## **NEW POPULATION FACTS ON OLDER AMERICANS, 1960**

---

The basic population data and information reported in the following pages provide part of the background to the growing recognition of the American aged population as a new and quite different phenomenon in our history.

Among the facts and trends presented are the following highlights:

### **SUMMARY OF POPULATION FACTS ON THE AGED**

1. In 1900, 1 person out of 20 was 65 years and older; today 1 out of every 11 is 65 years and older.
2. In 10 years, 1950-60, the aged population increased nearly 35 percent. The general population increased only 19 percent.
3. In contrast to the 65-plus population, the population aged 45-64 has only grown at about the same rate as the total population, 17.4 percent, between 1950-60.
4. In 1920, 1.8 percent of the aged were 85 years and older. In 1960, 5.6 percent of the aged were 85 years and older. Today the number of persons 85 years and older is 920 percent greater than it was in 1920.
5. In 1920, 8.1 percent of the voting age population was 65 years and older. In 1960, 15.4 percent of the voting age population was 65 years and older.
6. Nationally, there are 121 aged women for every 100 aged men. On farms, however, there are only 84 aged women for every 100 aged men.
7. Nearly one-half of the aged are widowed, single, or divorced. Seven out of every ten aged men are married, while only one out of every three aged women are married.
8. Between 1930 and 1940, an average of 758,000 persons were reaching the aged status annually. Between 1950 and 1959, an average of 1,198,000 persons a year reached their 65th birthday.
9. The net increase each year in the past decade has been more than 426,000 on the average, that is, each year the population 65 and older increased by this amount. The average annual net increase for the 75 and older population alone has been more than 170,000 during the past decade.
10. The aged population is expected to more than double in the 40 years between 1960 and 2000.
11. One-fourth of the aged live in rural nonfarm areas. Only 8 percent of the aged live on farms.
12. One-fifth of the aged are in the labor force. In 1920, one-third of the aged were in the labor force.

## A. NATIONAL TRENDS\*

In the 10 years since 1950, the aged population of the United States (persons aged 65 and over) increased by nearly 35 percent, to 16,559,580. This rate of growth was exceeded only in the case of children aged 5 to 14. In contrast, the total population increased by only 18.5 percent. In 1950, the aged constituted 8.1 percent of the total U.S. population but by 1960 they made up 9.2 percent of the total. The growth in this segment of our population is dramatized by the fact that in 1920 the aged as a proportion of the total U.S. population was only 4.7 percent. Thus, while only 1 out of every 20 Americans was 65 or older in 1920, the ratio has increased to 1 in every 11 in 1960.

The gradual but definite increase in average life expectancy taking place over the past several decades is reflected in the detailed composition of the aged population, as indicated in table I. The 65-plus population is not one homogeneous aggregate of persons of the same age. Within this 65-and-over population, furthermore, the very oldest group, those aged 85 and over, has increased in number since 1950 by more than 60 percent, and now number (as of 1960) more than 929,000.

TABLE I.—*Population 65 and older, 1950 and 1960*

	1950	1960	Per. ent increase, 1950 to 1960
Total aged population.....	12,294,698	16,559,580	34.7
65 to 69 years.....	5,013,490	6,257,910	24.8
70 to 74 years.....	3,419,20 <sup>a</sup>	4,738,932	38.6
75 to 79 years.....			
80 to 84 years.....	3,284,061	3,053,559	41.1
85 years and over.....	577,939	1,579,927	60.8
		929,252	

Table II below indicates the dramatic increase in the number of aged persons since 1920. The 236-percent increase in the number of persons 65 years and older and the 279-percent increase of those 75 years and older in the 40 years between 1920 and 1960 is extraordinary. The 920-percent increase in those 85 years and older is phenomenal.

TABLE II.—*Number and increase of persons 65, 75, and 85 years of age, 1920–60*

	Number		Increase, 1960 over 1920	
	1920	1960	Number	Percent
65 and older.....	4,929,000	16,559,580	11,630,580	236
75 and older.....	1,469,704	5,562,733	4,093,029	279
85 and older.....	91,085	929,252	838,167	920

\*See Statistical Supplement, section H, prepared by HEW Special Staff on Aging, for details of National and State data.

In 1920, 30 percent of the aged were 75 years and older; in 1960, 34 percent were 75 years and older. Those 85 years and older in 1920 constituted 1.8 percent of the aged population; in 1960, 5.6 percent were 85 years or older.

Life expectancy for persons born in 1920 was 54.1 years. Those born in 1959 (the latest year for which estimates are available) may expect to live 69.7 years, on the average.

#### GROSS INCREASE

In each year of the decade of the 1950's, over 1 million persons reached the age of 65.

TABLE III.—*Persons reaching aged status annually, 1950–59*

[In thousands]

	65 years	Male, 65 years	Female, 62 years		65 years	Male, 65 years	Female, 62 years
<b>YEAR I</b>							
1950 to 1951.....	1,120	554	630	1958 to 1959.....	1,284	609	753
1951 to 1952.....	1,135	562	646	ANNUAL AVERAGE.....			
1952 to 1953.....	1,151	569	662	1930 to 1940.....	758	386	429
1953 to 1954.....	1,172	575	678	1940 to 1950.....	985	490	550
1954 to 1955.....	1,196	582	694	1950 to 1959.....	1,198	582	692
1955 to 1956.....	1,219	590	708				
1956 to 1957.....	1,242	597	722				
1957 to 1958.....	1,263	603	736				

<sup>1</sup> Year is from July 1 to June 30. Data for 1960 are not yet available.

This stands in sharp contrast to the average annual number of persons reaching the age of 65 during the 1930–40 decade, 758,000.

#### NET ANNUAL INCREASE

More important than gross numbers of persons reaching the age of 65 each year, however, is the net increase each year in the total numbers of persons aged 65 and over. In the decade 1950–60, there was each year, on the average, 426,488 additional persons aged 65 and over, as compared with the previous year. And more than three-fifths of this annual net growth of the aged population were women.

*Average annual increase in aged population, 1950–60*

	Number	Percent
Total.....	426,488	100.0
Male.....	169,040	39.7
Female.....	157,448	60.3

The summary table in section H, consisting of detailed statistical data prepared by the Special Staff on Aging of the Department of Health, Education, and Welfare, provides more specific aspects of the net increases in our aged population.

## 4 POPULATION FACTS ON AGED IN UNITED STATES, 1960

## FUTURE TRENDS

Population projections made by the Department of Health, Education, and Welfare indicate that in the 40 years between 1960 and 2000 the aged population will more than double in number, bringing the total to over 30 million people. This would be an increase of more than 25 million aged persons since 1920. From the first census in 1790 when the total population was about 4 million, it was just about 70 years (in 1860) before the total U.S. population numbered over 30 million people. This projection to the year 2000 of 30 million persons aged 65 or more, it should be emphasized, does not take into account any of the effects of modern medical research in the chronic diseases characterizing an aging population, such as cancer and atherosclerosis.<sup>1</sup>

## WOMEN OUTLIVE MEN

The fact that women are outliving men is reconfirmed by the 1960 census. There are nearly 1.6 million more women than men aged 65 and over. Stated another way, of all persons 65 and over, 55 percent are women. More strikingly, women make up 61 percent of the 85-year-and-older population.

TABLE IV.—*Percent increase in population 65 and over by sex, 1950-60*

Age	Percent increase, 1950 to 1960		
	Total	Men	Women
65 and over.....	34.7	29.1	39.7
65 to 69 years.....	24.8	20.6	28.8
70 to 74 years.....	38.6	33.8	43.0
75 to 84 years.....	41.1	34.0	47.1
85 and over.....	60.8	52.6	66.5

The actual population figures for each of the older age groups are reported in table V. The ratio of women to men is 121 women for every 100 men in the 65-year-and-older group. The ratio increases with each 5-year age group, from 114 women for every 100 men in the 65-to-69-year age group to 157 women per 100 men in the 85-year-and-older group. Women as a percent of the total aged population increases from 53.2 percent up to 61 percent for the 85-year-and-older group.

<sup>1</sup> A report from Wayne State University ("Inside Wayne," Apr. 26, 1961) notes a breakthrough in the use of artificial plastic arteries to prevent crippling caused by diseases of the blood vessels. There has been dramatic progress in the last 7 years in replacing arteries, which had become plugged as their lining thickened from atherosclerosis, the cause of most heart disease and strokes. Dr. Herbert S. Robb, of the Wayne College of Medicine, has said: "If we could cure atherosclerosis, the ordinary lifespan, except for cancer, might be 120 to 130 years."

## POPULATION FACTS ON AGED IN UNITED STATES, 1960 5

TABLE V.—*Number of men and women age 65 and over, by 5-year-age groups, women as a percent of total aged population, and number of aged women for every 100 aged men, 1960*

(In thousands)

Age	Total	Men	Women <sup>1</sup>	Women as a percent of total	Number of aged women for every 100 aged men
65 and over.....	16,559.6	7,503.1	9,056.5	54.7	121
65 to 69.....	6,257.9	2,931.1	3,326.8	53.2	114
70 to 74.....	4,738.9	2,185.2	2,553.7	53.9	117
75 to 79.....	3,053.6	1,359.4	1,694.1	55.5	125
80 to 84.....	1,579.9	665.1	914.8	57.9	138
85 and over.....	929.3	362.3	567.0	61.0	157

<sup>1</sup> Details do not add to total because of rounding.

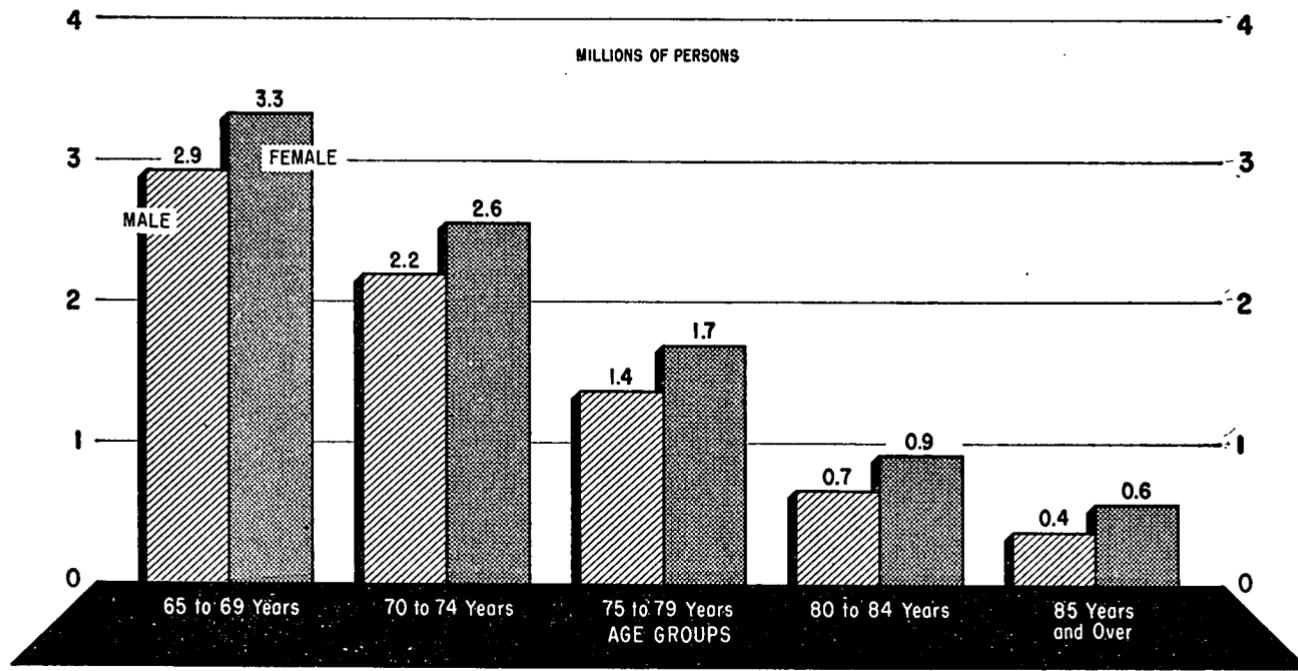

We have deliberately reversed the usual form of presenting sex ratios, in order to stress the excess of women over men in the aged population. The usual form of numbers of men per 100 women is as follows:

*Number of aged men per 100 aged women, 1960*

Total, 65 and over.....	83	75 to 79.....	79	80 to 84.....	84	85 and over.....	80
65 to 69.....	88	80 to 84.....	84	85 and over.....	85	85 and over.....	73
70 to 74.....	86	85 and over.....	85	85 and over.....	85	85 and over.....	64

Source: Special Staff on Aging, Department of Health, Education, and Welfare. (See sec. H for details. Ratios rounded off to nearest whole number.)

## U.S. POPULATION, 65 YEARS AND OVER, By Sex: 1960

SOURCE: 1960 Census of Population

## B. MARITAL STATUS OF THE AGED, 1950-60

The ramifications of the larger proportion of women in the aged population are far greater than statistics alone might suggest. For example, the marital status of the aged becomes significant in terms of both social and economic consequences.

*Aged men.*—In 1950, approximately two-thirds of all men aged 65 and over were married. Slightly less than one-fourth were widowed. Ten years later, more than seven-tenths were married, and slightly less than one-fifth (19 percent) were widowed.

The Census Bureau now provides more detailed information than previously available, and the data indicate that among men aged 65 to 74, nearly 8 out of every 10 were married, and less than 1 out of 8 were widowers. On the other hand, for men 75 and older, less than 6 out of 10 were married, and nearly a third were widowers.

TABLE VI.—*Marital status of aged men, 1950 and 1960, by percent*

	1950, 65 and over	1960		
		65 and over	65 to 74	75 and over
Total	100.0	100.0	100.0	100.0
Married	65.8	72.5	78.9	59.1
Widowed	23.9	18.8	12.7	31.6
Divorced	2.2	1.6	1.7	1.5
Single	8.1	7.1	6.7	7.8
Numbers	5,755	7,503	5,116	2,387
	thousands			

Source: Bureau of Census.

*Aged women.*—In 1950, slightly more than one-third of aged women were married. More than one-half were widowed. By the end of 10 years, in 1960, the proportion married remained relatively unchanged, 37 percent; and there was a slight decrease in the proportion who were widows, to 53 percent. Among aged women in the 65-to-74 age group, about 46 percent were married, and 44 percent were widows. Among those 75 and older, only about one-fifth were married, and nearly 7 out of every 10 were widows.

TABLE VII.—*Marital status of aged women, 1950 and 1960, by percent*

	1950, 65 and over	1960		
		65 and over	65 to 74	75 and over
Total	100.0	100.0	100.0	100.0
Married	36.0	37.1	45.6	21.8
Widowed	55.3	52.9	44.4	68.3
Divorced	.7	1.5	1.7	1.2
Single	8.0	8.5	8.4	8.6
Numbers	6,408	9,056	5,880	3,176
	thousands			

Source: Bureau of Census.

*Greater number of unmarried aged women.*—The United States is witnessing a decreasing number of all aged men per 100 aged women—starting with 101 men per 100 women in 1920 and declining to 83 per 100 in 1960. At the same time, the numbers of widowed, divorced, and single women over the age of 65 have increased sharply in the past 10 years, from 4.1 million in 1950 to nearly 5.7 million in 1960. This is an increase of nearly 40 percent.

On the other hand, the number of widowed, divorced, and single aged men has grown from 1.96 million to only 2.06 million in the same period of time. This is hardly any increase at all, in sharp contrast to the 40-percent increase in the number of aged women who are widowed, divorced, or single. Furthermore, the difference in absolute numbers is significant.

The crucial point is that nearly one-half of all the aged in this country, about 8 million persons, are widowed, single, or divorced. This fact has important implications for problems of public policy, family responsibility, and income maintenance, etc., especially in the case of aged women, most of whom have not been wage earners in their productive years, and therefore, as a case in point, with less favorable protection under our system of social security and private pension benefits.

TABLE VIII.—*Marital status of aged by sex, 1960, by percent*

	65 to 74 years		75 years and older

<i>Marital status</i>	<i>Percent</i>
Total.....	100.0
Married.....	53.1
Male.....	32.7
Female.....	20.4
Widowed, divorced, or single.....	46.9
Male.....	12.4
Female.....	34.5

Source: Census Bureau, Current Population Reports, Population Characteristics," March 1960, Series P-20, No. 105.

As table IX indicates, widowed, divorced, or single women constitute the largest group of aged in the United States: nearly 35 percent of all the aged are in this category. Only one-fifth of all the aged are married women. One-third of the aged are married men, and the remainder, about one-eighth, are widowed, divorced, or single men.

*Household characteristics of the aged*

From the preceding sections on the proportion of men and women in the aged population and their marital status, it is obvious that household and family characteristics of the older population should significantly reflect the basic statistics.

In March 1960, there were 4.8 million husband-wife families with the head of the family aged 65 or older. The average family size for this group was 2.47 persons, as compared to 3.77 for all husband-wife families.

TABLE X.—*Average family size by age of husband for the United States: March 1960*

	Average family size	Number
Total, all types of families.....	3.68	45,062,000
Husband-wife families.....	3.77	39,335,000
Husband under 45 years old.....	4.30	20,354,000
Husband 45 to 64 years old.....	3.43	14,163,000
Husband 65 years and older.....	2.47	4,818,000

Source: Bureau of Census, Series P-20, No. 106.

Nearly three-fourths of the aged are living in "primary" families—that is, families that include among their members the head of a household. Slightly more than one-fifth are unrelated individuals, numbering about 3.6 million individuals. Nearly 40 percent of these aged unrelated persons are 75 years old and over. Seventy percent are women. "Unrelated individuals," by Bureau of the Census definition, are persons (other than inmates of institutions) who are not living with any relatives.

The remaining proportion, of 4 to 5 percent, are mostly in institutions such as homes for the aged, mental hospitals, and other group quarters, as well as secondary families (families not including among the members the head of a household, such as lodgers) and subfamilies (married couples living in a household and related to, but not including the head of the household).

TABLE XI.—*Family status of aged population, males and females, March 1960*

## C. THE AGED POPULATION: AN INCREASING PERCENTAGE OF THE TOTAL ADULT POPULATION

The aged as a percent of the population 21 years and older is now 15.4 percent, as compared to 12.6 percent 10 years ago. These figures indicate the greater actual or potential weight the aged have in the total voting population. The figures do not exactly represent the voting age population since they include aliens and others not eligible to vote, and exclude younger persons permitted to vote in Alaska, Georgia, Hawaii, and Kentucky.

The aged have special problems and special demands flowing from their social, economic, and physical conditions. The chances of effective action on these special problems may well be affected by the extent and nature of their representation in the total electorate.

TABLE XII.—*Aged as a portion of the population 21 years and older*  
[In thousands]

Year	Number of persons 65 years and older	Number of persons 21 years and older	Aged as a percent of population 21 years and older
1920	4,933	60,887	8.1
1930	6,634	72,944	9.1
1940	9,019	83,997	10.7
1950	12,295	97,403	12.6
1960	16,560	107,377	15.4

The aged population since 1920 has increased 236 percent while the total adult population has increased by only 76 percent in the same period of time.

More than two-fifths of the increase between 1950 to 1960 in the total adult population is attributable to the increase in the aged population alone. This decade witnessed a growth of slightly less than 10 million adult persons, with nearly 4.3 million of them in the 65-and-older age group.

TABLE XIII.—*Percent of total adult population growth attributable to aged population and percent increase in aged and adult population, 1920-60*

	Decennial increase in aged population as percent of total adult population decennial increase	Percent increase in aged population	Percent increase in total adult population
1920 to 1930-----	14	35	20
1930 to 1940-----	22	36	15
1940 to 1950-----	24	36	16
1950 to 1960-----	43	35	10
1920 to 1960-----	25	236	76

(Percentages rounded off.)

## D. THE AGED IN THE STATES\*

The national data provide a composite picture of diverse trends in the individual regions, States, and localities. Every State experienced in the last 10 years an increase in the population 65 years and over (see table XIV) but this increase ranged from only 10.6 percent in Vermont to 132.9 percent in Florida. On the other hand, in some States, the aged as a percent of the total population decreased between 1950 and 1960.

**TABLE XIV.—Population 65 years old and over, by States, 1960 and 1950**

State	1960	1950	Increase	
			Number	Percent
United States.....	16,559,580	12,294,698	4,264,882	34.7

\*Section G provides more details and comparisons.

## 12 POPULATION FACTS ON AGED IN UNITED STATES, 1960

## AGED POPULATION INCREASE BY STATES

Eighteen States registered increases between 1950-60 greater than the national increase in aged population of 34.7 percent. Four States had increases in their aged so small that they were lower than the overall U.S. population increase of 18 percent.

TABLE XV.—*States with above average increase of aged population, 1950-60*

	Percent
1950-60 increase in U.S. aged population-----	34.7
Florida-----	132.9
Arizona-----	103.9
Nevada-----	65.4
New Mexico-----	55.1
California-----	53.8
Texas-----	45.2
Hawaii-----	42.8
Wyoming-----	42.6
New Jersey-----	42.2
Utah-----	41.3
North Carolina-----	38.6
Maryland-----	38.5
Michigan-----	38.2
Oregon-----	38.1
Connecticut-----	37.2
Colorado-----	36.8
Louisiana-----	36.6
Delaware-----	35.8

TABLE XVI.—*States with aged population increases below total population increase, 1950-60*

	Percent
1950-60 increase in U.S. population, all ages-----	18.1
Increase in State's aged population:	
Vermont-----	10.6
Alaska-----	13.6
Maine-----	13.9
New Hampshire-----	17.2

Such percentage changes, however, can conceal changes in absolute numbers of persons aged 65 and over. For example, California has had an increase of more than 480,000 aged persons since 1950, and now has a total of more than 1,376,000. New York witnessed an increase of nearly 430,000, and now has the largest population of aged persons, 1,687,590, as of 1960.

States with more than a half million aged persons in 1960 are as follows:

TABLE XVII.—*States with 500,000 or more aged persons, 1960*

State	1960 aged population	1950 aged population
New York.....	1,687,500	1,258,457
California.....	1,376,204	895,005
Pennsylvania.....	1,128,525	886,825
Illinois.....	974,923	754,301
Ohio.....	897,124	708,975
Texas.....	745,391	513,420
Michigan.....	638,184	461,650
Massachusetts.....	571,609	468,436
New Jersey.....	560,414	393,989
Florida.....	553,129	237,474
Missouri.....	503,411	407,388
Total.....	9,636,504	6,985,920
Total, United States.....	16,559,580	12,294,698

These 11 States with such concentrated numbers of senior Americans contain nearly three-fifths of the Nation's total aged population. The first 8 of these contain more than one-half of the Nation's older citizens.

In 1950, only New York had more than 1 million aged persons, but by 1960, two more States, California and Pennsylvania, were added to the list of States with 1 million or more persons 65 and older.

#### THE AGED AS A PERCENT OF STATE POPULATION

In the past 40 years, the number of aged persons as a percentage of total population has nearly doubled, from 4.7 percent in 1920 to 9.2 percent in 1960, reflecting the higher rate of increase in absolute numbers of aged persons.

14 POPULATION FACTS ON AGED IN UNITED STATES, 1960

The 9.2 percentage, however, is not constant among all the 50 States. The aged in Alaska make up only 2.4 percent of that State's total population, in sharp contrast to Iowa in which the aged make up 11.9 percent of the State's population.

TABLE XVIII.—*Percent of total population 65 years old and over, by States, 1960, 1950, and 1920*

State	1960	1950	1920	Rate of growth, 1920-60

Total number, all ages.....	179,323,175	150,697,361	105,710,620	-----

It is significant that, while in 1950 there were only 7 States in which the aged constituted 10 percent or more of their total populations, 18 States in 1960 had such large percentages of aged persons, as the following table indicates.

TABLE XIX.—*States with 10 percent or more of total population aged 65 and over, 1960*

State	Percent of population aged 65 and over		State	Percent of population aged 65 and over	
	1960	1950		1960	1950

## 16 POPULATION FACTS ON AGED IN UNITED STATES, 1960

### RATE OF INCREASE IN AGED PROPORTION OF STATES' POPULATIONS

There are six States in which the aged as a proportion of the total State population have multiplied threefold or more since 1920:

Idaho, growing from 2.4 percent in 1920 to 8.7 in 1960, a 262.5 percent increase.

Montana, from 3.0 percent to 9.7 percent, a 223.3-percent increase.

Wyoming, from 2.5 percent to 7.8 percent, a 212.0-percent increase.

North Dakota, from 3.0 percent to 9.3 percent, a 210.0-percent increase.

Oklahoma, from 3.5 percent to 10.7 percent, a 205.7-percent increase.

Arkansas, from 3.6 percent to 10.9 percent, a 202.8-percent increase.

The national rate of increase was 95.7 percent between 1920 and 1960, growing from 4.7 percent to 9.2 percent.

On the other hand, seven States experienced increases in the aged proportions of their populations clearly below the national increase, that is, less than 1½ times the 1920 proportions:

Vermont, from 8.5 in 1920 to 11.2 in 1960, an increase of 31.8 percent.

Maine, from 8.1 to 11.0, an increase of 35.8 percent.

New Hampshire, from 8.0 to 11.2, an increase of 40 percent.

Nevada, from 4.5 to 6.4, an increase of 42.2 percent.

Delaware, from 5.5 to 8.0, an increase of 45.5 percent.

Maryland, from 4.9 to 7.3, an increase of 49.0 percent.

California, from 5.9 to 8.8, an increase of 49.2 percent.

## E. THE AGED AS A PART OF THE STATES' ADULT POPULATION 21 YEARS OLD AND OVER

In the 10 years since 1950, the aged have increased from 12.6 percent of the total population 21 years and over, to 15.4 percent. While the 21-to-64 age group has increased only 6.7 percent in that period of time, the 65-and-over population has grown by 34.7 percent. Table XXI shows the aged as a proportion of the States' adult population. And table XXII shows the percent increase in aged proportions of the 21-and-over population in the last 10 years.

TABLE XXI.—*The aged as a percent of population 21 years and over*

State	Persons 65 years and older as a percent of the population 21 years and older		State	Persons 65 years and older as a percent of the population 21 years and older

## 18 POPULATION FACTS ON AGED IN UNITED STATES, 1960

TABLE XXII.—*Percent change in aged proportions of 21 and over population 1950-60, by States*

United States	<i>Percent</i>	<i>Percent</i>
	22.2	21.4
Alabama	24.6	22.6
Alaska	-26.7	25.7
Arizona	33.0	1.0
Arkansas	38.8	11.0
California	14.5	23.9
Colorado	11.7	15.9
Connecticut	19.5	28.1
Delaware	7.2	25.8
District of Columbia	40.2	26.0
Florida	37.7	14.9
Georgia	19.3	55.0
Hawaii	18.3	Oregon
Idaho	24.8	24.4
Illinois	22.0	Rhode Island
Indiana	13.5	26.7
Iowa	22.4	South Carolina
Kansas	16.7	32.6
Kentucky	23.0	South Dakota
Louisiana	20.7	Tennessee
Maine	13.0	Texas
Maryland	15.0	Utah
Massachusetts	20.5	Vermont
Michigan	24.1	Virginia
Minnesota	25.5	Washington
Mississippi	28.3	West Virginia

Twenty-two States have adult populations with the aged proportions clearly above the national average percentage of 15.4, as can be seen in the following table.

TABLE XXIII.—*States with aged persons 16 percent or more of adult population, 1960*

[Aged as percent of adult population (21 and over)]

Oklahoma	21.7	Minnesota	17.7
Iowa	19.7	Massachusetts	17.6
Nebraska	19.1	Wisconsin	17.1
Vermont	18.9	Oregon	17.1
Missouri	18.7	Montana	16.8
Arkansas	18.6	Kentucky	16.6
Maine	18.3	Rhode Island	16.6
South Dakota	18.3	North Dakota	16.5
Kansas	18.2	Mississippi	16.3
New Hampshire	18.2	Washington	16.2
Florida	17.9	Indiana	16.0

In terms of regions, these 22 above-average States are distributed as follows:

*North Central*.—Nine out of the twelve States in that region: Indiana, Iowa, Kansas, Minnesota, Missouri, Nebraska, North Dakota, South Dakota, and Wisconsin.

*New England*.—Five of the six States: Massachusetts, Maine, New Hampshire, Rhode Island, and Vermont.

*South Central*.—Four of the eight States: Arkansas, Kentucky, Mississippi, and Oklahoma.

*South Atlantic*.—One of the eight States: Florida.

*Mountain*.—One of the eight States: Montana.

*Pacific*.—Two of the three States: Oregon and Washington.

Sixteen States and the District of Columbia in 1960 had 21-and-over populations with the aged proportion clearly below the national average, as shown in table XXIV. Only 4.4 percent of Alaska's adult population was 65 years or older as of the last census, in sharp contrast to the 21.7 percent in the case of Oklahoma, the State with the greatest proportion of aged in its adult population. Considering only the 48 continental States, New Mexico, with 10.2 percent, has the lowest proportion.

TABLE XXIV.—*States with aged persons less than 14 percent of adult population, 1960*

[Aged as percent of adult population (21 and over)]

Alaska	4. 4	Utah	12. 8
Hawaii	8. 4	Georgia	13. 0
New Mexico	10. 2	Delaware	13. 4
Nevada	10. 4	Louisiana	13. 4
South Carolina	11. 9	Texas	13. 5
North Carolina	12. 2	District of Columbia	13. 6
Arizona	12. 3	Wyoming	13. 6
Maryland	12. 3	Michigan	13. 9
Virginia	12. 5		

In terms of regions in the continental United States, these below-average States are distributed as follows:

*North Central*.—One out of the 12 States in that region: Michigan.

*South Central*.—Two of the eight States: Louisiana and Texas.

*South Atlantic*.—Six of the eight States: Delaware, Georgia, Maryland, North Carolina, South Carolina, Virginia, and the District of Columbia.

*Mountain*.—Five of the eight States: Arizona, Nevada, New Mexico, Utah, and Wyoming.

Somewhat paradoxically, these 16 States with the lowest percentages of aged persons in their adult populations have, at the same time, experienced increases in their aged populations above the 1950–60 national growth of 34.7 percent—with the exception of only three States: Alaska, South Carolina, Georgia (and the District of Columbia). The very opposite is true of the 22 States with the highest percentages of aged persons among their adult populations: with the exception of only 2 States, Florida and Oregon, they have experienced increases in the aged population below the 1950–60 national growth of 34.7 percent.

## F. THE AGED IN THE RURAL POPULATION\*

Of the total population 65 years and older, more than 5.3 million live in rural areas, either on farms or in small towns with less than 2,500 population. In other words, one-third of the aged live in rural areas, 8 percent on farms, and nearly 25 percent in nonfarm areas. Ten years ago, the total number of the aged in the rural population was only 4.4 million, with 36 percent of the aged living in rural areas. Therefore, while the number of aged in the rural population has increased by nearly 1 million, the percent of the aged in the rural population has declined slightly.

The aged in the rural population in 1960, both farm and nonfarm, is compared with the total population 40 years and older in table XXV.

TABLE XXV.—*Rural aged population (farm and nonfarm) compared with total population 40 years and older, 1960 (1960 definition)*

[In thousands]

Age and sex	Total persons in age groups, urban and rural		Rural population

Source: U. S. Bureau of the Census Series Census—A.M.S. (p. 27) No. 28, Apr. 17, 1961.

In 1960 a new definition of farm population was adopted as a result of an increasing number of families living in the open country who are not obtaining their livelihood from agriculture. The new definition applies a more restrictive criterion in classifying places as farms. The aged make up 33 percent of the total rural population in terms of both the 1950 and 1960 definitions. Under the 1950 definitions, however, 11 percent of the aged live on farms and 22 percent in nonfarm areas, as of 1960.

\*Based on current population reports. In sec. H, see tables based on 1960 Census using the new urban-rural definitions.

The use of the two definitions also makes a difference in the data on the aged as a percentage of the rural population as seen in table XXVI.

TABLE XXVI.—*1960 rural population by age and aged in rural population, by percent, 1960 and 1950*

Age and year	Farm	Nonfarm	Total rural
1960 definition: Total, 1960.....	100.0	100.0	100.0
Under 14 years.....	31.9	34.0	33.5
14 to 64 years.....	59.6	58.5	58.8
65 years and over.....	8.5	7.5	7.7
1950 definition: 65 years and over, 1950.....	7.5	8.6	8.2
65 years and over, 1960.....	9.1	7.1	7.6

Under the older definition, the aged represent a higher percentage of the farm population in 1960 than they did in 1950. Using the same definition, while the aged as a percentage of nonfarm population has decreased in 10 years, there is an overall increase in the aged as a part of the total rural population.

The important point to be recalled is that over 5 million people aged 65 and over live in rural areas—33 percent of the aged population. This is not an insignificant statistic since an overall shortage of medical facilities and personnel and other community programs is most frequently present in the rural areas of the Nation.

The ratio of aged women per 100 aged men in rural areas is less than for the total population. Nationally, there are 121 aged women for every 100 aged men; in rural areas, there are 108 aged women for every 100 aged men. In the farm areas, there are only 84 aged women for every 100 aged men. This is the only major segment of the aged population in which men outnumber women.

TABLE XXVII.—*Number of aged women for every 100 aged men in the rural population, 1960 and 1950*

Age and year	Farm	Nonfarm	Total rural
1960 definition, 1960: 65 years and over.....	84	117	108
65 to 69 years.....	88	109	103
70 years and over.....	83	122	111
1950 definition: 65 years and over, 1950.....	78	102	92
65 years and over, 1960.....	89	119	93

There is a considerable difference in the ratio of men to women in the total rural population depending on whether the 1960 or the 1950 farm population definition is used. The generalization holds true, however, that there are more men than women on the farms, while in the nonfarm areas in 1960—regardless of definition—the ratio is close to the national ratio.

## G. THE AGED IN THE LABOR FORCE

The U.S. Department of Labor counts 3.3 million persons 65 years and over as part of the total labor force. This means that one-fifth of the aged are in the labor force, compared with one-third in 1920 and slightly more than one-fourth in 1950. The percentage decline of the aged in the labor force is a long-term development as seen below.

TABLE XXVIII.—*Percentage of aged 65 and over in the labor force, male and female, 1890–1960*

Year	Total	Male	Female	Year	Total	Male	Female
1890.....	39.9	70.0	8.5	1940.....	22.4	43.3	6.7
1900.....	37.4	64.9	9.3	1950.....	26.3	45.0	9.5
1920.....	32.8	57.1	8.2	1960.....	20.0	33.6	11.2
1930.....	31.4	55.5	8.2				

These trends reveal that the labor force participation rate among aged men has been reduced by more than half and that the rate among aged women increased somewhat since 1890.

The 1940–50 increase reflects the general increase in labor demand during the war period.

A comparison of the aged in the labor force as of March 1961 and March 1951 appears in table XXIX.

TABLE XXIX.—*Summary of employment status of persons 65 years and over, March 1961 and March 1951*

[In thousands]

Employment status	March 1961		March 1951		Change, 1961 over 1951	
	Number	Percent	Number	Percent	Number	Percent
Total.....	3,306	100.0	3,023	100.0	+283	+9.4
Employed in nonagricultural industries.....	2,566	77.6	2,248	74.4	+318	+14.1
Employed in agriculture.....	559	17.0	629	20.8	-70	-11.1
Unemployed.....	181	5.4	146	4.8	-35	-24.0

Sources: USDL "Employment and Earnings," April 1961 and Bureau of the Census, "Current Population Reports," Labor Force, Series P 50, No. 40.

The rate of unemployment among the aged in the labor force has increased from 4.8 to 5.4 percent since 1951.

While the number of aged has increased 34.7 percent and their labor force participation rate has decreased 6.3 percent in 10 years, the absolute number of aged in the labor force has increased 9.4 percent in 10 years. Employment in agricultural industries has actually declined by 11 percent, however.

Of the persons 65 years and over who are employed, more than a third work part time (less than 35 hours per week). Slightly more than one-fourth work more than 40 hours per week.

TABLE XXXI.—*Full- and part-time employment of persons 65 years and older, 1960*

Hours worked per week:	Percent
Total employed	100.0
1 to 34 hours	34.6
35 to 40 hours	38.1
41 hours or more	27.3

Of the aged in the 1961 labor force, 2.3 million are men and 965,000 are women. The employment status of aged men and women is given in tables XXX and XXXI.

TABLE XXX.—*Employment status of aged men, March 1961*

## 24 POPULATION FACTS ON AGED IN UNITED STATES, 1960

Over 32 percent of the unemployed workers 65 years and older experienced unemployment of 27 weeks or longer. Of the other age groups the next highest percentage was among persons 45 to 64 years of whom 17.6 percent were unemployed more than half a year. The average for all ages was 15 percent unemployed 27 weeks or longer.

Both of the two oldest age groups had a large percentage unemployed for two or more spells.

TABLE XXXII.—*Extent of unemployment among older workers, 1959*

Weeks of unemployment	Percent of the unemployed	
	45 to 64 years	65 years and over
Total.....	100.0	100.0
1 to 4 weeks.....	24.5	20.3
5 to 10 weeks.....	20.8	14.6
11 to 14 weeks.....	14.6	11.4
15 to 26 weeks.....	22.5	21.4
27 weeks or more.....	17.6	32.4
Percent of unemployed with 2 or more spells of unemployment.....	46.5	46.3

## POPULATION FACTS ON AGED IN UNITED STATES, 1960 51

 TABLE 15.—*Percent distribution of State's population aged 65 and over by size of area of residence, Apr. 1, 1960, by State in order of rank in relation to U.S. averages*

Category and State	Urban			Rural		
	Total	Urban-	Other	Total	Places	Other
		ized	urban		to	
Average, 51 States.....	69.6	51.2	18.4	30.4	4.8	25.6
1. Larger percentage of persons 65 and over in urban areas than U.S. average, and						
(a) Larger percentage than U.S. average in both "Urbanized areas" and "Other urban":						
Florida.....	78.6	58.1	20.5	21.4	3.4	17.9
Colorado.....	75.1	54.4	20.6	24.9	5.2	19.7
Hawaii.....	73.8	52.9	20.9	26.2	6.7	19.4
(b) Larger percentage than U.S. average in "Urbanized areas" but not in "Other urban":						
District of Columbia.....	100.0	100.0	-----	-----	-----	-----
Rhode Island.....	89.0	76.3	12.7	11.0	0.9	10.1
New Jersey.....	88.3	77.8	10.5	11.7	2.0	9.7
California.....	87.3	76.2	11.1	12.7	1.8	10.9
Massachusetts.....	86.4	77.3	9.1	13.6	2.3	11.3
New York.....	85.7	75.5	10.2	14.3	2.3	12.0
Connecticut.....	81.0	64.9	16.2	19.0	2.4	16.6
Arizona.....	78.6	64.7	14.0	21.4	3.5	17.9
Illinois.....	77.9	60.5	17.4	22.1	5.0	17.1
Utah.....	75.8	61.6	14.1	24.2	8.0	16.2
Ohio.....	74.0	56.6	17.4	26.0	3.7	22.4
Pennsylvania.....	73.7	57.4	16.3	26.3	4.5	21.8
Nevada.....	71.2	54.8	16.5	28.8	5.7	23.1
Maryland.....	71.0	60.1	10.9	29.0	3.1	25.9
Michigan.....	70.7	56.8	13.8	29.3	4.4	24.9
(c) Larger percentage than U.S. average in "Other urban" but not in "Urbanized areas":						
Washington.....	71.2	48.6	22.6	28.5	4.9	23.9
2. Larger percentage of persons 65 and over in rural areas than U.S. average, and						
(a) Larger percentage than U.S. average in both "Places of 1,000 to 2,500" and "Other rural":						
North Dakota.....	33.8	7.2	26.6	66.2	17.1	49.2
Mississippi.....	34.8	4.6	30.2	65.2	6.4	58.8
South Dakota.....	37.8	8.5	29.3	62.2	12.5	49.7
North Carolina.....	39.0	16.3	22.7	61.0	6.3	54.7
Vermont.....	39.4	-----	39.4	60.6	12.7	47.9
Alaska.....	39.9	-----	39.9	60.1	13.9	46.2
South Carolina.....	41.9	17.2	24.6	68.1	7.2	50.9
West Virginia.....	41.9	19.3	22.6	58.1	8.6	49.6
Arkansas.....	42.1	13.4	28.7	57.9	6.6	51.3
Kentucky.....	45.9	27.1	18.8	54.1	5.3	48.8
Nebraska.....	50.6	27.0	23.6	49.4	12.2	37.2
Montana.....	51.5	14.4	37.1	48.5	11.9	36.6
Maine.....	51.9	19.9	32.1	48.1	8.6	39.5
Idaho.....	52.5	-----	52.5	47.5	9.5	38.1
Georgia.....	53.4	31.0	22.4	46.6	5.7	40.9
Iowa.....	53.7	23.3	30.4	46.3	11.2	35.0
Kansas.....	54.6	22.2	32.3	45.4	10.1	35.3
New Hampshire.....	56.6	15.4	41.1	43.4	9.0	34.4
Oklahoma.....	58.3	23.3	34.9	41.7	9.0	32.8
Wyoming.....	60.1	-----	60.1	39.9	9.2	30.7
Indiana.....	60.8	35.0	25.9	39.2	5.6	33.6
Minnesota.....	61.3	40.5	20.8	38.7	8.5	30.2
Wisconsin.....	61.6	34.9	26.7	38.4	7.0	31.4
Missouri.....	62.5	44.8	17.6	37.5	6.2	31.4
