office will take action to suspend or terminate provider agreement.

#### For non-compliance involving non-immediate jeopardy-

The Response to On-Site Review Findings form must be provided to the SLP provider within ten working days after the conclusion of the on-site review. The SLP provider should complete and return the form to the BLTC regional supervisor within 14 calendar days from the date it was received from the review team. Initially, no correction date is to be later than 30 days from the date that the findings were presented to the SLP unless there is justification documented by the SLP provider. Within those 30 days, the SLP provider is responsible for notifying the regional supervisor the status of the corrections or that the corrections have been completed. The regional supervisor or designated staff will make a follow-up visit to the SLP provider within 10 working days of the notification or take other appropriate steps to determine if all corrective action has been taken. If the first 30-day follow-up review continues to show non-compliance, the SLP provider is granted a second 30-day period to correct the non-compliance issues. If the second follow-up continues to show non-compliance, the regional supervisor should notify the area manager and BLTC central office. BLTC central office will take action to apply one or more of the sanctions allowed depending on the severity of the non-compliance.

White Oaks at Spring Street 1300 W. Spring Street South Elgin, IL. 60177 Phone: 847-717-3187 Fax: 847-717-3248

## Date: 7/7/2023

Division of Assisted Living Illinois Department of Public Health 525-535 West Jefferson Street Springfield, IL. 62761-0001

Please accept this correspondence as the Licensee's Statement of Correction in response to Statement of Finding/Violation- Type 3 Violation (Section 295.4060) for annual survey completed on June 26, 2023.

## Type 3 Violation

## Section 295.4060 Alzheimer's and Dementia Programs

- a) In addition to this Section, Alzheimer and dementia programs shall comply with all of the other provisions of the Act. (Section 150(a) of the Act)
  - Require the manager and direct care staff to complete sufficient comprehensive and ongoing dementia and cognitive deficit training as set forth in subsection (i) of this Section;
  - 11) Have a supervisor of the program with training as outlined in subsection (i)(1) of this Section.
- i) Training requirements for individuals working in a special program:
  - 1) Manager qualifications and training:

93531641.2

- A) The manager of an establishment providing Alzheimer care or the supervisor of an Alzheimer program must be 21 years of age and have:
  - a college degree with documented course work in dementia care, plus one year of experience working with persons with dementia; or
  - ii) at least two years of management experience with persons with dementia.
- B) The manager or supervisor must complete, in addition to the training required in subsection (i)(2) of this Section and in Section 295.3020, six hours of annual continuing education regarding dementia care.

#### What is the specific corrective action the establishment is taking?

E2 will maintain required dementia specific training and working towards obtaining Certified Dementia Practitioner certification. E1 will hold title of Executive Director and Memory Care Director. E1 will oversee day to day operations and E2 will directly report to E1. An in-service was conducted by Regional Director of Operations on manager qualifications and training requirements.

#### What are the steps that will be taken to avoid future reoccurrences?

- Regional Director of Operations to provide in-service related to IDPH regulations on manager's qualifications and training requirements.
- E1 will now hold title of Executive Director and Memory Care Director until E2 meets the qualifications as a Memory Care Director per IDPH regulations.
- E2 to continue comprehensive and ongoing dementia and cognitive deficit training including working towards obtaining Certified Dementia Practitioner certification.
- Ongoing monitoring and report through quality assurance meeting.

# Specific date when the corrective action has been/will be completed. July 28, 2023.

Sincerely,

٠

93531641.2
